August 6, 1980

Highlights

52139 **Strategic Petroleum Reserve** Executive Order

52287 **Grant Programs—Energy** NRC announces proposed availability of FY 1981 funds for financial assistance to enhance technology advancement of nuclear energy safety; apply from 10–1–80 to 9–30–81

52295 **Grant Programs—Refugees** HHS/Sec'y gives notice of grants to assist non-profit refugee Mutual Assistance Association in providing services to persons legally admitted as refugees; apply by 9–8–80

52296 **Medicare** HHS/HCFA gives notice of ruling to discontinue medicare coverage of heart transplant procedures; effective 6–13–80

52144 **Credit** FRS amends regulations regarding extension of credit by Federal Reserve Banks

52173 **Real Estate** FHLBB publishes revisions of real estate lending regulations; comments by 10–6–80

52195 **Fuel** DOE gives notice of alternative fuel production financial assistance; effective 7–29–80

52143 **Aliens** Justice/INS publishes regulations regarding registration and fingerprinting of aliens in the United States; effective 8–5–80

CONTINUED INSIDE

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The Federal Register provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The Federal Register will be furnished by mail to subscribers, free of postage, for $75.00 per year, or $45.00 for six months, payable in advance. The charge for individual copies is $1.00 for each issue, or $1.00 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the Federal Register.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Highlights

52342 **Credit** USDA/CCC proposes intermediate credit export sales program for foreign market development facilities; comments by 9–5–80 (Part VII of this issue)

52177 **Securities** FHLBB publishes proposal regarding investment in consumer loans, commercial paper and corporate debt securities; comments by 10–6–80

52297 **Health Care** HHS/PHS announces scientific evaluation of clinical safety and effectiveness of electrical stimulation for treatment of facial nerve palsy

52326 **Accreditation** Commerce/Sec'y requests comments by 10–6–80 on preliminary finding of need to accredit laboratories that provide electromagnetic calibration services (Part IV of this issue)

52145 **Cadets** DOD/AF amends regulations regarding enlistment and discharge of AFROTC cadets; effective 7–15–80

52306 **Surface Mining** Interior/SMO amends bond and insurance requirements for surface coal mining and reclamation operations; effective 8–6–80 (Part III of this issue)

52151 **Telephone** FCC publishes regulations regarding connection of terminal equipment to the telephone network

52166 **Improving Government Regulations** Treasury/Comptroller publishes semiannual agenda regulations

52149 **Radio** FCC publishes regulations regarding applicants filing applications in the Domestic Public Land Mobile Radio Service must demonstrate interference free operation; effective 9–8–80

52284 **Privacy Act Document** Justice

52299 **Sunshine Act Meetings**

Separate Parts of This Issue

52303 **Part II, Interior/BLM**
52306 **Part III, Interior/SMREO**
52326 **Part IV, Commerce/Sec'y**
52332 **Part V, USDA/FGIS**
52339 **Part VI, USDA/FGIS**
52342 **Part VII, USDA/CCC**

The President
EXECUTIVE ORDERS
52139 Petroleum Reserve, Strategic (EO 12231)

EXECUTIVE AGENCIES

Agency for International Development
NOTICES
Authority delegations:
52261 Asia, Mission Directors, et al.; contracting functions

Aging, Federal Council
NOTICES
52188 Meetings

Agricultural Marketing Service
RULES
52143 Celery grown in Fla.
52141 Onions grown in Idaho and Oreg.
52141 Potatoes (Irish) grown in Wash.

Agriculture Department
See Agricultural Marketing Service; Commodity Credit Corporation; Federal Grain Inspection Service; Forest Service; Soil Conservation Service.

Air Force Department
RULES
Military personnel:
52145 ROTC Cadets; enlistment and discharge requirements, policies, and procedures

Antitrust Division
NOTICES
Competitive impact statements and proposed consent judgments:
52260 Ashland Oil, Inc., et al.

Civil Aeronautics Board
NOTICES
Hearings, etc.:
52189 El Dorado/Camden, Ark., essential air service

Commerce Department
See also Foreign-Trade Zones Board; National Technical Information Service.
NOTICES
Laboratory Accreditation Program, National Voluntary:
52326 Electromagnetic calibration services

Commodity Credit Corporation
PROPOSED RULES
52342 Foreign market development facilities; intermediate credit export sales program

Commodity Futures Trading Commission
NOTICES
Futures contracts, proposed; availability:
52192 New Orleans Commodity Exchange
52299 Meetings; Sunshine Act

Comptroller of Currency
PROPOSED RULES
Improving Government regulations:
52166 Regulatory agenda

Defense Department
See Air Force Department; Engineers Corps.

Drug Enforcement Administration
NOTICES
Schedules of controlled substances; production quotas:
52286 Schedules I and II, 1981 aggregate

Economic Regulatory Administration
NOTICES
Consent orders:
52195 Field Oil Co.
Energy Supply and Environmental Coordination Act; prohibition orders, rescissions, etc.:
52196 International Paper Co.
Natural gas; fuel oil displacement certification applications:
52198 Arizona Public Service Co.
52199 International Harvester Co.

Education Department
NOTICES
Meetings:
52194 Adult Education National Advisory Council

Energy Department
See also Economic Regulatory Administration; Federal Energy Regulatory Commission.
NOTICES
52195 Alternative fuels; feasibility studies and cooperative agreements
Meetings:
52195 Tar sands definitional workshop

Engineers Corps
NOTICES
Environmental statements; availability, etc.:
52193 Central and South Florida Canal 18, Jupiter Inlet and Loxahatchee River Study
52192 Cowanesque Reservoir, Tioga County, Pa.; flood control storage to water supply storage
52194 Delta Pumping Plant, Tracy, Calif.; additional pumps

Environmental Protection Agency
RULES
Air quality implementation plans; approval and promulgation; various States, etc.:
52148 Texas
Waste management, solid:

Title 3—

The President

Executive Order 12231 of August 4, 1980

Strategic Petroleum Reserve

By the authority vested in me as President of the United States of America by Title VIII of the Energy Security Act (Public Law 96–294) and by Section 301 of Title 3 of the United States Code, and in order to meet the goals and requirements for the strategic petroleum reserve, it is hereby ordered as follows:

1–101. The functions vested in the President by Section 160(c) of the Energy Policy and Conservation Act, as amended, are delegated to the Secretary of Energy (42 U.S.C. 6240(c); see Section 801 of the Energy Security Act).

1–102. The functions vested in the President by Section 7430(k) of Title 10 of the United States Code are delegated to the Secretary of Energy (see Section 804(b) of the Energy Security Act).

1–103. The functions vested in the President by Section 805(a) of the Energy Security Act are, consistent with Section 2 of Executive Order No. 11790, as amended, delegated to the Secretary of Energy.

Jimmy Carter

THE WHITE HOUSE,

Rules and Regulations

Federal Register
Vol. 45, No. 153
Wednesday, August 6, 1980

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 946

Irish Potatoes Grown in Washington; Expenses and Rate of Assessment

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation authorizes expenses for the functioning of the State of Washington Potato Committee. It enables the committee to collect assessments from first handlers on assessable potatoes and to use the resulting funds for its expenses.

EFFECTIVE DATE: July 1, 1980.

FOR FURTHER INFORMATION CONTACT: Charles W. Porter, Chief, Vegetable Branch, Fruit and Vegetable Division, AMS, U.S. Department of Agriculture, Washington, D.C. 20250 (202) 447–2615. The Final Impact Statement relating to this rule is available upon request from Mr. Porter.

SUPPLEMENTARY INFORMATION: *Findings.* This final action has been reviewed under USDA procedures established in Secretary's Memorandum 1955 to implement Executive Order 12044, and has been classified "not significant."

Pursuant to Marketing Order No. 946, as amended (7 CFR Part 946), regulating the handling of potatoes grown in Washington, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon other information, it is found that the expenses and rate of assessment which follows will tend to effectuate the declared policy of the act.

It is further found that it is impracticable and contrary to the public interest to provide 60 days for interested persons to file comments or to engage in public rulemaking procedure, and that good cause exists for not postponing the effective date of this section until 30 days after publication in the **Federal Register** (5 U.S.C. 553) because the order requires that the rate of assessment for a particular fiscal period shall apply to all assessable potatoes from the beginning of such period. Handlers and other interested persons were given an opportunity to submit information and views on the expenses and assessment rate at an open public meeting of the committee, held July 8, 1980, in Moses Lake, Washington. To effectuate the declared purposes of the act it is necessary to make these provisions effective as specified.

7 CFR Part 946 is amended by adding a new § 946.233 as follows:

§ 946.233 Expenses and rate of assessment.

(a) The reasonable expenses that are likely to be incurred during the fiscal period ending June 30, 1981, by the State of Washington Potato Committee for its maintenance and functioning, and for such other purposes as the Secretary determines to be appropriate will amount to $19,150.

(b) The rate of assessment to be paid by each handler in accordance with this part shall be $0.003 per hundredweight, or equivalent quantity, of assessable potatoes handled by him as the first handler during the fiscal period, except that potatoes for livestock feed, charity, seed, canning, freezing and "other processing" as defined in the act shall be exempt.

(c) Unexpended income in excess of expenses for the fiscal period may be carried over as a reserve to the extent authorized in § 946.42(a).

(d) Terms used in this section shall have the same meaning as when used in the marketing agreement and this part.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: July 31, 1960.

D. S. Kuryloski,

Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc. 80-23633 Filed 8-5-80; 8:45 am]

BILLING CODE 3410-02-M

7 CFR Part 958

Onions Grown in Certain Designated Counties in Idaho and Malheur County, Oreg.; Handling Regulation

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation requires fresh market shipments of onions grown in certain designated counties in Idaho and Malheur County, Oregon, to be inspected and meet minimum quality and size requirements. The regulation should promote orderly marketing of such onions and keep less desirable qualities and sizes from being shipped to consumers.

EFFECTIVE DATE: August 6, 1980.

FOR FURTHER INFORMATION CONTACT: Charles W. Porter, Chief, Vegetable Branch, Fruit and Vegetable Division, AMS, U.S. Department of Agriculture, Washington, D.C. 20250 (202) 447–2615. The Final Impact Statement relative to this final rule is available on request from the above named individual.

SUPPLEMENTARY INFORMATION: This final action has been reviewed under USDA procedures established in Secretary's Memorandum 1955 to implement Executive Order 12044 and has been classified "not significant."

Marketing Agreement No. 130 and Order No. 958, both as amended (7 CFR Part 958), regulate the handling of onions grown in certain designated counties in Idaho and Malheur County, Oregon. It is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The Idaho-Eastern Oregon Onion Committee, established under the order, is responsible for its local administration.

Notice of rulemaking was published in the July 16, 1980, **Federal Register** (45 FR 47692). The notice afforded interested persons through July 31, 1980, to file written data, views or arguments pertaining to that proposal. None was filed.

This regulation is based upon unanimous recommendations made by the committee at its public meeting in Ontario, Oregon, on June 19, 1980. The recommendations of the committee reflect its appraisal of the composition of the 1980 crop of Idaho-Eastern Oregon onions and the marketing prospects for this season and are

consistent with the marketing policy it adopted. Harvesting of onions is expected to begin about August 1.

The grade, size, pack, maturity and inspection requirements specified herein are necessary to prevent onions of low quality or less desirable sizes from being distributed in fresh market channels. They also provide consumers with good quality onions consistent with the overall quality of the crop, and maximize returns to producers for the preferred quality and sizes.

Exceptions are specified to certain of these requirements to recognize special situations in which such requirements are inappropriate or unreasonable. Shipments are allowed to certain special purpose outlets without regard to the grade, size, maturity, pack and inspection requirements, provided that safeguards are met to prevent such onions from reaching unauthorized outlets.

Special purpose shipments are allowed for planting, livestock feed, charity, dehydration, extraction and pickling since such shipments normally do not enter the commercial fresh market channels and no useful purpose is saved by regulating such shipments. Onions for canning and freezing are exempt under the legislative authority for this part.

Findings. After consideration of all relevant matters, including the proposal in the notice, it is found that the handling regulation will tend to effectuate the declared policy of the act.

It is further found that good cause exists for not postponing the effective date of this regulation until 30 days after its publication in the **Federal Register** (5 U.S.C. 553) in that (1) shipments of onions grown in the production area will begin on or about the effective date specified herein, (2) to maximize benefits to producers, this regulation should apply to as many shipments as possible during the marketing season, (3) notice of the regulation was published in the **Federal Register** of July 16, 1980, and information regarding its provisions, which are similar to those in effect during the previous season, has been made available to producers and handlers in the production area, and (4) compliance with this regulation will not require any special preparation by handlers which cannot be completed by the effective date.

7 CFR Part 958 is amended by adding a new § 958.325 as follows:

§ 958.325 Handling regulation.

During the period August 6, 1980, through April 30, 1981, no person may handle any lot of onions, except braided red onions, unless such onions are at least "moderately cured," as defined in paragraph (f) of this section, and meet the requirements of paragraphs (a) and (b) of this section, or unless such onions are handled in accordance with paragraphs (c) and (d), or (e) of this section.

(a) *Grade and size requirements.* (1) *White varieties.* Shall be either:

(i) U.S. No. 2, 1 inch minimum to 2 inches maximum diameter; or

(ii) U.S. No. 2, if not more than 30 percent of the lot is comprised of onions of U.S. No. 1 quality, and at least 1½ inches minimum diameter; or

(iii) U.S. No. 1, at least 1½ inches minimum diameter.

However, none of these three categories of onions may be commingled in the same bag or other container.

(2) *Red varieties.* U.S. No. 2 or better grade, at least 1½ inches minimum diameter.

(3) *All other varieties.* Shall be either:

(i) U.S. No. 2 grade, at least 3 inches minimum diameter, if not more than 30 percent of the lot is comprised of onions of U.S. No. 1 quality; or

(ii) U.S. No. 1, 1½ inches minimum to 2¼ inches maximum diameter; or

(iii) U.S. No. 1, at least 2¼ inches minimum diameter.

However, none of these three categories of onions may be commingled in the same bag or other container.

(b) *Inspection.* No handler may handle any onions regulated hereunder unless such onions are inspected by the Federal-State Inspection Service and are covered by a valid applicable inspection certificate, except when relieved of such requirement pursuant to paragraphs (c) or (e) of this section.

(c) *Special purpose shipments.* The minimum grade, size, maturity and inspection requirements of this section shall not be applicable to shipments of onions for any of the following purposes:

(1) Planting; (2) livestock feed; (3) charity; (4) dehydration; (5) canning; (6) freezing; (7) extraction; and (8) pickling.

(d) *Safeguards.* Each handler making shipments of onions for dehydration, canning, freezing, extraction or pickling pursuant to paragraph (c) of this section shall:

(1) First apply to the committee for and obtain a Certificate of Privilege to make such shipments;

(2) Prepare, on forms furnished by the committee, a report in quadruplicate on each individual shipment to such outlets authorized in paragraph (c) of this section;

(3) Bill or consign each shipment directly to the applicable processor; and

(4) Forward one copy of such report to the committee office and two copies to the processor for signing and returning one copy to the committee office. Failure of the handler or processor to report such shipments by promptly signing and returning the applicable report to the committee office may be cause for cancellation of such handler's Certificate of Privilege and/or the processor's eligibility to recieve further shipments pursuant to such Certificate of Privilege. Upon cancellation of any such Certificate of Privilege the handler may appeal to the committee for reconsideration.

(e) *Minimum quantity exemption.* Each handler may ship up to, but not to exceed, one ton of onions each day without regard to the inspection and assessment requirements of this part, if such onions meet minimum grade, size, and maturity requirements of this section. This exception shall not apply to any portion of a shipment that exceeds one ton of onions.

(f) *Definitions.* The terms "U.S. No. 1" and "U.S. No. 2" have the same meaning as defined in the United States Standards for Grades of Onions (Other Than Bermuda-Granex-Grano and Creole Types), as amended (7 CFR 2851.2830–2851.2854), or the United States Standards for Grades of Bermuda-Granex-Grano Type Onions (7 CFR 2851.3195–2851.3209), whichever is applicable to the particular variety, or variations thereof specified in this section. The term "braided red onions" means onions of red varieties with tops braided (interlaced). The term "moderately cured" means the onions are mature and are more nearly well cured than fairly well cured. Other terms used in this section have the same meaning as when used in Marketing Agreement No. 130 and this part.

(g) *Applicability to imports.* Pursuant to § 8e of the act and § 980.117 "*Import regulations; onions*" (43 FR 5499); onions imported during the effective period of this section shall meet the grade, size, quality and maturity requirements specified in the introductory paragraph and paragraph (a) of this section.

(Secs. 1–19, 48 stat. 31, as amended; 7 U.S.C. 601–674)

Dated, August 1, 1980, to become effective August 6, 1980.

D. S. Kuryloski,

Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

BILLING CODE 3410-02-M

7 CFR Part 967

Celery Grown in Florida; Handling Regulation

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This handling regulation establishes the quantity of Florida celery to be marketed fresh during the 1980–81 season, with the objective of assuring adequate supplies and orderly marketing.

EFFECTIVE DATE: August 6, 1980.

FOR FURTHER INFORMATION CONTACT: Charles W. Porter (202) 447–2615.

SUPPLEMENTARY INFORMATION: This action is consistent with the marketing policy for 1980–81 which was designated "significant" under the procedures of Executive Order 12044.

The marketing policy and regulation were unanimously recommended by the Florida Celery Committee following discussion at a public meeting at Orlando on June 11, 1980. A final impact analysis on the marketing policy is available from Charles W. Porter, Chief, Vegetable Branch, Fruit and Vegetable Division, AMS, USDA, Washington, D.C. 20250 (202) 447–2615.

Marketing Agreement No. 149 and Order No. 967, both as amended (7 CFR 967) regulate the handling of celery grown in Florida. It is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The Florida Celery Committee, established under the order, is responsible for local administration.

The committee recommended a Marketable Quantity of 8,601,309 crates of fresh celery for the 1980–81 season. This is based on the appraisal of the expected supply and prospective market demand.

Notice of the proposed regulation was published in the July 16 **Federal Register** (45 FR 47693) inviting written comments by July 31, 1980. None was received.

The 8.6 million crate Marketable Quantity is ten percent more than the approximately 7.8 million crates expected to be marketed fresh during the season which ended July 31, 1980. Each producer registered pursuant to § 967.37(f) will have an allotment equal to 100 percent of his historical marketings. This regulation provides the industry an opportunity to (1) produce to its fullest capacity for the benefit of the consumer, and (2) determine its actual or potential maximum production capacity.

As required by § 967.37(d)(1) a reserve of six percent of the 1980–81 total Base Quantities is authorized for new producers and for increases by existing producers, with 277,700 crates to be allotted to each category. One producer submitted an application for 30,000 crates additional Base Quantities for use during the upcoming season and it was approved.

To maximize the benefits of orderly marketing the regulation should become effective as early as possible in August, when the marketing year begins. Interested persons were given an opportunity to comment on the proposal at an open public meeting on June 11, where it was unanimously recommended by the committee. This regulation is similar to ones in effect for past seasons.

Findings. On the basis of all considerations it is believed that this regulation will tend to effectuate the declared policy of the act.

It is hereby further found that good cause exists for not postponing the effective date of this section until 30 days after publication in the **Federal Register** (5 U.S.C. 553) in that (1) notice was given of the handling regulation set forth in this section through publicity in the production area and by publication in the July 16 **Federal Register**, (2) as provided in the marketing agreement and order, this regulation applies to celery marketed during the 1980–81 season, (3) compliance with this section will not require any special preparation by handlers which cannot be completed prior to the time actual handling of harvested celery begins, approximately the latter part of October, (4) prompt issuance of this regulation will be beneficial to all interested persons because it should afford producers and handlers maximim time to plan their operations accordingly, and (5) no useful purpose will be served by postponing such issuance.

7 CFR Part 967 is amended by adding a new § 967.316 as follows:

§ 967.316 Handling regulation; marketable quantity; and uniform percentage for the 1980–81 season ending July 31, 1981.

(a) The Marketable Quantity is established under § 967.36(a) as 8,601,309 crates of celery.

(b) As provided in § 967.38(a), the Uniform Percentage shall be 100 percent.

(c) Pursuant to § 967.36(b), no handler shall handle any harvested celery unless it is within the Marketable Allotment of a producer who has a Base Quantity and such producer authorizes the first handler thereof to handle it.

(d) As required by § 967.37(d)(1) a reserve of six percent of the total Base Quantities is hereby authorized for (1) new producers and (2) increases for existing Base Quantity holders with 277,700 crates allotted to each category.

(e) Terms used herein shall have the same meaning as when used in the said marketing agreement and order.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: August 1, 1980, to become effective August 6, 1980.

D. S. Kuryloski,

Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

BILLING CODE 3410-02-M

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

8 CFR Part 264

Registration and Fingerprinting of Aliens in the United States; Reference to Form I-551

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Final rule.

SUMMARY: This document amends two sections of the regulations of the Immigration and Naturalization Service to include reference to the new Alien Registration Receipt Card, Form I-551. The amendments are necessary because the Service now issues Form I-551 as the alien registration document to aliens entitled to evidence of alien registration. The amendments are intended to update the Service's regulations.

EFFECTIVE DATE: August 5, 1980.

FOR FURTHER INFORMATION CONTACT: Stanley J. Kieszkiel, Acting Instructions Officer, Immigration and Naturalization Service, 425 Eye Street, NW., Washington, D.C. 20536. Telephone: (202) 633–3048.

SUPPLEMENTARY INFORMATION: In order to include reference to the Alien Registration Receipt Card now issued on Form I–551, the following amendments are hereby prescribed to Chapter I of Title 8 of the Code of Federal Regulations:

§ 264.1 [Amended]

In § 264.1 paragraphs (f) and (g) are amended by changing all references to "I–151" to read "I–551".

* * * * *

(Sec. 103, 221, 261–265 (8 U.S.C. 1103, 1201, 1301–1305))

These amendments are published pursuant to section 552 of Title 5 of the United States Code (80 Stat. 3838), as amended by Pub. L. 93–502 (88 Stat. 1561), and the authority contained in

V 45 / 153 AUG 6 80 UMI

section 103 of the Immigration and Nationality Act (8 U.S.C. 1103), 28 CFR 0.105(b), and 8 CFR 2.1. Compliance with the provisions of section 553 of Title 5 of the United States Code as to notice of proposed rule making and delayed effective date is unnecessary in this instance because the amendments contained in this order are editorial in nature, and up-date Service practice and procedure regarding the new Alien Registration Receipt Card in current use.

Effective date. These amendments become effective on August 5, 1980.

Dated: July 30, 1980.

David Crosland,

Acting Commissioner of Immigration and Naturalization.

[FR Doc. 80-23635 Filed 8-5-80; 8:45 am]

BILLING CODE 4410-10-M

FEDERAL RESERVE SYSTEM

12 CFR Part 201

Changes in Discount Rates

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: The Board of Governors has amended its Regulation A, "Extensions of Credit By Federal Reserve Banks," for the purpose of adjusting discount rates with a view to accommodating commerce and business in accordance with other related rates and the general credit situation of the country.

EFFECTIVE DATE: The changes were effective on the dates specified below.

FOR FURTHER INFORMATION CONTACT: Theodore E. Allison, Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 (202/452-3257).

SUPPLMENTARY INFORMATION: Pursuant to the authority of 5 U.S.C. Sec. 553 (b)(3)(B) and (d)(3), these amendments are being published without prior general notice of proposed rulemaking, public participation, or deferred effective date. The Board has for good cause found that current economic and financial considerations required that these amendments must be adopted immediately.

Pursuant to section 14[d] of the Federal Reserve Act (12 U.S.C. 357), Part 201 is amended as set forth below:

1. Section 201.51 is revised to read as follows:

§ 201.51 Advances and discounts for member banks under sections 13 and 13a.

The rates for all advances and discounts under sections 13 and 13a of the Federal Reserve Act (except advances under the last paragraph of such section 13 to individuals, partnerships, or corporations other than member banks) are:

Federal Reserve Bank of	Rate	Effective
Boston	10	July 29, 1980.
New York	10	July 28, 1980.
Philadelphia	10	July 29, 1980.
Cleveland	10	July 28, 1980.
Richmond	10	July 28, 1980.
Atlanta	10	July 28, 1980.
Chicago	10	July 28, 1980.
St. Louis	10	July 28, 1980.
Minneapolis	10	July 28, 1980.
Kansas City	10	July 28, 1980.
Dallas	10	July 28, 1980.
San Francisco	10	July 28, 1980.

2. Section 201.52 is revised to read as follows:

§ 201.52 Advances to member banks under section 10(b).

(a) The rates for advances to member banks under section 10(b) of the Federal Reserve Act are:

Federal Reserve Bank of	Rate	Effective
Boston	10½	July 29, 1980.
New York	10½	July 28, 1980.
Philadelphia	10½	July 29, 1980.
Cleveland	10½	July 28, 1980.
Richmond	10½	July 28, 1980.
Atlanta	10½	July 28, 1980.
Chicago	10½	July 28, 1980.
St. Louis	10½	July 28, 1980.
Minneapolis	10½	July 28, 1980.
Kansas City	10½	July 28, 1980.
Dallas	10½	July 28, 1980.
San Francisco	10½	July 28, 1980.

(b) The rates for advances to member banks for prolonged periods and significant amounts under section 10(b) of the Federal Reserve Act and § 201.2(e)(2) of Regulation A are:

Federal Reserve Bank of	Rate	Effective
Boston	11	July 29, 1980.
New York	11	July 28, 1980.
Philadelphia	11	July 29, 1980.
Cleveland	11	July 28, 1980.
Richmond	11	July 28, 1980.
Atlanta	11	July 28, 1980.
Chicago	11	July 28, 1980.
St. Louis	11	July 28, 1980.
Minneapolis	11	July 28, 1980.
Kansas City	11	July 28, 1980.
Dallas	11	July 28, 1980.
San Francisco	11	July 28, 1980.

3. Section 201.53 is revised to read as follows:

§ 201.53 Advances to persons other than member banks.

The rates for advances under the last paragraph of section 13 of the Federal Reserve Act to individuals, partnerships, or corporations other than member banks secured by direct obligations of, or obligations fully guaranteed as to principal and interest by, the United States or any agency thereof are:

Federal Reserve Bank of	Rate	Effective
Boston	13	July 29, 1980.
New York	13	July 28, 1980.
Philadelphia	13	July 29, 1980.
Cleveland	13	July 28, 1980.
Richmond	13	July 28, 1980.
Atlanta	13	July 28, 1980.
Chicago	13	July 28, 1980.
St. Louis	13	July 28, 1980.
Minneapolis	13	July 28, 1980.
Kansas City	13	July 28, 1980.
Dallas	13	July 28, 1980.
San Francisco	13	July 28, 1980.

(12 U.S.C. 248(i). Interprets or applies 12 U.S.C. 357)

By order of the Board of Governors, July 30, 1980.

Griffith L. Garwood,

Deputy Secretary of the Board.

Delegation of Authority To Approve Certain Expenditures of the U.S. Marshals Service

AGENCY: Department of Justice.

ACTION: Final rule.

SUMMARY: Title 28, United States Code, Section 567, provides that, under regulations prescribed by the Attorney General, each United States Marshal shall be allowed: (1) his actual and necessary office expenses; (2) the expense of transporting prisoners, including the cost of necessary guards and the travel and subsistence expense of prisoners and guards; and (3) other necessary expenditures in the line of duty, approved by the Attorney General. This order delegates the authority to approve "other necessary expenditures in the line of duty" to the Director, United States Marshals Service.

EFFECTIVE DATE: July 28, 1980.

FOR FURTHER INFORMATION CONTACT: Gilbert Leigh, Director, Finance Staff, Justice Management Division, Department of Justice, Washington, D.C. 20530 (202-633-2728).

By virtue of the authority vested in me by 28 U.S.C. §§ 509, 510 and 567, and 5 U.S.C. § 301, Title 28, Code of Federal Regulations is amended as follows:

PART 0—ORGANIZATION OF THE DEPARTMENT

1. A new subsection (p), to read as follows, is added to § 0.111:

§ 0.111 General functions.

* * * * * *

(p) Approval of "other necessary expenditures in the line of duty" of U.S. Marshals and Deputy U.S. Marshals under 28 U.S.C. 567(3).

2. Section 0.113 is amended to read as follows:

§ 0.113 Redelegation of authority.

The Director, U.S. Marshals Service, is authorized to redelegate to any of his subordinates any of the powers and functions vested in him by this subpart, except that the authority to approve "other necessary expenditures in the line of duty" of U.S. Marshals and Deputy U.S. Marshals may not be delegated below the Assistant Director level.

Dated: July 28, 1980.

BILLING CODE 4410-01-M

28 CFR Part 0

[Order No. 906-80]

Establishment of the Office of Small and Disadvantaged Business Utilization in the Department of Justice

AGENCY: Department of Justice.

ACTION: Final rule.

SUMMARY: The Small Business Investment Act was amended in 1978. Among other things, the 1978 amendment established in each Federal agency having procurement powers an office to be known as the "Office of Small and disadvantaged Business Utilization;" (OSDBU). This order attaches the Department of Justice OSDBU to the Office of the Deputy Attorney General and assigns certain responsibilities to the Director of that office.

EFFECTIVE DATE: September 5, 1980.

FOR FURTHER INFORMATION CONTACT: William J. Snider, Administrative Counsel, Justice Management Division, Department of Justice, Washington, D.C. 20530 ((202) 633-3452).

By virtue of the authority vested in me by 28 U.S.C. 509 and 510 and 15 U.S.C. 644(k), it is hereby ordered as follows:

PART 0—ORGANIZATION OF THE DEPARTMENT

Subpart C of Part 0 of Chapter I, 28 Code of Federal Regulations, is amended by adding the following § 0.18a.

§ 0.18a Office of Small and Disadvantaged Business Utilization.

The Office of Small and Disadvantaged Business Utilization is headed by a Director appointed by the Attorney General, who shall be responsible to, and report directly to, the Deputy Attorney General. Subject to the general supervision and direction of the Deputy Attorney General, the Director shall:

(a) Be responsible for the implementation and execution of the functions and duties required by sections 637 and 644 of Title 15, United States Code;

(b) Establish Department goals for the participation by small businesses, including small businesses owned and controlled by socially and economically disadvantaged individuals, in Department procurement contracts;

(c) Have supervisory authority over Department personnel to the extent that the functions and duties of such personnel relate to the functions and duties described in paragraph (a) of this section;

(d) Provide resource information and technical training and assistance regarding utilization of small businesses, including small businesses owned and controlled by socially and economically disadvantaged individuals, to Department personnel who perform procurement functions;

(e) Assign a small business technical adviser to any Department offices to which the Small Business Administration assigns a procurement center representative, in accordance with section 644(k)(6) of Title 15, United States Code;

(f) Develop and implement appropriate outreach programs to include small minority businesses in procurement contracts;

(g) Cooperate and consult regularly with the Small Business Administration with respect to the functions and duties described in paragraph (a) of this section;

(h) Review, evaluate and report to the Deputy Attorney General on the performance of organizational units of the Department in accomplishing the goals for utilization of small and disadvantaged businesses; and

(i) Prepare the Department's annual report to the Small Business Administration on the extent of participation by small and disadvantaged businesses in Department procurement contracts.

Dated: July 30, 1980.

Benjamin R. Civiletti,

Attorney General.

Department of the Air Force

32 CFR Part 888d

Military Personnel; Enlistment and Discharge of AFROTC Cadets

AGENCY: Department of the Air Force, DOD.

ACTION: Final rule.

SUMMARY: The Department of the Air Force is amending its regulations by revising Part 888d, Enlistment and Discharge of AFROTC Cadets. This revision clarifies the enlistment

V 45 / 153 AG 6 80 UMI

requirements for students selected for membership in the College Scholarship Program (CSP) and the Professional Officer Course (POC), AFROTC; prescribes the policies and procedures for enlistment in and discharge from the United States Air Force Reserve (USAFR); and for ordering certain discontinued members to extended active duty (EAD) involuntarily in their enlisted grade. It implements DOD Directives 1215.8, May 1, 1974; 1215.9, November 7, 1969; and Change 1, July 10, 1970.

EFFECTIVE DATE: July 15, 1976.

FOR FURTHER INFORMATION CONTACT:

Major Herbert L. Treger, telephone (202) 695–0318.

Title 32 of the Code of Federal Regulations is amended by revising Part 888d to read as follows:

PART 888d—ENLISTMENT AND DISCHARGE OF AFROTC CADETS

Sec.

888d.1 Purpose.
888d.2 Terms explained.
888d.3 Enlistment obligations.
888d.4 Enlistment prerequisites.
888d.5 Periods of enlistment.
888d.6 Who enlists applicants.
888d.7 Action at time of enlistment.
888d.8 Failure to complete training or accept commission.
888d.9 Basis for discharge.
888d.10 Reporting cadets for discharge or order to EAD.
888d.11 ARPC actions on cadets reported for EAD in their enlisted grade.

Authority: 10 U.S.C. 8012.

Note.—This part is derived from Air Force Regulation 45–14, July 15, 1976.

Note.—Part 806 of this chapter states the basic policies and instructions governing the disclosure of records and tells the members of the public what they must do to inspect or obtain copies of the material referenced herein.

§ 888d.1 Purpose.

This part prescribes enlistment requirements for students selected for membership in the College Scholarship Program (CSP) and the Professional Officer Course (POC), AFROTC, under 10 U.S.C. Sections 2101 through 2111. It also prescribes the policies and procedures for enlistment in the United States Air Force Reserve (USAFR); for discharge from the USAFR; and for ordering certain discontinued members to extended active duty (EAD) involuntarily in their enlisted grade.

Note.—This part is affected by the Privacy Act of 1974. Each form which is required by this part contains a Privacy Act Statement, either incorporated in the body of the document or in a separate statement accompanying each such document.

§ 888d.2 Terms explained.

(a) *AF Form 1056, Air Force Reserve Officers' Training Corps Contract.* A contractual agreement jointly executed by the Department of the Air Force and a student programmed to serve on EAD. The agreement establishes membership in the CSP or POC. Part 870 of this chapter is the prescribing directive for this form.

(b) *AF Form 1448, Air Force Reserve Officers' Training Corps Contract (Air National Guard/Air Force Reserve).* A contract jointly executed by the Department of the Air Force and a student programmed for service in the Air National Guard/Air Force Reserve. This contract establishes membership in the POC. Part 870 of this chapter is the prescribing directive for this form.

(c) *College Scholarship Program (CSP).* A program in which selected cadets receive educational financial assistance including normal tuition, fees, laboratory expenses, books, and a monthly subsistence allowance. This program is prescribed under 10 U.S.C. 2107.

(d) *Extended Active Duty (EAD).* A tour of active duty (AD), normally for more than 90 days, performed by a member of the Air National Guard of the United States (ANGUS) or the USAFR. Strength accountability for persons on EAD changes from the ANGUS/USAFR to the active force.

(e) *General Military Course (GMC).* The first and second years of the 4-year program consisting of Aerospace Studies 100 and 200.

(f) *Prior Service Applicant.* A former member of the Armed Forces or the Reserve components of the Armed Forces who served a continuous period of AD, EAD, or active duty for training (ADT) of 6 months or more.

(g) *Professional Officer Course (POC).* The third and fourth years of the 4-year program and the first and second years of the 2-year program consisting of Aerospace Studies 300 and 400. This advanced training is prescribed under 10 U.S.C. 2104.

§ 888d.3 Enlistment obligation.

Each student selected for a scholarship award by the Commandant, AFROTC, or selected for POC membership must enlist in the USAFR under this part before being eligible to enroll as a member of the POC or CSP.

§ 888d.4 Enlistment prerequisites.

An applicant must meet the prerequisites for enlistment prescribed in Part 888 of this chapter and the eligibility requirements for admission to membership in the POC or CSP according to Part 870 of this chapter.

§ 888d.5 Periods of enlistment.

Applicants enrolled in the CSP are enlisted for a period of 8 years. All others are enlisted for a period of 6 years. However, nonscholarship cadets enlisted for a period of 6 years need not change their period of enlistment if they are subsequently granted scholarships.

§ 888d.6 Who enlists applicants.

Detachment Commanders and other officers assigned to AFROTC may enlist an eligible applicant in the USAFR.

§ 888d.7 Action at time of enlistment.

The enlistment authority:

(a) Completes counseling requirements according to Parts 888 and 870 of this chapter.

(b) Ensures that enlistment documents and forms are prepared according to Part 888 of this chapter.

(1) AF Form 22, Statement of Understanding (US Air Force Reserve), or AF Form 73, Statement of Understanding (AFROTC Airmen Scholarship and Commissioning Program), or AF Form 1404, Statement of Understanding (AFROTC Production for ANGUS and USAFR). Each student enlisted under this part must certify that the applicable provisions are understood.

(2) DD Form 4, Enlistment or Reenlistment Agreement—Armed Forces of the United States, and DD Form 1966, Application for Enlistment Armed Forces of the United States. Prepare according to Part 888 of this chapter.

Note.—A cadet discontinued from AFROTC membership and discharged from the USAFR obligated reserve section (ORS) may apply for enlistment or reenlistment. If eligible for enlistment in the Regular Air Force under Part 888 of this chapter, or reenlistment in the USAFR under AFR 35–16, volume II, cadet service with concurrent Reserve status is creditable in computing basic pay and is creditable toward completing the enlisted member's military service obligation (MSO).

(3) AF Form 2061, USAF Drug Abuse Certificate (Appointment/Officer Training Applicants Only). Before enlistment, applicant completes AF Form 2061 according to Part 870 of this chapter.

(4) AF Form 2031, Drug Abuse Circumstances (Instructions to Recruiter). Accomplish AF Form 2031 according to Part 870 of this chapter.

(c) Ensures that an applicant who is a member of any military component, including the USAFR, on entrance into this program, is discharged and enlisted. Discharge is contingent on immediate enlistment under this part and orders must cite this fact.

(d) Determines the grade in which applicant must be enlisted.

(e) Publishes Reserve order according to AFR 10–7, chapter 3, assigning enlistee to the Air Reserve Personnel Center (ARPC) (ORS–RC) (AFROTC) with attachment to (Specify AFROTC detachment and educational institution.)

Exception.—The appropriate Detachment Commander publishes Reserve orders on receipt of enlistment documents from the AD enlisting activity for members enlisted in the USAFR to participate in the AFROTC ASCP.

§ 888d.8 Failure to complete training or accept commission.

(a) *General Military Course (CSP).* No GMC cadet will be ordered to AD involuntarily, except former Regular Air Force enlisted personnel who had 1 year or more remaining on their enlistment contract when discharged from AD to accept an AFROTC scholarship under the AFROTC ASCP. These members normally will be ordered to AD in enlisted status for a period of time equivalent to that not served on their AD enlistment contract.

(b) *POC (Nonscholarship).* A cadet who does not complete the course of instruction, or declines to accept a commission on completion, normally will be ordered to AD to serve in enlisted status for 2 years.

(c) *POC (College Scholarship Program).* A cadet who:

(1) Does not complete this program of instruction normally will be ordered to AD in enlisted status for 2 years; or

(2) Completes this program of instruction but declines a commission when offered, normally will be ordered to AD in enlisted status for 4 years.

(d) *Nurse Licensing Requirements.* A nurse who fails to complete licensing requirements within 8 months following completion of AFROTC and degree requirements normally will be discharged.

§ 888d.9 Basis for discharge.

Discharge is accomplished by ARPC on:

(a) Successful completion of the AFROTC program and acceptance of a commission. The discharge is:

(1) Effective the day preceding acceptance of the commission.

(2) For the convenience of the Government, citing this subparagraph as authority.

(b) Discontinuance of AFROTC membership for any reason unless reported for order to AD involuntarily under § 888d.10. A request for discharge must be accompanied by DD Form 785, Record of Disenrollment From Officer Candidate-Type Training, for permanent inclusion in the cadet's master personnel record (MPerR) group. Discharge for any of the reasons cited in AFR 35–41, volume III, chapter 5, paragraphs 5–20 through 5–22 and 5–31 through 5–36, is instituted when applicable. All other discharges are for the convenience of the Government, citing this subparagraph as authority.

(c) Termination of a scholarship when the student remains a member of the GMC or has completed GMC instruction, but has not begun POC instruction. Discharge occurs the day of scholarship termination and is for the convenience of the Government, citing this subparagraph as authority.

Note.—Discharge under §§ 888d.9(b) and 888d.9(c) does not relieve a male cadet from draft liability under the Military Selective Service Act of 1967.

§ 888d.10 Reporting cadets for discharge or order to EAD.

(a) The Commandant, AFROTC, reports the names of AFROTC cadets or former cadets who qualify for administrative discharge under this part to ARPC at least once a week. ARPC notifies the respective State Adjutant General of individuals under contractual agreement to the ANGUS who are eliminated from training.

(b) The Commandant, AFROTC, normally will report the name of a discontinued POC cadet to ARPC for order to involuntary AD in enlisted grade if the cadet was discontinued for indifference to training, disciplinary reasons, breach or anticipatory breach of the terms of the category agreement, or declining to accept a commission. However, each case will be considered on its own merits. This does not preclude waiving active enlisted service for physical disqualification, humanitarian reasons, the needs of the service, or other mitigating circumstances. When it is known that the cadet has disenrolled from the institution, this information is included. The period of involuntary AD is as described in § 888d.8. DD Form 785 must be completed and sent to ARPC with an information copy to AFMPC/DPMMPO, Randolph AFB TX 78148, in these cases.

(c) The Commandant, AFROTC, normally reports the name of a discontinued GMC or POC cadet to ARPC for order to involuntary AD in enlisted grade if the cadet was discharged from AD under the AFROTC ASCP to participate in the CSP and was discontinued for any reason except as outlined below. (This does not include a GMC cadet who had less than 1 year remaining on his or her Regular enlistment contract at time of discharge. Such a GMC cadet is reported for discharge under paragraph (a) of this section). The period of AD will be as described in § 888d.8. DD Form 785 must be completed and sent to ARPC with an information copy to AFMPC/DPMMPO in these cases. Although the Commandant, AFROTC, may include other unique cases on an individual basis, exceptions normally will be limited to those:

(1) Who have failed to maintain medical qualifications for commissioning;

(2) With a bona fide hardship (as determined by the Commandant, AFROTC);

(3) Who voluntarily enlist in the Regular Air Force;

(4) Discontinued for inaptitude or reasons involving undesirable traits of character; or

(5) Whose order to involuntary AD would not be in the best interest of the service.

§ 888d.11 ARPC actions on cadets reported for EAD in their enlisted grade.

(a) On notification from the Commandant, AFROTC, that discontinued cadets have been identified for order to EAD involuntarily in their enlisted grade, ARPC advises the discontinued cadets that they:

(1) Will be ordered to EAD involuntarily in their enlisted grade for the period prescribed in § 888d.8 except that:

(i) Discontinued cadets are not ordered to EAD until they complete undergraduate degree requirements or disenroll from the institution, whichever occurs first. Discontinued ASCP cadets are ordered to EAD at the end of the school term in which they are disenrolled. Discontinued cadets enrolled in graduate school are not ordered to EAC until they complete the academic year in which they are disenrolled or disenroll from the institution, whichever occurs first;

(ii) Individuals usually are given at least 60 days' notification before their EAD date; and

(iii) When ARPC notification permits, students are entered on EAD within 30 days after the date they normally would complete degree requirements or their current academic year of graduate school, as appropriate. When ARPC notification occurs after a disenrolled cadet has completed degree requirements, disenrolled from college, or is a graduate student between academic years, EAD is scheduled no later than 75 days after ARPC notification. A cadet may submit a written request to ARPC for an earlier or specific date of entry on EAD.

V 45 / 153 AUG 6 80 UMI

(2) Must keep ARPC informed of any change in current address or in their status which may have a bearing on their availability for EAD or affect their status in the USAFR.

(b) ARPC publishes appropriate orders not less than 30 days before scheduled EAD date and sends copies to the discontinued cadet by registered mail, return receipt requested.

(c) Exceptions to the provisions of this section require approval of AFMPC/DPMMPO, Randolph AFB TX 78148.

Carol M. Rose,

Air Force Federal Register Liaison Officer.

BILLING CODE 3910-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[FRL 1562-1]

Approval and Promulgation of State Implementation Plan Approval of Conditionally Approved Element in the Texas Plan for Nonattainment Areas

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rulemaking.

SUMMARY: The purpose of this notice is to approve that portion of the State Implementation Plan (SIP) revision for Texas, which commits to the identification and implementation of currently planned transportation control measures (TCMs) for Harris County. This revision was submitted by the Governor on December 28, 1979, to fulfill the requirements of Part D of Title 1 of the Clean Air Act, as amended in 1977, with regard to nonattainment areas.

When originally submitted certain portions of the SIP contained deficiencies which the State agreed to correct by a specified deadline. The deadline proposed by EPA in the rulemaking notice of August 1, 1979 was October 29, 1979. During the public comment period the State requested a new deadline of December 31, 1979. EPA concurred with this date and it was approved in the final rulemaking notice of March 25, 1980. The EPA received the required documentation on December 28, 1979 from the State and has evaluated the submittal. Based upon the approvable submittal, EPA has determined that the State has satisfied the condition specified in the March 25, 1980 notice and therefore is approving this element of the Texas SIP.

EFFECTIVE DATE: Effective August 6, 1980.

FOR FURTHER INFORMATION CONTACT:
Jerry Stubberfield, Chief, Implementation Plan Section, Air and Hazardous Materials Division, Environmental Protection Agency, Region 6, 1201 Elm Street, Dallas, Texas 75270, (214) 767-1518.

SUPPLEMENTARY INFORMATION:

Introduction

On August 1, 1979 (44 FR 45204), EPA published a notice of proposed rulemaking on revisions to the Texas SIP. Under that notice the Agency discussed the SIP in detail and described the deficiencies of the SIP pursuant to Part D of the Act and the General Preamble, which was published in the April 4, 1979 issue of the Federal Register (at 44 FR 20372) and supplemented on July 2, 1979 (44 FR 38583), August 28, 1979 (44 FR 50371), September 17, 1979 (44 FR 53761), and November 23, 1979 (44 FR 67182).

The July 2, 1979 supplement to the April 4, 1979 notice outlines the criteria for conditional approval. This discussion will not be restated in this notice.

In a notice of proposed rulemaking published in the Federal Register on August 1, 1979 EPA conditionally approved the transportation control measures portion of the Texas SIP provided the State commit to identify and implement TCMs for Harris County having beneficial air quality impacts.

Based upon discussions with the TACB and EPA the State committed to a conditional approval deadline of December 31, 1979. This date was approved in the final rulemaking notice of March 25, 1980.

On December 28, 1979 the State submitted to EPA under the signature of the Governor, their Plans for Implementation of Air Quality Related Transportation Control Measures for Harris County. The currently planned Transportation Control Measures committed to by local elected officials and having positive air quality impacts include two permanent park and ride lots and three long term lease lots that have a total capacity of 2650 parking spaces. In addition, the Metropolitan Transit Authority committed to continuation of the Houston Car Share (car-pooling) program.

These measures (i.e., park and ride programs and carpool programs) are considered by EPA to be acceptable TCMs and EPA feels that this submittal satisfies the condition specified in the March 25, 1980 notice. Therefore, EPA is withdrawing conditional approval, and is fully approving this portion of the SIP.

PUBLIC COMMENTS: The public was given the opportunity to comment on the substance and schedules of the conditionally approved items in the proposed rulemaking of August 1, 1979, 44 FR 45204. The public had no comments specific to the currently planned TCMs for Harris County but other comments received on the Texas SIP were discussed in the March 25, 1980 Notice of Final Rulemaking.

Under Executive Order 12044, EPA is required to judge whether a regulation is "significant" and therefore subjected to the procedural requirements of the Order or whether it may follow other specified development procedures. EPA labels these other regulations "specialized". I have reviewed this regulation and determined that it is a specialized regulation not subject to the procedural requirements of Executive Order 12044.

This notice of final rulemaking is issued under the authority of Section 110 of the Clean Air Act, as amended.

EPA finds that good cause exists for making this package immediately effective: (1) Implementation Plans are already in effect under State law and EPA approval imposes no additional regulatory burden;

(2) EPA has a responsibility under the Act to take final action as soon as possible on the portion of the SIP which were given conditional approval regarding Part D Requirements.

Dated: July 24, 1980.

Douglas M. Costle,

Administrator.

Part 52 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

Subpart SS—Texas

1. In § 52.2270, paragraph (c) is amended by adding a new paragraph (24) as follows.

§ 52.2270 Identification of plan.

* * * * *

(c) * * *

(24) A revision identifying and committing to implement currently planned Transportation Control Measures (TCMs) for Harris County was submitted by the Governor on December 28, 1979.

2. § 52.2791 is revoked and reserved.

§ 52.2791 [Reserved]

[FR Doc. 80-23466 Filed 8-5-80; 8:45 am]

BILLING CODE 6560-01-M

40 CFR Part 122

[FRL 1557-4]

Consolidated Permit Regulations; Signatories To Permit Applications and Reports; Statement of Policy Regarding Signatory and Certification Provisions

AGENCY: Environmental Protection Agency.

ACTION: Statement of policy.

SUMMARY: This policy statement is in response to several industry requests for clarification of certain terms contained in the signatory and certification provisions of 40 CFR 122.6. This policy statement does not change the meaning of the Consolidated Permit Regulations in anyway, but clarifies 1. the requirement of which corporate official must sign permit applications, 2. requirements for signers to have "personally examined" and be "familiar" with the information submitted, and 3. the requirement that the signer make "inquiry of those individuals immediately responsible for obtaining the information."

DATES: This Statement of Policy becomes effective August 6, 1980.

FOR FURTHER INFORMATION CONTACT:
Beth Osheim, Office of Water Enforcement (EN-336), U.S. Environmental Protection Agency, Washington, D.C. 20460 (202) 426-4793.

SUPPLEMENTARY INFORMATION: The promulgation of the consolidated permit regulations in 45 FR 33290 (May 19, 1980), resulted in numerous inquiries from industry representatives who were having difficulty understanding certain terms used in the signature requirement and certification for permit applications and reports submitted by corporations found in 40 CFR 122.6(a)(1) and (d). We are setting forth this statement of policy to respond to these inquiries and to inform the public of our interpretation of these requirements. This statement of policy does not change the regulation in any way.

POLICY STATEMENT: The requirement that the signer of a permit application submitted by a corporation be a "principal executive officer of at least the level of vice-president" means that the signer must be a president, secretary, treasurer, or any vice-president of the corporation in charge of a principal business function. Any other person who performs similar policy-making functions for the corporation falls within the meaning of this phrase. For example, in cases of very large corporations having many divisions which are not separate corporate entities, the signature of a divisional vice-president or executive officer with such policy-making functions satisfies this requirement even though the divisional vice-president or executive officer technically is not a vice-president or executive officer of the corporation. The signature of the manager for the plan for which the application is being submitted will not satisfy this requirement unless that person is a principal executive officer of at least the level of vice-presient or performs similar policy-making functions for the corporation.

The requirement that the signer of a permit application or other report have "personally examined" and be "familiar" with the information submitted means that the signer must have read the document. The signer must sufficiently comprehend the information contained in the document and its regulatory consequences to enable him or her to make a reasonable inquiry as to the truth, accuracy, and completeness of the information.

To comprehend the regulatory consequences of an NPDES permit application would include, for example, understanding that the information submitted, such as the description of the plant, its processes, and the nature and quantity of pollutants being discharged, will form the basis for determining the effluent limitations, monitoring requirements, notification levels, and other conditions to be established in the NPDES permit.

The requirement that the signer make "inquiry of those individuals immediately responsible for obtaining the information" means that he or she must make a good faith effort to ascertain whether or not the information submitted complies with the requirements of this section. The inquiry must provide the signer with a reasonable basis to believe that the information submitted is true, accurrate, and complete. Because the nature and extent of the inquiry required will vary on a case-by-case basis, it would be impossible for the Agency to specify necessary steps here. In general, however, the signer at least must inquire of the person or persons who supervised the collection of the information. These persons must be able to supply the information necessary to ascertain the truth, accuracy, and completeness of the information being submitted. If inquiry of these supervisors is insufficient to provide a reasonable basis to believe that the information is true, accurate, and complete, the signer must make further inquiry as necessary to establish that basis before signing the document.

Dated: July 28, 1980.

Jeffrey G. Miller,

Acting Assistant Administrator for Enforcement.

Dated: July 29, 1980.

Michele Beigel Corash,

General Counsel.

[FR Doc. 80-23741 Filed 8-5-80; 8:45 am]

BILLING CODE 6560-01-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 22

[FCC 80-450]

Making Clear That Applicants at the Time of Filing Applications in the Domestic Public Land Mobile Radio Service Must Demonstrate Interference-Free Operation

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Federal Communications Commission amends its regulations to require that applicants for base station facilities in the Domestic Public Land Mobile Radio Service, at the time their applications are tendered for filing, must explicitly state whether there are any co-channel facilities within a specified distance and, if so, must submit interference studies which demonstrate tnat their proposed facilities will not cause co-channel electrical harmful interference.

EFFECTIVE DATE: September 8, 1980.

ADDRESSES: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT:
Charles Jay Isemen, Common Carrier Bureau, (202) 632-6450.

SUPPLEMENTARY INFORMATION: In the matter of amendment of Part 22 of the Commission's rules to make clear that applicants at the time of filing applications in the Domestic Public Land Mobile Radio Service must demonstrate interference-free operation.

Memorandum Opinion and Order

Adopted: July 23, 1980.
Released: July 30, 1980.

1. In the Domestic Public Land Mobile Radio Service (DPLMRS), processing is often delayed because many applications do not contain interference studies that the staff needs in order to determine whether the proposed facilities will cause harmful electrical interference to existing stations. We have reviewed our existing rules that

V 45 / 153 3 AG 6 80 0 UMI

require applicants for base station facilities in the DPLMRS to demonstrate interference-free operation and have concluded that interference-free operation should be demonstrated at the time an application is tendered for filing. The changes we are making in our rules make it clear that such information must be submitted at the time an application is filed rather than withheld until the Commission specifically requests the information.

2. The interrelationship of §§ 22.15, 22.100(a), 22.502, 22.503, and 22.504, of the rules establishes the requirement that applicants for base station facilities in the DPLMRS demonstrate interference-free operation. Section 22.15 requires applications to "contain all technical information required by the application form and any additional information necessary to fully describe the proposed construction and to demonstrate compliance with all technical requirements of the rules * * *." 47 CFR § 22.15 Section 22.100(a) of the rules states that assignment of frequencies will be made only in such a manner as to facilitate the rendition of communications service on an interference-free basis in each service area. 47 CFR § 22.100(a). Section 22.504(a) of the rules defines the reliable service area of a base station entitled to protection from co-channel electrical harmful interference. 47 CFR § 22.504. As a guideline in making frequency assignments that will permit interference-free operation, § 22.502 and 2.503 classify co-channel stations by antenna height above average terrain and effective radiated power and establish the minimum mileage separation that normally will be required. 47 CFR 22.502 and 22.503. To aid the Commission staff in assuring that frequencies are assigned on an interference-free basis, FCC Form 401, Item 26, requires applicants to disclose the average elevation of radial in feet above mean sea level, the height of antenna radiation center in feet above elevation of radial, and the effective radiated power in radial direction, for those radials that are in the direction of a co-channel station within seventy-five miles.[1] It has been our practice to require applicants to submit interference studies demonstrating interference-free operation with all existing co-channel stations within seventy-five miles and with those proposed co-channel stations within seventy-five miles with which the application is "cut off" from comparative consideration by the provisions of § 22.31 of the Commission's rules, 47 CFR 22.31. Whenever interference studies have not been submitted with such applications, our staff has had to spend considerable time and effort in writing letters to the applicants requesting them to submit the information. Significant staff time and effort could be saved and the resultant processing delays could be substantially reduced if this information was provided at the time the application was submitted.[2] In the future, an application that does not contain the requisite interference studies would be subject to being returned as a defective application pursuant to § 22.20(a) of the rules, 47 CFR 22.20(a).

3. We are clarifying our rules to reflect existing practices and interpretations. We also wish to promote greater consistency in the information submitted by applicants. Accordingly, we are adding a new subsection (b) to § 22.15 of the Commission's rules, (technical content of applications) which will require applicants for base station facilities to explicitly state whether there are any co-channel facilities (whether existing or proposed by applications pending for more than 60 days from their public notice dates[3] within a specified distance and, if there are such facilities, to submit interference studies demonstrating that the applicant's proposed facilities will not cause harmful electrical interference to those facilities. The specified distance will be the minimum mileage separation established by §§ 22.502 and 22.503 whenever the application is for two-way base station facilities.[4] We realize that these minimum mileage separations establish a conservative estimate of the minimum mileage separation between co-channel stations when applied to one-way co-channel facilities. Consequently, we find that our present practice of requiring applicants for one-way facilities to identify co-channel facilities as far away as seventy-five miles is too burdensome in those cases where the table in § 22.503 indicates that the minimum milege separation is less than seventy-five miles. Accordingly we shall relax this burden and amend § 22.15(b) to require applicants for one-way base station facilities to explicitly state whether there are any protected co-channel facilities within seventy-five miles or the minimum mileage separation determined by applying the provisions of § 22.502 and the table shown in § 22.503(a), whichever is less, and if there are such facilities, to submit interference studies demonstrating that the proposed facilities will not cause harmful electrical interference to those facilities. We will not consider an application to be unacceptable for filing because it fails to identify applications for co-channel facilities that are pending for less than sixty days. In such cases, the Commission's staff may contact the applicant requesting the submission of appropriate interference studies.

4. In some cases, an applicant proposes operation where the average of the eight radials complies with the antenna height-power limit but the combination of effective radiated power and antenna height along a particular radial direction exceeds the limit that is computed by applying Section 22.505[5] in that direction. In these situations, our experience indicates that harmful electrical interference may be caused for a considerably greater distance. Consequently, we have been requiring applicants to explicitly state whether there are any protected co-channel facilities in that particular direction within 125 miles[6] and, if there are such facilities, to submit interference studies demonstrating that the proposed facilities will not cause harmful electrical interference to those facilities. Section 22.15(b) will also codify this requirement.

5. Authority for the adoption of the foregoing revisions is contained in Sections 4(i), 303(f), 303(r), 308(b), and 319(a) of the Communications act of 1934, as amended. 47 U.S.C. 154(i), 303(f), 303(r), 308(b) and 319(a).

6. In view of the fact that the amendments adopted herein are rules that clarify existing agency practice and procedure, prior publication of *Notice of Proposed Rule Making* under the provisions of Section 4 of the Administrative Procedure Act is unnecessary, and the amendments will become effective on

7. It is ordered, that effective September 8, 1980, § 22.15 of the Commission's rules is amended as set forth in the attached Appendix below.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; (47 U.S.C. 154, 303).)

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix

Section 22.15(b), Title 47, of the Code of Federal Regulations (47 CFR 22.15(b)) is amended to read as follows:

§ 22.15 Technical content of applications.

* * * * *

(b) Each Domestic Public Land Mobile Radio Service application for a construction permit for a new base station or a major modification to an existing base station must:

(1) Explicitly state whether there are any co-channel facilities (whether existing or proposed by applications pending for more than 60 days from their public notice dates) within:

(i)(A) The minimum mileage separation established by §§ 22.502 and 22.503(a), if the application is for two-way communications facilities, or

(B) The lesser of 75 miles or the minimum mileage separation determined by applying the provisions of § 22.502 and the table shown in § 22.503(a), if the application is for one-way communications facilities;

(ii) 125 miles along any radial direction where the combination of effective radiated power in that direction and antenna height above average terrain in that direction exceeds the limit that is computed by applying the provisions of § 22.505 to that direction;

(2) Contain interference studies demonstrating that the proposed facilities will not cause harmful electrical interference to those co-channel facilities (existing or proposed) identified in response to subparagraph (1) of this paragraph. The interference studies must use procedures consistent with § 22.504 and FCC Report No. R-6406, "Technical Factors Affecting the Assignment Of Facilities In The Domestic Public Land Mobile Radio Service," by Roger B. Carey. All supporting data and calculations must be included with the results of the studies.

[FR Doc. 80-23639 Filed 8-5-80: 8:45 am]

BILLING CODE 6712-01-M

[1] If there are no co-channel stations within seventy-five miles, applicants must respond to this item and state explicitly that there are no such stations. *RAM Broadcasting of Indiana, Inc.*, 76 FCC 2d 384 (Com. Car. Bur. 1980); *See also Public Notice*, Mimeo 30894, released April 24, 1980, "Mobile Services Division Will Return Public Mobile Radio Service Applications Found To Be Defective."

[2] As we have stated on another occasion, it is the applicant's responsibility to conduct interference studies to determine whether its proposed service can be rendered on an interference-free basis. *Dial-A-Page, Inc.*, 75 FCC 2d 432, 439, 46 RR 2d 1239, 1245 (1980).

[3] Such co-channel facilities will hereinafter be referred to as "protected co-channel facilities."

[4] In order to determine the class of station pursuant to § 22.502 of the the rules, 47 CFR 22.502, both the antenna height above average terrain and effective radiated power must be computed along the particular radial between the co-channel stations.

[BC Docket No. 80-143]

TV Broadcast Stations in Lansing and Saginaw, Mich.; Newark, Sandusky, and Toledo, Ohio; Changes Made in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Final rule (Report and Order).

SUMMARY: As a result of a Notice of Proposed Rule Making, adopted on the Commission's own motion, this action substitutes Channel 47 for Channel 36 at Lansing, Michigan; Channel 49 for Channel 45 at Saginaw, Michigan; Channel 51 for Channel 52 at Newark, Ohio; Channel 52 for Channel 51 at Sandusky, Ohio; and Channel 36 for Channels 54 and 60 at Toledo, Ohio. This action will allow use of the 806–890 MHz band for land mobile operations in the United States-Canadian border area.

DATE: Effective September 10, 1980.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Gordon W. Godfrey, Broadcast Bureau, (202) 632–9660.

SUPPLEMENTARY INFORMATION: In the matter of amendment of § 73.606(b), *Table of Assignments,* Television Broadcast Stations. (Lansing and Saginaw, Michigan; Newark, Sandusky and Toledo, Ohio), BC Docket No. 80–143. See 45 FR 28775, April 30, 1980.

Report and Order—Proceeding Terminated

Adopted: July 25, 1980.

Released: August 4, 1980.

1. The Commission has before it for consideration the *Notice of Proposed Rule Making,* adopted April 7, 1980, on the Commission's own motion. The *Notice* proposed the following changes in UHF television assignments:

City	Delete	Add
Lansing, Michigan	36	47
Saginaw, Michigan	45	49
Newark, Ohio	52	51
Sandusky, Ohio	51	52
Toledo, Ohio	54, 60	36

2. The only comment submitted in this proceeding was from Toledo Christian Broadcasting, Inc. ("TCB") in opposition to the proposed addition of Channel 36 and deletion of Channels 54 and 60 at Toledo. TCB states that it was incorporated in December, 1979, and has been in the process of preparing a construction permit application for Channel 54 at Toledo since then. TCB submits that Toledo is a market whose vitality deserves two independent television outlets and that keeping the two channels assigned to Toledo would further the Commission's objectives of maximizing diversity of viewpoints available in a broadcast marketplace.

3. TCB offers no supporting data regarding Toledo's claimed vitality. In addition, Channels 54 and 60 have remained vacant at Toledo for a number of years while in many communities all assigned television channels have been occupied. Finally, TCB does not indicate that Channel 36 could not be used for its planned station.

4. As was indicated in the *Notice,* these proposed changes are needed to resolve conflicts with a revised Canadian UHF television table. The revised Canadian table was originated to clear UHF Channels 70 through 83 (the 806–890 MHz frequency band) of Canadian television stations and assignments. This will make possible land mobile use of this band in the common border area by both countries.[1]

5. We have carefully considered the proposal herein and the comments of TCB, and believe it would be in the public interest to make the substitutions proposed. The need for land mobile use of the 806–890 MHz band in the border area far outweighs any reasons for retaining two unoccupied and unapplied for television assignments at Toledo.

6. Two recently granted construction permits specify channel assignments which are being deleted herein (File No. BPCT–5176 for Station WSFJ on Channel 52 in Newark, Ohio, and File No. BPCT–781023KE on Channel 51 in Sandusky, Ohio). Since the grants were specifically conditioned on the outcome of U.S./Canadian negotiations, and the channels assigned in Newark and Sandusky are being changed, we will modify their authorizations to specify the newly assigned channels.

7. Finally, at the time of the *Notice,* there were on file three applications for the use of Channel 36 in Lansing, Michigan. (Subsequently, one of the three applicants submitted an amendment to its application to specify Channel 53.) While we are substituting Channel 47 for Channel 36 in Lansing, each application, if amended to Channel 47 at its currently requested site, would have a short-spacing. Channel 53 is currently assigned to Lansing, though, and each remaining application may be amended to Channel 53 with no change in site and no short-spacings. We believe that since these applicants have concluded cut-off procedure once on Channel 36, they should have an opportunity to retain their cut-off protection. Since we have substituted Channel 47 for Channel 36, we will permit the applications to be amended to specify the Channel 47 assignment at a new site and retain cut-off protection. If, however, applicants wish to keep their proposed sites and specify Channel 53, we believe that they must face a new cut-off date with the possibility of additional competing applications.

8. In view of the foregoing, it is ordered, that effective September 10, 1980, § 73.606(b) of the Commission's rules, the Television Table of Assignments, is amended with respect to the channel assignments at the following communities:

City	Channel No.
Lansing, Michigan	6-, 47, 53-
Saginaw, Michigan	25-, 49-
Newark, Ohio	*31-, 51
Sandusky, Ohio	52
Toledo, Ohio	11-, 13, 24-, *30+, 36-

9. Authority for the action taken herein is contained in Sections 4(i), 5(d)(1), 303(g) and (r) and 307(b) of the Communications Act of 1934, as amended, and § 0.281 of the Commission's rules.

10. It is further ordered, that pursuant to § 316(a) of the Communications Act of 1934, as amended, the outstanding construction permit held by Christian Television of Ohio, Inc. for Station WSFJ, Newark, Ohio, is modified, effective September 10, 1980, to specify operation on UHF–TV Channel 51 instead of UHF–TV Channel 52. The permittee shall inform the Commission in writing by no later than September 10, 1980, of its acceptance of this modification. In addition, the permittee shall, within 60 days of receipt of this *Order,* submit to the Commission the technical information normally required of an applicant for Channel 51.

11. It is further ordered, that pursuant to § 316(a) of the Communications Act of 1934, as amended, the outstanding construction permit held by Christian Faith Broadcast, Inc., for a television station in Sandusky, Ohio, is modified, effective September 10, 1980, to specify operation on UHF–TV Channel 52 instead of UHF–TV Channel 51. The permittee shall inform the Commission in writing by no later than September 10, 1980, of its acceptance of this modification. In addition, the permittee shall, within 60 days of receipt of this *Order,* submit to the Commission the technical information normally required of an applicant for Channel 52.

12. It is further ordered, that copies of this document SHALL BE SENT by Certified Mail, Return Receipt Requested, to the following permittees and applicants: Christian Television of Ohio, Inc., c/o Michael F. Riley, 8869 National Rd. SW., Pataskalia, Ohio 43062; Christian Faith Broadcast, Inc., 3809 Maple Ave., Castalia, Ohio 44824; Benko Broadcasting Company, 1503 Jolley Rd., Okemos, Michigan 48864; Kare-Kim Broadcasting Company, Inc., 2405 W. McNichols, Detroit, Michigan 48221; and F & S Communications/News, Inc., 4280 West Saginaw Highway, Lansing, Michigan 48917.

13. It is further ordered, that this proceeding is termined.

14. For further information concerning this proceeding, contact Gordon W. Godfrey, Broadcast Bureau, (202) 632–9660.

(Secs. 4, 5, 303, 48 Stat., as amended, 1066, 1068, 1082; (47 U.S.C. 154, 155, 303))

[FCC 80-406]

Cable Television Services; Registration Statement; Clarification

AGENCY: Federal Communications Commission.

ACTION: Clarification and Amendment of Rules.

SUMMARY: The subject *Order* discusses § 76.12 of the Rules to make it clear that a cable facility which separately serves fewer than 50 subscribers but which is a part of a larger system which aggregately serves 50 or more subscribers is required to register. The *Order* also amends § 76.12(e) to remove any implication that more than one cable television system community unit may be listed on a single registration statement.

EFFECTIVE DATE: August 18, 1980.

ADDRESSES: Office of the Secretary, Federal Communications Commission, 1919 M Street, N.W., Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Bob Ratcliffe, Cable Television Bureau, (202) 254–3407.

SUPPLEMENTARY INFORMATION:

Adopted: July 8, 1980.

Released: August 1, 1980.

By The Commission.

In the matter of: clarification and amendment of § 76.12 of the Commission's rules; Order.

1. It has come to our attention that some confusion exists among cable operators as to the exact scope of the registration requirements found in § 76.12 of the Commission's Rules. Specifically, questions have arisen concerning the circumstances under which a cable facility serving less than 50 subscribers is required to file a registration statement. The purpose of the present *Order* is to clarify this point and to amend certain language in § 76.12 which may have contributed to the prevailing uncertainty regarding that section's applicability.

2. Section 76.12 states, in part:

A system community unit shall be authorized to commence operation or to add a television broadcast signal to existing operations only after filing with the Commission [a registration statement].

The obligation to file a registration statement, then, is dependent upon whether or not the cable facility concerned constitutes a "system community unit" within the meaning of the rules. Section 76.5(mm) defines such a unit as follows:

A cable television system, or a portion of a cable television system, that operates or will operate within a separate and distinct community or municipal entity (including unincorporated communities within unincorporated areas and including single, discrete unincorporated areas).

The critical aspect of this definition for our purposes is the requirement that a cable facility constitute a cable television system or a portion of such a system in order to qualify as a community unit. Since a cable television system is defined, in part, by service to 50 or more subscribers [1], this requirement means that a qualifying facility must either serves 50 subscribers in its own right *or* operate as a part of a set of facilities which, taken together, serve 50 or more subscribers. There is no condition, however, in this definition or elsewhere in the rules that each facility comprising a multiple facility system serve 50 subscribers independently. Accordingly, a cable facility serving less than 50 subscribers separately, but which is a part of a system aggregately serving 50 or more subscribers, constitutes a community unit within the meaning of § 76.5(mm) and must file a registration statement pursuant to § 76.12 of the rules.[2]

3. In undertaking our review of § 76.12 in connection with this *Order,* it became apparent that § 76.12(e) is poorly drafted and may be one source of the current confusion concerning registration. Paragraph (e), as presently drawn, requires cable operators to submit the following information as part of a registration statement:

(e) The name of each separate community or area served and the county in which it is located.

Clearly, this provision implies that more than one community or area may be involved. But, since the entity required to file a registration statement is a community unit and such a unit serves, by definition, only one community or discrete area, this implication is contradictory. It is, moreover, inconsistent with our position, which we clearly stated upon adopting the registration process, that each individual community unit would be required to file a separate registration statement.[3] We shall, therefore, amend paragraph (e) to read as follows:

(e) The name of the community or area served and the county(ies) in which it is located.

Some clarification of § 76.12(d) also seems appropriate, although amendment of its terms is not necessary. This provision states that operators shall indicate "the date the system provided service to 50 subscribers" as a part of a registration statement. We wish to make it clear that where the community unit filing the registration statement is not a system unto itself, the information requested by paragraph (d) refers to the date on which the aggregate subscribership of the system of which the filing unit is a part reached 50.

4. Finally, we are aware that under the Commission's former certification

[1] Section 76.5(a) defines a cable television system as: A nonbroadcast facility consisting of a set of transmission paths and associated signal generation, reception, and control equipment, under common ownership and control, that distributes or is designed to distribute to subscribers the signals of one or more television broadcast stations, but such term shall not include (1) any such facility that serves or will serve fewer than 50 subscribers * * *.

[2] Conversely, of course, a cable facility which serves fewer than 50 subscribers, but which stands alone, is not within the definition of a community unit and is not required to register.

[3] *See Report and Order in CT Docket No. 78–206,* FCC 78–690, 69 FCC 2d 697 (1978), at para. 12.

V 45 / 153
AG 6 80
UMI

process, community units with less than 50 subscribers, even though part of a system with 50 or more subscribers, were not required to obtain a certificate of compliance.[4] This policy may well have contributed to operator uncertainty regarding the obligation to register under 50 subscriber units upon our adoption of the registration process and deletion of the certificating mechanism. It is sufficient to confirm here that such registration is required and to note that our policy revision in this connection was based upon the greatly reduced burden which the registration obligation imposes on cable operators and our conclusion that registration of less than 50 subscriber units would contribute measurably to the accuracy and coherence of our information data base and thus to a more efficient administration of our regulatory responsibilities in the cable area.[5]

5. Since the clarification and rule amendment adopted herein are interpretive in nature, the prior notice and effective date provisions of Section 4 of the Administrative Procedure Act, 5 U.S.C. 553, are inapplicable. Authority for the amendment being adopted is contained in Sections 2, 3, 4(i) and (j), 301, 303, 307, 308 and 309 of the Communications Act of 1934, as amended.

ACCORDINGLY, IT IS ORDERED, That effective August 18, 1980, Section 76.12 of the Commission's Rules and Regulations IS AMENDED as set forth in the attached Appendix.

(Secs. 2, 3, 4, 5, 301, 303, 307, 308, 309, 315, 317, 48 Stat., as amended, 1064, 1065, 1066, 1068, 1081, 1082, 1083, 1084, 1085, 1088, 1089; 47 U.S.C. 152, 153, 154, 155, 301, 303, 307, 308, 309, 315, 317)

Federal Communications Commission.

William J. Tricarico,

Secretary.

47 CFR Parts 13, 81, 83, and 87

[Docket No. 20617; FCC 80-416]

Establishing a Marine Radio Operator Permit and Deleting the Radiotelephone Third-Class Operator Permit

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission amends Parts 13, 81, 83 and 87 of the Rules to institute a new radio operator license called the "Marine Radio Operator Permit", to abolish the Radiotelephone Third Class Operator Permit, and to change the examination order for its licenses. Primary purpose is to reduce operating costs by ceasing to issue licenses where no regulatory requirement exists for them.

EFFECTIVE DATE: To be specified later in a Public Notice.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Roy E. Kolly or Vernon P. Wilson, Field Operations Bureau, 202-632-7240.

SUPPLEMENTARY INFORMATION:

In the matter of Amendments of Parts 13, 81, 83, and 87 of the Commission's Rules to establish a Marine Radio Operator Permit and delete the Radiotelephone Third Class Operator Permit; Third Report and Order *See also* 44 FR 66816, November 21, 1979.

Adopted: July 17, 1980.

Released: August 7, 1980.

By the Commission:

1. This instant Third Report and Order is intended to (1) abolish the Radiotelephone Third Class Operator Permit, and (2) institute a new Marine Radio Operator Permit. The Commission issues 53,000 third class permits annually, primarily to individuals having no legitimate need for the permit. The situation prevails in large part because of deregulation steps previously taken by the Commission in this docket.[1] Through this Order we are modifying the examination and license structure to eliminate the issuance of third class permits where no regulatory requirements for the permit exist.

2. We have explored the reasons why individuals obtain third class permits, and we can divide them into four categories. One category consists of those wanting third class permits so that they can become routine operators at AM, FM and TV stations. The routine operators at these stations need only Restricted Radiotelephone Operator Permits which require no examination.[2] Yet persons obtain third class permits—which require passing a relatively simple examination on basic radio laws and operating practices—because they believe the third class permit will give them an advantage when competing for employment in a tight market. Of the third class permits we issue, 40 percent are to individuals in this category.

3. To get a second class license an applicant must first pass the simple third class examination on basic radio laws and operating practice, and then a more difficult examination on electronic theory. The applicant may take these two examinations in one sitting, or break them up into two parts. Frequently, the applicant takes and passes the easier examination on radio laws and operating practice, and then waits a few months before taking the more difficult technical examination. Upon passing the examination on radio laws and operating practice, the applicant qualifies for and is issued a third class permit for which there is no need since the applicant's ultimate goal is a second class license. Forty percent of the third class permits we issue are to individuals in this category.

4. Some applicants for second class licenses do elect to take the simple and the difficult examination in one sitting. However, if the applicant does not pass the difficult technical examination after passing the simple examination on rules and operating practices, the applicant is issued the third class permit for which he qualified. These applicants have no need for the third class permit which they view as a consolation prize, for their goal is the second class license. Eighteen percent of the third class permits issued are to individuals in this category.

5. In the last category are individuals the FCC requires to hold third class permits. These are primarily the persons who operate the radios on Great Lakes freighters and on charter fishing vessels. Two percent of the third class permits issued are to individuals in this last category. These persons have a legitimate need for the permit because of the safety requirements of the Great Lakes Agreement and the FCC rules governing vessels carrying passengers for hire.

6. From the foregoing it can be seen that there is no FCC requirement for 98 percent of the third class permits that we issue, nor does there appear to be any public interest benefit for awarding third class permits in these situations. By merely revising the order in which the examinations are taken, we can eliminate the necessity of issuing most third class permits. By this order we are amending the Rules to require an applicant for a second class license to pass the more difficult technical examination (now called element three) before attempting the relatively simple examination (now called elements one and two) on FCC Rules and operating practices.

7. Those who pass both examinations will be issued a second class license. Those who fail the difficult technical examination will not be entitled to take the simple examination on Rules and operating practices, and no license will be issued. To the very few who pass the difficult part but fail the simple part, we will issue one-year credit certificates to spare them the burden of re-taking the passed examination.

8. We recognize the need for the maritime radio operators mentioned previously (Great Lakes vessels, charter fishing vessels, and some coast stations) to demonstrate their qualifications through a relatively simple examination. However, instead of issuing them third class permits, we will issue them a certificate more appropriately called a "Marine Radio Operator Permit." This permit will be valid only for operating maritime stations, and it cannot be used as credit toward any other operator license.

9. We also realize that on some occasions a person will need to hold both a Marine Radio Operator Permit for maritime communications, and a Restricted Radiotelephone Operator Permit for, perhaps, broadcast operation. We are thus modifying our Rules to allow an individual in such cases to hold more than one operator permit.

10. We now come to the question of how to deal with persons holding third class permits. These persons may continue to hold and use third class permits until they expire. However, the third class permits will not be renewed. Persons applying for a renewal will be issued the new Marine Radio Operator Permit if they so desire. Additionally, they may obtain the Restricted Radiotelephone Operator Permit. By having these two permits, a person will still be able to operate the same stations they could under the third class permit.

11. Authority for these amendments appears in Sections 4(i) and 303 of the Communications Act of 1934, as amended. In that the amendments adopted herein are editorial and procedural in nature, the prior notice and public procedure provisions of the Administrative Procedure Act, 5 U.S.C. 553 are not applicable. However, as the amendments being adopted are subject to clearance of reporting requirements by the General Accounting Office, the effective date of this action will be announced by public notice in the near future.

12. Further information on this matter may be obtained from Vernon Wilson or Roy E. Kolly, telephone 202-632-7240.

13. Accordingly, it is ordered that Parts 13, 81, 83, and 87 of the Commission's Rules are amended as set forth in the attached Appendix, effective on the date to be specified in a Public Notice in the **Federal Register** in the near future.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix

PART 13—COMMERCIAL RADIO OPERATOR

Part 13 of the FCC Rules and Regulations is amended as follows:

1. Section 13.2(b)(2)(ii) is added to read as follows:

§ 13.2 Classification of operator licenses and endorsements.

* * * * *

(b) * * *

(2) * * *

(ii) Marine Radio Operator Permit.

* * * * *

2. Section 13.3(a) is revised to read as follows:

§ 13.3 Dual holding of licenses.

(a) U.S. citizens, citizens of American Samoa, and Trust Territory citizens may hold the Restricted Radiotelephone Operator Permit and the Marine Radio Operator Permit at the same time. Otherwise they may not hold more than one radiotelephone license and one radiotelegraph license at the same time.

* * * * *

3. Section 13.5(c)(2) is revised to read as follows:

§ 13.5 Eligibility for new license.

* * * * *

(c) * * *

(2) If the applicant afflicted with blindness is afforded a waiver of the written examination requirements and is found qualified for a Radiotelephone First Class Operator License, Radiotelephone Second Class Operator License, or a Marine Radio Operator Permit, the applicant may be issued the license or permit, provided that the license or permit so received shall bear an endorsement as follows:

This license is not valid for the operation of any station licensed by the Commission unless the station has been adapted for operation by a blind person and the equipment to be used in such station for the purpose is capable of providing for operation in compliance with the Commission's Rules.

Note.—Some Radiotelephone Third Class Operator Permits previously issued by the Commission also bear this endorsement.

* * * * *

4. Section 13.11(e) is revised to read as follows:

§ 13.11 Procedure.

* * * * *

(e) *Blind applicant.* A blind person seeking an examination for Radiotelephone First Class Operator License, Radiotelephone Second Class Operator License, or Marine Radio Operator Permit shall make a request in writing to the appropriate field office for a time and date to appear for such examination. The examination shall be administered only at the field office. Requests for examinations shall be made at least 2 weeks prior to the date on which the examination is desired.

5. Section 13.22 is revised to read as follows:

§ 13.22 Examination requirements.

Applicants for original licenses will be required to pass examinations as follows:

(a) *Radiotelephone First Class Operator License.* (1) Ability to transmit and receive spoken messages in English.

(2) Written examination elements 3, 1, 2, and 4.

(b) *Radiotelephone Second Class Operator License.* (1) Ability to transmit and receive spoken messages in English.

(2) Written examination elements 3, 1, and 2.

(c) *Marine Radio Operator Permit.* (1) Ability to transmit and receive spoken messages in English.

(2) Written examination elements 1 and 2 (marine version).

(d) *Radiotelegraph First Class Operator License.* (1) Ability to transmit and receive spoken messages in English.

---

[4] *See First Report and Order in Docket 20561,* FCC 77-205, 63 FCC 2d 956 (1977) at n. 19.

[5] Given the uncertainty surrounding the registration obligation we have clarified today, we do not anticipate enforcement action against community units within the scope of this *Order* for failure to comply with Section 76.12, if such units file the required registration statement within 60 days of the effective date of this *Order.*

[1] The First Report & Order, Docket 20617, was released January 5, 1979 (44 FR 1733). The Second Report and Order was released November 16, 1979 (44 FR 66861). Docket 20617 involved a general review and revision of the FCC's radio operator licensing procedures.

[2] Section 318 of the Communications Act of 1934, as amended, allows the opertion of broadcast stations only by persons holding an operator license issued by the Commission.

V 45 / 153 AUG 6 80 UMI

(2) Transmitting and receiving code test of twenty-five (25) words per minute plain language and twenty (20) code groups per minute.

(3) Written examination elements 1, 2, 5, and 6.

(e) *Radiotelegraph Second Class Operator License.* (1) Ability to transmit and receive spoken messages in English.

(2) Transmitting and receiving code test of twenty (20) words per minute plain language and sixteen (16) code groups per minute.

(3) Written examination elements 1, 2, 5, and 6.

(f) *Radiotelegraph Third Class Operator Permit.* (1) Ability to transmit and receive spoken messages in English.

(2) Transmitting and receiving code test of twenty (20) words per minute plain language and sixteen (16) code groups per minute.

(3) Written examination elements 1, 2, and 5.

(g) *Restricted Radiotelephone Operator Permit.* No oral or written examination is required for this permit. In lieu thereof, applicants will be required to certify in writing to a declaration which states that the applicant has need for the requested permit; can receive and transmit spoken messages in English; can keep at least a rough written log in English or in some other language in general use that can be readily translated into English; is familiar with the provisions of treaties, laws, and rules and regulations governing the authority granted under the requested permit; and understands that it is his responsibility to keep currently familiar with all such provisions.

6. Section 13.25 is revised to read as follows:

§ 13.25 New class, additional requirements.

The holder of a first, second and third class license who applied for another license will be required to pass only the added examination requirements for the new class license. Provided that the holder of a radiotelegraph third class operator permit who takes an examination for a radiotelegraph second class operator license more than one year after the issuance date of the third class permit will also be required to pass the code test prescribed therefor:

7. Section 13.26 is revised to read as follows:

§ 13.26 Cancelling and issuing new licenses.

If the holder of a license qualifies for a new license as shown in the following table, the license held will be cancelled upon issuance of the new license:

New license issued	License to be cancelled
Radiotelegraph First Class Operator License.	Radiotelegraph Second or Third Class Operator License, Restricted Radiotelephone Operator Permit.
Radiotelegraph Second Class Operator License.	Radiotelegraph Third Class Operator Permit, Restricted Radiotelephone Operator Permit.
Radiotelegraph Third Class Operator Permit.	Restricted Radiotelephone Operator Permit.
Radiotelephone First Class Operator License.	Radiotelephone Second or Third Class Operator License, Restricted Radiotelephone Operator Permit, Marine Radio Operator Permit.
Radiotelephone Second Class Operator License.	Radiotelephone Third Class Operator Permit, Restricted Radiotelephone Operator Permit, Marine Radio Operator Permit.
Marine Radio Operator Permit.	Radiotelephone Third Class Operator Permit.

8. Section 13.27 is revised to read as follows:

§ 13.27 Eligibility for re-examination.

An applicant who fails an examination element, including a code test element, will be ineligible for 2 months to take an examination for any class of license requiring that element. Examination elements will be graded in the order listed (see § 13.22), and an applicant may, without further application, be issued the class of license for which he qualifies.

Note.—A month after date is the same day of the following month, or if there is no such day, the last day of such month. This principle applies for other periods. For example, in the case of the 2 month period to which this note refers, an applicant examined December 1 may be re-examined February 1, and an applicant examined December 29, 30, or 31 may be re-examined the last day of February while one examined February 28 may be re-examined April 28.

9. In § 13.28, headnote and text are revised to read as follows:

§ 13.28 License renewals.

(a) Restricted Radiotelephone Operator Permits issued to U.S. citizens, citizens of American Samoa, and Trust Territory Citizens are issued for the lifetime of the holder and need not be renewed.

(b) Other licenses issued for five year periods may be renewed upon proper application. There are no service or examination requirements for renewals.

(c) The Radiotelephone Third Class Operator Permit will not be renewed as such. Persons holding this permit may be issued a Marine Radio Operator Permit and a Restricted Radiotelephone Operator Permit.

10. Section 13.61(i) is added to read as follows:

§ 13.61 Operating authority.

* * * * *

(i) *Marine Radio Operator Permit.* Any station except:

(A) Stations transmitting telegraphy by any type of the Morse Code, or

(B) AM, FM, TV and International Broadcast Stations.

(C) Class I–B coast stations at which the power is authorized to exceed 250 watts carrier power or 1,000 watts peak envelope power, or

(D) Class II–B or Class III–B coast stations, other than those in Alaska, at which the power is authorized to exceed 250 watts carrier power or 1,000 watts peak envelope power, or

(E) Ship stations or aircraft stations at which the installation is not used solely for telephony, direct-printing or at which the power is more than 250 watts carrier power or 1,000 watts peak envelope power: Provided, That (*1*) such operator is prohibited from making any adjustments that may result in improper transmitter operation, and (*2*) the equipment is so designed that the stability of the frequencies of the transmitter is maintained by the transmitter itself within the limits of tolerance specified by the station license, and none of the operations necessary to be performed during the course of normal rendition of the service of the station may cause off-frequency operation or result in any unauthorized radiation, and (*3*) any needed adjustments of the transmitter that may affect the proper operation of the station are regularly made by or under the immediate supervision and responsibility of a person holding a first or second class commercial radio operator license, either radiotelephone or radiotelegraph as may be appropriate for the class of station involved (as determined by the scope of the authority of the respective licenses as set forth in paragraphs (a), (b), (e), and (f) of this section and § 13.62), who shall be responsible for the proper functioning of the station equipment, and (*4*) in the case of ship radiotelephone or aircraft radiotelephone stations when the power in the antenna of the unmodulated carrier wave is authorized to exceed 100 watts, any needed adjustments of the transmitter that may affect the proper operation of the station are made only by or under the immediate supervision and responsibility of an operator holding a first or second class radiotelegraph or radiotelephone license, who shall be responsible for the proper functioning of the station equipment.

11. Section 13.62(c) is amended to read as follows:

§ 13.62 Special privileges.

* * * * *

(c) The holder of Radiotelephone or Radiotelegraph First, Second, and Third Class Licenses, or the holder of a Restricted Radiotelephone Operator Permit may perform routine transmitter operating duties at any AM, FM, or TV broadcast station. However, if the operator holds a license other than a First Class Radiotelephone Operator License, only such duties as set forth in paragraph (d) of this Section may be performed, under the following conditions and restrictions:

(1) The licensee of the station has fully instructed the operator in the performance of all transmitter adjustments described in paragraph (d) and in all other required operator duties such as the reading of meters and making of log entries.

(2) The licensee of the broadcast station has posted at each operating position step-by-step instructions for all transmitter adjustments and operating procedures which duty operators, employed under the provisions of this paragraph, are required to perform. Also posted must be a table or chart of the limiting values of transmission system operating parameters that are required to be observed and logged.

(3) The emissions of the station must be terminated whenever the transmitting system is observed operating beyond the posted limiting values or in any other manner inconsistent with the rule or station authorization when the adjustments listed in paragraph (d) are ineffective in correcting the improper operation.

* * * * *

PART 81—STATIONS ON LAND IN THE MARITIME SERVICES AND ALASKA-PUBLIC FIXED STATIONS

Part 81 of the FCC Rules and Regulations is amended as follows:

1. Section 81.151(a) and headnote are revised to read as follows:

§ 81.151 Graded values of commercial operator licenses.

(a) The classes of commercial radio operator authorizations are arranged in order of descending value for the purposes of this part, as follows:

T–1, Radiotelegraph First Class Operator License.
T–2, Radiotelegraph Second Class Operator License.
P–1, Radiotelephone First Class Operator License.
P–2, Radiotelephone Second Class Operator License.
T–3, Radiotelegraph Third Class Operator Permit.
P–3, Radiotelephone Third Class Operator Permit.
MP, Marine Radio Operator Permit.
RP, Restricted Radiotelephone Operator Permit.

2. Section 81.152(d) is revised to read as follows:

§ 81.152 Operator required.

* * * * *

	Minimum operator authorization
(d) Description of station:	
Public coast telegraph, all classes, except:	T–2
A1 Morse under supervision of T1 or T2.	T–3
NB–DP under supervision of T1 or T2.	T–3, P–3, MP
Coast telephone, all classes, except in Alaska:	
Exceeds 250 watts carrier power or 1,500 watts peak envelope power.	T–2 or P–2
250 watts or less carrier power or 1,500 watts or less peak envelope power operating on frequencies below 30 MHz.	T–3, P–3, MP
250 watts or less carrier power, or 1,500 watts or less peak envelope power operating on frequencies above 30 MHz.	RP
Coast telephone, in Alaska:	
Exceeds 250 watts carrier power, or 1,500 watts peak envelope power, Class I station.	T–2, or P–2
Exceeds 250 watts carrier power, or 1,500 watts peak envelope power, Class II or Class III station.	T–3, P–3, MP
250 watts or less carrier power, or 1,500 watts or less peak envelope power, all classes.	RP
Marine fixed, except in Alaska	RP
Marine fixed, in Alaska	RP
Marine utility coast	RP
Shipyard base	RP

* * * * *

3. Section 81.154(a), introductory text, is revised to read as follows:

§ 81.154 Limitations applicable to commercial radio operator permits.

(a) With respect to any station subject to this part which the holder of a Radiotelegraph or Radiotelephone Third Class Operator Permit, a Marine Radio Operator Permit, or a Restricted Radiotelephone Operator Permit may operate, the following provisions shall apply:

* * * * *

PART 83—STATIONS ON SHIPBOARD IN THE MARITIME SERVCIES

Part 83 of the FCC Rules and Regulations is amended as follows:

1. Section 83.151(a) is revised to read as follows:

§ 83.151 Graded values of commercial radio operator authorizations.

(a) The classes of commercial radio operator authorizations are arranged in order of descending value for the purposes of this part, as follows:

T–1, Radiotelegraph First Class Operator License.
T–2, Radiotelegraph Second Class Operator License.
P–1, Radiotelephone First Class Operator License.
P–2, Radiotelephone Second Class Operator License.
T–3, Radiotelegraph Third Class Operator Permit.
P–3, Radiotelephone Third Class Operator Permit.
MP, Marine Radio Operator Permit.
RP, Restricted Radiotelephone Operator Permit.

2. Section 83.155 (d) and (e) are revised to read as follows:

§ 83.155 Operator(s) required by Title III of Communications Act of 1934.

* * * * *

(d) Each cargo ship of the United States which, in accordance with Part II of Title III of the Communications Act, is equipped with a radiotelephone station shall for distress and safety purposes carry at least one qualified operator. Where the power of the station does not exceed 250 watts carrier power for A3 emission, or 1000 watts peak envelope power for A3A, A3H and A3J emissions, such operator shall hold a Marine Radio Operator Permit, a Radiotelephone Third Class Operator Permit, or a higher class of operator authorization. Where the power of the station exceeds 250 watts carrier power for A3 emission, or 1000 watts peak envelope power for A3A, A3H and A3J emissions such operator shall, as a minimum, hold a Radiotelephone Second Class Operator License.

(e) Each vessel of the United States transporting more than six passengers for hire, which in accordance with Part III of Title III of the Communications Act is equipped with a radiotelephone installation, shall for safety purposes carry at least one qualified operator. Where the power of the station does not exceed 250 watts carrier power or 1,500 watts peak envelope power, such operator shall hold a Marine Radio Operator Permit, a Radiotelephone Third Class Operator Permit, or a higher class of operator authorization. Where the power of the station exceeds 250 watts carrier power or 1,500 watts peak envelope power, such operator shall, as a minimum, hold a Radiotelephone Second Class Operator License.

3. Section 83.156(b)(3) is revised to read as follows:

V 45 / 153 AUG 6 80 UMI

§ 83.156 Operator(s) required by the Safety Convention.

* * * * *

(b) * * *

(3) Where the power of the station does not exceed 250 watts carrier power for A3 emission, or 1000 watts peak envelope power for A3A, A3H and A3J emissions such operator shall hold a Marine Radio Operator Permit, a Radiotelephone Third Class Operator Permit, or a higher class of operator authorization. Where the power of the station exceeds 250 watts carrier power for A3 emission or 1000 watts peak envelope power for A3A, A3H and A3J emissions such operator shall, as a minimum, hold a Radiotelephone Second Class Operator License.

4. Section 83.157(a) is revised to read as follows:

§ 83.157 Licensed operators required by Great Lakes Radio Agreement.

(a) For the purpose of complying with Article VII, paragraph 1 of the Great Lakes Radio Agreement, there shall be on board each United States vessel when underway and subject to the Great Lakes Radio Agreement, as an officer or member of the crew, at least one person who shall hold a Marine Radio Operator Permit, a Radiotelephone Third Class Operator Permit, or higher class of authorization.

* * * * *

5. Section 83.159 is revised to read as follows:

§ 83.159 Operator requirements for noncompulsory stations.

Description of station:	Minimum Operator Authorization
Ship telegraph, except direct-printing	T-2
Ship direct-printing telegraph	P-3, MP
Ship telephone, more than 250 watts carrier power or 1,000 watts peak envelope power.	P-2
Ship telephone, not more than 250 watts carrier power or 1,000 watts peak envelope power.	P-3, MP
Ship telephone, not more than 100 watts carrier power or 400 watts peak envelope power.	RP
Marine-utility	RP
Ship radiolocation-test, using radar only.	P-2[1]
Ship earth station	RP

[1] With ship radar endorsement.

6. Section 83.160(a), introductory text, is revised to read as follows:

§ 83.160 Limitations applicable to commercial radio operator permits.

(a) With respect to any station subject to this part which the holder of a Radiotelegraph or Radiotelephone Third Class Operator Permit, a Marine Radio Operator Permit, or a Restricted Radiotelephone Operator Permit may operate, the following provisions shall apply:

* * * * *

PART 87—AVIATION SERVICES

Part 87 of the FCC Rules and Regulations is amended as follows.

1. Section 87.133(a)(1), introductory text, is revised to read as follows:

§ 87.133 General operator requirements.

(a) * * *

(1) Only a person holding a Marine Radio Operator Permit or a third class or higher operator permit shall operate aircraft stations.

* * * * *

2. Section 87.136(a) is revised to read as follows:

§ 87.136 Operation of transmitter controls.

(a) Operation of the station by the holder of a Radiotelephone or Radiotelegraph Third Class Operator Permit, a Marine Radio Operator Permit, or a Restricted Radiotelephone Operator Permit shall be subject to the condition that the operation of the transmitter shall require only the use of simple external switching devices, excluding all manual adjustment of frequency determining elements, and the stability of the frequencies shall be maintained by the transmitter itself within the limits of tolerance specified by § 87.65 or the station license. In addition, when using an aircraft radio station on maritime mobile service frequencies the carrier power of the transmitter shall not exceed 250 watts (emission A3) or 1000 watts (emission A3A, A3H, A3J).

* * * * *

3. Section 87.139(b)(2) is revised to read as follows:

§ 87.139 Operator licenses not required for certain operations.

* * * * *

(b) * * *

(2) Operation by an unlicensed person shall be confined to transmitters which may be operated by the holder of a Marine Radio Operator Permit or a third class or a Restricted Permit as specified in § 87.136(a).

Note.—Whenever the term "license" is used generally to denote an operator authorization it includes "permit".

INTERSTATE COMMERCE COMMISSION

49 CFR Parts 1002, 1003, 1045A, 1056, 1062, 1100, 1130, 1150

[Ex Parte No. 55; Sub-No. 43]

Rules Governing Applications for Operating Authority

AGENCY: Interstate Commerce Commission.

ACTION: Correction to Notice of interim rules and request for comments.

SUMMARY: At 45 FR 45534, July 3, 1980, there appeared a notice implementing the Motor Carrier Act of 1980 which revised the rules governing the application process for motor carriers entering the trucking field. In that notice, on page 45538, column 2, last paragraph, 2 lines of text were inadvertently omitted. To be inserted after the 6th line of that paragraph are the following lines: "retroactive effect unless they clearly provide for such effect. Nothing in the legislative history of the Act".

BILLING CODE 7035-01-M

49 CFR Part 1033

[3rd Rev. S.O. 1474]

Various Railroads Authorized To Use Tracks and/or Facilities of Chicago, Milwaukee, St. Paul and Pacific Railroad Company, Debtor, (Richard B. Ogilvie, Trustee)

Decided: July 29, 1980.

AGENCY: Interstate Commerce Commission.

ACTION: Third Revised Service Order No. 1474

SUMMARY: Pursuant to Section 122 of the Rock Island Transition and Employee Assistance Act, Public Law 96-254, the Commission is authorizing various railroads to provide interim service over Chicago, Milwaukee, St. Paul and Pacific Railroad Company, Debtor, (Richard B. Ogilvie, Trustee), (MILW) and to use such tracks and facilities as are necessary for that operation.

In view of the urgent need for continued service over MILW's lines pending the implementation of long-range solutions, this order permits carriers, previously providing service under various individual service orders to operate under authority of a single order which appendix describes their operations, and to continue to provide service to shippers which would otherwise be deprived of essential rail transportation.

In particular, this order grants authority to Burlington Northern Inc. In Sioux City, Iowa, between milepost 509.77 and milepost 512.62, a distance of approximately 2.85 miles.

EFFECTIVE DATE: 12:01 a.m., July 31, 1980, and continuing in effect until 11:59 p.m., September 30, 1980, unless modified, amended or vacated by order of this Commission.

FOR FURTHER INFORMATION CONTACT:
M. F. Clemens, Jr. (202) 275-7840.

Pursuant to Section 122 of the Rock Island Transition and Employee Assistance Act, Public Law 96-254, the Commission is authorizing various railroads to provide interim service over Chicago, Milwaukee, St. Paul and Pacific Railroad Company, Debtor, (Richard B. Ogilvie, Trustee), (MILW) and to use such tracks and facilities as are necessary for that operation.

In view of the urgent need for continued service over MILW's lines pending the implementation of long-range solutions, this order permits carriers, previously providing service under various individual service orders to operate under authority of a single order which appendix describes their operations, and to continue to provide service to shippers which would otherwise be deprived of essential rail transportation.

Third Revised Service Order No. 1474, is revised by granting authority to the Burlington Northern Inc., item 15, permitting an interim operation over lines in the state of Iowa.

It is the opinion of the Commission that an emergency exists requiring that the railroads listed in the attached appendix be authorized to conduct operations, also identified in the attachment, using MILW tracks and/or facilities; that notice and public procedure are impracticable and contrary to the public interest; and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered,

§ 1033.1474 Third Revised Service Order No. 1474.

(a) Various railroads authorized to use tracks and/or facilities of the Chicago, Milwaukee, St. Paul and Pacific Railroad Company, Debtor, (Richard B. Ogilvie, Trustee). Various railroads authorized to use tracks and/or facilities of the Chicago, Milwaukee, St. Paul and Pacific Railroad Company (MILW), as listed in Appendix A to this order, in order to provide interim service over the MILW.

(b) The Trustee shall permit the affected carriers to enter upon the property of the MILW to conduct service essential to these interim operations.

(c) The Trustee will be compensated on terms established between the Trustee and the affected carrier(s); or upon failure of the parties to agree as, hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by Section 122(a) Public Law 96-254.

(d) Interim operators, authorized in Appendix A to this order, shall, within fifteen (15) days of its effective date, notify the Railroad Service Board of the date on which interim operations were commenced on the expected commencement date of those operations.

(e) Interim operators, authorized in Appendix A to this order, shall, within thirty days of commencing operations under authority of this order, notify the MILW Trustee of those facilities they believe are necessary or reasonably related to the authorized operations.

(f) During the period of these operations over the MILW lines, interim operators shall be responsible for preserving the value of the lines, associated with each interim operation, to the MILW estate, and for performing necessary maintenance to avoid undue deterioration of lines and associated facilities.

(g) Any operational or other difficulty associated with the authorized operations shall be resolved through agreement between the affected parties or, failing agreement, by the Commission's Railroad Service Board.

(h) Any rehabilitation, operational, or other costs related to the authorized operations shall be the sole responsibility of the interim operator incurring the costs, and shall not in any way be deemed a liability of the United States Government.

(i) *Application.* The provisions of this order shall apply to intrastate, interstate and foreign traffic.

(j) *Rate applicable.* Inasmuch as this operation by interim operators over tracks previously operated by the MILW is deemed to be due to carrier's disability, the rates applicable to traffic moved over these lines shall be the rates applicable to traffic routed to, from, or via these lines which were formerly in effect on such traffic when routed via MILW, until tariffs naming rates and routes specifically applicable become effective.

(k) In transporting traffic over these lines, all interim operators involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the divisions of the rates of transportation applicable to that traffic. Divisions shall be, during the time this order remains in force, those voluntarily agreed upon by and between the carriers; or upon failure of the carriers to so agree, the divisions shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(l) *Employees*—In providing service under this order interim operators, to the maximum extent practicable, shall use the employees who normally would have performed work in connection with the traffic moving over the lines subject to this Service Order.

(m) *Effective date.* This order shall become effective at 12:01 a.m., July 31, 1980.

(n) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., September 30, 1980, unless otherwise modified, amended, or vacated by order of this Commission.

This action is taken under the authority of 49 U.S.C. 10304-10305 and Section 122, Public Law 96-254.

This order shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms of that agreement and upon the American Short Line Railroad Association. Notice of this order shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing a copy with the Director, Office of the **Federal Register.**

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington and John H. O'Brien.

Agatha L. Mergenovich,
Secretary.

Appendix A

MILW Lines Authorized To Be Operated by Interim Operators

1. Chicago and North Western Transportation Company (CNW):
   A. At DeKalb, Illinois.
   B. At Appleton, Wisconsin.
   C. At Lake Preston, Mitchell, and Sioux Falls, South Dakota, and from Wolsey to but not including Aberdeen, South Dakota.
   D. At Miloma and Montgomery, Minnesota.
   E. Between Jefferson and Marathon, Jefferson and Waukee, and Manning and Huxley, Iowa.
   F. Between Merriam Park and Norwood, Minnesota.
2. Illinois Central Gulf Railroad Company (ICG):
   A. Between Cedar Rapids and Louisa, Iowa, including Marion, Iowa.
   B. In Sioux City, Iowa, from Pearl Street west approximately 1.5 miles to Tri-View Industrial area, and from Court Street to Virginia Street.

3. Seattle and North Coast Railroad Company (SNC):
A. Between Port Angeles and Port Townsend, Washington, including Pier 27 and associated track in Seattle, Washington.
4. Cedar Rapids and Iowa City Railway Company (CIC):
A. Between Middle Amana and Cedar Rapids, Iowa.
B. Over the Chicago, Rock Island and Pacific Railroad Company trackage—4th Street Corridor—in Cedar Rapids, Iowa, originally operated by MILW under trackage rights.
C. Over certain terminal and industry tracks in Cedar rapids, Iowa, between milepost 86 and milepost 87 in order to serve the 6th Street Power Station.
5. Escanaba and Lake Superior Railroad Company (ELS):
A. Between Iron Mountain, Michigan, and Green Bay, Wisconsin.
6. Consolidated Rail Corporation (CR):
A. At Momence, Illinois.
7. Des Moines Union Railway Company (DMU):
A. Between Des Moines (milepost 0) and Clive (milepost 8.5), Iowa; and between Clive (milepost 0) and Grimes, Iowa, (milepost 7), a total of 15.5 miles.
8. The La Salle and Bureau County Railroad Company (LSBC):
A. From Mendota, Illinois, (milepost 69.5) to Ladd, Illinois, (milepost 82.1), a total of 12.6 miles.
9. Chicago, Madison and Northern Railway Company (CMN):
A. Between Sparta, Wisconsin, (milepost 2.5) and Viroqua, Wisconsin, (milepost 34.7), a distance of approximately 32.2 miles.
B. Between Janesville, Wisconsin, (milepost 10.0) and Mineral Point, Wisconsin, (milepost 90.7), a distance of approximately 80.7 miles.
10. Wisconsin Central Railroad Company (WCRC):
A. Between Waukesha, Wisconsin, (milepost 20.5) and Milton Junction, Wisconsin, (milepost 61.5), a distance of approximately 41.0 miles.
11. Pend Oreille Valley Railroad, Inc., (POV):
A. Between Newport, Washington, (milepost 43.6) and Metaline Falls, Washington, (milepost 104.7), a distance of approximately 61.1 miles.
12. St. Maries River Railroad Company (SMRR):
A. Between St. Maries and Bovill, Idaho, the Bovill Branch, a distance of approximately 52 miles; and between St. Maries and Plummer, Idaho, a distance of approximately 19 miles.
13. Chippewa River Railroad Company (CRRC):
A. Between Eau Claire, Wisconsin, and Durand, Wisconsin, a distance of approximately 33 miles.
14. Wisconsin and Southern Railroad Company (WSR):
A. The following lines in the state of Wisconsin: (1) North Milwaukee (milepost 93.72) to Oshkosh (milepost 187.64).
(2) Horicon (milepost 140.27) to Cambia (milepost 165.7).
(3) Granville (milepost 100.5) to Menomonee Falls (milepost 104).
(4) Iron Ridge (milepost 133) to Mayville (milepost 140).
(5) Beaver Dam Junction (milepost 148.5) to Beaver Dam (milepost 150.5).
(6) Fox Lake Junction (milepost 154.5) to Fox Lake (milepost 156.7).
(7) Brandon (milepost 161.15) to Markesan (milepost 172.7).
15. Burlington Northern Inc. (BN) [1]
A. In Sioux City, Iowa, between milepost 509.77 and milepost 512.62, a distance of approximately 2.85 miles.

BILLING CODE 7035-01-M

49 CFR Part 1033

[Service Order No. 1480]

Distribution of Freight Cars

AGENCY: Interstate Commerce Commission.

ACTION: Service Order No. 1480.

SUMMARY: This order restates the provisions of 19th Revised Service Order No. 1234, which provided for the substitution of smaller cars for larger cars of any type when the larger cars were unavailable. This order is in effect for (60) sixty days to provide carriers with sufficient time to modify tariffs to incorporate the order's provisions.

EFFECTIVE DATE: 12:01 a.m., August 1, 1980, and continuing in effect until 11:59 p.m., September 30, 1980.

FOR FURTHER INFORMATION CONTACT: M. F. Clemens, Jr., (202) 275-7840.

SUPPLEMENTARY INFORMATION:

Decided: July 31, 1980.

There is a shortage of high capacity covered hopper cars for transporting shipments of grain, grain products, and soy beans, caused by certain tariff provisions specifying the minimum quantities that must be loaded into cars offered to the shippers. At the same time smaller cars, suitable except as to capacity, are available for transporting these products. The inability of the carriers and shippers to utilize the smaller capacity cars in place of the larger cars required by tariff provisions is resulting in great economic loss to both shippers and carriers.

Service Order No. 1234 contained provisions which permitted railroads to substitute a sufficient number of smaller cars of any car type for larger cars ordered and which are unavailable to transport various commodities.

This order was based on a continuing freight car shortage of certain type cars, and the inability of carriers to provide the larger cars as ordered and as required by tariffs.

This order provides relief previously granted by provisions of Service Order No. 1234, which was vacated on July 31, 1980. We have concluded that the provisions contained in Service Order No. 1234, and restated in this order, should be resolved by appropriate tariff modifications. This order will remain in effect for (60) sixty days to provide the time necessary for tariffs to be amended to provide the relief herein granted.

In the opinion of the Commission, an emergency exists requiring immediate action to modify existing rules, regulations and practices with respect to car service to secure maximum utilization of the available supply of freight cars and to alleviate shortages of cars. Accordingly, the Commission finds that notice and public procedure are impracticable and contrary to the public interest, and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered,

§ 1033.1480 Distribution of Freight Cars.

(a) Subject to the concurrence of the carrier and the shipper, carriers may substitute a sufficient number of smaller cars of any car type for larger cars ordered and which are unavailable to transport shipments of numerous commodities, regardless of tariff requirements specifying minimum cubic or weight carrying capacity. (See exceptions).

Exception. This order shall not apply to shipments subject to tariff provisions requiring the use of twenty-five or more per shipment.

Exception. This order shall not apply to shipments subject to tariff provisions which require that cars be furnished by the shipper.

(b) *Rates and Minimum Weights Applicable.* The rates to be applied and the minimum weights applicable to shipments for which cars smaller than those ordered have been furnished and loaded as authorized by Section (a) of this order shall be the rates and minimum weights applicable to the larger cars ordered.

(c) *Billing to be Endorsed.* The carrier substituting smaller cars for larger cars as authorized by Section (a) of this order shall place the following endorsement on the bill of lading and on the waybills authorizing movement of the car:

"Car of ( ) cu. ft. and/or of ( ) lbs. or greater capacity ordered. Smaller cars furnished authority ICC Service Order No. 1480.

(d) *Concurrence of Carrier and Shipper Required.* Smaller cars shall not be furnished in lieu of cars of greater capacity without the consent of the carrier and shipper.

[1] Added.

(e) *Exceptions.* Exceptions to this order may be authorized to railroads by the Railroad Service Board, Washington, D.C. 20423. Requests for such exception must be submitted in writing, or confirmed in writing, and must clearly state the points at which such exceptions are requested and the reason therefor.

(f) *Rules and Regulations Suspended.* The operation of all rules, regulations, or tariff provisions is suspended insofar as they conflict with the provisions of this order.

(g) *Application.* The provisions of this order shall apply to intrastate, interstate and foreign commerce.

(h) *Effective date.* This order shall become effective at 12:01 a.m., August 1, 1980.

(i) *Expiration.* The provisions of this order shall remain in effect until September 30, 1980.

This action is taken under the authority of 49 U.S.C. 10304-10305 and 11121-11126.

This order shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms of that agreement and upon the American Short Line Railroad Association. Notice of this order shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing a copy with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington and John H. O'Brien.

Agatha L. Mergenovich,
Secretary.

BILLING CODE 7035-01-M

49 CFR Part 1033

[Directed Service Order No. 1398]

Kansas City Terminal Railway Co.—Directed To Operate Over—Chicago, Rock Island & Pacific Railroad Co., Debtor (William M. Gibbons, Trustee); Modification of Cost Data Submission Requirements for Directed Service Operations

Decided: July 29, 1980.

AGENCY: Interstate Commerce Commission.

ACTION: Modification of cost data submission requirements.

SUMMARY: In Directed Service Order No. 1398, pursuant to 49 U.S.C. § 11125, we directed the Kansas City Terminal Railway Company (KCT-DRC) to perform directed operations over the lines of the Chicago, Rock Island & Pacific Railroad Company, Debtor (William M. Gibbons, Trustee) (Rock Island or RI). Our regulations at 49 CFR § 1126.2 set forth the cost form to be filed by directed rail carriers to justify reimbursement for directed service. The form specified in our regulations is not designed to apply to directed service as performed by KCT-DRC. Therefore, we are waiving the requirements of 49 CFR 1126.2 for KCT-DRC's operations over Rock Island under DSO No. 1398 and substituting more applicable reporting requirements.

DATES: This decision shall be effective on August 4, 1980.

FOR FURTHER INFORMATION CONTACT: Richard J. Schiefelbein, (202) 275-0826.

SUPPLEMENTARY INFORMATION: In September 1979, Rock Island's cash flow position became so severe as to prevent continuation of normal rail operations. Therefore, we issued Directed Service Order No. 1398 (44 FR 56343, Oct. 1, 1979) directing KCT-DRC to perform operations over Rock Island lines. KCT-DRC provided a management team which operated Rock Island during the period of directed service under DSO No. 1398. These operations were performed predominantly with Rock Island, rather than KCT-DRC, equipment and employees.

Under 49 U.S.C. § 11125(b)(5), KCT-DRC is entitled to federal payment providing reimbursement for losses incurred as a result of providing directed service, and a reasonable profit. The form for submission of cost data to justify reimbursement is set forth at 49 CFR 1126.2. This cost form is structured for directed service operations which would include a predominance of joint costs. Because of the significantly different nature of the KCT-DRC operations from the type of operations anticipated by our cost submission regulations, we will modify the reporting requirements for KCT-DRC for submission of cost data under DSO No. 1398.

In place of the cost form specified in 49 CFR § 1126.2, KCT-DRC may submit the following reports and statements to justify reimbursement for operations under DSO No. 1398:

1. ICC Quarterly Report of Revenues, Expenses, and Income—Railroads (Form RE&I, 49 CFR 1243.1);

2. ICC Quarterly Condensed Balance Sheet—Railroads (Form CBS, 49 CFR 1243.2); and

3. Source and Application of Funds Statement (Schedule 240, "Statement of Changes in Financial Position" required in the Annual Report R-1).

These reports should cover directed service operations only (not including normal KCT operations) for the directed service period of railroad operations, and related accounting and administrative functions for the period from October 5, 1979, through July 31, 1980. Additionally, KCT-DRC should report estimated costs of all open and unfinished business, or unsettled amounts, including allowable interest and allowance for profit.

This action will not significantly affect either the quality of the human environment or the conservation of energy resources.

It is ordered:

(1) The requirements of 49 CFR 1126.2 are waived with respect to KCT-DRC operations under DSO No. 1398. DSO No. 1398 is modified to include the cost data submission requirements set forth in this decision.

(2) This decision shall be effective on August 4, 1980.

By the Commission, Chairman Gaskins, Vice Chairman Gresham, Commissioners Stafford, Clapp, Trantum, Alexis, and Gilliam.

Agatha L. Mergenovich,
Secretary.

BILLING CODE 7035-01-M

49 CFR Parts 1309 and 1310

[Docket No. 37416]

Identification of Rates Filed Under Zone of Rate Freedom by Motor Common Carriers of Property and Freight Forwarders

AGENCY: Interstate Commerce Commission.

ACTION: Final rules.

SUMMARY: The Interstate Commerce Act, as amended by the Motor Carrier Act of 1980, permits motor common carriers of property and freight forwarders to reduce or increase rates within a 10 percent zone of rate freedom without investigation, suspension, revision, or revocation on the grounds that the changed rate is unreasonable because it is too high or too low. The Act requires that the carriers notify the Commission when they wish to have rates considered under this rate freedom.

This document establishes rules which will set forth the manner in which this notification will be made. The effect on the carriers and forwarders will be minimal since only a small amount of additional wording will be required on

the tariff publications and accompanying letters of transmittal.

EFFECTIVE DATE: August 6, 1980.

FOR FURTHER INFORMATION CONTACT: William P. Geisenkotter, Chief, Section of Tariffs, Bureau of Traffic, Interstate Commerce Commission, Washington, D.C. 20423, (202) 275–7739.

SUPPLEMENTARY INFORMATION: Section 10708 of Title 49, United States Code, was amended by the Motor Carrier Act of 1980 by adding a "Zone of Rate Freedom for Motor Common Carriers of Property and Freight Forwarders" (Subsection (d)). Subsection (d)(1) reads as follows:

(d)(1) Notwithstanding any other provision of this title, the Commission may not investigate, suspend, revise, or revoke any rate proposed by a motor common carrier of property or freight forwarder on the grounds that such rate is unreasonable on the basis that it is too high or too low if—

(A) the carrier notifies the Commission that it wishes to have the rate considered pursuant to this subsection; and

(B) the aggregate of increases and decreases in any such rate is not more than 10 percent above the rate in effect one year prior to the effective date of the proposed rate, nor more than 10 percent below the lesser of the rate in effect on July 1, 1980 (or, in the case of any rate which a carrier first establishes after July 1, 1980, for a service not provided such carrier on such date, such rate on the date such rate first becomes effective), or the rate in effect one year prior to the effective date of the proposed rate.

In addition, for the first two years following the Motor Carrier Act, general rate increases obtained in the one-year period prior to the effective date of the proposed rate shall not be included except to the extent that such general rate increases exceed 5 percent of the rate in effect one-year prior to the effective date of the proposed rate.

It is therefore necessary that the Commission establish rules that will require carriers to furnish sufficient information to allow identification and analysis of rates, charges, and provisions filed under the zone of rate freedom. The adopted rules will accomplish this.

The rules will require carriers and freight forwarders filing rates, charges, or provisions which they wish considered under the zone of rate freedom provisions to show on their tariffs or amendments an appropriate statement. The rates, charges, or provisions must be identified. The carrier or freight forwarder will be required to certify in the letter of transmittal that the rates or provisions do not exceed the amount allowed by section 10708(d)(3) (A or B); and fall within the 10 percent zone; also, if the rate is more than 10 percent above the rate in effect one year earlier, to include in the statement whether the proposed rate has been subject to general rate increases during the previous year, what percent increase was taken, the bureau which published the increase, and the effective date. In addition, the letter of transmittal shall contain an appropriate statement identifying the number of the item (or page) and tariff containing the rate, charge, or provision in effect a year earlier or July 1, 1980 (or later), as appropriate. The letter shall also state that the rate, charge, or provision was independently established by an individual carrier.

The Commission does not believe this revision requires notice and comment rulemaking under section 553 of the Administrative Procedure Act (5 U.S.C. 553) because it merely establishes notification procedures mandated by Congress and thus is only a procedural and not a substantive rule. Indeed, this will impose a very minor burden on the carriers who will benefit over all from the zone of rate freedom.

This decision does not affect significantly either the quality of the human environment or energy resources.

It is ordered: 1. Chapter X of Title 49 of the Code of Federal Regulations is amended as set forth in the appendix below.

2. Notice of this decision will be given to the public by depositing a copy in the Office of the Secretary, Interstate Commerce Commission, Washington, D.C. 20423, for public inspection, and by delivering a copy to the Director, Office of the Federal Register as notice to all interested persons.

This decision is issued under authority of section 10762 of the Interstate Commerce Act, U.S.C. 10762, and under section 553 of the Administrative Procedure Act, 5 U.S.C. 553.

Decided: July 15, 1980.

By the Commission, Chairman Gaskins, Vice Chairman Gresham, Commissioners Stafford, Clapp, Trantum, Alexis and Gilliam.

Agatha L. Mergenovich,

Secretary.

PART 1309—TARIFFS AND CLASSIFICATIONS OF FREIGHT FORWARDERS

Part 1309 is amended by adding § 1309.8 as follows:

§ 1309.8 Zone of rate freedom.

(a) *Statement of carrier's intent required.* Each tariff, supplement, or loose-leaf page publishing a rate, charge, or provision which the freight forwarder wishes to have considered pursuant to the zone of rate freedom provisions of subsection (d) of section 10708 of Title 49, United States Code, shall indicate this by showing an appropriate statement. If a bound tariff or supplement, the statement shall be shown on the title page. Each rate, charge, or provision shall be identified. If the rates, charges, or provisions in a bound tariff or supplement are too numerous to be identified on the title page, identification shall be on the first printed page following the title page.

(b) *Letters of transmittal.* (1) The letter of transmittal accompanying each tariff, supplement, of loose-leaf page which contains a rate, charge, or provision which the freight forwarder wishes to have considered pursuant to the zone of rate freedom provisions of subsection (d) of section 10708 of Title 49, United States Code, shall indicate this by including an appropriate statement.

(2) If the application of the proposed rate, charge, or provision would result in an increase in charges, the letter shall state that the proposed increase in the aggregate is not more than 10 percent above that in effect 1 year prior to the effective date of the proposed increase.

(3) If the application of the proposed rate, charge, or provision would result in a reduction in charges, the letter shall state that the proposed reduction in the aggregate shall be no more than 10 percent below the lesser of that in effect on July 1, 1980 (or the date, if after July 1, 1980, on which a rate, charge, or provision first became effective for a service not provided by the freight forwarder on July 1, 1980), or that in effect 1 year prior to the effective date of the proposed reduction.

(4) The letter shall identify the number of the item (or page) and tariff in which the rate, charge, or provision may be found that was in effect 1 year prior to the effective date of the proposed or in effect July 1, 1980, or later, as appropriate.

(5) The letter shall also state that the rates or provisions were set independently and were not discussed with any other carriers. If published by a rate bureau, the letter shall state that the docketing and publishing of the rate or provision were done in compliance with its agreement regarding independent notice actions.

(6) The freight forwarder will also be required in the letter to certify that the rates or provisions do not exceed the amount allowed by section 10708 (d)(3) (A or B); and that the rates or provisions fall within the 10 percent zone; also, if the rate is more than 10 percent above the rate in effect one year earlier, to include in the statement whether the proposed rate has been subject to general rate increases during the previous year, what percent increase was taken, the bureaus which published the increase, and the effective date.

(Sec. 20, 24 Stat. 386, as amended; secs. 204, as amended, 217, as amended, 219, as amended, 49 Stat. 546, as amended, 560, as amended, 563, as amended, secs. 403, 405, 413, 56 Stat. 285, 287, 295; 49 U.S.C. 20, 304, 317, 319, 1003, 1005, 1013)

PART 1310—FREIGHT RATE TARIFFS AND CLASSIFICATIONS OF MOTOR COMMON CARRIERS

Section 1310.1(c) is amended by adding subparagraph (6) to paragraph (c) as follows:

§ 1310.1 Filing tariffs (Rule 1).

* * * * *

(c) * * *

(6)(i) The letter of transmittal accompanying each tariff publication which contains a rate, charge, or provision which the carrier wishes to have considered pursuant to the zone of rate freedom provisions of subsection (d) of section 10708 of Title 49, United States Code, shall indicate this by including an appropriate statement.

(ii) If application of the proposed rate, charge, or provision would result in an increase in charges, the letter shall state that the proposed increase in the aggregate is not more than 10 percent above that in effect 1 year prior to the effective date of the proposed increase.

(iii) If the application of the proposed rate, charge, or provision would result in a reduction in charges, the letter shall state that the proposed reduction in the aggregate shall be no more than 10 percent below the lesser of that in effect on July 1, 1980 (or the date, if after July 1, 1980, on which a rate, charge, or provision first became effective for a service not provided by the carrier on July 1, 1980), or that in effect 1 year prior to the effective date of the proposed reduction.

(iv) The letter shall identify the number of the item (or page) and tariff in which the rate, charge, or provision may be found that was in effect 1 year prior to the effective date of the proposed reduction or in effect July 1, 1980, or later, as appropriate.

(v) The letter shall also state that the rates or provisions were set independently and were not discussed with any other carriers. If published by a rate bureau, the letter shall state that the docketing and publishing of the rate or provision were done in compliance with its agreement regarding independent notice actions.

(vi) The carrier will also be required in the letter to certify that the rates or provisions do not exceed the amount allowed by section 10708 (d)(3) (A or B) and that the rates or provisions fall within the 10 percent zone; also, if the rate is more than 10 percent above the rate in effect one year earlier, to include in the statement whether the proposed rate has been subject to general rate increases during the previous year, what percent increase was taken, the bureau which published the increase, and the effective date.

* * * * *

§ 1310.4(f) is amended by adding subparagraph (6) to paragraph (f) as follows:

§ 1310.4 Form, size, and printing (Rule 4).

* * * * *

(f) * * *

(6) Each loose-leaf page (original or revised) publishing a rate, charge, or provision which the carrier wishes to have considered pursuant to the zone of rate freedom provisions of subsection (d) of section 10708 of Title 49, United States Code, shall indicate this by showing an appropriate statement. The rate, charge, or provision shall be identified.

* * * * *

§ 1310.5 is amended by adding paragraph (m) as follows:

§ 1310.5 Title page original tariffs (Rule 5).

* * * * *

(m) *Zone of rate freedom statement.* Each tariff (or supplement) publishing a rate, charge, or provision which the carrier wishes to have considered pursuant to the zone of rate freedom provisions of subsection (d) of section 10708 of Title 49, United States Code, shall indicate this by showing an appropriate statement on the title page. Each rate, charge, or provision shall be identified. If the rates, charges, or provisions are too numerous to be identified on the title page, identification shall be on the first printed page following the title page.

(Secs. 204, 217, 49 Stat. 546, as amended, 560, as amended, sec. 210a, an amended, 52 Stat. 1238, as amended, 49 U.S.C. 304, 317, 310a)

[FR Doc. 80-23662 Filed 8-5-80; 8:45 am]

BILLING CODE 7035-01-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 32

National Wildlife Refuges in Mich., Ohio, Ill., Iowa, Minn., and Wis.

AGENCY: Fish and Wildlife Service.

ACTION: Special Regulations.

SUMMARY: Migratory game bird hunting on certain National Wildlife Refuges has been determined by the Director to be compatible with the objectives for which the areas were established, will utilize a renewable resource, and will provide additional recreational opportunity to the public.

DATES: Effective August 6, 1980, for the duration of the 1980–81 migratory game bird season. See individual refuge and respective State regulations for exact dates.

FOR FURTHER INFORMATION CONTACT: The appropriate Area Manager or Refuge Manager at the address or telephone number listed below:

John S. Popowski, Area Manager, U.S. Fish and Wildlife Service, 202 Manly Miles Building, 1405 S. Harrison Road, East Lansing, Michigan 48823. Telephone: (517) 337–6600. Responsible for the Seney, Shiawassee and Ottawa National Wildlife Refuges.

George G. P. Bekeris, Area Manager, U.S. Fish and Wildlife Service, 530 Federal Building and U.S. Court House, 316 North Robert Street, St. Paul, Minnesota 55101. Telephone: (612) 725–7641. Responsible for the Chautauqua, Crab Orchard, Mark Twain (Big Timber Division), Sherburne, Tamarac and Upper Mississippi River National Wildlife Refuges.

John R. Frye, Refuge Manager, Seney National Wildlife Refuge, Seney, Michigan 49883. Telephone: (906) 586–9851.

Robert S. Johnson, Refuge Manager, Shiawassee National Wildlife Refuge, 6975 Mower Road, RR No. 1, Saginaw, Michigan 48601. Telephone: (517) 777–5930 or (517) 777–5910.

Leland E. Herzberger, Refuge Manager, Ottawa National Wildlife Refuge, 14000 W. State Route 2, Oak Harbor, Ohio 43449. Telephone: (419) 898–0014.

Thomas S. Sanford, Refuge Manager, Chautauqua National Wildlife Refuge, RR No. 2, Havana, Illinois 62644. Telephone: (309) 535–2290.

Wayne D. Adams, Refuge Manager, Crab Orchard National Wildlife Refuge, P.O. Box J, Carterville, Illinois 62918. Telephone: (618) 997–3344.

Howard Lipke, Refuge Manager, Mark Twain National Wildlife Refuge, Great River Plaza, 311 N. Fifth Street, Suite 100, Quincy, Illinois 62301. Telephone: (217) 224–8580.

Ronald Papike, Refuge Manager, Sherburne National Wildlife Refuge, Route No. 2, Zimmerman, Minnesota 55398. Telephone: (612) 389–3323.

Omer N. Swenson, Refuge Manager, Tamarac National Wildlife Refuge,

V 45 / 153 AG 6 80 UMI

Rural Route, Rochert, Minnesota 56578. Telephone: (218) 847–4355.

Robert Howard, Refuge Manager, Upper Mississippi River Wildlife and Fish Refuge, 122 W. 2nd Street, Winona, Minnesota 55987. Telephone: (507) 452–4232.

SUPPLEMENTARY INFORMATION: Hunting migratory game birds on portions of the following refuges shall be in accordance with all applicable State and Federal regulations, subject to the additional special regulations and conditions as indicated. Portions of refuges which are open to migratory game bird hunting are designated by signs and/or delineated on maps. Special conditions applying to individual refuges and maps are available at refuge headquarters or from the respective Office of the Area Manager (addresses listed above).

The Refuge Recreation Act of 1962 (16 U.S.C. 460k) authorizes the Secretary of the Interior to administer such areas for public recreation as an appropriate incidental or secondary use only to the extent that it is practicable and not inconsistent with the primary objectives for which the area was established. In addition, the Refuge Recreation Act requires (1) that any recreational use permitted will not interfere with the primary purpose for which the area was established; and (2) that funds are available for the development, operation, and maintenance of the permitted forms of recreation.

The recreational use authorized by these regulations will not interfere with the primary purposes for which these National Wildlife Refuges were established. This determination is based upon consideration of, among other things, the Service's Final Environmental Statement on the Operation of the National Wildlife Refuge System published in November 1976. Funds are available for the administration of the recreational activities permitted by these regulations.

§ 32.12 Special regulations; hunting migratory game birds; for individual wildlife refuge areas.

Michigan

Seney National Wildlife Refuge

Public hunting of Woodcock and Wilson's Snipe (Jacksnipe) is allowed subject to the following special condition:

Hunting is permitted on 33,525 acres of the refuge designated as Area B from September 15 through November 12.

Shiawassee National Wildlife Refuge

The State of Michigan has established a quota harvest for the Saginaw County Goose Management Area of which the refuge is a part. The season will be closed early should the quota be reached.

Posting the area "Closed" is required and is done unilaterally by both the Service and the State.

Public hunting of *geese only* is permitted on areas comprising 1,350 acres subject to the following special conditions:

(1) Hunting shall be by federal permit and only from assigned blinds or pits. Blind assignments will be determined by drawings each day.

(2) Permit application cards for hunting from season opening (concurrent with State of Michigan) until the end of October must be sent to Shiawassee Refuge on or before September 15, 1980. Only successful applicants will be notified.

(3) For the month of November a daily public drawing will be held to determine who may hunt during that day. Applicants must be present for each days drawing and need not have a permit card to participate in the drawing for blind selection.

(4) Goose hunting will be on odd days only throughout the entire season.

(5) Only non-toxic steel shot will be permitted. The limit is 12 shells per hunter.

(6) Hunters may not have shotgun shells containing lead or other toxic shot in their possession.

(7) A blind rental fee of $2.00/hunter is required. Decoys can be rented for $1.00/dozen.

(8) After completion of the days hunt, all hunters must proceed to refuge headquarters for check-out and the submission of geese for examination.

Ohio

Ottawa National Wildlife Refuge

Public hunting of Canada, snow (including blue color phase) and white-fronted geese is permitted, on an area encompassing 640 acres, subject to the following special conditions:

(1) Hunting shall be by State permit and only from assigned blinds. Blind assignments will be determined by drawings.

(2) A fee of five dollars per hunter will be required for blind rental.

(3) No more than two persons per blind (permit holder and one guest) are permitted.

(4) Hunters must report to the check station at least one hour before legal shooting time.

(5) Each hunter may possess not more than 10 shells. Only nontoxic steel shot, sizes no larger than No. 1, will be permitted. Hunters may not have shotgun shells containing lead or other toxic shot in their possession.

(6) Hunters will be permitted to pursue and shoot downed geese only within 75 yards of their assigned blind.

(7) Hunting hours shall be from the legal opening time in the morning until 12 noon.

(8) All hunters must be out of their assigned blinds by 1:00 P.M.

(9) All hunters must report to the check station and submit their geese for examination by 2:00 P.M.

(10) The use of trained dogs to retrieve downed geese within the hunting area is permitted.

Illinois

Chautauqua National Wildlife Refuge

Public hunting of migratory game birds is permitted only on areas, designated by signs, comprising 745 acres, subject to the following special conditions:

(1) Blinds—No permanent structure, excluding wood or brush duck blinds shall be permitted; no blinds shall be locked or otherwise sealed against public entry.

(2) Use of steel shot is required for hunting waterfowl and coots. Possession of lead shot shells while hunting waterfowl and coots is prohibited.

Crab Orchard National Wildlife Refuge

Public hunting of migratory game birds is permitted, on areas comprising 23,000 acres, designated as Areas I and III, subject to the following special conditions:

(1) Only portable or temporary blinds located on the immediate vicinity of the site may be used for hunting and these must be removed or dismantled at the end of the day's hunt. Blinds and pits beyond the shoreline of refuge waters may not be constructed, established, occupied or used.

(2) Use of steel shot is required for hunting waterfowl and coots. Possession of lead shot shells while hunting waterfowl and coots is prohibited.

(3) During the goose season, on Grassy, Orchard, Sawmill and Turkey Islands, hunters may hunt only from blinds provided by the refuge. Only hunters occupying these blinds are allowed on these islands during the goose hunting season.

(4) Only authorized waterfowl hunting is permitted on the controlled areas of Grassy Point, Carterville Public, and Greenbriar Road Areas from sunrise to 12:00 Noon daily during the goose season. Goose hunting on these areas is subject to the following conditions:

(a) Hunting is permitted only from existing refuge established blinds. This includes lake shorelines.

(b) Hunters must comply with all rules as posted.

Iowa

Mark Twain National Wildlife Refuge

Public hunting of migratory game birds is permitted, on areas designated by signs, comprising 1,760 acres on the Big Timber Division and Turkey Island Area, subject to the following special conditions:

(1) Blinds—no permanent structure; excluding wood or brush duck blinds, shall be permitted; no blinds shall be locked or otherwise sealed against public entry.

Minnesota

Sherburne National Wildlife Refuge

Public hunting of ducks, coots, rails, Wilson snipe and woodcock is permitted, on an area comprising 8,514 acres (designated as Area B on refuge map), subject to the following special conditions:

(1) Use of steel shot is required for hunting ducks and coots. Possession of lead shot shells while hunting ducks and coots is prohibited.

(2) Field possession of migratory birds in the refuge area closed to migratory bird hunting is prohibited.

(3) Only boats without motors will be permitted in the area open to the hunting of ducks and coots.

(4) Boats and decoys must be removed from the refuge at the end of each day.

Tamarac National Wildlife Refuge

Public hunting of ducks, geese and coots is permitted, on an area comprising approximately 12,500 acres, subject to the following special conditions:

(1) Use of steel shot is required for hunting waterfowl and coots. Possession of lead shot shells while hunting waterfowl and coots is prohibited.

(2) The use of dogs to retrieve downed waterfowl and coots is permitted and encouraged.

(3) Boats are permitted for waterfowl hunting.

Illinois, Iowa, Minnesota, Wisconsin

Upper Mississippi River Wild Life and Fish Refuge

Public hunting of migratory game birds is permitted where designated subject to the following conditions:

(1) Use of steel shot is required for hunting waterfowl and coots. Possession of lead shot shells while hunting waterfowl and coots is prohibited.

(2) The use of dogs for hunting and retrieving waterfowl is permitted, provided such dogs are under control at all times.

(3) The Illinois portion of the refuge is open for teal hunting as provided by "Illinois State Teal Regulations". Hunters may hunt during the special teal season from other than established waterfowl hunting blinds or small boats.

(4) The hunting of migratory waterfowl in the Illinois portion of the refuge, pools 12, 13, and 14 including Potter's Marsh is governed by special conditions which are hereby adopted and are available from the Refuge Manager, Upper Mississippi River Wild Life and Fish Refuge, Savanna District, P.O. Box 250, Savanna, Illinois 61074.

This special regulation supplements the regulations which govern hunting on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32.

The public is invited to offer suggestions and comments at any time.

Harvey K. Nelson,

Regional Director.

July 29, 1980.

Vol. 45, No. 153
Wednesday, August 6, 1980

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF THE TREASURY

Office of the Comptroller of the Currency

12 CFR Ch. I

[Docket No. 80-7]

Improving Government Regulations; Semiannual Agenda

AGENCY: Office of the Comptroller of the Currency, Department of the Treasury.

ACTION: Semiannual agenda.

SUMMARY: The semiannual agenda, implementing the President's Executive Order 12044 to improve government regulations, provides notice to the public of the Office of the Comptroller of the Currency's (Office) regulatory actions since February 1, 1980, including projects initiated or acted upon since that date, and projects on which action is expected during the next six months. In addition, this semiannual agenda discusses the Office's Information Collection Budget, Banking Bulletins and Circulars and other matters. The principal functions of the Office are chartering, examining, supervising and regulating national banks.

ADDRESS: Comments should be sent to Docket No. 80-7, Communications Division, 3rd Floor, Office of the Comptroller of the Currency, 490 L'Enfant Plaza East, S.W., Washington, D.C. 20219, Attention: Marie Giblin. Comments will be available for inspection and photocopying. Suggestions for additional projects are welcome.

FOR FURTHER INFORMATION CONTACT: Alan Herlands, Director, Shela Turpin, Bank Analyst, Jonathan Levin, Senior Attorney, or David G. Hayes, Senior Economic Advisor, Regulations Analysis Division. Telephone: (202) 447-1177. Questions concerning specific projects discussed in this semiannual agenda may also be directed to the knowledgeable officials identified with each one as set forth below.

SUPPLEMENTARY INFORMATION: This agenda is divided into 6 sections which discuss the following topics: I—Regulations likely to be subject to review or other action within the next 6 months; II—Regulations issued or amended in final form within the last 6 months; III—Banking Bulletins and Circulars; IV—Information Collection Budget; V—Impact of selected regulations; and VI—Mailing schedules for Office issuances. Prior agenda have included only the information contained in Sections I and II. This agenda has been expanded to further enhance public participation in Office activities relating to the costs and benefits of bank regulation and supervision.

Regulations Discussed in Section I are

12 CFR Part 1—Investment securities regulation
12 CFR Part 2—Disposition of credit life insurance income
12 CFR Part 4—Description of office procedures, public information [1]
12 CFR Part 5—Supplemental application procedures
12 CFR Part 7—Interpretive rulings
12 CFR Part 8—Assessment of fees [1]
12 CFR Part 9—Fiduciary powers of national banks and collective investment funds
12 CFR Part 11—Securities Exchange Act disclosure rules
12 CFR Part 13—Employee stock option and stock purchase plans [1]
12 CFR Part 14—Changes in capital structure [1]
12 CFR Part 15—Change in bank control [1]
12 CFR Part 17—Required notification to nominate bank directors
12 CFR Part 20—International operations
12 CFR Part 21—Minimum security devices and procedures for national and District banks
12 CFR Part 25—Community Reinvestment Act
12 CFR Part 28—Federal branches and agencies of foreign banks [1]
Unassigned-Adjustable rate mortgages

Regulations Discussed in Section II are

12 CFR Part 4—Description of office, procedures, public information.
12 CFR Part 7—Interpretive rulings.
12 CFR Part 16—Securities offering disclosure circulars.
12 CFR Part 26—Management interlocks.

Section I: Action Expected

12 CFR Part 1—Investment securities regulation.

On December 16, 1979, the Comptroller announced that individual rulings under this regulation over the last seventeen years would be reviewed for the purpose of developing a general set of principles with respect to decisions concerning a national bank's ability to purchase, deal in, underwrite or hold securities (44 FR 76263). The purpose of this project is to decrease the need for individual banks to seek specific rulings and to decrease the need for attorneys to provide individual banks with detailed legal research. An advance notice of proposed rulemaking was issued on January 28, 1980, and comments closed March 7, 1980. A proposed rule is expected shortly (45 FR 6407).

For further information, contact Radcliffe Park, Assistant Director or Raija Bettauer, Attorney, Legal Advisory Services Division. Telephone (202) 447-1880.

12 CFR Part 2—Disposition of Credit Life Insurance income

On January 4, 1980, the Federal Financial Institutions Examination Council (FFIEC), on behalf of its member agencies, which include this Office, issued a joint notice of a proposed policy statement on this subject. Comments closed March 31, 1980. The proposed policy differs somewhat from the Office's present regulation. The Office may review the regulation after consideration by the FFIEC (45 FR 1152).

For further information, contact Ford Barrett, Assistant Chief Counsel, Telephone (202) 447-1896.

12 CFR Parts 4, 5, 8, 13, 14, 15, and 28—Comprehensive Review of Corporate Activities and Application Procedures

These regulations cover many significant aspects of applications for national bank corporate and structural activities. The Office has undertaken a long-term project to review the regulations, policy statements, procedures and forms. A major consolidation of those provisions under Part 5, and proposals to amend certain requirements, are expected shortly. Related regulations currently include:

12 CFR Part 4—Description of office, procedures, public information (describes, in part, basic information for filing a number of forms, including national bank charters, branches, conversions, mergers, changes in location, changes in title, changes in capital structure, fiduciary powers,

[1] Action expected is described under 12 CFR Part 5.

domestic operating subsidiaries, voluntary liquidations, receiverships and conservatorships, and federal branches and agencies of foreign banks); *12 CFR Part 5—Supplemental application procedures* (describes procedures for giving notice of applications, opportunities for interested parties to be heard, and related matters concerning applications); *12 CFR Part 8—Assessment of fees* (establishes fees for examinations, charter applications and other national bank activities); *12 CFR Part 13—Employee stock option and stock purchase plans* (describes procedures and conditions for the Office approval of bank applications for such plans); *12 CFR Part 14—Changes in capital structure* (describes procedures and conditions for the Office's approval of applications for authorized but unissued stock, stock dividends, preferred stock, subordinated notes and debentures, and other increases in common stock); *12 CFR Part 15—Change in bank control* (requires that individuals seeking to acquire control of a national bank give the Office 60 days advance notice, within which time the Office may disapprove the acquisition); and *12 CFR Part 28—Federal branches and agencies of foreign banks* (describes, among other matters, applications for federally chartered branches and agencies of foreign banks in the United States).

For further information, contact Darrell W. Dochow, Deputy Director, Bank Organization and Structure Division. Telephone (202) 447-1184.

12 CFR Part 7—Interpretive Rulings

Definition of capital (7.1100). The Office is reviewing this ruling to determine whether accounts other than shareholders' equity should continue to be included in the definition of capital for determining statutory limitations on certain national bank activities. The amount of a bank's defined capital affects the maximum which it may lend to a single entity or group of related entities, the amount of investment securities of a single issuer it may hold, other borrowing and investment limits, and branching capabilities. A notice of proposed rulemaking was issued July 24, 1980, with comments due on or before October 24, 1980 (45 FR 49276, Docket No. 80-6).

For further information, contact Robert B. Norris, National Bank Examiner. Telephone (202) 447-1786.

Other real estate owned (7.3025). The Office is reviewing the implementation of this recently revised ruling to determine if additional revisions would be appropriate. A final amendment which would take advantage of the new flexibility provided under the Depository Institutions Deregulation and Monetary Control Act (Pub. L. 96-221) by granting national banks greater leeway in the disposition of "other real estate" is expected shortly. In addition, a proposal is being developed to establish a uniform definition of "real estate" for all national banks. Currently, state law applies.

For further information, contact Alan Priest, Attorney, Legal Advisory Services Division. Telephone (202) 447-1880.

Investment in bank premises (7.3100). In January 1978, the Office issued for comment a proposed amendment to this interpretive ruling in order to provide greater consistency with revisions to generally accepted accounting principles. This change should not affect the costs to national banks in preparing their financial statements and should make the financial statements more useful to the banks themselves, the Office, and public users of national bank financial statements. A final interpretation is expected shortly (43 FR 2731).

For further information, contact Charles Byrd, Assistant Director, Legal Advisory Services Division. Telephone (202) 447-1880.

Data processing services (7.3500). On June 16, 1980, the Office issued an advance notice of proposed rulemaking soliciting comments on the extent to which this ruling accommodates national bank data processing activity in the face of recent major technological advances. Information about the current level of national bank involvement in data processing is being expressly sought from equipment manufacturers and users, suppliers of data processing services, banks and the general public. A proposal is expected by year-end (45 FR 40613, Docket No. 80-1).

For further information, contact Sharon Miyasato or David Ansell, Attorneys, Legal Advisory Services Division. Telephone (202) 447-1880.

Oath of directors (7.4415). The Office is considering amending this ruling to eliminate the requirement that national bank directors who are not residents of the state in which a majority of the board resides take their oath of office in their home state. If so amended, the ruling would permit all directors present at the first meeting of a board of directors, after its election, to take a joint oath.

For further information, contact Karen Main, Economist, Regulations Analysis Division. Telephone (202) 447-1177.

Indemnification (7.5217). The Office is reviewing this ruling which sets forth the conditions under which a national bank may indemnify bank directors and personnel. Alternatives to be considered include standards reflected in relevant state laws regarding indemnification and/or in the Model Business Corporation Act. An advance notice of proposed rulemaking was published on February 6, 1980, and comments closed on April 7, 1980. A proposed rule is expected within three months (45 FR 8025).

For further information, contact Raija Bettauer, Attorney, Legal Advisory Services Division. Telephone (202) 447-1880.

Loans originating at other than banking offices (7.7380). The U.S. Circuit Court of Appeals for the District of Columbia on June 11, 1980, reversed the district court ruling in *Independent Bankers Association of America* v. *Heimann*, which had ordered rescission of the Office's interpretive ruling regarding loans originated at other than banking offices (so called "loan production offices") (44 FR 29038). Pursuant to the Circuit Court's reversal, the Office is considering revoking the rescission of Interpretive Ruling 7.7380 and reinstating it in the precise language of the original.

Activities which would come within the terms of this ruling could be conducted either directly by a national bank or by a national bank subsidiary.

For further information, contact David L. Ansell, Attorney, Legal Advisory Services Division. Telephone (202) 447-1880.

Charitable foundations (7.7445). This ruling permits national banks to establish and contribute to charitable foundations. It does not cover foundations to which a national bank grants, in effect, the right to receive income for a specified period from assets (commonly securities) owned by the bank, although the Office has approved such foundations upon request under certain conditions. An amendment to the ruling is expected to be proposed to establish guidance in this area.

For further information, contact Fred Finke, National Bank Examiner, Commercial Examinations Division. Telephone (202) 447-1164.

Charitable contributions (7.7479). This ruling limits the amount which a national bank may contribute to charity on a semi-annual basis to five percent of income as reported on call reports to the Comptroller. The Office is reviewing this interpretation in connection with the review of charitable foundations (7.7445) to determine whether any modifications or guidance are necessary. Subjects under consideration include defining the term charitable, aggregating

contributions to charitable trusts and other charities, and modifying or removing the five percent limitation.

For further information, contact Fred Finke, National Bank Examiner, Commercial Examinations Division. Telephone (202) 447–1164.

Bank indebtedness—leasing (7.7520). In January 1978, the Office issued for comment a proposed interpretive ruling to provide greater consistency with revised generally accepted accounting principles for national banks which lease their banking premises. A final interpretation should be issued shortly. It should not affect the costs to national banks in preparing their financial statements and should make the financial statements more useful to the banks themselves, the Office, and the public users of national bank financial statements (43 FR 2731).

For further information, contact Charles Byrd, Assistant Director, Legal Advisory Services Division. Telephone (202) 447–1880.

Single premium annuities. On July 27, 1979, the Office published an advance notice of proposed rulemaking requesting comment concerning national bank participation in insurance company offerings of single premium annuity contracts which would utilize deposit accounts in national banks (44 FR 44172).

A preliminary review of the comments revealed significant legal and supervisory issues regarding the permissibility of this activity for national banks. Further review and analysis is being undertaken to determine whether the rulemaking process will continue, and a decision is expected shortly.

For further information, contact Howard Finkelstein, Attorney, Legal Advisory Services Division. Telephone (202) 447–1880.

12 CFR Part 9—Fiduciary Powers of National Banks and Collective Investment Funds

The Office is developing a proposal which would require national banks to prepare and make available a disclosure statement with respect to accounts over which investment discretion may be exercised. The statement would set forth policies and practices concerning commissions paid for effecting securities transactions. This proposal would be issued pursuant to Section 28(e) of the Securities Exchange Act of 1934 and follows the recent adoption of rules by the Securities and Exchange Commission.

The Office is also developing a possible amendment to the regulation to clarify certain sections and incorporate interpretations, previously provided to individual national banks upon request, relating to collective investment funds. The proposal also will contain amendments accommodating new statutory authority to revoke national bank trust powers, solicit public suggestions for review or revision of other sections of Part 9, and contain proposed rules relating to deposits of trust funds awaiting investment or distribution and retention rules for fiduciary records.

For further information, contact Dean E. Miller, Deputy Comptroller for Specialized Examinations. Telephone (202) 447–1731.

12 CFR Part 11—Securities Exchange Act Disclosure Rules

On June 4, 1979, the Office announced a long-term project to clarify and simplify this regulation in stages. The first proposal, dealing with tender offers, is expected within 6 months.

This part contains regulations substantially similar to those issued by the Securities and Exchange Commission (SEC). Periodically, the SEC revises its regulations, and the Office must propose substantially similar revisions or publish reasons why such revisions are not appropriate (44 FR 31984).

For further information, contact David Anderson, Attorney, or Michael Herrick, Attorney, Securities Disclosure Division. Telephone (202) 447–1954.

12 CFR Part 17—Required Notification To Nominate Bank Directors

This regulation states that national banks may adopt bylaws or articles of association that require any shareholder proposing to nominate a director, other than a management nominee, to file certain information in advance with the Office and the bank. Particularly in light of recent amendments to the Change in Bank Control rules (12 CFR Part 15), the Office is considering a proposal to rescind this regulation. A notice of proposed rulemaking was published in the **Federal Register** on April 14, 1980 and comments closed June 13, 1980. A final rule is expected within three months (45 FR 2578).

For further information, contact Larry Mallinger, Attorney, Legal Advisory Services Division. Telephone (202) 447–1880.

12 CFR Part 20—International Operations

This regulation requires prior notifications and reports to the Office of specified international activities by national banks. The need for receipts of those notices and reports from national banks is under review, since they are also filed with other Federal agencies.

For further information, contact William Ryback, Director, International Banking Activity Examination Division. Telephone (202) 447–1747.

12 CFR Part 21; 12 CFR 7.5225—Minimum Security Devices and Procedures

The Office's existing regulation requires several specific reports and records, refers to effective dates long past, overlaps with an interpretive ruling, and contains unnecessary gender-specific terminology. The Office is considering ways to eliminate certain reporting and recordkeeping requirements, the now meaningless effective dates, and the gender-specific terminolgoy. A proposed amendment, or a more general advance notice of proposed rulemaking, is expected to be issued for comment.

For further information, contact Richard C. Wanlin, Special Assistant to the Chief National Bank Examiner. Telephone (202) 447–1574.

12 CFR Part 25—Community Reinvestment Act

This regulation, and identical ones of three other federal supervisors of depository institutions, took effect in February 1979. The Office, in association with the other agencies, is evaluating more than a year's experience with the regulation. That evaluation is wide-ranging and includes consideration of such issues as: (1) Supplementing the previously issued list of questions and answers to clarify issues that do not individually justify amending the regulation; (2) issuing a policy information statement on the agencies' experiences during the first year of CRA's operation; (3) providing "plain-English" instructions to the public on how to comment on CRA-covered applications; (4) discussing alternative definitions for low-and moderate-income neighborhoods; and (5) assigning weights to the various assessment factors the agencies consider in appraising CRA performance.

For further information, contact Janice Booker, Customer Program Specialist, Customer Programs Division. Telephone (202) 287–4265.

Adjustable Rate Mortgages

The Office is considering adding a new regulation which would affirmatively authorize national banks to make residential mortgage loans carrying an interest rate subject to periodic adjustment. Authorization is intended to help ensure the availability of long-term mortgage funds by facilitating development of new instruments and to provide borrower protection provisions in the form of mandatory disclosures and rules designed to prevent too rapid an increase in installment payment amounts. A proposal is expected within 2 months.

For further information, contact Jonathan L. Fiechter, Deputy Director, Banking Research and Economic Analysis. Telephone (202) 447–1914.

Section II: Actions Taken

12 CFR Part 4—Description of Office, Procedures, Public Information

Office organization. On March 24, 1980, the Office published a final rule which incorporates into this regulation changes in the organization of the Office. Changes in the central office structure, title changes of key positions, revisions in functional descriptions as well as additions and updates of Regional Office information were included (45 FR 18906).

For further information, contact Barbara M. Yadley, Attorney, Legal Advisory Servcies Division. Telephone (202) 447–1880.

Forms. On July 25, 1980, the Office also published a final rule which incorporates into this Part a revised list of those forms used for, among other matters, corporate applications and the solicitation of data (45 49537, Docket No. 80–4).

For further information, contact Jonathan Levin, Senior Attorney, Regulations Analysis Division. Telephone (202) 447–1177.

12 CFR Part 7—Interpretive Rulings

Application of lending limits to standby letters of credit (7.1160). In the past, the Comptroller issued several informal opinions which allowed banks to meet the requirements of exception (2) of Interpretive Ruling 7.1160—"Prior to or at the time of issuance, the issuing bank has set aside funds in a segregated deposit account, clearly earmarked for that purpose, to cover the bank's maximum liability under the standby letter of credit."—with collateral in the form of United States Government securities or "marketable securities." the Prior Semiannual Agenda indicated that position would be reviewed.

After review, and consultations with the staffs of the Federal Reserve Board and Federal Deposit Insurance Corporation, the Office determined that a strict construction of exception (2)—"segregated deposit"—should be adopted. The Comptroller's Chief Counsel, in a letter dated June 12, 1980, stated that the exception would be restricted to cash and short-term certificates of deposit and that prior inconsistent opinions which permitted U.S. Government and "marketable securities" were withdrawn.

For further information, contact Ford Barrett, Assistant Chief Counsel. Telephone (202) 447–1896.

Directors' qualifying shares (7.4210). On July 24, 1980, an amendment to this ruling was published to accommodate certain statutory changes effected by the Depository Institutions Deregulation and Monetary Control Act of 1980 (Pub. L. 96–221). Section 710 of that act authorizes the Office to determine that an equivalent ownership interest in a company controlling a national bank may satisfy the traditional requirement for directors' qualifying shares in the bank. Under the amendment, if any of the par, book, or market value of holding company stock, as of the date it was acquired or the date the person becomes a director. equals or exceeds $1,000, the person meets the stock ownership requirement for all subsidiary national banks (45 FR 49239, Docket No. 80–5).

For further information, contact James V. Elliott, Director, Bank Organization and Structure Division. Telephone (202) 447–1184.

Pension plans (7.5010). This ruling covers the authority of national banks to offer pension plans to their employees. As indicated in the last semiannual agenda, it was reviewed in light of legal changes which have occurred over the last several years, with a view to possible modification. The Office has concluded that changes are not necessary. Adding information to the ruling would only repeat legal and regulatory requirements already covered by other agencies and departments.

For further information, contact Laura McAuliffe, Executive Assistant to the Senior Advisor. Telephone (202) 447–1175.

National bank as guarantor or surety on indemnity bond (7.7010). The Office has reviewed the need for a formal amendment to clarify the role which marketable securities may have as collateral in guarantees and indemnity bonds. In the past, the Office has advised individual national bank inquirors that a national bank may become a guarantor by setting aside either cash or marketable securities to cover the total potential liability. The last semiannual agenda indicated that the ruling would be reviewed.

After review and analysis, the Office has determined that no change is warranted in the ruling at this time. Moreover, the Office has withdrawn previous interpretations allowing marketable securities to serve as collateral for guarantees and indemnity bonds.

For further information, contact Ford Barrett, Assistant Chief Counsel. Telephone (202) 447–1896.

12 CFR Part 16—Securities Offering Disclosure Circulars

The Office adopted amendments to the securities offering disclosure rules, effective March 21, 1980. Subject to certain exemptions, the disclosure rules generally require a national bank to provide an offering document to offerees when it offers or sells its equity or debt securities. The March amendments are intended to simplify and expedited the process through which national banks offer their securities to the public, while providing the information needed by investors.

The principal amendments to Part 16 concern: (a) A qualified exemption from offering circular requirements where the amount offered exceeds $500,000 in a twelve-month period (The regulation previously provided for an exemption at the $300,000 level.); (b) a requirement permitting use of an abbreviated offering circular where the amount offered does not exceed $2,000,000 in a twelve-month period; and (c) certain technical amendments to the offering circular format (45 FR 11115).

For further information, contact Michael Herrick, Attorney, Securities Disclosure Division. Telephone (202) 447–1954.

12 CFR Part 26—Management Interlocks

On April 9, 1980, the Office published final amendments to its regulation implementing the Depository Institution Management Interlocks Act (Title II of the Financial Institutions Regulatory and Interest Rate Control Act of 1978 (Pub. L. 95–630)) in joint action with the Federal Reserve System, Federal Deposit Insurance Corporation, Federal Home Loan Bank Board, and National Credit Union Administration.

The April amendments contain clarifying and technical changes to the regulation published in July 1979, and add a definition of the term "representative or nominee", as well as new provisions concerning "grandfather rights" and "changes in circumstances" (45 FR 24384).

For further information, contact Howard Finkelstein, Attorney, Legal Advisory Services Division. Telephone (202) 447–1880.

Section III: Banking Bulletins and Banking Circulars

The Office's formal regulations (those actions adopted into the Code of Federal Regulations as "regulations") do not

V 45 / 153 AUG 6 80 UMI

cover all regulatory issues meriting public attention. Often, there are special matters of supervisory concern and new or revised supervisory procedures that are not appropriate candidates for formal regulation. However, they must be communicated to the industry and other members of the public expeditiously. Such communication usually is accomplished by the Office system of banking bulletins and banking circulars. Both were initiated in 1968. Bulletins are numbered consecutively during the year issued and ordinarily remain in effect for one year or less. They are frequently used as cover memoranda to forward copies of proposed and final regulations to banks and other interested members of the public. Circulars are more permanent and are numbered consecutively. Since 1968, 144 have been issued, of which 64 were withdrawn, leaving 80 still in effect.

Review Project

The Office is presently reviewing all effective circulars to eliminate any inconsistencies between circulars and other authoritative documents, to update as needed and to review any requirements imposed on banks. A number of circulars are likely to be revised or rescinded. The project is scheduled for completion within six months. The public is invited to submit suggestions concerning any circular currently in effect. Comments should be sent to, and further information obtained from, Frank Carbone, Director, Commercial Examinations Division. Telephone (202) 447–1164.

Listing of Bulletins and Circulars

In the past, the Office has not disseminated periodic summary listings of recently issued bulletins and circulars. It appears that such a listing may be useful to national banks and other members of the public. Accordingly, this and other semiannual agenda will contain such listings.

Following, is a list of bulletins and circulars published since the last semiannual agenda together with a brief description of their contents.

For further information, contact Tibby Ford, Communications Division. Telephone (202) 447–1800.

Banking Bulletins

Number	Date	Subject	Contents
BB-80-3	February 15, 1980	Semiannual Agenda	Memorandum to presidents of all national banks conveying a copy of the Semiannual Agenda, as published in the **Federal Register** February 13, 1980 (45 FR 9743).
BB-80-4	February 27, 1980	12 CFR Part 12 (Disposition of Credit Life Insurance Income).	Memorandum to chief executive officers of all national banks, regional administrators and examiners, citing judicial support for Office directives requesting certain national banks to cease paying credit life insurance commissions to bank insiders.
BB-80-5	February 25, 1980	12 CFR Part 16 (Securities Offering Disclosure Rules).	Memorandum to chief executive officers of all national banks, regional administrators and examiners, conveying a copy of 12 CFR Part 16 as published in the **Federal Register** February 20, 1980 (45 FR 11115).
BB-80-6	March 6, 1980	Investment Securities Eligibility Rulings.	Memorandum to chief executive officers of all national banks, regional administrators and examiners conveying a copy of 12 CFR Part 1 (Investment Securities), as published in the **Federal Register** February 11, 1980 (45 FR 6407).
BB-80-7	March 26, 1980	12 CFR Part 103 (Financial Recordkeeping and Reporting of Currency and Foreign Transactions).	Memorandum to chief executive officers of national banks noting Office concern with Treasury reports of large cash flows through some banks and drawing attention to: (1) need for internal procedures that will permit full compliance with 12 CFR 103; and (2) Treasury intent to amend 12 CFR 103, as published in the **Federal Register** September 7, 1979 (44 FR 52258).
BB-80-8	Undated	Management Official Interlocks	Memorandum to chief executive officers of all national banks, regional administrators and examiners conveying a copy of 12 CFR Part 26 (Management Official Interlocks) as published in the **Federal Register** April 9, 1980 (45 FR 24384).
BB-80-9	April 17, 1980	12 CFR Part 17 (Required Notification to Nominate Bank Directors).	Memorandum to chief executive officers of all national banks, regional administrators, and examiners conveying a copy of a proposal to rescind 12 CFR Part 17 as published in the **Federal Register** April 14, 1980 (45 FR 2578).
BB-80-10	April 21, 1980	12 CFR Part 7 (Loans Secured by Real Estate).	Memorandum to chief executive officers of all national banks, regional administrators and examiners conveying a copy of 12 CFR Part 7, Subpart B as published in the **Federal Register** September 5, 1979 (45 FR 51795).
BB-80-11	April 23, 1980	Regulation E	Memorandum to chief executive officers of all national banks discussing the applicability and requirements of Federal Reserve Regulation E with special emphasis on those amendments which become effective May 10, 1980.
BB-80-12	Undated	Draft Consumer Program	Memorandum to chief executive officers of all national banks, regional administrators and examiners conveying a copy of the proposed Consumer Program, (required by Executive Order 12160), as published in the **Federal Register** April 24, 1980 (45 FR 27696).

BB-80-14	June 13, 1980	Revised Regulation Z	Memorandum to chief executive officers of all national banks, regional administrators and examiners conveying a copy of the Federal Reserve's revised Regulation Z, as released by the Federal Reserve Board April 28, 1980 and as published in the **Federal Register** May 5, 1980 (45 FR 29702).
BB-80-15	June 11, 1980	OCC adoption of FFIEC's Uniform Guideline on Internal Control for Foreign Exchange in Commercial Banks.	Memorandum to chief executive officers of all national banks, regional administrators and examiners conveying a copy of the subject Guideline, as released by the FFIEC May 22, 1980.
BB-80-16	June 27, 1980	Proposed Regulation D	Memorandum to chief executive officers of all national banks, regional administrators and examiners conveying a copy of the Federal Reserve's proposed Regulation D, published June 9, 1980 (45 FR 38368).
BB-80-17	June 30, 1980	Proposed Rulemaking—Data Processing Services.	Memorandum to chief executive officers of all national banks, regional administrators and examiners conveying a copy of an advance notice of proposed rulemaking for Interpretive Ruling 7.3500 (12 CFR 7.3500-Data Processing Services), as published in the **Federal Register** June 16, 1980 (45 FR 40613).
BB-80-18	July 1, 1980	Amendments to 31 CFR 103	Memorandum to chief executive officers of a national bank, regional administrators and examiners conveying a copy of Treasury Department Regulation 12 CFR 103, (Financial Recordkeeping and Reporting of Currency and Foreign Transactions), as published in the **Federal Register** June 5, 1980 (45 FR 37818).

Banking Circulars

Number	Date	Subject	Contents
BC-135	February 8, 1980	Fraudulent use of Documents Purporting to be "ICC notes".	Memorandum to chief executive officers of all national banks; all State Banking Authorities; Chairman, Board of Governors of the Federal Reserve System; Chairman, Federal Deposit Insurance Corporation; Conference of State Bank Supervisors; Regional administrators; and examiners conveying a notice from the United States Council of the International Chamber of Commerce, Inc., that documents purporting to be ICC notes are not obligations of the Council.
BC-136	February 8, 1980	European Credit Bank Corporation, Ratho Mill, Saint Vincent, West Indies.	Memorandum to chief executive officers of all national banks; all State Banking Authorities; Chairman, Board of Governors of the Federal Reserve System; Chairman, Federal Deposit Insurance Corporation; Conference of State Bank Supervisors; regional administrators; and examiners informing them that subject bank is not licensed to do business and has not honored checks drawn on it.
BC-137	February 19, 1980	Prohibition on Political Contributions by National Banks.	Memorandum to chief executive officers of national banks, regional administrators and examiners advising of the rescission of BC-62 and outlining, after consultation with the Federal Election Commission, prohibitions imposed on national banks by 2 U.S.C. 441(b) (Federal Election Campaign Act of 1971).
BC-138	February 29, 1980	Gold; 30 Ingots Paid as Ransom	Memorandum to chief executive officers of national banks; all State Banking Authorities; Chairman, Board of Governors of the Federal Reserve System; Chairman, Federal Deposit Insurance Corporation; Conference of State Bank Supervisors; regional administrators; and examiners indentifying gold ingots used to pay ransom and asking for information about them.
BC-139	March 14, 1980	Monetary and Credit Actions to Help Curb Inflation.	Memorandum to chief executive officers of all national banks describing the President's program to curb inflation and conveying copies of news releases and final regulations promulgated by the Federal Reserve that constituted a part of that program.
BC-79 (201) revision	March 19, 1980	National Bank Participation in the Financial Futures and Forward Placement Markets.	Memorandum to the chief executive officers of all national banks and to regional administrators describing Office policy on national banks entering into contracts calling for the future delivery of selected financial instruments.
BC-180 Supplement 2	March 24, 1980	12 CFR Part 27 (Fair Housing Home Loan Data System).	Memorandum to chief executive officers of national banks, regional administrators and examiners briefly describing the regulation and conveying a special questionnaire on past and expected home loan applications.
BC-140	May 2, 1980	Uniform Policy for Classification of Consumer Installment Loans Based on Delinquency Status.	Memorandum to presidents of all national banks, regional administrators and examiners describing the subject policy as recommended by the Federal Financial Institutions Examination Council and adopted by the Comptroller's Office.
BC-141	May 2, 1980	Brokered funds	Memorandum to chief executive officers of national banks; all State Banking Authorities; Chairman, Board of Governors of the Federal Reserve System; Chairman, Federal Deposit Insurance Corporation; Conference of State Bank Supervisors; regional administrators; and examiners warning of growing incidence of suspect offers of brokered deposits and asking that observed questionable offers be reported to the Office.
BC-142	May 23, 1980	Arab International Bank	Memorandum to chief executive officers of national banks; all State Banking Authorities; Chairman, Board of Governors of the Federal Reserve System; Chairman, Federal Deposit Insurance Corporation; Conference of State Bank Supervisors; regional administrators; and examiners advising that documents having the words ARAB INTERNATIONAL BANK are not those of the Arab International Bank, Cairo, Egypt.
BC-143	May 23, 1980	Status of Entities Licensed by Saint Vincent Trust Authority Ltd., Saint Vincent, West Indies.	Memorandum to chief executive officers of national banks; all State Banking Authorities; Chairman, Board of Governors of the Federal Reserve System; Chairman, Federal Deposit Insurance Corporation; Conference of State Bank Supervisors; regional administrators; and examiners advising extreme caution in dealing with four listed business entities.
BC-144	June 30, 1980	Status of Offshore Shell Bank Licenses Issued by Saint Vincent Trust Authority, Ltd., West Indies.	Memorandum to chief executive officers of national banks; all State Banking Authorities; Chairman, Board of Governors of the Federal Reserve System; Chairman, Federal Deposit Insurance Corporation; Conference of State Bank Supervisors; regional administrators; and examiners advising extreme caution in dealing with four listed business entities.

SECTION IV: INFORMATION COLLECTION BUDGET

On December 4, 1979, the President issued Executive Order 12174 on Paperwork, calling for the establishment of "procedures that eliminate all paperwork burdens on the public above the minimum necessary to determine and implement public policy and ensure compliance with Federal laws". In response to a directive from the Office of Management and Budget (OMB) under that Executive Order, the Office has prepared an "Information Collection Budget" for fiscal year 1981. That document contains estimates of the time incurred by the public (including national banks) preparing information required by the Office in order to perform its supervisory responsibilities. The purpose of this Information Collection Budget, together with those of other Executive Branch agencies, is to establish a firm yet reasonable limit on the flow of paper between the Federal Government and the public. The Office has taken seriously its responsibility to lessen paperwork and regulatory burdens placed on national banks, as this and prior semiannual agenda demonstrate.

To prepare the Information Collection budget, the Office estimated the amount of time required to respond to each information request it expects to make.

The Office's Information Collection Budget estimates a total public cost of approximately 727,500 hours. That figure represents information collections ranging from activities requiring only 15 minutes to some requiring an average of 100 hours of a respondent's time. Most activities affect far fewer than the total number of national banks.

Information required in the examination process has been expressly excluded from the Information Collection Budget because of the unique aspects of the examination. The Office's estimate of the amount of time spent by a bank on all aspects of a commercial examination is 322 hours, with 107 hours devoted to paperwork. The Office recognizes there is wide variation in this figure resulting from variations in the size of institutions and the nature of the examination. The total amount of time spent on examination paperwork, including specialized examinations by banks, is an estimated 558,225 hours. This figure approximates only one-third of the time the Office estimates will be spent on paperwork by bank examiners.

In addition, the Office recognizes that during an economic down-turn, reporting and surveillance are likely to be increased. For this reason a contingency allowance of at least 500,000 hours has been proposed beyond the total cost estimated.

For further information, contact Susan Wagner, Special Assistant to the Comptroller. Telephone (202) 447–1766.

V 45 / 153 AUG 6 80 UMI

V 45 / 153 AG 6 80 UMI

SECTION V: IMPACT OF SELECTED REGULATORY CHANGES

As occasions warrant, the Office seeks to measure the impact on the banking industry of new or revised regulations. Two such analyses were undertaken since publication of the last semiannual agenda. One examined selected effects of the new 12 CFR Part 12 (Recordkeeping and confirmation requirements for certain transactions effected by national banks) an the other examined the effects of revisions to 12 CFR Part 18 (Annual financial disclosure to shareholders). Both regulatory developments became effective January 1, 1980.

Each analysis was based on voluntary returns of special questionnaires sent to a number of national banks. No bank received both questionnaires.

For further information, contact David C. Hayes, Senior Economic Advisor, Regulations Analysis Division. Telephone (202) 447–1177.

Part 12

The analysis of a survey on this new regulation has not been completed at this time. Preliminary indications are discussed below, and a further analysis should be reported in the next semiannual agenda. The requirements of the New Part 12, in summary form, are:

1. A chronological record of all securities transactions effected for customers must be kept. Banks effecting more than 200 securities transactions per year for customers, not counting transactions in government securities, must also keep account records, a memorandum of each order, and a record of broker/dealers used and commissions paid to each;

2. Each bank must provide each customer with a prompt confirmation of each transaction, unless the bank and customer agree to other confirmation procedures; and

3. Each bank must require its trading personnel to report to the bank any large transactions of their own, other than transactions in government securities.

A survey was sent to 273 national banks of various sizes, to develop information on bank practices prior to and after the effective date of the regulation, and related information. Responses were received from 75 percent of the banks.

A preliminary review of the data indicates the following matters of interest:

1. Prior to the regulation, only 25 percent of the responding banks required their trading personnel to report their own large transactions;

2. Most banks effecting large numbers of transactions were generally in compliance with all other requirements of the new regulation prior to its adoption;

3. Many banks effecting small numbers of transactions maintained one or more of the four records systems. However, the record(s) maintained were not usually the specific chronological record now required.

Further analysis is expected to cover such matters as:

1. The number and size of banks which would be affected if the regulation were changed by increasing the number of exempt transactions or by exempting banks of a certain size;

2. The changes in bank practices resulting from the prompt confirmation requirement and the flexibility providing for other confirmation arrangements; and

3. The impact of the regulation on small banks with a limited number of transactions.

Part 18

Analysis of revisions to Part 18 is complete. Revisions to Part 18 granted approximately 56 percent of all national banks flexibility in meeting their responsibility to keep their shareholders informed about the bank's financial condition. Previously, national banks that were neither wholly-owned subsidiaries of a bank holding company, nor subject to 12 CFR Part 11 (Securities Exchange Act disclosure rules) were obliged to send an annual financial report to each shareholder. Under the revised Part 18, those 2,485 national banks have the option of providing annual financial information in a more flexible format to each shareholder, or notifying each shareholder that such information is available and will be forwarded upon request without charge. The Office sought to estimate national bank use of the option and related cost savings. To accomplish that objective, a seven part questionnaire was mailed to a sample of 119 national banks. The sample was drawn from all national banks subject to Part 18 which were not to receive the Part 12 survey form. Banks were divided into three asset size classes: under $25 million, $25 million—$100 million; and $100 million and over. Potential respondents wer drawn at random from each size class. There was a 92 percent response rate. Banks were asked to state:

1. Number of shareholders;

2. Whether a notice or an annual report was sent in 1980;

3. If notice was sent, how many shareholders requested an annual report;

4. If notice will be sent in 1981;

5. Cost of sending an annual report to all shareholders;

6. Cost of sending a notice to all shareholders and a report to those who might request it; and

7. Time spent responding to survey.

Results, other than those concerning costs may be summarized as follows:

1. 7 percent of all respondents sent notices in 1980 and they found that only 4 percent of their shareholders wanted annual reports; and

2. 18 percent of all respondents plan to send notices in 1981.

Results of the cost questions are reflected in the following table.

Bank size (assets)	Cost of annual report		Cost of notice	
	Per bank	Per shareholder	Per bank	Per shareholder
Greater than $100 million:				
Average	$2,757	$9.01	$762	$2.46
Median	2,030	5.73	500	1.13
$25 million to $100 million:				
Average	837	7.39	408	4.02
Median	457	1.79	85	.47
Less than $25 million:				
Average	227	2.53	60	.66
Median	114	1.44	25	.65

If the survey results are extrapolated to all affected banks, the aggregate cost of providing an annual report to all shareholders, as was previously required, would have been approximately $1.5 million. The aggregate cost of sending a notice and furnishing the informatin upon request is approximately $600,000. Thus, the change in the regulation could reduce cost by $900,000, a 60% reduction, without significantly reducing the benefits of the regulation, i.e. providing shareholders easy access to financial information concerning the bank in which they own an interest.

Section VI: Mailing Schedules for Office Issuances

Many bankers have complained about the amount of paper received from the Office. The suggestion has been offered that the Office accumulate various issuances, including proposed and final regulations, and send them to banks on a monthly or quarterly schedule. Items whose timeliness is critical, such as requirements with which banks must comply by an early date, would be exempted from such a program.

While a periodic mailing of issuances would not necessarily reduce the imcoming volume of paper to a bank, it could have several advantages:

1. A predictable time for bank staff to devote to incoming OCC issuances;

2. Possible improvements in the distribution of issuances and where appropriate, the updating of manuals and other reference materials as well as in the preparation and submission of comments solicited by the Office; and

3. Potential savings in Office mailing costs.

The Office solicits comments on the desirability of a periodic mailing schedule and also requests comment on:

1. Preferred schedules and the reason for stated preferences;

2. Any suggestions for improvements in the format of OCC issuances; and

3. Methods other than monthly or quarterly mailings which might assist banks in dealing with regulatory issuances, such as publication in the weekly bulletins of each regional office a simple notice, including a short summary and such information as docket number, **Federal Register** citation, comment period and a knowledgeable Official who may be contacted for additional information.

For further information, contact Shela Turpin, Bank Analyst, Regulations Analysis Division. Telephone (202) 447–1177.

Dated: July 31, 1980.

BILLING CODE 4810–33–M

FEDERAL HOME LOAN BANK BOARD

12 CFR Parts 525, 541, 545, and 563

[No. 80–469]

Federal Savings and Loan Associations; Revision of Real Estate Lending Regulations

Dated: July 31, 1980.

AGENCY: Federal Home Loan Bank Board.

ACTION: Proposed regulations.

SUMMARY: These proposed regulations implement in part Title IV of the Depository Institutions Deregulation and Monetary Control Act of 1980, which comprehensively revised and expanded the investment authority of Federal savings and loan associations in the area of real-estate-related loans. Major changes include the lifting of restrictions on location of security property, lien priority and dollar amount of loans.

DATE: Comments must be received by: October 6, 1980.

ADDRESS: Send comments to the Office of the Secretary, Federal Home Loan Bank Board, 1700 G Street, N.W., Washington, D.C. 20552.

FOR FURTHER INFORMATION CONTACT: Nancy L. Feldman, Associate General Counsel, (202) 377–6440, Federal Home Loan Bank Board, 1700 G Street, N.W., Washington, D.C. 20552.

SUPPLEMENTARY INFORMATION: The Depository Institutions Deregulation and Monetary Control Act of 1980 ("Act"), Pub. L. 96–221, 94 Stat. 132, greatly expanded the investment powers of Federal savings and loan associations; and important part of this expansion is set forth in section 401 of Title IV of the Act, which revised section 5(c) of the Home Owners Loan Act of 1933 (12 U.S.C. § 1464(c)) with regard to real-estate-related lending authority of Federals.

Since a major purpose of expanding Federals' lending authority was to make them more competitive with other financial institutions, the Board proposes to implement the new statutory authority not only by removing restrictions no longer mandated by statute, but also by rescinding some of its current rules which set forth detailed lending procedures the Board believes should more properly be determined by an association's management. The Board is also taking this opportunity to regroup its lending regulations to better reflect the proposed changes, and to delete provisions in other parts of its regulations which would be inconsistent with such changes. Major proposed changes are described below.

Dollar Limits on Loan

The Act eliminated the previous statutory restrictions on home loans of $75,000 ($112,500 for loans secured by real estate in Alaska, Guam, and Hawaii) and dollar limitations referenced to section 207(c)(3) of the National Housing Act of 1934, as amended, for apartment loans; it also eliminated the 20-percent-of-assets exception for the portion of loans in excess of these amounts. The Board therefore proposes to lift all of its dollar restrictions on loans, except with respect to its loans-to-one-borrower limitation and affiliated-person loan limitations, found in Part 563 of the Regulations for Insurance of Accounts of (12 CFR 563). The proposed removal of dollar limits extends to current regulatory limits on low-downpayment loans currently found in 12 CFR 545.6–2 (a)(2) and (3), and current limits on home improvement and equipping loans.

As a related matter, the Board also proposes to rescind 12 CFR 525.13 of the Regulations of the Federal Home Loan Bank System, which limits the dollar amount of home mortgages eligible as collateral for Bank advances. That provision implemented section 10(b)(2) of the Federal Home Loan Bank Act of 1932, which refers to the now-rescinded dollar limitations on home loan amounts in section 5(c) of the Home Owner's Loan Act.

Lien Priority

The Act eliminated the first-lien security requirement previously applied to Federals' basic residential lending authority. the Board therefore proposes to delete such limitation from its regulations, but to require that associations making loans on the security of junior liens prepare and maintain documentation sufficient to indicate that the total liens on such property do not exceed applicable loan-to-value ratios. Estimations of such ratios would reflect a current appraisal of the property at the time the association's loan is to be made and, if such loan is for improvement of the property, may include an estimate of the expected value of the property after completion of such improvements.

Location of Security Property

Revised section 5(c) does not restrict associations in their ability to invest in loans outside their local areas; the Board is therefore proposing to lift all geographic limitations on real estate loans, including loans made for property improvement and loans made on the security of mobile homes. Currently, Federal associations are limited to

investment in loans made in an area generally comprising their home states and a territory 100 miles around their home offices, with use of a 20 percent-of-assets "leeway" basket and a 20 percent-of-assets loan participation basket. Institutions whose accounts are insured by the Federal Savings and Loan Insurance Corporation are permitted by the Board, under the authority of section 403(b) of the National Housing Act, as amended (12 U.S.C. § 1726), to invest 40 percent of assets in loan participations secured by non-local property, and 15 percent of assets in non-local whole loans. In order to give parity to insured institutions in relation to the new proposed rules for Federals, the Board additionally is proposing to lift these current geographic limitations. Notwithstanding these changes, the Board will continue to evaluate an association's efforts to meet its responsibilities under CRA in satisfying its continuing and affirmative obligations to help meet the credit needs of their local communities, including low- and moderate-income neighborhoods.

Downpayments, Term of Years

The previous section 5(c) did not contain statutory references to loan-to-value ratios for real estate loans; the statute as revised uses 90 percent of value as a reference point for residential real-estate loans that will not require the extra security of mortgage insurance. The Board therefore proposes to liberalize its residential lending regulations to recognize 90 percent loans rather than 80 percent loans as the basic home finance benchmark, and to limit regulatory restrictions currently applied to home loans between 80 and 90 percent to those in excess of 90 percent. However, the 80 percent limit would continue to apply to short-term loans made to facilitate the trade-in or exchange of property because these are nonamortized loans, but this provision would be liberalized to authorize the making of such loans to realtors.

In addition, in order to provide associations with real estate loan authority comparable to that of national banks, the Board proposes to raise its multi-family loan limit from 80 to 90 percent of value, and its commercial real estate lending authority from 75 percent of value and 25 year terms to 90 percent of value and 30 year terms.

In recognition of recent rapid increases in housing costs, and as an expression of its desire to assist potential borrowers in meeting associations' eligibility requirements regarding loan repayments, the Board is also proposing to allow associations to make home loans with maximum terms of 40 years. Additionally, nonamortized residential loans would be permitted a maximum term of five years, rather than the current three year maximum.

Leeway Authority

The Board proposes to liberalize its current regulations pertaining to construction loans and nonconforming secured loans on residential real property which do not meet its regular lending requirements. Section 5(c) authorizes associations to invest up to five percent of assets in each of these categories; at present, however, the Board's regulations limit such investment to two percent of assets in each category unless an association has net worth in excess of regulatory requirements and meets certain eligibility criteria. The Board therefore proposes to permit investment up to the full statutory allowance, and notes that this would permit associations to invest in loans made by state-chartered associations which fall into either of the two categories, including adjustable-type mortgages.

Other Proposed Changes

Various regulatory definitions would be amended to reflect the new statutory language. Loans on building lots would no longer be restricted to builders. Certain percentage-of-assets limits which are regulatory rather than statutory, such as those pertaining to flexible payment mortgages and development loans, would be deleted. A new section providing for loans on unimproved real estate would be added to implement this new statutory authority. Loans of up to 15 years would be authorized on the security of building lots to be used for borrowers' personal residential use. the coverage of private mortgage insurance on loans in excess of 90 percent of value would be reduced to the amount of the loan exceeding 90 percent. The minimum loans-to-one-borrower authority for new associations would be increased.

Accordingly, the Federal Home Loan Bank Board hereby proposes to amend 12 CFR Parts 525, 541, 545, and 563, as set forth below.

Federal Home Loan Bank System

PART 525—ADVANCES

§ 523.13 [Deleted]

1. Delete § 525.13 Home Mortgages exceeding $60,000.

Federal Savings and Loan System

PART 541—DEFINITIONS

2. Amend Part 541 by revising §§ 541.12, 541.14, and 541.17 (a) and (b), and adding new §§ 541.18–1 and 541.21, to read as follows:

§ 541.12 Improved real estate.

Any of the real estate defined in §§ 541.3, 541.4, 541.11, 541.16, 541.17, or 541.23.

§ 541.14 Loans secured by liens on real estate.

(a) Loans secured by an interest in real estate in fee or in a leasehold or subleasehold extending or renewable automatically at the option of the holder or the Federal association for 5 years after maturity of the loan, if, in the event of default, the real estate interest could be used to satisfy the obligation with the same priority as a mortgage or a deed of trust in the jurisdiction where the real estate is located; and

(b) Loans secured by assignment of such loans.

§ 541.17 Other improved real estate.

(a) Commercial real estate containing (1) a permanent structure(s) constituting at least 25 percent of its value, or (2) improvements which make it usable by a business or industrial enterprise.

(b) Real estate containing offsite improvements, completed according to governmental requirements and general practice in the community, sufficient to make the property ready for primarily residential construction, and real estate in the process of being improved by a building or buildings to be constructed or in the process of being constructed for primarily residential use.

* * * * *

§ 541.18–1 Residential real property.

Real estate improved or to be improved by a structure(s) designed primarily for residential use, and deriving at least 80 percent of its value from the land and improvements attributable to such use.

§ 541.21 Unimproved real estate.

Any real estate which will become (a) improved real estate as defined in § 541.12, or (b) other improved real estate as defined in § 541.17(b) of this Part.

PART 545—OPERATIONS

3. Revise §§ 545.6, 545.6–1, and 545.6–2, by substituting new texts to read as follows:

§ 545.6 Real estate loans.

(a) *General.* A Federal association may invest in, sell, purchase, or otherwise deal with loans or interests in loans secured by liens on real estate, only as provided in this Part and subject to the limitations in § 563.9 of this chapter.

(b) *Determination of loan-to-value ratios.* (1) In determining compliance with maximum loan-to-value limitations in this Part, at the time of making a loan an association shall add together the amount of all real estate loans on the security property, and shall not make such a loan unless the total amount of such mortgages (including the one to be made) does not exceed applicable maximum loan-to-value limitations prescribed in this Part, as indicated by documentation retained in the loan file.

(2) In valuing the real estate security, an association shall use the current appraised value of the security property, and may include any expected value of improvements to be financed.

(c) *Purchase of loans from the Federal Savings and Loan Insurance Corporation.* An association may purchase from the Federal Savings and Loan Insurance Corporation any real-estate-related loan guaranteed by the Corporation under a guaranty contract made by the Corporation with the purchasing association.

§ 545.6–1 Insured and guaranteed real estate loans.

(a) Loans that are insured or guaranteed by a public mortgage insurer may be made in amounts and with terms and conditions of repayment acceptable to the insurer, provided the loan is at least 10 percent insured or 20 percent guaranteed.

(b) A loan is insured or guaranteed by a public mortgage insurer if:

(1) The loan is guaranteed, or a commitment to guarantee the loan has been made, under the Servicemen's Readjustment Act of 1944 or chapter 37 of title 38, United States Code;

(2) The mortgagee is insured, or a commitment for insurance has been made, under the National Housing Act or the Servicemen's Readjustment Act of 1944, or chapter 37 of title 38, United States Code; or

(3) The loan is insured or guaranteed by an agency or instrumentality of a state (i) whose full faith and credit is pledged to support the insurance or guarantee, or (ii) whose insurance or guarantee program is approved by the Federal Home Loan Mortgage Corporation.

§ 545.6–2 Residential real estate loans.

(a) *Home loans.* (1) *General requirements.* Loans on the security of homes or combinations of homes and business property, repayable in regular monthly payments sufficient to liquidate the debt, principal and interest, wthin the loan term, shall not exceed 90 percent of the value of the security property and shall be repayable within 40 years. Except as otherwise specifically authorized in this Part, after the first payment on a loan described under this paragraph (a) which is secured by property occupied or to be occupied by the borrower, no subsequent payment shall be more than any preceding payment.

(2) *Ninety-five percent loan-to-value authorization.* The loan-to-value limitation in paragraph (a)(1) of this section shall be 95 percent, if:

(i) The loan contract requires that, in addition to principal and interest payments on the loan, one-twelfth of estimated annual taxes and assessments on the security property by paid monthly in advance to the association;

(ii) The borrower, including a purchaser who assumes the loan, has executed a certificate stating that the borrower occupies, or in good faith intends to occupy, the property (or one dwelling on the property) as the borrower's principal dwelling; and

(iii) As long as the unpaid balance of the loan exceeds 90 percent of the value or purchase price of the security property, determined at the time the loan was made, such excess is guaranteed or insured by a mortgage insurance company which the Federal Home Loan Mortgage Corporation has determined to be a "qualified private insurer."

(3) *Non-monthly installment loans.* The term-of-years limitation shall be 15 years on loans made with interest payable less frequently than monthly but at least semi-annually and principal payable less frequently than monthly but at least annually in installments sufficient to retire the debt, both interest and principal, within the term, and 40 years on loans made on farm residences or combinations of farm residences and commercial farming enterprises with principal and interest payable less frequently than monthly but at least annually in installments sufficient to retire the debt, both interest and principal, within the loan term.

(4) *Loans to facilitate trade-in or exchange.* Loans made to facilitate the trade-in or exchange of security property described in this section, including bridge loans to individuals and realtors, shall not exceed 80 percent of value and shall be repayable within 18 months, with interest payable at least semi-annually: *provided,* that the aggregate amount of such loans may not exceed 5 percent of an association's assets.

(5) *Nonamortized loans.* Nonamortized loans (loans on which no principal payments are made until the end of the term) shall not exceed 60 percent of value and shall be repayable within 5 years, with interest payable at least semi-annually.

(6) *Loans made on the combined security of real estate and savings accounts.* Loans may be made under paragraph (a)(2) in excess of the maximum loan-to-value ration therein permitted, with such excess secured by savings accounts, subject to the following restrictions:

(i) The loan shall not exceed the appraised value of the real estate;

(ii) The savings account shall consist only of funds belonging to the borrower, members of his family, or his employer;

(iii) The association shall fully disclose to the prospective borrower the difference (including interest, private-mortgage-insurance costs, and equity interest) between a loan secured by real estate and savings and a loan secured by real estate alone; and

(iv) The loan shall comply with § 545.6–4(b)(2).

(7) *Flexible payment loans.* Loans authorized under this paragraph (a) which are secured by a single-family dwelling which the borrower has certified is or will be the borrower's principal dwelling, may be repayable in monthly installments, as follows:

(i) During an initial period not exceeding five years, installments shall equal at least one-twelfth the annual interest rate times the unpaid balance of the loan which rate may be increased only by subsequent agreement;

(ii) The amount of the first payment after such period shall be fixed at the beginning of the loan term and subsequent required payments may be less but not more;

(iii) Required payments shall be sufficient to liquidate the debt, principal and interest, within the loan term; and

(iv) The loan agreement shall describe the payment schedule.

(8) *Loans on cooperatives.* Loans may be made under paragraphs (a) (1) or (2) as follows:

(i) *Loans on the security of cooperative housing developments.* The association shall require that the cooperative housing development maintain reserves at least equal to those required for comparable developments insured by the Federal Housing Administration.

V 45 / 153 AG 6 80 UMI

(ii) *Loans on individual cooperative units.* Such loans may be made on the security of (A) a security interest in stock or a membership certificate issued to a tenant stockholder or resident member by a non-profit cooperative housing organization, and (B) an assignment of the borrower's interest in the proprietary lease or occupancy agreement issued by such organization.

(9) See §§ 545.6–4 and 545.6–4a of this Part for other mortgage plans which may be used for loans authorized under this paragraph.

(b) *Multifamily dwelling loans.* Loans on the security of other dwelling units, combinations of dwelling units, including homes, and business property involving only minor or incidental business use, shall not exceed 90 percent of the value of the security property and shall be repayable within 30 years: provided, that nonamortized loans shall not exceed 60 percent of value and shall be repayable within 5 years, with at least semi-annual interest payments.

(c) *Loans on unimproved real estate.* Loans to finance acquisition of land to be eventually developed for primarily residential usage shall not exceed 66⅔ percent of the value of the security property, and shall be repayable in 3 years with interest payable at least semi-annually.

(d) *Development loans.* (1) Loans to finance development of land for primarily residential usage shall not exceed 75 percent of the value of the security property and shall be repayable within 5 years, with interest payable at least semi-annually. An association shall not make such a loan unless it appears that the purpose of the loan is to enable the borrower to undertake residential development of the land to be acquired, as evidenced by a preliminary development plan that is satisfactory to the association.

(2) Upon release of any portion of the security property from the lien securing the loan, the principal balance of the loan shall be reduced by an amount at least equal to that portion of the outstanding loan balance attributable to the value of the property to be released. "Value" for the purposes of the preceding sentence is the value fixed at the time the loan was made.

(3) An association may extend the time for payment for an additional period not over 3 years, but no such extension may be made unless (A) interest on the loan is current, (B) the association's board has before it a current independent appraisal of the security property, and (C) the outstanding principal balance of the loan is or has been reduced to an amount not over 75 percent of the value of the security property.

(4) The aggregate amount of loans outstanding to any one borrower (including loans to any business entity with which such borrower is associated) or on any one project shall not exceed an amount equal to two percent of the association's assets.

(e) *Loans on building lots and sites.* Loans on the security of building lots and sites ("other improved real estates" as defined in § 541.17(b) of this Part) shall comply with the following requirements:

(1) Loans for a borrower's principal dwelling (as evidenced by a borrower's certification of intention, at the time the loan is made, that the property will be so used) shall not exceed 75 percent of the value of the security property and shall be repayable within 15 years. The loan contract shall provide for monthly payments of principal and interest sufficient to amortize at least 40 percent of the original principal amount before the end of the loan term.

(2) Loans other than for a borrower's principal dwelling shall not exceed 75 percent of the value of the security property and shall be repayable within 3 years, with semi-annual interest payments beginning not more than 1 year after the first disbursement.

(3) The provisions of paragraphs (d)(2), (3), and (4) of this section shall apply to this paragraph (e).

(f) *Construction loans.* (1) Construction loans shall not exceed 75 percent of the value of the security property and shall be repayable in 3 years, except that for construction of single family dwellings, construction of individual structures shall be completed within 18 months of disbursement of applicable loan funds.

(2) Associations shall reserve the right to impose limits on the number of structures under construction at a given time.

(3) The provisions of paragraphs (d)(2) and (4) of this section apply to this paragraph (f).

(g) *Rehabilitation loans.* Loans to finance substantial alteration, repair or improvement of primarily residential property may be made within the maximum loan-to-value ratios permitted for loans under paragraphs (a) and (b) of this section and shall be repayable within 3 years (18 months for a single family dwelling).

(h) *Combination loans.* (1) Loans authorized by this section may be combined, with the term of each loan beginning at the end of the term of the preceding loan.

(2) Development, lot and site, and construction loans combined with permanent financing loans, or made to borrowers who have secured permanent financing from other lenders, may be made within the maximum loan-to-value ratios permitted for loans under paragraph (a) and (b) of this section: *provided,* that disbursement of loan proceeds in excess of 80 percent of the value of the security property shall not be made until substantial completion of the construction.

(3) For a combination of loans to finance development and loans on building lots and sites and/or construction loans, whether or not development has been completed, (i) beginning not more than 3 years after the first disbursement of loan proceeds, the principal shall be amortized monthly at a rate of at least 1½ percent of that portion of the loan balance applicable to any home, including the building site, and (ii) beginning not more than 4 years after the first disbursement of any loan proceeds, principal shall be amortized monthly at a rate of at least 1½ percent of that portion of the loan balance not applicable to the construction of any home and its building site.

(i) See § 545.6–5 of this Part for residential loan leeway authority.

4. Delete § 545.6–2a, and revise § 545.6–3 by substituting a new text, to read as follows:

§ 545.6–2a Loans on cooperatives [Deleted]

§ 545.6–3 Home improvement loans.

An association may invest in any loans, with or without security, for residential real property alteration, repair or improvement, or for equipping residential real property, with equal installments payable at least quarterly, the first installment due no later than 120 days from the date the loan is made and the final installment due no later than 20 years and 32 days from such date. However, the loan contract may provide for a first and/or final installment in an amount other than that of the regular installment, but such installment shall not be less than one-half of, nor more than one and one-half times, the amount of the regular installment.

§ 545.6–4 [Amended]

5. Amend § 545.6–4(b) by deleting the phrase "under § 541.9 of this subchapter" in subparagraph (4), and changing the reference from § 545.6–1(a) to § 545.6–2(a) in subparagraph (5) thereof.

§ 545.6–4a [Amended]

6. Amend § 545.6–4a by deleting the phrase "of up to 30 years" in paragraph (b) thereof.

7. Revise §§ 545.6–5 and 545.6–6 by substituting new texts to read as follows:

§ 545.6–5 Leeway authority for loans relating to residential real property and farms.

(a) *Loans without requirement of security—for construction purposes.* In additional to loans in which it may invest under other provisions of this Part, an association may invest an amount not exceeding the greater of its net worth or 5 percent of assets in loans for construction, adding to, improving, altering, repairing, equipping or furnishing residential real property, where the association relies substantially for repayment on: (1) the borrower's general credit standing and forecast of income, with or without other security, or (2) other assurances of repayment, including a third-party guaranty or similar obligation.

(b) *Nonconforming secured loans.* In addition to loans in which it may invest under other provisions of this Part, an association may invest an amount not exceeding the greater of its net worth or 5 percent of assets in loans, advances of credit, and interests therein, secured by residential real property and real property used or to be used for commercial farming enterprises, which are not otherwise authorized under this Part.

§ 545.6–6 Commercial real estate loans.

(a) Loans secured by first liens on other improved real estate, as defined in § 541.17(a) and (c) of this subchapter, shall not exceed 90 percent of the value of the security property, and shall be repayable within 30 years: provided, that nonamortized loans shall not exceed 60 percent of value and shall be repayable within 5 years, with interest payable at least semi-annually.

(b) An association's aggregate investment under this section shall not exceed 20 percent of assets.

(c) See § 545.6–5 for additional authority to invest in real estate loans to commercial farming enterprises, and § 545.6–10 for additional authority to invest in community development loans.

8. Delete §§ 545.6–7, 545.6–8 and 545.6–12, and revise paragraph (a) of § 545.6–13, to read as follows:

§ 545.67–7 Insured loans to finance land development [Deleted]

§ 545.6–8 Housing facilities for the aging [Deleted]

§ 545.6–12 Nonconforming secured loans and loans without requirement of security. [Deleted]

§ 545.6–13 Farmers Home Administration rural housing program guaranteed loans.

(a) *General.* An association may invest in loans on residential real estate guaranteed under the Farmers Home Administration (FmHA) Rural Housing Program, without regard to other provisions in this Part.

* * * * *

§§ 545.7–6 and 545–7–7 [Amended]

9. Amend § 545.7–6 by deleting paragraph (d)(1) and paragraph (e)(2)(ii); amend § 545.7–7 by deleting paragraph (a)(3); and revise § 545.7–9 as follows:

§ 545.7–9 Collateral loans.

An association may make a collateral loan (secured by assignment of secured loans) if it could, under applicable law and regulations, make or purchase the underlying assigned loan(s).

10. Delete §§ 545.8, 545.8–1, 545.8–6, and 545.8–7, and revise the title of § 545.8–3, as follows:

§ 545.8 Participations. [Deleted]

§ 545.8–1 Purchase of loans. [Deleted]

§ 545.8–3 Contract provisions for real estate loans.

§ 545.8–6 Lending area. [Deleted]

§ 545.8–7 Percentage limitation on real estate loan investments. [Deleted]

Federal Savings and Loan Insurance Corporation

PART 563—OPERATIONS

11. Revise § 563.9 to read as follows:

§ 563.9 Nationwide lending.

An insured institution may invest in, sell, purchase, participate or otherwise deal in loans on security property located outside its normal lending territory but within the United States or its territories and possessions.

12. Delete §§ 563.9–1 and 563.9–2 as follows:

§ 563.9–1 Participation loans. [Deleted]

§ 563.9–2 Sales of interest in loans on real estate located outside normal lending territory. [Deleted]

13. Amend § 563.9–3 by deleting "$100,000" and substituting "$200,000" in paragraph (b) thereof.

(Sec. 10, 47 Stat. 725 (12 U.S.C. 1421 et seq.) sec. 5, 48 Stat. 132 (12 U.S.C. 1464), as amended by sec. 401, 94 Stat. 160; secs. 402, 403, 407, 48 Stat. 1256, 1257, 1260, as amended (12 U.S.C. 1725, 1726, 1730), Reorg. Plan No. 3 of 1947, 12 F.R. 4891, 3 CFR, 1943–48 comp., p. 1071)

By the Federal Home Loan Bank Board.

Federally-Chartered Saving and Loan Associations and Mutual Savings Banks; Investment in Consumer Loans, Commercial Paper and Corporate, Debt Securities

Dated: July 31, 1980.

AGENCY: Federal Home Loan Bank Board.

ACTION: Proposed regulations.

SUMMARY: These regulations are proposed to implement section 401 of Title IV of the Depository Institutions Deregulation and Monetary Control Act of 1980 which authorizes Federally-chartered savings and loan associations and mutual savings banks, subject to a 20 percentage-of-assets limitation, to make secured or unsecured consumer loans and to invest in, sell, or hold commercial paper and corporate debt securities as defined and approved by the Federal Home Loan Bank Board. These regulations also implement the Federal Financial Institutions Examination Council's recommended "Uniform Policy for Classification of Consumer Installment Credit Based on Delinquency Status."

DATE: Comments must be received by: October 6, 1980.

ADDRESS: Please send comments to the Office of the Secretary, Federal Home Loan Bank Board, 1700 G Street, N.W., Washington, D.C. 20552.

FOR FURTHER INFORMATION CONTACT: Ann Hume Loikow, Office of General Counsel, telephone number (202) 377–6448, Federal Home Loan Bank Board, 1700 G Street N.W., Washington, D.C. 20552.

SUPPLEMENTARY INFORMATION:

Background

Section 401 of The Depository Institutions Deregulation and Monetary Control Act of 1980 ("Act"), Pub. L. 96–221, 94 Stat. 132, greatly expanded the investment powers of Federally-chartered savings and loan associations and mutual savings banks. Among other things, section 401 of the Act completely

revised section 5(c) of the Home Owners Loan Act of 1933 (12 U.S.C. § 1464(c)) which contains the basic investment authority for Federally-charter savings and loan associations. A new subparagraph (B) was added to section 5(c)(2), the category of investments limited to 20 percent of assets, which authorizes Federals to engage in consumer lending and to invest in, sell, or hold commercial paper and corporate debt securities as defined and approved by the Board. These increased investment powers will assist associations in meeting their objective of financing the nation's housing needs.

Since a major purpose of revising section 5(c) and expanding Federals' investment powers was to make them more competitive with other financial institutions by enabling them to offer the consumer convenient one-stop financial services, the Board proposes to implement this new authority with a broad regulation and to leave the detailed decisions regarding exercise of this new lending and investment authority to each institution's management.

Consumer Lending

Definitions

Although Federals already had authority before the passage of this Act to make certain specialized kinds of consumer loans such as educational loans, home improvement loans, equipping loans, and mobile home loans, the only way in which a Federally chartered association could engage in generalized consumer lending was by investing in a service corporation which, under § 545.9–1 of the Rules and Regulations for the Federal Savings and Loan System ("Federal Regulations") (12 CFR 545.9–1), was authorized to originate, purchase, sell and service consumer loans in general, as well as make these more limited types of loans to consumers. Subparagraph (a)(3) of § 545.9–1 contains the Board's only definition of "consumer loan." Since generalized consumer lending is now authorized for Federals, as well as for their service corporations, the Board proposes to delete this provision and to add a new definition of "consumer loan," applicable to both Federals and their service corporations.

The proposed new definition is derived from the Act's language and the Federal Reserve Board's definitions of similar terms in its consumer protection regulations (Regulations B and Z in particular). Associations will now be authorized to make both secured and unsecured consumer loans. The major difference from the Federal Reserve Board's definitions is that loans secured by liens on real estate, as defined in § 541.14 of the Federal Regulations, are excluded. In addition, the proposed definition of "consumer loan" is broader than that found in § 545.9–1 since it does not limit secured consumer loans as § 545.9–1 does to those which are "secured by goods used or bought primarily for personal, family or household purposes." Thus, so long as a loan is not a loan secured by a lien on real estate and is made for personal, family or household purposes, which could include debt consolidation, there is no restriction on what can be used for security, if any is required.

Under the new definition, a consumer loan is a type of "consumer credit," which is a broader term and includes other types of loans which are separately authorized to be made to consumers. A consumer loan may be made as either "open-end" or "closed-end consumer credit." New definitions of these terms are proposed to be added to Part 561 of the Regulations of the Federal Savings and Loan Insurance Corporation ("Insurance Regulations"). The proposed definitions are modelled on the Federal Reserve Board's definitions in Regulations B and Z, with which associations are already familiar, and are needed to implement the "Uniform Policy for Classification of Consumer Installment Credit Based on Delinquency Status" recommended by the Federal Financial Institutions Examination Council, which is incorporated into this proposal.

Another new definition has also been proposed to be added to Part 541 of the Federal Regulations. The statutory definition of "Loans," which states that any reference to a loan in section 5(c) of the Home Owners Loan Act also authorizes an association to have an interest in such loan, has been added to make it clear in the regulations that an association may participate in any loan it is authorized to invest in or make.

Consumer Loan Authority

A new § 545.7–10, which contains the basic authorization for, and limits on, an association's exercise of the new consumer loan authority, is proposed to be added to the subdivision "Other Loans" of Part 545 (Operations) of the Federal Regulations. Since a large amount of consumer lending is indirect, where the dealer enters into an arrangement with a lender under which the dealer directly arranges the consumer loan that the lender then acquires, associations would be at a competitive disadvantage if they were authorized only to make direct consumer loans. Thus, both direct and indirect consumer lending will be authorized. The only restrictions proposed are the following: such loans would come within the 20-percentage-of-assets limitation contained in the Act; a requirement that before indirect loans can be made through a dealer, the dealer must have been approved by the association's board of directors; a limitation on the total balances of all outstanding unsecured consumer loans to one borrower; and a requirement that all consumer loans that the assoociation makes—i.e., originates, purchases, sells, services, and participates in—conform to the association's written underwriting standards and are loans which the association could make directly.

The proposed requirement that the association's board of directors approve the dealer with whom the association engages in indirect consumer lending is designed to ensure that the board of directors is aware of the various arrangements the association has made to make consumer loans and that the association has examined the dealer's reliability and financial responsibility so that such arrangements are carefully and prudently considered.

The proposed limitatin on unsecured loans to one borrower would limit the association's authority to make unsecured consumer loans to the lesser of one-fourth of one percent of the association's assets or five percent of its net worth. These two measures are roughly equivalent and place an overall limitation on unsecured loans to the same borrower which is more restrictive that the restriction found in § 563.9–3 of the Insurance Regulations. Under that section, all associations may have at least $100,000 in total balances of all outstanding loans to the same borrower and may increase that minimum to an amount equal to the lesser of ten percent of the association's withdrawable accounts or an amount equal to the association's net worth. Under the proposed limitation, assuming a mature association whose net worth is five percent of assets, for example, an association with $100 million in assets could not make more than $250,000 in unsecured consumer loans to the same borrower, an association with $50 million in assets could not make more than $125,000 in sch loans, and an association with $10 million in assets could only make a maximum of $25,000 in such loans to the same borrower.

The more restrictive provisions of this section are proposed as a reasonable limitation on the amount of an association's portfolio that can be concentrated in *unsecured* personal loans to the *same* person. This limitation does not prevent an association from making additional *secured* loans to a borrower, since with a secured loan there is some sort of collateral to protect the association's interest if the borrower defaults. Section 563.9–3 would still limit the total amount of all loans which an association would be authorized to make to the same borrower.

No limitation (other than the overall 20 percent-of-assets limit for consumer loans) is proposed to be placed on the total amount of unsecured consumer loans an association can make to all borrowers, since such a limitation would have little practical effect unless it reached the unsecured loans made in connection with credit cards and NOW accounts, neither of which is subject under the Act to a percentage-of-assets limitation. However, the Board recognizes that it is normal business practice for a lender to place relatively low limits, in the range of several hundred to several thousand dollars, on such extensions of credit when an account is opened, so the danger of overconcentration in loans dependent on the credit of the same person is not as much of a problem as it is with unsecured loans made under § 545.7–10.

Although banks and other lenders often finance a dealer's inventory in order to induce the dealer to allow them to finance individual consumer loans, the Board is not proposing to authorize associations to do inventory financing because the Board does not consider inventory financing to fall within the Act's requirement that the loan be "for personal, family, or household purposes." Section 545.7–6 of Federal Regulations pertaining to mobile home financing, does authorize associations to finance a mobile home dealer's inventory. However, the language of section 5(c)(1)(J) of the Home Owners Loan Act, which that regulation implements, is much broader than that of section 5(c)(2)(B), which authorizes consumer lending, since it authorizes associations to make loans "*for the purpose of* manufactured home financing" (emphasis added). Section 5(c)(2)(B) is much more narrowly written and only authorizes associations to "*make* secured or unsecured loans for personal, family, or household purposes" (emphasis added). Since Congress's intention in authorizing associations to make consumer loans was to make them a "family finance center," which in one place could meet all the financial needs of the consumer, the Board feels that section 5(c)(2)(B) cannot be read as authorizing what is, in effect, a commercial loan.

The Board has received a number of inquiries about whether an association could finance loans secured by interval ownership interests in real estate. The Board has previously taken the position that a substantial portion of such loans is made for the purchase of benefits and services in addition to the real estate itself and that this portion, which is not secured by the real estate, must be considered to be an unsecured consumer loan which, prior to the enactment of the Act and and the issuance of these regulations, an association was not authorized to make. Because of the administrative difficulties in separating the real estate portion from the non-real estate portion of such loans, the Board has now determined that the total amount of loans made to purchase an interval ownership in real estate should be included within the category of unsecured consumer loans which an association will be authorized to make by this new section.

There may be some confusion as to what types of loans must be put into the 20% consumer loan category contained in § 545.7–10, since a number of other loans which Federals are authorized to make under separate statutory provisions, such as educational loans and equipping loans, are commonly thought of as "consumer loans" because they are loans to a natural person for personal, family, or household purposes. Because these specific lending activities have been expressly reauthorized in the Act, the Board has concluded that in order to provide associations with the maximum degree of flexibility associations should be given the option, under section 545.7–10(b), of choosing the category in which to place a particular loan.

Classification of Delinquent Consumer Loans

On February 7, 1980, the Federal Financial Institutions Examination Council recommended that all of the Federal financial regulatory agencies adopt a uniform examination policy on the classification of delinquent consumer installment loans. The Board declined to take action at that time since Congress had not yet taken final action to authorize Federals to make consumer loans. Since that has now occurred, the Board is proposing to include in the proposed regulations the provisions of the uniform policy, slightly modified to conform to the format and nomenclature of the regulatory and examination process pertaining to savings and loan associations.

The Examination Council recommended the establishment of uniform guidelines for the classification of installment credit based upon delinquency status, in order to provide uniform treatment of such loans by all insured financial institutions. The Examination Council's approach in determining how to classify delinquent consumer loans parallels, in principle, current banking practices and recognizes the statistical validity of measuring losses for both open-end and closed-end credit predicated on past-due status. Although the three Federal banking agencies have historically relied upon delinquency status as a major determinant in classifying consumer installment credit, no interagency standard has ever been used.

The Board recognizes that evaluating the quality of a consumer credit portfolio on a loan-by-loan basis is inefficient and unnecessary. Therefore, in order to give this policy equal weight with the Board's other accounting requirements which have been issued as regulations, the Board has chosen to propose that the Council's Uniform Policy be added as an amendment to the Insurance Regulations which would allow the Board's existing method of classifying loans to be modified to conform to the Examination Council's recommended policy.

Several new definitions are proposed to be added to Part 561 of the Insurance Regulations. Since the Uniform Policy divides "consumer credit," a broader concept than "consumer loan," as noted above, into "open-end" and "closed-end" credit, definitions of these three terms, derived from the Federal Reserve Board's Regulations B and Z, have been proposed to be added to Part 561. Unlike the Federal Reserve Board's regulations, however, loans secured by liens on real estate as defined in § 541.14 are excluded from the definition of "consumer credit." Thus, the types of loans which are subject to the proposed delinquency classification system are non-real estate loans for personal, family, or household purposes, including consumer loans, educational loans, unsecured loans for real property alteration, repair or improvement, or for the equipping of real property, and credit extended in connection with credit cards. Because the Board's present system for classifying loans already specifically provdies for the inclusion of delinquent mobile home loans (§§ 561.15 (i), (j), and (k)), mobile home loans are excluded from the term "consumer credit" and are thus not subject to the proposed classification system.

A proposed new definition of "slow consumer credit" (§ 561.16a), which

V 45 / 153 3 AG 6 80 UMI

corresponds to the Uniform Policy's definition of "substandard" consumer credit, has also been developed. The current definition of "scheduled items" would be amended so "slow consumer credit" would be counted in determining the amount of an association's scheduled items. Another new definition, "consumer credit classified as a loss" (§ 561.16b), is also to be added to Part 561 in connection with the proposed new § 563.46, which would require an association to charge off consumer credit classified as a loss to its net worth or against its current earnings. This proposed charge-off conforms to generally accepted accounting principles and to the banking industry's practices. An illustrative chart showing when a delinquent loan is to be classified as "slow" or as a "loss" has been included in proposed § 561.16a and § 561.16b.

Nevertheless, the Board recognizes that there may be instances, particularly where significant amounts are involved, that may warrant exceptions to the formula contained in the proposed regulations which would recognize those individual situations. Thus, proposed § 561.16a and § 561.16b would not require an association to classify a loan as "slow consumer credit" or as a "loss" if the association could clearly demonstrate that repayment would occur regardless of delinquency status. Examples of such situations might include: loans well secured by collateral and in the process of collection; loans supported by valid guarantees or insurance; and loans where claims have been filed against solvent estates.

The Board also recognizes that even a well managed association is likely to have a higher rate of slow consumer loans than slow real estate loans and that under the Board's regulations, associations are prohibited from engaging in certain activities if their scheduled items, which includes their slow loans and slow consumer loans, reach a certain level. Although the Board has proposed amendments to other sections of its regulations which will somewhat limit the impact of excessive scheduled items, the Board is considering ways to reflect this higher normal level of slow consumer loans so that associations operating well-managed consumer loan programs will not be subject to unreasonable limitations on their activities. Comments as to how this should be accomplished and what is an acceptable level of slow consumer loans are specifically solicited. However, it should be noted that the Board believes that the scheduled items computation is an important tool in determining an association's safety and soundness and that all scheduled items, including all slow consumer loans, should be fully reported and reflected in an association's net worth requirements.

Commercial Paper and Corporate Debt Securities

Definitions

Proposed new definitions of "commercial paper" and of "corporate debt securities" would be added to Part 541 of the Federal Regulations. In order to conform to the general practices of the securities industry, the proposed definition of "commercial paper" (§ 541.27) was derived from section 3(a)(3) of the Securities Act of 1933 (15 U.S.C. 77(c)(a)(3)) which exempts certain commercial paper with a maturity of nine months or less from the registration requirements of that act. Use of this definition would also be consistent with the amendments to section 5A(b)(1) of the Federal Home Loan Bank Act ("Bank Act") (12 U.S.C. 1425a(b)) now pending before Congress which would allow the Board to allow "highly rated commercial paper with 270 days or less remaining until maturity" to be counted for liquidity purposes.

Consistent with the goal of providing competitive equality with banks, the proposed new definition of "corporate debt securities" to be added as § 541.28 has been derived from the definition of "investment securities" contained in the national banking laws and regulations (12 U.S.C. 24 and 12 CFR 1.3(b)). Although there is no generally accepted limitation on the maturity of corporate debt securities, the proposed amendments now pending to section 5A(b)(1) of the Bank Act would also limit corporate debt obligations allowed to be used for liquidity purposes to those with three years or less remaining until maturity. Although the practical effect of enacting these amendments would be to encourage associations to invest in short-term securities, the Board feels that an additional requirement is needed to encourage associations to acquire short-term assets so that the maturities of the assets and liabilities in their portfolios will be more evenly balanced, with these new assets reflecting market rates much as the new savings certificates do. Because the Board feels that it is desirable to grant associations some flexibility in making these investments while encouraging investment in shorter-term securities, the Board has chosen to include in paragraph (b) of this section a requirement that the average maturity of such securities in an association's portfolio be limited to five years. By limiting the average maturity of the corporate debt securities in an association's portfolio rather than the maturity of each security, an association may invest in longer term securities, provided that such investments are offset by investments in much shorter term securities.

The Board has included the requirement that the corporate debt securities be "not predominantly speculative in nature." This is derived from the Comptroller of the Currency's regulatory definition of the types of investment securities in which national banks may invest (12 CFR 1.3(b)). This requirement is included to reinforce the Board's expectation that associations will exercise prudent judgment in exercising their new authority to invest in both commercial paper and corporate debt securities. The Board believes that the exercise of prudence by associations, together with the other limitations contained in § 545.9–4(b), will minimize or eliminate instances in which an association's corporate debt investment might be regarded as speculative.

Authorization To Invest in Commercial Paper and Corporate Debt Securities

A new § 545.9–4 is proposed to be added to the "Other Investments" section of Part 545 (Operations) of the Federal Regulations. Paragraph (a) of this section contains the general authorization for Federals to invest in, sell, or hold commercial paper and corporate debt securities as defined in § 541.27 and § 541.28 respectively, subject to the Act's 20 percentage-of-assets limitation and the limitations contained in paragraph § 545.9–4(b). The 20 percentage-of-assets limitation applies to the total investment under § 545.7–10 (Consumer loans) and § 545.9–4 (Commercial paper and corporate debt securities), added together, as provided by the Act. Federals are already authorized to issue their own commercial paper by § 545.24 (Borrowing, issuing obligations, and giving security), provided that the issuance complies with the provisions of § 563.8 (Borrowing limitations).

There are six proposed limitations, other than those contained in the definitions, on investments in commercial paper and corporate debt securities. First, as with investments in state and local government obligations (§ 545.7–11(b)(1)), at the time of purchase, such investments would be required to fall within certain grades as rated by nationally recognized investment rating services. Investments in commercial paper would be limited to those which are rated in one of the top two such grades, and investments in corporate debt securities to those which are rated in one of the top four such grades. At least two such rating companies must have published ratings of the investments placing them in the required grades. The Board believes that this approach will afford Federals a range of investment options consistent with safe and sound operations.

Second, the commercial paper or corporate debt securities in which Federals could invest would be required to be denominated in dollars and be issued by a corporation domiciled in the United States. This provision would limit investments to domestic paper and securities and eliminate the problems of dealing with ever-changing international exchange rates when trying to evaluate such an investment.

Third, a limit would be placed on an association's total investment in the commercial paper and debt securities of any one issuer. This limitation is similar to the "loans to one borrower provisions" of § 563.9–3 and the proposed limitation on unsecured consumer loans to one borrower in § 545.7–10(c). Most states have incorporated similar limitations in their state banking laws to prevent undue concentration of an institution's portfolio in the issues of one issuer. The Board is proposing that an association be limited to investing an amount equal to not more than one percent of its assets in the commercial paper and debt securities of any one issuer. As with § 563.9–3(a)(1), the term "issuer" includes any person or entity affiliated with the issuer. This limitation is consistent with the sixth proposed limitation, which would require associations to exercise prudent judgment in making investments in commercial paper and corporate debt securities. Such regulatory language is found in most state laws and is consistent with the Comptroller's requirement that national banks exercise "prudent banking judgment" in their investments.

Fourth, associations would be authorized to invest in corporate debt securities which are convertible into stock if several conditions are met. First, the securities must conform to all the other limitations contained in paragraph (b) of § 545.9–4. In addition, they must not be convertible at the option of the issuer, a limitation the Comptroller of the Currency's regulations also places on national banks' investments in convertible securities. This ensures that the exercise of the conversion feature is solely in the hands of the association. However, since Federals have not been given the statutory authority to invest in equity securities, two additional limitations are proposed to be included. The association would be prohibited from exercising the conversion feature itself and could only invest in convertible securities that are traded on a national exchange. The latter limitation would ensure that the security was readily marketable so that, although the association could not convert it itself, it could easily sell it to another investor who could.

The fifth limitation, which has already been discussed, limits the average maturity of all corporate debt securities contained in an association's portfolio to five years.

Accordingly, the Board hereby proposes to amend the Rules and Regulations for the Federal Savings and Loan System by deleting § 545.9–1(a)(3) and adding new §§ 541.25, 541.26, 541.27, 541.28, 545.7–10 and 545.9–4; and to amend the Rules and Regulations of the Federal Savings and Loan Insurance Corporation by adding new §§ 551.38, 561.39, 561.40, 561.16a, 561.16b, and 563.46, and amending § 561.15. Such new and amended sections shall read as follows:

§ 545.9–1 [Amended]

1. Delete the present subparagraph (3) to paragraph (a) of § 545.9–1 and renumber the present subparagraphs (4) through (8) as (3) through (7), respectively.

2. Add the following new definitions to Part 541:

§ 541.25 Consumer loan.

A secured or unsecured loan to a natural person for personal, family, or household purposes. Such loan is a type of consumer credit, as defined in § 561.38, and may be made as either open-end or closed-end consumer credit, as defined in § 561.39 and § 561.40.

§ 541.26 Loans.

Obligations and extensions or advances of credit; and any reference to a loan or investment includes an interest in such a loan or investment.

3. Add a new § 545.7–10 to read as follows:

§ 545.7–10 Consumer loans.

(a) *General.* A Federal association may make direct or indirect consumer loans; *provided:* (1) that at any one time the total investment made under this section and § 545.9–4 ("Commercial paper and corporate debt securities"), added together, shall not exceed 20 percent of an association's assets; and (2) that before indirect loans are made through a dealer, the dealer is approved by the association's board of directors. The authority to make a consumer loan includes the authority to originate, purchase, sell, service, and participate in such loans; *provided,* such loans conform to the provisions of this section and the association's written underwriting standards.

(b) *Relationship to other provisions of this chapter.* If a loan which may be made under this section is also authorized to be made under another section, an association shall have the option of choosing under which applicable section, and its respective percentage of assets limitation, if any, the loan shall be made.

(c) *Limitation on unsecured loans to one borrower.* The total balances of all outstanding loans, as defined in § 563.9–3(a)(2), which may be made under this section in unsecured loans to one borrower, as defined in § 563.9–3(a)(1), is limited to the lesser of ¼ of one percent of an association's assets or five percent of its net worth.

4. Add the following new definitions (§§ 561.38, 561.39, 561.40, 561.16a, and 561.16b) to Part 561:

§ 561.38 Consumer credit.

Credit extended to a natural person for personal, family, or household purposes, except for loans secured by liens on real estate as defined in § 541.14 and chattel liens secured by mobile homes. Among the types of credit included are consumer loans, as defined by § 541.25; educational loans; unsecured loans for real property alteration, repair or improvement, or for the equipping of real property; and credit extended in connection with credit cards.

§ 561.39 Open-end consumer credit.

Consumer credit extended on an account under a plan in which repeated transactions are reasonably contemplated, which describes the terms of such transactions and allows the consumer to pay in full without penalty or in installments, and which provides for a finance charge which may be computed from time to time on the outstanding unpaid balance. The term does not include negotiated advances under an open-end real estate mortgage.

§ 561.40 Closed-end consumer credit.

Consumer credit other than open-end consumer credit.

§ 561.16a Slow consumer credit.

The term "slow consumer credit" means closed-end consumer credit delinquent 90 to 119 days (4 monthly payments) and open-end consumer

V. 45 / 153 AUG 80 UMI

credit delinquent 90 to 179 days (4 to 6 zero billing cycles). For the purposes of computing delinquency, a payment of 90 percent or more of the contractual payment will be considered as a full payment. If an association can clearly demonstrate that repayment would occur regardless of delinquency status—for example the loan is well secured by collateral and is in the process of collection; the loan is supported by a valid guarantee or insurance; or it is a loan where the claims have been filed against a solvent estate—then such loan need not be classified as "slow consumer credit." The following chart illustrates the delinquency computation:

Closed-End Consumer Credit

Due date	Period	Delinquency status	Classification
March 10	March 10 to April 9	Not delinquent	
April 10	April 10-May 9	30 days or 2 payments	
May 10	May 10-June 9	60 days or 3 payments	
June 10	June 10-July 9	90 days or 4 payments	Slow.

Open-End Consumer Credit

Statement	Day	Zero billing cycle	Payment record	Days delinquent	Classification
1	1			0	
2	30	1	No payment	[1]5	
3	60	2	No payment	30	
4	90	3	No payment	60	
5	120	4	No payment	90	Slow.
6	150	5	No payment	120	Slow.
7	180	6	No payment	150	Slow.

[1] For purposes of illustration, assume customer has 25 days in which to pay before payment is considered delinquent.

§ 561.16b Consumer credit classified as a loss.

The term "consumer credit classified as a loss" means closed-end consumer credit delinquent 120 days or more (5 monthly payments or more) and open-end consumer credit delinquent 180 days or more (7 zero billing cycles or more). For the purposes of computing delinquency, a payment of 90 percent or more of the contractual payment will be considered as a full payment. If an association can clearly demonstrate that repayment would occur regardless of delinquency status—for example, the loan is well secured by collateral and is in the process of collection; the loan is supported by a valid guarantee or insurance; or it is a loan where claims have been filed against a solvent estate—then such loan need not be classified as a loss. The following chart illustrates the delinquency computation:

Closed-End Consumer Credit

Due date	Period	Delinquency status	Classification
March 10	March 10 to April 10	Not delinquent	
* * *	* * *	* * *	*
June 10	June 10-July 9	90 days or 4 payments	Slow.
July 10	July 10-August 9	120 days or 5 payments	Loss.[1]
August 10	August 10-September 9	150 days or 6 payments	Loss.[1]

Open-End Consumer Credit

Statement	Day	Zero billing cycle	Payment record	Days delinquent	Classification
1	1			0	
* * *	* * *	* * *	* * *	* * *	*
7	280	6	No payment	150	Slow.
8	210	7	No payment	180	Loss.[1]
9	240	8	No payment	210	Loss.[1]

[1] Charge-off as required by § 563.46 occurs.

5. Amend paragraph (a) of § 561.15 to read as follows:

§ 561.15 Scheduled items.

The term "scheduled items" means:

(a) Slow consumer credit, slow loans (other than loans specified in paragraph (b) of this section),

* * * * *

6. Add a new § 563.46 to read as follows:

§ 563.46 Charge-off of consumer credit classified as a loss.

When consumer credit is classified as a loss, as defined in § 561.16b, it shall be charged to the association's net worth or against its current earnings.

7. Add the following new definitions (§§ 541.27 and 541.28) to Part 541:

§ 541.27 Commercial paper.

Any note, draft, bill of exchange, or banker's acceptance which arises out of a current transaction or the proceeds of which have been or are to be used for current transactions, and which has a maturity at the time of issuance of not exceeding nine months, exclusive of days of grace, or any renewal thereof the maturity of which is likewise limited.

§ 541.28 Corporate debt security.

A marketable obligation, evidencing the indebtedness of any corporation in the form of bonds, notes and/or debentures which is commonly regarded as a debt security and is not predominantly speculative in nature.

8. Add a new § 545.9–4 to read as follows:

§ 545.9–4 Commercial paper and corporate debt securities.

(a) *General.* A Federal association may invest in, sell, or hold commercial paper and corporate debt securities, including corporate debt securities convertible into stock, subject to the limitations set forth in paragraph (b); *provided,* that at any one time the total investment made under this section and § 545.7–10 ("Consumer loans"), added together, shall not exceed 20 percent of an association's assets.

(b) *Limitations.* (1) As of the date of purchase, as shown by the most recently published rating made of such investments by at least two nationally recognized investment rating services, the commercial paper must be rated in either one of the top two grades and the corporate debt securities must be rated in one of the four highest grades.

(2) The commercial paper or corporate debt securities are denominated in dollars and are issued by a coporation domiciled in the United States.

(3) At any one time, an association's total investment in the commercial paper and coporate debt securities of any one issuer, or issued by any person or entity affiliated with such issuer, shall not exceed one percent of the association's assets.

(4) Investments in corporate debt securities convertible into stock are subject to the following additional limitations: (i) Purchase of securities convertible into stock at the option of the issuer is prohibited; (ii) such securities must be traded on a national exchange; and (iii) associations are prohibited from exercising the conversion feature.

(5) At any one time, the average maturity of all corporate debt securities in an association's portfolio may not exceed five years.

(6) An association shall exercise prudent judgment in making investments under this section.

(Sec. 5(c)(2)(B), 48 Stat. 132, as amended by Title IV, § 401, Pub. L. 96–221, 94 Stat. 151; § 5(d), 48 Stat. 132, as amended (12 U.S.C. 1464(d)); §§ 402, 403, 48 Stat. 1256, 1257, as amended (12 U.S.C. 1725, 1726); Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR 1943–48 Comp., p. 1071).

By the Federal Home Loan Bank Board.

Robert D. Linder,

Acting Secretary.

BILLING CODE 6720–01–M

DEPARTMENT OF JUSTICE

Office of the Attorney General

28 CFR Part 16

[AAG/A Order No. 54–80]

Exemption of Records Systems Under the Privacy Act

AGENCY: Department of Justice.

ACTION: Proposed rule.

SUMMARY: In the Notice Section of today's **Federal Register,** the Department of Justice proposes to exempt a new system of records, the DEA Regional Automated Intelligence Data System (RAIDS), JUSTICE/DEA–028 from the provisions of 5 U.S.C. 552a(c)(3) and (4), (d), (e)(1), (2) and (3), (e)(4)(G) and (H), (e)(5) and (8), (f) (g) and (h) pursuant to 5 U.S.C. 552a(j) and (k). These exemptions are required in order to ensure the confidentiality of intelligence and narcotics law enforcement.

DATES: All comments must be received by September 5, 1980.

ADDRESS: All comments should be addressed to the Administrative Counsel, Justice Management Division, Department of Justice, 10th and Constitution Avenue, N.W., Room 1214, Washington, D.C. 20530.

FOR FURTHER INFORMATION CONTACT:
William J. Snider (202–633–3452).

The authority for this proposed rule is 5 U.S.C. 552a. Accordingly, it is proposed that 28 CFR 16.98 be amended by adding paragraph (c)(16) as follows:

§ 16.98 Exemption of Drug Enforcement Administration Systems.

* * * * *

(c) * * *

* * * * * *

(16) Regional Automated Intelligence Data System (RAIDS) (JUSTICE/DEA–028).

* * * * * *

Dated: July 24, 1980.

William D. Van Stavoren,

Acting Assistant Attorney General for Administration.

BILLING CODE 4410–09–M

28 CFR Part 50

Open Judicial Proceedings; Policy

AGENCY: Department of Justice.

ACTION: Proposed rule.

SUMMARY: This section establishes guidelines for Government attorneys for consenting to, or moving for, the closure of judicial proceedings. The policy adopts a strong presumption that judicial proceedings should be open to the public unless closure is plainly essential to the interests of justice. Government attorneys may not move for or consent to closure of a portion of a judicial proceeding without the approval of the Deputy or Associate Attorney General.

DATES: Comments are invited from the public and the media. Comments should be received by the Department of Justice by September 15, 1980.

ADDRESS: Comments should be submitted to: Larry L. Simms, Deputy Assistant Attorney General, Office of Legal Counsel, Department of Justice, Constitution Avenue and 10th Street, NW., Washington, D.C. 20530.

Comments received in response to this notice will be available for public inspection in the Public Reading Room (Room 1266), Department of Justice, Constitution Avenue and 10th Street, N.W., Washington, D.C. between 9:00 a.m. and 5:30 p.m., Monday through Friday, except on Federal holidays, until the proposed rule is published in final form.

FOR FURTHER INFORMATION CONTACT:
T. Alexander Aleinikoff, Attorney-Adviser, Office of Legal Counsel, Department of Justice, Constitution Avenue and 10th Street, NW., Washington, D.C. 20530, (202) 633–2044.

SUPPLEMENTARY INFORMATION: Part 50 of Title 28 of the Code of Federal Regulations is proposed to be amended by adding a new § 50.9, to read as set forth below.

Dated: July 30, 1980.

Benjamin R. Civiletti,

Attorney General.

PART 50—STATEMENTS OF POLICY

It is proposed to add § 50.9 to read as follows:

§ 50.9 Policy with regard to open judicial proceedings.

Because of the vital public interest in open judicial proceedings, the Government has a general affirmative duty to oppose their closure. There is, moreover, a strong presumption against closing proceedings or portions thereof, and the Department of Justice foresees very few cases in which closure would be warranted. The Government should move for or consent to closed proceedings only when closure is plainly essential to the interests of justice. In furtherance of the Department's concern for the right of the public to attend judicial proceedings and the Department's obligation to the fair administration of justice, the following guidelines shall be adhered to by all attorneys for the United States.

(a) These guidelines apply to all federal trials, pre-trial evidentiary hearings, plea proceedings, sentencing proceedings, or portions thereof, except as indicated in paragraph (e) of this section.

(b) A Government attorney has a compelling duty to protect the societal interest in open proceedings.

(c) A Government attorney shall not move for a consent to closure of a proceeding covered by these guidelines unless:

(1) No reasonable alternative exists for protecting the interests at stake;

V 45 / 153 3 AG 6 80 UMI

(2) Closure is clearly likely to prevent the harm sought to be avoided;

(3) The degree of closure is minimized to the greatest extent possible;

(4) The public is given adequate notice of the proposed closure, and the motion for closure is made on the record;

(5) Transcripts of the closed proceedings will be unsealed as soon as the interests requiring closure no longer obtain; and

(6) Failure to close the proceedings will produce

(i) A substantial likelihood of denial of the right of a party to a fair trial,

(ii) A substantial likelihood of imminent danger to the safety of parties, witnesses, or other persons, or

(iii) A substantial likelihood that ongoing investigations will be seriously jeopardized.

(d) A Government attorney shall not move for or consent to the closure of:

(1) A civil proceeding except with the express authorization of the Associate Attorney General, based on articulated findings which meet the requirements of (c) above; or

(2) A criminal proceeding except with the express authorization of the Deputy Attoney General, based on articulated findings which meet the requirements of paragraph (c) of this section.

(e) These guidelines do not apply to:

(1) The closure of part of a judicial proceeding where necessary to protect national security information or classified documents; or

(2) *In camera* inspection, or the receipt, consideration or sealing, during the course of an open proceeding and as governed by substantive or procedural law (including the rules of evidence), of the following: trade secrets or similar commercial information, material which jeopardizes confidential investigative sources and methods, or grand jury information; or

(3) Conferences traditionally held at the bench or in chambers during the course of an open proceeding.

BILLING CODE 4410-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[FRL 1562-4]

State of Washington; Availability of Implementation Plan Revision

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability and advance notice of proposed rulemaking.

SUMMARY: EPA announces today receipt of a revision to the Washington State Implementation Plan which describes a strategy for the control of airborne lead within areas of the Central Puget Sound Region.

The public is invited to submit written comments to the record. A Notice of Proposed Rulemaking describing this revision and the action that EPA intends to take regarding this proposed revision will be published in the **Federal Register** at a later date. A second comment period for submittal of written comments will extend for thirty (30) days after the publication of the Notice of Proposed Rulemaking.

DATE: Preliminary comments on the proposed revisions will be accepted by EPA until such time as EPA publishes its Notice of Proposed Rulemaking. Subsequent to such proposal, EPA will again invite public comment on these proposed revisions to the Washington SIP.

ADDRESSES: The revisions to the Washington State Implementation Plan may be examined during normal business hours at the following locations:

Central Docket Section (#10A-80-10), Environmental Protection Agency, West Tower Lobby, Gallery I, 401 M Street, Washington, D.C. 20460.

Air Programs Branch, Environmental Protection Agency, Region 10, 1200 Sixth Avenue, Seattle, WA 98101.

State of Washington, Department of Ecology, 4224-6th Avenue SE., Rowesix, Bldg. #4, Lacey, WA 98503.

Comments Should Be Addressed To:

Laurie M. Kral, Air Programs Branch, M/S 629, Environmental Protection Agency, 1200 Sixth Avenue, Seattle, WA 98101, Telephone No. (206) 442-1226, FTS: 399-1226.

FOR FURTHER INFORMATION CONTACT:

Richard F. White, Air Programs Branch, M/S 629, Environmental Protection Agency, 1200 Sixth Avenue, Seattle, WA 98101, Telephone No. (206) 442-1226, FTS: 399-1226.

SUPPLEMENTARY INFORMATION: Effective October 5, 1978 a National Ambient Air Quality Standard (NAAQS) for airborne lead was established at 1.5 u/m^3 averaged quarterly. Therefore, pursuant to Section 110 of the Clean Air Act, each state is required to submit to EPA an implementation plan to attain and maintain the national standard for lead. This plan must demonstrate attainment of the lead NAAQS by November 5, 1982, and maintenance thereafter.

The revision entitled "Airborne Lead: A Plan for Control," contains control strategies for the Central Puget Sound Region. This revision includes (1) the Interstate-5 nonattainment area for lead in Seattle, and (2) the three-phase plan for reduction in lead emissions from parking lots and RSR Quemetco secondary lead smelter on Harbor Island, Seattle and (3) documentation of available lead data concerning the ASARCo copper smelter in Tacoma. A more detailed description of this revision will be published in the **Federal Register** at a later date as part of the Notice of Proposed Rulemaking.

The purpose of this Notice is to call the public's attention to the fact that the Airborne Lead Implementation Plan for the Central Puget Sound Region has been formally submitted to EPA by the state and is available for public inspection at the locations listed above. The public is encouraged to submit written comments regarding the proposed revision and thus participate in this rulemaking activity. Those interested may wish to first read the General Preamble for proposed rulemaking published by the EPA on April 4, 1979 (44 FR 20372) which identifies the major considerations that will guide EPA's evaluation of SIP revisions.

(Secs. 110 Clean Air Act (42 U.S.C. 7410 and 7502)).

Dated: July 28, 1980.

Donald P. Dubois,

Regional Administrator.

[FR doc. 80-23747 filed 8-5-80; 8:45 am]

BILLING CODE 6560-01-M

40 CFR Parts 167 and 169

[FRL 1563-5]

Registration of Pesticide Producing Establishments, Submission of Pesticide Reports, Labeling; and Maintenance of Records; Proposed Amendment to Regulations for Registration of Establishments and Maintenance of Records

AGENCY: Office of Enforcement, Environmental Protection Agency (EPA or the Agency).

ACTION: Proposed rule, extension of comment period.

SUMMARY: In the **Federal Register** of July 9, 1980 (45 FR 46100 EPA proposed to amend its regulations on registration of pesticide producing establishments and recordkeeping (40 CFR Parts 167 and 169) to include producers of active ingredients used in making pesticides. Comments were requested by August 8, 1980. An industry group and companies representing a broad spectrum of the chemical and pesticide industry expressed interest in this proposal and requested an extension of the comment period. Accordingly, the Agency is extending the comment period to encourage public comment on its proposal.

DATE: Comments on the proposed amendments to 40 CFR Parts 167 and 169 must be received by September 8, 1980.

ADDRESS: Interested persons are invited to participate in this proposed rulemaking by submitting written comments to Mr. Peter J. Niemiec, Pesticides and Toxic Substances Enforcement Division (EN-342), Policy and Strategy Branch, EPA, 401 M Street S.W., Washington, D.C. 20460. All comments filed pursuant to this notice will be available for public inspection in the Pesticides and Toxic Substances Enforcement Division, Room 3624 at the address given above from 8:30 to 4:30 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT:

Peter J. Niemiec, Office of Enforcement, Pesticides and Toxic Substances Enforcement Division, EN-342, EPA 401 M Street S.W., Washington, D.C. 20460. (202) 755-9404.

SUPPLEMENTARY INFORMATION: On July 9, 1980, EPA published a proposed amendment to its regulations regarding the registration of pesticide producing establishments and recordkeeping (40 CFR Parts 167 and 169). The primary purpose of this proposed amendment is to require producers of active ingredients used to make pesticides to register their establishments and report their production as well. Congress directed the Agency to register active ingredient producers in the Federal Pesticide Act of 1978, Pub. L. 95-396, 92 Stat. 819, which amended the Federal Insecticide and Rodenticide Act, U.S.C. Section 136 *et seq* (hereinafter, "FIFRA" or "the Act").

Since the Notice of Proposed Rulemaking was published, EPA has received several written and oral requests to extend the comment period for an additional thirty days. The organizations requesting the extension ranged from a manufacturer of pesticides through manufacturers of commodity chemicals, to a trade group for chemical manufacturers. In general, the reason for the request was that the proposed amendments will affect manufacturers not currently regulated under FIFRA. Thus, it was felt that more time was needed to adequately assess the impact of the proposal.

EPA believes that this is a legitimate reason for extending the comment period. In particular, the Agency hopes that the extended comment period will encourage more public comment on the effects of its proposal on the commodity chemical industry. Comments on all other aspects of the proposal are also encouraged.

Dated: August 1, 1980.

Richard O. Wilson,

Acting Assistant Administrator for Enforcement.

[FR Doc. 80-23821 Filed 8-5-80; 8:45 am]

BILLING CODE 6560-01-M

40 CFR Part 410

[FRL 1559-4]

Textile Mills Point Source Category Effluent Limitations Guidelines; Pretreatment Standards, and New Source Performance Standards

AGENCY: Environmental Protection Agency.

ACTION: Notice of availability, correction.

SUMMARY: EPA is making available a correction in the development document supporting the Agency's October 29, 1979, proposed regulation (44 FR 62204) implementing Sections 301, 304, 306, and 307 of the Clean Water Act for the textile industry. The purpose of this notice is to clarify the methodology used by the agency to calculate the proposed numerical limitations. EPA is inviting submission of comments relating to the information presented in this notice.

DATE: Comments should be submitted no later than September 5, 1980.

ADDRESS: Comments should be submitted to Mr. James R. Berlow, Effluent Guidelines Division (WH-552), Environmental Protection Agency, 401 M St., S.W., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT:

Mr. James R. Berlow, Effluent Guidelines Division (WH-522), Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460, telephone (202) 426-2554.

SUPPLEMENTARY INFORMATION: On October 29, 1979, the Environmental Protection Agency proposed a regulation (44 FR 62204) to establish best available technology economically achievable (BAT) and best conventional pollutant control technology (BCT) limits for existing sources, new source performance standards (NSPS), and pretreatment standards for existing and new sources (PSES and PSNS) for the Textile Mills Point Source Category.

The regulation, as proposed, requires no revision; however, the Agency inadvertently included an early draft of Table V-9 in the supporting *Development Document for Proposed Effluent Limitations Guidelines and Standards for the Textile Mills Point Source Category* (EPA 440/1-79/022b). Based upon additional data, Table V-9 had been revised prior to publication of the proposed regulation. EPA used the revised table in developing the proposed regulation, not the earlier draft. EPA regrets any inconvenience or confusion this oversight may have caused, and presents the corrected table provided in this notice.

Solicitation of Comments:

EPA invites and encourages public participation in its rulemaking process. Comments should be specifically directed to any changes between the original and corrected versions of Table V-9. EPA is soliciting comments only on the correction presented here. Any comments no related to the specific data contained in Table V-9 will not be appropriate. The Agency is allowing 30 days from the publication of this notice for evaluation and presentation of comments. Therefore, comments should be submitted to James R. Berlow at the above address no later than September 5, 1980.

Dated: July 23, 1980.

Eckart C. Beck,

Assistant Administrator for Water and Waste Management.

BILLING CODE 6560-01-M

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1116

[Ex Parte No. 382]

Recordation of Documents

AGENCY: Interstate Commerce Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: We propose to modify certain administrative procedures by requiring a "notification of release" with the filing of any trust document or other instrument with the Secretary's Office for recordation, pursuant to 49 USC 11303. This provision will require the filing party to indicate when a document is filed, the period it should be retained by the Commission. At the end of the period, unless a continuation is requested, the Commission will dispose of the documents according to the retention schedule provided in this modified rule.

DATE: Comments on this proposed rulemaking are due on or before September 5, 1980.

ADDRESS: An original and 10 copies, if possible, should be sent to: Office of the Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT: James H. Bayne, 202–275–7646 or Joseph Ross, 202–275–0956.

SUPPLEMENTARY INFORMATION: The purpose of this rulemaking is to provide a reasonable limitation on the retention period for documents filed with the Commission under 49 USC 11303, as evidence of proprietary or leasehold interest in certain transportation property. These documents include mortgages, leases, equipment trust agreements, conditional sales agreements or other instruments evidencing the mortgage, lease, conditional sale or bailment of railroad cars, locomotives, or other rolling stock or vessels. Assignment of a right or interest under one to those instruments and an amendment to that instrument or assignment are also included.

Section 49 U.S.C. 11303 does not provide a specific retention period for such documents filed with the Commission. The statute only requires the Commission to maintain a system for recording each document and an index of those documents, which is open to the public.

Since the recordation provision was enacted in 1952, the Commission has maintained such documents at its Washington Headquarters' office. It is no longer possible to retain all such documents for an indefinite period of time. The Secretary of the Commission is custodian of such records and as filing officer, has the power to destroy those documents that have lapsed or are no longer effective instruments. The Office of the Secretary has determined that a total retention period of 30 years will be sufficient to deal with most documents filed under 49 U.S.C. 11303. Upon the recommendation of the Secretary, we plan to adopt the following amendments to 49 CFR 1116.5 which proposes that such documents having an initial retention period of 15 years be maintained at the Commission's Washington offices. Documents which are still effective after the initial retention period would be transferred to the Federal Records Center for an additional period of 15 years. Expired or lapsed documents would be destroyed after the initial 15 year retention period. Our proposed rule would also provide special provisions by which the filing party can request that individual documents be maintained longer than 30 years.

We also propose to adopt the following retention schedule for documents now on file with the Commission under 49 U.S.C. 11303. Recorded documents filed prior to June 1, 1965, will be transferred immediately to the Federal Records Center, with a proposed destruction date of July 1, 1995. Documents filed between July 1, 1965, and the effective date of this rule will be retained by the Commission until July 1, 1995. Such documents will be disposed of under the provisions of this rule. If after July 1, 1995, they are no longer effective, the documents will be destroyed. Documents which expire after July 1, 1995, will be transferred to the Federal Records Center for an additional retention period of 15 years. After the additional retention period, the documents will be destroyed, unless a continuance is requested by the parties that filed the documents.

The action proposed will not have an adverse effect on either the quality of the human environment or conservation of energy resources. However, anyone may comment on this aspect of the proposal.

Oral hearings do not appear to be necessary at this time and none is contemplated. Anyone wishing to present views and evidence, either in support of or in opposition to this proposal, is invited to submit written data, views, or arguments. Written materials submitted will be available for public inspection at the offices of the Interstate Commerce Commission, 12th and Constitution Avenue, N.W., Washington, D.C. during regular business hours.

This notice of proposed rules is issued under authority of 49 U.S.C. 11303 and 5 U.S.C. 553.

Decided: July 23, 1980.

By the Commission, Chairman Gaskins, Vice-Chairman Gresham, Commissioners Stafford, Clapp, Trantum, Alexis, and Gilliam. Commissioner Clapp absent and not participating.

Agatha L. Mergenovich,

Secretary.

Appendix

This rulemaking proposes amending Subchapter B, Part 1116 of Chapter 10 of Title 49 of the Code of Federal Regulations by adding to paragraph (a) of Part 1116.5 so that Part 1116.5(a) reads as follows:

(a)(1) The original and copies of the documents filed with the Commission under the provisions of 49 U.S.C. 11303 will be stamped with a consecutive recordation number and the date and hour of recordation. A notation will be added to show that the document has been filed under the provision of 49 U.S.C. 11303. The original will be returned and the copies or counterpart retained by the Commission.

(2) The Secretary will accept a document for filing under these regulations only if the filing parties include a notification of release which states the period of time that such document must be retained by the Commission. This notification must specify the expiration date of the document. If the expiration date of the document or the requested retention period exceeds 30 years, the filing party must also submit a request for continuation which will inform the Commission of the need to retain the document beyond the 30-year retention period established by these regulations.

(3) Documents filed under these regulations which have an expiration date of 15 years or less will be retained in the Office of the Secretary for 60 days after the expiration of the initial 15 year retention period. At the end of the 60-day period, unless the filing party requests a continuation of the retention period, the documents will be destroyed.

(4) Documents with expiration dates of more than 15 years will be retained in the Office of the Secretary for an initial retention period of 15 years. Sixty days after the expiration of the initial 15-year period, the documents will be transferred to the Federal Records Center for an additional 15 years. Sixty days after the end of the second 15-year period, the documents will be destroyed unless the filing party requests a continuation of the retention period.

(5) A continuation request may also be made by the filing party between 180 days before and 60 days after the expiration of the retention period. Any such continuation request must be signed by the filing party. It must identify the recordation number of the original document, and state that the original document is still effective. Upon timely filing and acceptance of the continuation request, the retention period of the document will be extended for 5 years from the expiration date of the last retention period. Succeeding continuation requests may be made in the same manner to extend the retention period.

Notices

Federal Register
Vol. 45, No. 153
Wednesday, August 6, 1980

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

FEDERAL COUNCIL ON THE AGING

Meeting

The Federal Council on the Aging was established by the 1973 Amendments to the Older Americans Act of 1965 (Pub. L. 93–29, 42 U.S.C. 3015) for the purpose of advising the President, the Secretary of Health and Human Services, the Commissioner on Aging and the Congress on matters relating to the special needs of older Americans.

Notice is hereby given pursuant to the Federal Advisory Committee Act (Pub. L. 92–463, 5 U.S.C. App. 1, Sec. 10, 1976) that the Council will hold a meeting on August 25, 1980 from 9:00 a.m. to 5:00 p.m. and August 26, 1980 from 9:00 a.m. to 12:30 p.m. in Rooms 403A Hubert Humphrey Building, 200 Independence Avenue, S.W. Washington, D.C. 20201.

The agenda will consist of a discussion on the pros and cons of major issues emanating from the Council's Congressionally-Mandated Study and strategies for effectively "bounding" these issues. Status reports on committee activity will be presented. Also, special guests including Mr. Morton Leeds of the Department of Housing and Urban Development will make presentations.

Finally, non-mandated aging concerns/issues which will highlight Council work in FY' 81 are to be discussed.

Further information on the Council may be obtained from the Federal Council on the Aging, Washington, D.C. 20201, telephone (202) 245–0441.

FCA meetings are open for public observation.

Dated: July 31, 1980.

Charles J. Fahey,
Chairman, Federal Council on the Aging.

DEPARTMENT OF AGRICULTURE

Forest Service

Spruce Creek Wilderness Study Area; White River National Forest Pitkin County, Colo.; Public Hearing

Notice is hereby given that a public hearing will be held during the hours of 2:00 to 5:00 p.m. and 7:00 to 10:00 p.m., September 9, 1980, at the Holiday Inn, Glenwood Springs, Colorado, on a proposal for the future management of the Spruce Creek Study Area contiguous to the Hunter Creek-Fryingpan Wilderness. The Area contains approximately 8,000 acres within the White River National Forest in the county of Pitkin in the State of Colorado.

A copy of the Draft Environmental Impact Statement may be obtained from the Forest Supervisor, White River National Forest, P.O. Box 948, Glenwood Springs, Colorado 81601.

Individuals and organizations may express their views by appearing at this hearing or may submit written comments for inclusion in the official record to the Regional Forester, Rocky Mountain Region, P.O. Box 25127, Lakewood, Colorado 80225. Those persons wishing to present oral testimony at the hearing should notify the Regional Forester at the above address, prior to September 2, 1980. To be included in the official record, written comments must be received by October 9, 1980.

R. Max Peterson,
Chief, Forest Service.

Soil Conservation Service

Environmental Impact Finding; Buggy Creek Critical Area Treatment RC&D Measure, Oklahoma

AGENCY: Soil Conservation Service, U.S. Department of Agriculture.

ACTION: Notice of a finding of no significant impact.

FOR FURTHER INFORMATION CONTACT:
Mr. Roland R. Willis, State Conservationist, Soil Conservation Service, Agricultural Center Office Building, Farm Road & Brumley Street, Stillwater, Oklahoma 74074, telephone 405–624–4460.

Notice

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Buggy Creek Critical Area Treatment RC&D Measure, Caddo County, Oklahoma.

The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Roland R. Willis, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for a critical area treatment plan for erosion control. The planned works of improvement include gully shaping, waterways, vegetative protection, erosion control dams, a diversion, concrete channel liners, critical area plantings, and fencing.

The Notice of a Finding of No Significant Impact (FNSI) has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Roland R. Willis, State Conservationist, Soil Conservation Service, Agricultural Center Office Building, Farm Road & Brumley Street, Stillwater, Oklahoma 74074, telephone 405–624–4460. The FNSI has been sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the FNSI are available to fill single copy requests at the above address.

Implementation of the proposal will not be initiated until September 5, 1980.

Environmental Impact Finding; Upper Howard's Creek Watershed, Kentucky

AGENCY: Soil Conservation Service, U.S. Department of Agriculture.

ACTION: Notice of finding of no significant impact.

FOR FURTHER INFORMATION CONTACT:
Mr. Glen E. Murray, State Conservationist, Soil Conservation Service, 333 Waller Avenue, Lexington, Kentucky 40504, telephone (606) 233–2749.

Notice

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the deauthorization of Federal funding of the Upper Howard's Creek Watershed, Clark County, Kentucky.

The environmental assessment of this action indicates that deauthorization of Federal funding of the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Glen E. Murray, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this action.

The Notice of Finding of No Significant Impact (FNSI) has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Glen E. Murray. The FNSI has been sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the FNSI are available to fill single copy requests at the above address.

No administrative action on implementation of the proposal will be taken until October 6, 1980.

CIVIL AERONAUTICS BOARD

[Docket No. 36508]

Essential Air Service at El Dorado/Camden, Ark.; Oral Argument

Notice is hereby given, pursuant to the provisions of the Federal Aviation Act of 1958, as amended, that oral argument in this proceeding is assigned to be held before the Board on August 20, 1980, at 10:00 a.m. (local time), in Room 1027, Universal Building, 1825 Connecticut Avenue, N.W., Washington, D.C.

Each party that wishes to participate in the oral argument shall so advise the Secretary, in writing, on or before August 11, 1980, together with the name of the person who will represent it at the argument. Legal counsel is not required.

To assist the parties in making their presentations to the Board, copies of the rate-of-compensation agreement between each carrier and the Bureau of Domestic Aviation will be distributed to all parties in this case prior to the oral argument.

A notice setting forth the procedures to be followed at the oral argument will be issued after August 11, 1980.

Dated at Washington, D.C., August 1, 1980.

Phyllis T. Kaylor,
Secretary.

Foreign-Trade Zones Board

[Docket No. 12–77]

Application for Expansion of Foreign-Trade Zone No. 8, Toledo, Ohio; Withdrawal Approved

Notice is hereby given that the Toledo-Lucas County Port Authority, Grantee of Foreign-Trade Zone No. 8, Toledo, has requested the withdrawal without prejudice of its application to expand its zone, filed with the Foreign-Trade Zones Board on October 20, 1977 (Docket No. 12–77). The proposal was opposed by the domestic steel industry because the main purpose of the expansion was to handle foreign steel.

The withdrawal has been approved by the Board's executive secretary and the proposal is considered closed.

Dated: July 31, 1980.

John J. Da Ponte, Jr.,
Executive Secretary, Foreign-Trade Zones Board.

Foreign-Trade Zone Board

[Order No. 161]

Resolution and Order Approving Application of the Port of Portland, Oreg. for a Foreign-Trade Subzone in Portland; Proceedings of the Foreign-Trade Zones Board, Washington, D.C.

Resolution and order

Pursuant to the authority granted in the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a–18u), the Foreign-Trade Zones Board has adopted the following Resolution and Order:

The Board, having considered the matter, hereby orders:

After consideration of the application of the Port of Portland, Oregon, Grantee of Foreign-Trade Zone No. 45, filed with the Foreign-Trade Zones Board (the Board) on May 30, 1979, as amended on February 29, 1980, requesting authority to establish a special-purpose subzone at the Beall Pipe and Tank Corporation facility, located at 12005 North Burgard Road in Portland, within the Columbia River Customs port of entry, for the purpose of storing imported steel coil and for the manufacture of electric resistance and spiral welded steel pipe for export, the Board, finding that the requirements of the Foreign-Trade Zones Act, as amended, and the Board's regulations are satisfied, and that the proposal is in the public interest, approves the application.

The Grantee shall notify the Board's Executive Secretary for approval prior to he commencement of any additional manufacturing operations at the subzone site. The Secretary of Commerce, as Chairman and Executive Officer of the Board, is hereby authorized to issue a grant of authority and appropriate Board Order.

Grant To Establish, Operate, and Maintain a Foreign-Trade Subzone at Portland, Oreg.

Whereas, by an Act of Congress approved June 18, 1934, an Act "To provide for the establishment, operation, and maintenance of foreign-trade zones in ports of entry of the United States, to expedite and encourage foreign commerce, and for other purposes," as amended (19 U.S.C. 81a–81u) (the Act), the Foreign-Trade Zones Board (the Board) is authorized and empowered to grant to corporations the privilege of establishing, operating, and maintaining foreign-trade zones in or adjacent to ports of entry under the jurisdiction of the United States;

Whereas, the Board's regulations provide (15 CFR 400.304) that the establishment of a foreign-trade subzone in an area separate from an existing zone, for one or more of the specialized purposes of storing, manipulating, manufacturing, or exhibiting goods may be authorized if the Board finds that existing or authorized zones will not serve adequately

the convenience of commerce with respect to the proposed purposes;

Whereas, the Port of Portland, Oregon, Grantee of Foreign-Trade Zone No. 45 (the Grantee), has made application (filed May 30, 1979, amended February 29, 1980) in due and proper form to the Board for the establishment, operation, and maintenance of a foreign-trade subzone at the Beall Pipe and Tank Corporation facility, located at 12005 North Burgard Road in Portland, Oregon, for the purposes of storing imported steel coil, and for the manufacture of electric resistance and spiral welded steel pipe for export only;

Whereas, notice of said application has been given and published, and full opportunity has been afforded all interested parties to be heard;

Whereas, the Board has found that the proposed location of the foreign-trade subzone in Portland is suitable, and the facilities provided are sufficient; and

Whereas, the Board has found that the requirements of the Foreign-Trade Zones Act, as amended, and the Board's regulations are satisfied, and that the proposal is in the public interest;

Now, Therefore, the Board hereby grants to the Grantee the privilege of establishing, operating, and maintaining a foreign-trade subzone for the above purposes, designated on the records of the Board as Foreign-Trade Subzone No. 45A, at the location mentioned above and more particularly described on the maps and drawings accompanying the application, said grant being subject to the provisions, conditions, and restrictions of the Act and the Regulations issued thereunder, to the same extent as though the same were fully set forth herein, and also to the following express conditions and limitations:

Operation of the foreign-trade subzone shall be commenced by the Grantee within a reasonable time from the date of issuance of the grant, and prior thereto, the Grantee shall obtain all necessary permits from Federal, State, and municipal authorities.

The Grantee shall allow officers and employees of the United States free and unrestricted access to and throughout the foreign-trade subzone in the performance of their official duties.

The Grantee shall notify the Executive Secretary of the Board for approval prior to the commencement of any manufacturing operation within the subzone other than that of electric resistance and spiral welded steel pipe for export.

The grant shall not be construed to relieve the Grantee or operator from liability for injury or damage to the person or property of others occasioned by the construction, operation, or maintenance of said subzone, and in no event shall the United States be liable therefor.

The grant is further subject to settlement locally by the District Director of Customs and District Army Engineer with the Grantee regarding compliance with their respective requirements for the protection of the revenue of the United States and the installation of suitable facilities.

In Witness Whereof, the Foreign-Trade Zones Board has caused its name to be signed and its seal to be affixed hereto by its Chairman and Executive Officer at Washington, D.C., this 31st day of July 1980, pursuant to Order of the Board.

Foreign-Trade Zones Board.

Philip W. Klutznick,

Chairman and Executive Officer.

Attest.

John J. Da Ponte, Jr.,

Executive Secretary.

Government-Owned Inventions; Availability for Licensing

The inventions listed below are owned by the U.S. Government and are available for domestic and, possibly, foreign licensing in accordance with the licensing policies of the agency-sponsors.

Copies of patents cited are available from the Commissioner of Patents & Trademarks, Washington, DC 20231, for $.50 each. Requests for copies of patents must include the patent number.

Copies of patent applications cited are available from the National Technical Information Service (NTIS), Springfield, Virginia 22161 for $5.00 each ($10.00 outside North American Continent). Requests for copies of patent applications must include the PAT-APPL number. Claims are deleted from patent application copies sold to avoid premature disclosure. Claims and other technical data will usually be made available to serious prospective licensees upon execution of a non-disclosure agreement.

Requests for information on the licensing of particular inventions should be directed to the addresses cited for the agency-sponsors.

Government-Owned Inventions; Availability for Licensing

The inventions listed below are owned by the U.S. Government and are available for domestic and, possibly, foreign licensing in accordance with the licensing policies of the agency-sponsors.

Copies of patents cited are available from the Commissioner of Patents & Trademarks, Washington, DC 20231, for $0.50 each. Requests for copies of patents must include the patent number.

Copies of patent applications cited are available from the National Technical Information Service (NTIS), Springfield, Virginia 22161 for $5.00 each ($10.00 outside North American Continent). Requests for copies of patent applications must include the PAT-APPL number. Claims are deleted from patent application copies sold to avoid premature disclosure. Claims and other technical data will usually be made available to serious prospective licensees upon execution of a non-disclosure agreement.

Requests for information on the licensing of particular inventions should be directed to the addresses cited for the agency-sponsors.

Douglas J. Campion,

Program Coordinator, Office of Government Inventions and Patents, National Technical Information Service, Department of Commerce.

Chief, Intellectual Prop. Division, OTJAG, Department of the Army, Room 2D 444, Pentagon, Washington, DC 20310

Patent application 6,077,862: Cargo Container Transporter. Filed September 21, 1979.

Patent application 6,078,892: Multipurpose Humidity Controlled Agent Generator. Filed October 24, 1979.

Patent application 6,091-227: Engine Simulator to Calibrate RPM and Cam-Dwell Test Sets. Filed November 5, 1979.

Patent application 6,099,262: Doppler Extended Depth of Field Imaging System with Coherent Object Illumination. Filed December 3, 1979.

Patent application 6,114,916: Laser Scanner Transport. Filed January 24, 1980.

Patent application 6,115,819: Kinetic Sabot System. Filed January 28, 1980.

Patent application 6,115,820: Propellant Charge for Blank Ammunition. Filed January 28, 1980.

Patent 4,137,757: Compression Testing Apparatus. Filed February 2, 1978, patented February 6, 1979. Not available NTIS.

COMMODITY FUTURES TRADING COMMISSION

Proposed Futures Contract; Availability

The Commodity Futures Trading Commission ("Commission") is making available and requesting public comment on a rough rice futures contract proposed to be traded by the New Orleans Commodity Exchange. The New Orleans Commodity Exchange has not yet been designated as a contract market by the Commission. Copies of this proposed contract will be available at the Commission's offices in Washington, New York, Chicago, Minneapolis, Kansas City, and San Francisco. The Commission will also furnish copies upon request made to the Commission Secretary.

Any person interested in expressing views on the terms and conditions of this proposed contract should send comments by September 5, 1980 to Ms. Jane Stuckey, Secretary, Commodity Futures Trading Commission, 2033 K Street NW., Washington, D.C., 20581. (202) 254-6314. Copies of all comments will be available for inspection at the Commission's Washington office.

Issued in Washington, D.C., on July 31, 1980.

Jane K. Stuckey,
Secretary of the Commission.

BILLING CODE 6351-01-M

DEPARTMENT OF DEFENSE

Corps of Engineers, Department of the Army

Intent To Prepare a Draft Environmental Impact Statement (DEIS) for the Proposed Reallocation of Flood Control Storage to Water Supply Storage in the Cowanesque Reservoir, Tioga County, Pa.

AGENCY: Baltimore District, U.S. Army Corps of Engineers, DOD.

ACTION: Notice of intent to prepare a draft environmental impact statement (DEIS).

SUMMARY: 1. The Baltimore District is currently studying the possiblity of reallocating flood control storage to water supply storage in the Cowanesque Reservoir. The Cowanesque Reservoir is an existing Corps of Engineers flood control project on the Cowanesque River in north central Pennsylvania. The existing project has been designed for flood control and recreation purposes with a 410 acre summer pool at elevation 1045 msl. The reallocation study is examining the potential of permanently storing additional water in the reservoir to provide for consumptive use downstream in the Susquehanna River Basin during periods of drought.

2. Alternatives under examination consist of three increased storage levels between 1045 feet msl and 1085 feet msl as well as the course of not providing water supply storage in the existing Federal project.

3. The study was initiated in June 1979 and a Stage I Report was circulated for review in February 1980. A public meeting was held on June 30, 1980. The responses to the Stage I report and the public meeting have been used to scope the significant issues. All parties that have not been previously notified and have an interest in the study and development of a DEIS are invited to participate by contacting the Baltimore District, Corps of Engineers.

Many comments were received on the report and at the public meeting. Issues that have been identified are the effects on flood control of impounding additional water, the inundation of the existing recreation facilities and replacement of facilities at higher pool levels, the effects of water supply drawdowns on recreation during late summer and fall, the effects of higher pool levels on terrestrial and aquatic habitat, and the effects of releasing additional water during droughts on the downstream fishery. Additional coordination with Federal, State, and local officials is anticipated prior to preparation of the DEIS. Additional public meetings and workshops will also be held.

4. A separate scoping meeting is not anticipated, and the additional workshops will be used to ascertain and elaborate upon the list of significant issues. If sufficient interest develops, a scoping meeting will be held.

5. The estimated date that the DEIS will be available to the public is October 1981.

6. Questions concerning the proposed action and DEIS can be directed to Mr. J. William Haines, Study Manager, Urban Studies Branch, Planning Division, U.S. Army Engineer District, Baltimore, P.O. Box 1715, Baltimore, Maryland 21203.

Dated: July 21, 1980.

James W. Peck,
Colonel, Corps of Engineers, District Engineer.

BILLING CODE 3710-01-M

Corps of Engineers; Department of the Army

Intent To Prepare a Draft Environmental Impact Statement (DEIS) for Central and South Florida Canal 18, Jupiter Inlet, and Loxahatchee River Study

AGENCY: U.S. Army Corps of Engineers, DOD.

ACTION: Notice of intent to prepare a draft environmental impact statement (DEIS).

SUMMARY: 1. The study was authorized by resolutions adopted June 6, 1958 and December 19, 1960 by the Senate Public Works Committee, and July 1958 and June 7, 1961 by the House Public Works Committee. The resolutions requested a review of the authorized Central and Southern Florida Flood Control project with respect to and including flood control measures for northern Palm Beach County and adjacent portions of Martin County, and with particular reference to provision of flood control improvements at and in the vicinity of Jupiter Inlet and the Loxahatchee River; modification of Canal 18; and of treating this entire area as a single watershed. The planning objectives of the study include:

a. Provide flood protection for the purpose of reducing flood damages to land use activities in the C-18 drainage basin and Jupiter estuary areas, during the period of analysis (1985-2035).

b. Provide additional water supplies to meet existing and future municipal, industrial, and agricultural needs within the study area, during the period of analysis.

c. Restore, enhance, and preserve the natural environment with emphasis on the protection of the Loxahatchee River.

d. Improve and maintain water quality in C-18, Loxahatchee River, and associated waters to meet consumptive and environmental needs within the study area.

e. Preserve and enhance fish and wildlife habitat within the study area.

f. Provide sufficient groundwater recharge and surface flows to protect coastal water supplies subject to saltwater intrusion within the study area.

g. Improve esthetics and pressure scenic or unique sites for future generations within the study area.

h. Protect and enhance for future generations those free-flowing portions of the Loxahatchee River and its tributaries which possess outstanding wild, scenic, recreation, or other related values.

2. Alternative plans capable of satisfying the objectives of the study include structural and nonstructural measures. Those identified alternatives are not considered all-inclusive, but are preliminary in nature. If during the scoping process additional water resource problems, needs and alternative measures are identified, these will be assessed during the planning process. Structural measures include modification of C-18, construction of C-300, pumping, creation of floodways and conservation pools; well field development, and sedimentation traps. Nonstructural measures include deep aquifer storage, flood plain zoning, floodproofing, evacuation and/or relocation, water conservation, waste water recycling and land treatment, onsite retention, and designation of preservation areas.

3. The process for determining the scope of issues to be addressed and identifying the significant issues related to alternative actions has been initiated through a public involvement program. Three public meetings/workshops were held during Stage I planning. Additional meetings will be scheduled during the study to provide an active and continuous participation by the public in the planning process. The study is being coordinated with the National Park Service, U.S. Geological Survey, U.S. Heritage Conservation and Recreation Service, U.S. Fish and Wildlife Service, South Florida Water Management District, and Florida Game and Freshwater Fish Commission. Affected Federal, State, and local agencies; Indian tribes; and other interested organizations and individuals are invited to identify issues, problems, needs, and alternative courses of action not already considered by communicating with the addressee listed below.

a. Significant issues to be analyzed in the DEIS include flood control, water quality, water supply, and preservation and enhancement of environmental quality.

b. Consultation with the Florida State Historic Preservation Officer and U.S. Heritage Conservation and Recreation Service will be initiated in accordance with the National Historic Preservation Act of 1966 and Executive Order 11593. The project is being coordinated with the U.S. Fish and Wildlife Service as required by the Fish and Wildlife Coordination Act of 1972. Section 7 requirements of the Endangered Species Act of 1973, as amended, will be initiated.

4. A scoping meeting will not be held.

5. The DEIS will be available for review in February 1982.

ADDRESS: Questions regarding the proposed action and DEIS can be referred to Dr. Lloyd Saunders, Chief of the Environment and Resources Branch, U.S. Army Corps of Engineers, Jacksonville District, P.O. Box 4970, Jacksonville, Florida 32232, telephone (904) 791-2202 or FTS 946-2202.

V 45 / 153 3 AG 6 80 UMI

Dated: July 28, 1980.

James W. R. Adams,

Colonel, Corps of Engineers, District Engineer.

[FR Doc. 80-23681 Filed 8-5-80; 8:45 am]

BILLING CODE 3710-AJ-M

Intent To Prepare a Draft Environmental Impact Statement (DEIS) for a Proposed Addition of Four Pumps to the Delta Pumping Plant Near Tracy, Calif.

AGENCY: U.S. Army Corps of Engineers, DOD.

ACTION: Notice of intent to prepare a draft environmental impact statement (DEIS). The document will also serve as a draft environmental impact report under the California Environmental Quality Act.

SUMMARY: The State of California, Department of Water Resources, on October 21, 1975, applied for a Department of the Army permit for operation of the Delta Pumping Plant, Intake Channel, and Clifton Court Forebay, and for the installation and operation of four additional pumps at the pumping plant. The application was filed pursuant to Section 10 of the Rivers and Harbors Act of 1899 and by order of the United States District Court (Sierra Club v. Morton). By making application, the Department of Water Resources in no way waives its right to withdraw the application if it prevails in overturning the order of the court referenced to above.

To facilitate compliance with the District Court's order, the Corps has treated the application as if it were two applications; first, for approval of the existing facilities; second, for the installation and operation for four additional pumps. A public notice and draft EIS for the first application was published on December 21, 1978, and a final EIS is presently being prepared.

The purpose of the Delta Pumping Plant is to divert water from the Sacramento-San Joaquin Delta to the California Aqueduct, part of the State Water Project (SWP), for use in the San Joaquin Valley, South San Francisco Bay, and Southern California areas. This water is entirely contracted for by local water vending agencies.

Project water flows through the channels of the Delta to the forebay, through control gates into the forebay, and then through the intake channel to the pumping plant. The pumping plant lifts water 244 feet from the intake channel to the California Aqueduct. The plant was designed for 11 pumps, presently 7 pumps are installed with a pumping capability of 6300 cubic feet of water per second.

The four additional pumps could each pump 1,067 cubic feet per second and each would be driven by a 34,500-horsepower electric motor. These pumps would be paired to discharge through existing manifolds into two existing 15-foot diameter discharge lines.

The additional units are a component of the Department of Water Resources' program to balance water supplies with needs in the State Water Project's service areas. Future components being planned include a peripheral canal for transferring water across the Delta, additional reservoirs north and south of the Delta, ground water storage south of the Delta, and water conservation and recycling programs in the service areas.

The purposes of the additional pumping units are:

a. Alleviate scheduling problems for maintenance of the existing units,

b. Minimize the peak power requirements of the SWP and energy costs, and,

c. Convey future water supplies developed by the aforementioned water transfer and storage facilities.

The following alternatives have been identified to date. All alternatives identified below, involve operation in compliance with California State Water Resources Control Board Decision D-1485 and/or other constraints.

a. Permit denial, no action, i.e., continued operation with existing seven pumps.

b. Installation and operation of one, two, or three additional pumps.

c. Installation of four additional pumps, with operations on a monthly basis limited to the diversions which could be made with the existing seven pumps.

d. Installation of four additional pumps, with operations on an annual basis limited to what could be diverted with the existing seven pumps.

e. Installation of 4 pumps, with no limits on diversions.

On July 7th 1980, the Sacramento District issued a Public Notice of Application (No. 582A) to all known, interested parties. In this notice we requested, that the reviewers provide comment on the topical scope, alternatives, and major issues to be covered by the EIS. Along with our public notice the Department of Water Resources issued a "Notice of Preparation of Draft Environment Impact Statement/Environmental Impact Report" and a "Notice of Solicitation of Views During Predraft EIS/EIP Consultation Process."

Based on experience with the draft EIS for the existing pumping plant the significant issues will be:

(1) Effects on the San Francisco Bay ecosystem.

(2) Effects on Sacramento San Joaquin Delta water quality, fisheries and wildlife.

(3) Effects on water levels in nearby Delta channels.

(4) Effects on the State Water Project (SWP) service areas.

(5) Effects on energy requirements of the Delta Pumping Plant.

(6) The relationship of the four additional pumps to the planned peripheral canal and other future facilities of the SWP.

Environmental review is also required by the California Environmental Quality Act (CEQA). Thus, the environmental statement will be the joint document described in the above public notices.

We hope to accomplish the scoping process by mail with these notices because of large geographical area affected by the proposal. If additional scoping is needed, meetings will be held after the close of the comment period for the public notices.

We estimate that the draft EIS will be published in August 1981.

Questions about the proposed action and draft EIS can be directed to Mr. Tom Coe, Regulatory Section, U.S. Army Corps of Engineers, 650 Capitol Mall, Sacramento, California 95814, telephone (916) 440-2541 (FTS 448-2541).

Paul F. Kavanaugh,

Colonel, CE, District Engineer.

July 14, 1980.

BILLING CODE 3710-GH-M

DEPARTMENT OF EDUCATION

National Advisory Council on Adult Education; Meeting

AGENCY: National Advisory Council on Adult Education.

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the Program Liaison Committee of the National Advisory Council on Adult Education. This notice also describes the functions of the Council. Notice of this meeting is required under the Federal Advisory Committee Act (Pub. L. 92-463, Sec. 10(a)(2)).

DATE: August 21-22, 1980, 9:00 a.m. to 4:00 p.m.

ADDRESS: National Advisory Council on Adult Education, 425 13th Street, N.W., Suite 323, Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Dr. Gary A. Eyre, Executive Director, National Advisory Council on Adult Education, 425 13th Street, N.W., Washington, D.C. 20004 (202/376-8892).

SUPPLEMENTARY INFORMATION: The National Advisory Council on Adult Education is established under Section 313 of the Adult Education Act (20 U.S.C. 1201). The Council is directed to:

Advise the Secretary in the preparation of general regulations and with respect to policy matters arising in the administration of this title, including policies and procedures governing the approval of State plans under section 306 and policies to eliminate duplication, and to effectuate the coordination of programs under this title and other programs offering adult education activities and services.

The Council shall review the administration and effectiveness of programs under this title, make recommendations with respect thereto, and make annual reports to the President of its findings and recommendations (including recommendations for changes in this title and other Federal laws relating to adult education activities and services). The President shall transmit each such report to the Congress together with his comments and recommendations.

The meeting of the Council shall be open to the public.

The proposed agenda includes:

Adult Education collaboration with other Human Service Programs.

Adult Education outreach with community based organizations.

Reauthorization issues.

Records shall be kept of all Committee proceedings, and shall be available for public inspection at the office of the National Advisory Council on Adult Education, 425 13th St., N.W., Suite 323, Washington, D.C. 20004.

Signed at Washington, D.C. on August 1, 1980.

Gary A. Eyre,

Executive Director, National Advisory Council on Adult Education.

AGENCY: Department of Energy.

ACTION: Notice.

SUMMARY: In order to expedite the domestic development and production of alternative fuels and to reduce dependence on foreign supplies of energy resources by establishing such domestic production at maximum levels at the earliest time practicable, the Department of Energy (DOE) has been authorized by Congress (Supplemental Appropriations Bill for FY 1980) to provide financial assistance to incentivize and support the construction and operation of commercial scale alternative fuels production facilities.

Up to $100,000,000 is available for grants to support feasibility studies of projects leading to construction and operation of commercial scale facilities. Individual awards may not exceed $10,000,000.

An additional $200,000,000 is available for cooperative agreements with non-Federal entities to support commercial scale development of alternative fuel facilities. Individual awards may not exceed $25,000,000.

EFFECTIVE DATE: July 29, 1980.

FOR FURTHER INFORMATION CONTACT: Jean Leche (202) 633-8365 Alternative Fuels Task Force, Resource Applications, Mail Station 3344, Room 3500, 12th and Pennsylvania Avenue, NW., Washington, D.C. 20461.

SUPPLEMENTARY INFORMATION: The Program Solicitation for grant application for feasibility studies, Number DE-PS01-80RA50412, and the Program Solicitation for cooperative agreement proposals, Number DE-PS01-80RA50413, will become available on or about August 1, 1980. Organizations desiring a copy of these solicitations should send a written request to:

U.S. Department of Energy, Resource Applications, Mail Station 3344, Room 3500, 12th and Pennsylvania Avenue, NW., Washington, D.C. 20461.

Organizations that were on the mailing list for the previous Alternative Fuels Program Solcitations need not submit another request to receive this solicitation.

Issued in Washington, DC July 30, 1980.

Joseph P. Cappello,

Director, Office of Procurement Operations.

BILLING CODE 6450-01-M

Tar Sands Definitional Workshop; Meeting

Notice is hereby given that the Office of Oil and Natural Gas within Resource Applications is holding a workshop to try to gather information to provide a basis for establishing a definition of tar sands. Representatives from industry, the Departments of Energy and the Interior, the Internal Revenue Service, the Congress, and several States have been invited to provide input on an appropriate definition. The workshop will be held at the U.S. Geological Survey National Center in Reston, Virginia, on Thursday, August 7, 1980, beginning at 9:00 a.m. and lasting until 3:30 p.m. If more time is required, the workshop will be continued on Friday, August 8, 1980, at 9:00 a.m.

The workship will be open to the public. The chairman of the workshop is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the chairman will be permitted to do so, either before or after the meeting. Members of the pulic who wish to make an oral statement should inform Ira C. Mayfield, Acting Director, Office of Oil and Natural Gas, (202) 633-8395, prior to the meeting and reasonable provision will be made for their appearance of the agenda.

Issued at Washington, D.C. on July 29, 1980.

R. D. Langenkamp,

Deputy Assistant Secretary, Resource Development & Operations, Resource Applications.

BILLING CODE 6450-01-M

Economic Regulatory Administration

Field Oil Co., Inc.; Action Taken on Consent Order

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of action taken and opportunity for comment on consent order.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) announces action taken to execute a Consent Order and provides an opportunity for public comment on the Consent Order and on potential claims against the refunds deposited in an escrow account establishment pursuant to the Consent Order.

DATES: Effective date: July 22, 1980.

COMMENTS BY: September 5, 1980.

ADDRESS: Send comments to: Kenneth E. Merica, District Manager of Enforcement, P.O. Box 26247, Belmar Branch, Lakewood, Colorado, 80226.

FOR FURTHER INFORMATION CONTACT: Kenneth E. Merica, District Manager of Enforcement, P.O. Box 26247, Belmar Branch, Lakewood, Colorado, 80226. Phone: (303) 234-3195.

SUPPLEMENTARY INFORMATION: On July 22, 1980, the Office of Enforcement of the ERA executed a consent Order with

Field Oil Company, Inc. (Field) of Ogden, Utah. Under 10 CFR 205.199J(b), a Consent Order which involves a sum of less than $500,000 in the aggregate, excluding penalties and interest, becomes effective upon its execution.

I. The Consent Order

Field, with its home office located in Ogden, Utah, is a firm engaged in the business of purchasing covered products and reselling them to wholesale purchasers and ultimate consumers, without substantially changing their form, and is subject to the Mandatory Petroleum Price and Allocation Regulations at 10 CFR Parts 210, 211 and 212. To resolve certain civil actions which could be brought by the Office of Enforcement of the Economic Regulatory Administration as a result of its audit of Field, the Office of Enforcement, ERA, and Field entered into a Consent Order, the significant terms of which are as follows:

1. Total overcharge during the audit period (March 1, 1979, through July 31, 1979) on all covered gasoline products was: $20,237.67.

a. Wholesale Reseller Overcharge: $16,001.75.

b. Retail End-User Overcharge: $4,236.12.

2. Field violated the gasoline price regulations contained in 10 CFR 212.93(a)(1) of the Mandatory Petroleum Price Regulations by exceeding its "maximum legal selling price" for the covered gasoline products sold to Field's wholesale and retail customers.

3. Field has agreed to refund the total overcharge on or before September 30, 1980.

4. Field has paid a civil penalty of $5,059.25 in connection with the overcharges.

5. The provisions of 10 C.F.R. 205.199J, are applicable to the Consent Order.

II. Disposition of Refunded Overcharges

In this Consent Order, Field agrees to refund, in full settlement of any civil liability with respect to actions which might be brought by the Office of Enforcement, ERA, arising out of the transactions specified in I.1.a. above, the sum of $16,001.75, plus interest, on or before September 30, 1980. Refund of those overcharges will be in the form of certified check(s) made payable to the United States Department of Energy and will be delivered to the Assistant Administrator for Enforcement, ERA. These funds will remain in a suitable account pending the determination of their proper disposition.

The DOE intends to distribute the refund amounts in a just and equitable manner in accordance with applicable laws and regulations. Accordingly, distribution of such refunded overcharges requires that only those "persons" (as defined at 10 CFR 205.2) who actually suffered a loss as a result of the transactions described in the Consent Order receive appropriate refunds. Because of the petroleum industry's complex marketing system, it is likely that overcharges have been passed through as higher prices to subsequent purchasers. In fact, the adverse effects of the overcharges may have become so diffused that it is a practical impossibility to identify specific, adversely affected persons, in which case disposition of the refunds will be made in the general public interest by an appropriate means such as payment to the Treasury of the United States pursuant to 10 CFR 205.199I(a).

Furthermore, Field agrees to refund, in full settlement of any civil liability with respect to actions which might be brought by the Office of Enforcement, ERA, arising out of transactions specified in I.1.b. above, the sum of $4,236.12, plus interest, on or before September 30, 1980. Refund of those overcharges shall be in the form of payment by check or by credit memo against future purchases for each identified retail end-user overcharged.

III. Submissions of Written Comments

A. *Potential Claimants:* Interested persons who believe that they have a claim to all or a portion of the refund amount specified in I.1.a. above, should provide written notification of the claim to the ERA at this time. Proof of claims is not now being required. Written notification to the ERA at this time is requested primarily for the purpose of identifying valid potential claims to the refund amount. After potential claims are identified, procedures for the making of proof of claims may be established. Failure by a person to provide written notification of a potential claim within the comment period for this Notice may result in the DOE irrevocably disbursing the funds to other claimants or to the general public interest.

B. *Other Comments:* The ERA invites interested persons to comment on the terms, conditions, or procedural aspects of this Consent Order.

You should send your comments or written notification of a claim to Kenneth E. Merica, District Manager of Enforcement, P.O. Box 26247, Belmar Branch, Lakewood, Colorado 80226. You may obtain a free copy of this Consent Order by writing to the same address or by calling (303) 234-3195.

You should identify your comments or written notification of a claim on the outside of your envelope and on the documents you submit with the designation, "Comments on Field Oil Company, Inc. Consent Order." We will consider all comments we receive by 4:30 p.m., local time, on (30 days after publication). You should identify any information or data which, in your opinion, is confidential and submit it in accordance with the procedures in 10 CFR 205.9(f).

Issued in Lakewood, Colorado, on the 22nd day of July 1980.

Kenneth E. Merica,

District Manager of Enforcement, Rocky Mountain District.

[FR Doc. 80-23743 Filed 8-5-80; 8:45 am]

BILLING CODE 6450-01-M

Energy Supply and Environmental Coordination Act; Rescission of Prohibition Orders

Pursuant to 10 CFR 303.137(d), the Department of Energy (DOE) hereby gives notice that on July 31, 1980, it issued orders rescinding the Prohibition Orders issued on June 30, 1977, to the International Paper Company's Pine Bluff, Arkansas Plant, Units 1 and 2 (Docket No. OCU-0786) pursuant to Section 2 of the Energy Supply and Environmental Coordination Act of 1974 (ESECA), as amended (15 U.S.C. 791 *et seq.*).[1] This action was initiated by DOE under the authority granted to it by Section 2(f) of ESECA and in accordance with the implementing regulations, 10 CFR Part 303, Subpart J. The Prohibition Orders, if made effective by issuance of Notices of Effectiveness (NOE), would have prohibited the above-named major fuel burning installations (MFBI) from burning natural gas or petroleum products as their primary energy source.

By the terms of the Clean Air Act Amendments of 1977 (Pub. L. 95-95), the written concurrence of the Governor of the State in which the facility is located must be obtained before the Environmental Protection Agency (EPA) may certify to DOE that the outstanding Prohibition Orders can take effect. By letter of July 16, 1979, Arkansas Governor Bill Clinton advised EPA that, because of environmental problems involving the disposal of solid wastes by the local jurisdictions surrounding the Pine Bluff Plant and his desire to see Pine Bluff Plant, Units 1 and 2 burn solid wastes as their primary energy source, he did not intend to concur on the Prohibition Orders requiring the conversion of the units to coal. Accordingly, by letter of February 6, 1980, EPA advised DOE that it could not certify the earliest date upon which Pine Bluff Plant, Units 1 and 2 would be able to burn coal as their primary energy source and be in compliance with applicable air pollution control requirements, as required by Section 2 of ESECA and Section 112(b)(2) of the Clean Air Act Amendments of 1977.

Based upon this information, DOE has determined that the outstanding Prohibition Orders issued to Pine Bluff Plant, Units 1 and 2 cannot be made effective without the EPA certification as required by 10 CFR 303.37(b)(1), and accordingly, DOE has rescinded the orders.

In its "Intention to Rescind a Prohibition Order" published in the **Federal Register** on March 25, 1980 (45 FR 19296), DOE gave notice of its intention to rescind the Prohibition Orders issued to the above-named MFBIs, and invited written comments on the proposed action. No comments were received during the period allotted for submission of written comments, and no issues were raised or called to DOE's attention, which would have caused DOE to terminate the rescission action.

These Rescission Orders were served on Mr. Gardiner L. Tucker, Vice President, Science and Technology, International Paper Company, 720 E. 42nd Street, New York, New York 10017, by registered mail, July 31, 1980. Copies of the Rescission Orders will be on display for any interestd members of the public to inspect at the DOE Public Docket Room located in Room B-120, 2000 M Street, NW., Washington, D.C. 20461, from 1:00 to 4:30 p.m., Monday through Friday of each week. Copies will also be available at the appropriate DOE regional office and in the Freedom of Information Reading Room, Room 5B-180, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, between the hours of 8:15 a.m. and 4:15 p.m., Monday through Friday.

Any person aggrieved by the Rescission Orders may file an appeal with the DOE Office of Hearings and Appeals (previously the Office of Exceptions and Appeals) in accordance with 10 CFR Part 303, Subpart H. The appeal shall be filed within 30 days after service of the Rescission Orders. Service by registered mail is complete upon mailing. There has not been an exhaustion of administrative remedies until an appeal has been filed pursuant to Subpart H and the appellate proceeding is completed by the issuance of an order granting or denying the appeal.

Any questions regarding this recission action should be directed to DOE as follows: Steven A. Frank, ESECA Programs Branch, Department of Energy, Economic Regulatory Administration, Room 3318, 2000 M Street, NW., Washington, D.C. 20461, (202) 653-3701). Written questions should be identified on the envelope and in the correspondence with the designation, "International Paper Company, Pine Bluff 1 and 2—Rescission Orders".

(Energy Supply and Environmental Coordination Act of 1974 (15 U.S.C. 791 *et seq.*) as amended by Pub. L. 95-70 and Pub. L. 95-620; Federal Energy Administration Act of 1974 (15 U.S.C 761 *et seq.*) as amended by Pub. L. 95-70, and Pub. L. 95-91; Department of Energy Organization Act (42 U.S.C 7101 *et seq.*); E.O. 11790 (39 FR 23185); E.O. 12009 (42 FR 46167))

Issued in Washington, D.C., July 31, 1980.

Robert L. Davies,

Acting Assistant Administrator, Office of Fuels Conversion, Economic Regulatory Administration.

Rescission Orders

Registered Mail

To: International Paper Company, 220 E. 42nd Street, New York, New York 10017.
Attention: Mr. Gardiner L. Tucker, Vice President.

Docket No.	Owner	Plant and Units	Location
OCU-0786	International Paper Co.	Pine Bluff, 1 and 2.	Pine Bluff, Ark.

Pursuant to Section 2(f) of the Energy Supply and Environmental Coordination Act of 1974 (ESECA), as amended (15 U.S.C. 792(f)) and in accordance with the implementing regulations, 10 CFR Part 303, Subpart J ("Modification of Rescission of Prohibition Orders and Construction Orders"), the Economic Regulatory Administration of the Department of Energy (DOE)[1] hereby rescinds the Prohibition Orders issued on June 30, 1977, to the above-named major fuel burning installations (MFBI). Such orders, if made effective by the issuance of Notices of Effectiveness (NOE), would have prohibited these MFBIs from burning natural gas or petroleum products as their primary energy source.

By the terms of the Clean Air Act Amendments of 1977 (Pub. L. 95-95), the written concurrence of the Governor of the State in which the facility is located must be obtained before the Environmental Protection Agency (EPA) may certify to DOE that the outstanding Prohibition Orders can take effect. By letter of July 16, 1979, Arkansas Governor Bill Clinton advised EPA that, because of environmental problems involving the disposal of solid wastes by the local jurisdictions surrounding the Pine Bluff Plant and his desire to see Pine Bluff Plant, Units 1 and 2 burn solid wastes as their primary energy source, he did not intend to concur on the Prohibition Orders requiring the conversion of the units to coal. Accordingly, by letter of February 6, 1980, EPA advised DOE that it could not certify the earliest date upon which Pine Bluff Plant, Units 1 and 2 would be able to burn coal as their primary energy source and be in compliance with applicable air pollution control requirements, as required by Section 2 of ESECA and Section 112(b)(2) of the Clean Air Act Amendments of 1977.

Based upon this information, DOE has determined that the outstanding Prohibition Orders issued to Pine Bluff Plant, Units 1 and 2 cannot be made effective without the EPA certification as required by 10 CFR 303.37(b)(1), and accordingly, DOE hereby rescinds the orders.

In its "Intention to Rescind a Prohibition Order" published in the **Federal Register** on March 25, 1980 (45 FR 19296), DOE gave notice of its intention to rescind the Prohibition Orders issued to the above-named MFBIs, and invited written comments on the proposed action. No comments were received during the period allotted for submission of written comments, and no issues were raised or called to DOE's attention, which would have caused DOE to terminate the rescission action.

Any person aggrieved by these Rescission Orders may file an appeal with the DOE Office of Hearings and Appeals (previously the Office of Exceptions and Appeals) in accordance with 10 CFR Part 303, Subpart H. The appeal shall be filed within 30 days after service of the Rescission Orders. Service by registered mail is complete upon mailing. There has not been an exhaustion of administrative remedies until an appeal has been filed pursuant to Subpart H and the appellate proceeding is completed by the issuance of an order granting or denying the appeal.

Any questions regarding these Rescission Orders should be directed to DOE as follows: Steven A. Frank, ESECA Programs Branch, Department of Energy, Economic Regulatory Administration, Room 2104, 2000 M Street, NW., Washington, D.C. 20461 (telephone: (202) 653-3701). Written questions should be identified on the envelope and in the correspondence with the designation, "International Paper Company, Pine Bluff 1 and 2—Rescission Orders".

(Energy Supply and Environmental Coordination Act of 1974 (15 U.S.C. 791 *et seq.*) as amended by Pub. L. 95-70 and Pub. L. 95-620; Federal Energy Administration Act of 1974 (15 U.S.C. 761 *et seq.*) as amended by Pub. L. 95-70 and Pub. L. 95-91; Department of Energy Organization Act (42 U.S.C. 7101 *et seq.*); E.O. 11790 (39 FR 23185); E.O. 12009 (42 FR 46267))

[1] Effective October 1, 1977, the responsibility for implementing ESECA was transferred by Executive Order No. 12009 from the Federal Energy Administration to the Department of Energy pursuant to the Department of Energy Organization Act (42 U.S.C. 7101 *et seq.*).

[1] Effective October 1, 1977, the responsibility for implementing ESECA was transferred by Executive Order No. 12009 from the Federal Energy Administration to the Department of Energy pursuant to the Department of Energy Organization Act (42 U.S.C. 7101 *et seq.*).

BILLING CODE 6450-01-M

[ERA Docket No. 80-CERT 021]

Arizona Public Service Co.; Certification of Eligible Use of Natural Gas to Displace Fuel Oil

Arizona Public Service Company (Arizona Public), P.O. Box 21666, Phoenix, Arizona 85036, filed an application for certification of an eligible use of natural gas to displace fuel oil at its Ocotillo Plant in Tempe, Arizona, West Phoenix Plant in Phoenix, Arizona, Saguaro Plant in Red Rock, Arizona, and Yuma Plant in Yuma, Arizona, with the Administrator of the Economic Regulatory Administration (ERA) pursuant to 10 CFR Part 595 on May 30, 1980. Notice of that application was published in the Federal Register (45 FR 48181, July 18, 1980) and an opportunity for public comment was provided for a period of ten (10) calendar days from the date of publication. No comments were received.

Arizona Public intends to purchase natural gas from Bixco, Inc., Phoenix, Arizona. On October 2, 1979, Arizona Public was previously granted a certificate (ERA Docket No. 79-CERT-084) of eligible use of the same amounts of natural gas to displace fuel oil requested in this application to be used at these same facilities but purchased from the Delhi Gas Pipeline Company (Delhi). To date, no natural gas has been purchased from Delhi under the certification. In this application, Arizona Public requested that it still be permitted to purchase gas from Delhi, but indicated that the total amount of gas used to displace fuel oil, even if purchased from both sellers, would not exceed the volumes requested in this application. Therefore, as recommended by the applicant, ERA is terminating the earlier certificate (79-CERT-084) upon issuance of this certificate, but incorporating into this certificate the authority to purchase oil displacement gas from Delhi.

The ERA has carefully reviewed Arizona Public's application in accordance with 10 CFR Part 595 and the policy considerations expressed in the Final Rulemaking Regarding Procedures for Certification of the Use of Natural Gas to Displace Fuel Oil (44 FR 47920, August 16, 1979). The ERA has determined that Arizona Public's application satisfies the criteria enumerated in 10 CFR Part 595, and, therefore, has granted the certification and transmitted that certification to the Federal Energy Regulatory Commission. A copy of the transmittal letter and the actual certification are appended to this notice.

Issued in Washington, D.C., on July 31, 1980.

F. Scott Bush,

Assistant Administrator, Regulations and Emergency Planning, Economic Regulatory Administration.

Department of Energy,
Washington, D.C.
July 31, 1980.

Re: ERA Certification of Eligible Use, ERA Docket No. 80-CERT-021, Arizona Public Service Company.

Mr. Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426

Dear Mr. Plumb: Pursuant to the provisions of 10 CRF Part 595, I am hereby transmitting to the Commission the enclosed certification of an eligible use of natural gas to displace fuel oil. This certification is required by the Commission as a precondition to interstate transportation of fuel oil displacement gas in accordance with the authorizing procedures in 18 CFR Part 284, Subpart F. As noted in the certificate, it is effective for one year from the date of issuance, unless a shorter period of time is required by 18 CFR Part 284, Subpart F. Also as noted in the certificate, the earlier certification (ERA Docket No. 79-CERT-084) issued to Arizona Public Service Company on October 2, 1979 authorizing the purchase of oil displacement gas from the Delhi Gas Pipeline Company (Delhi) is terminated upon the issuance of this certificate, but the authority to purchase gas from Delhi is incorporated in this certificate. A copy of the enclosed certification is also being published in the Federal Register and provided to the applicant.

Should the Commission have any further questions, please contact Mr. Albert F. Bass, Deputy Director, Division of Natural Gas, Economic Regulatory Administration, 2000 M Street, NW, Room 7108, Washington, D.C. 20461, telephone (202) 653-3286. All correspondence and inquiries regarding this certification should reference ERA Docket No. 80-CERT-021.

Sincerely,

F. Scott Bush

Assistant Administrator, Regulations and Emergency Planning, Economic Regulatory Administration.

Enclosure:

Certification by the Economic Regulatory Administration to the Federal Energy Regulatory Commission of the Use of Natural Gas for Fuel Oil Displacement by the Arizona Public Service Co.

[ERA Docket No. 80-CERT-021]

Application for Certification

Pursuant to 10 CFR Part 595, Arizona Public Service Company (Arizona Public) filed an application for certification of an eligible use of 10,832,000 Mcf per year for the Ocotillo Plant, 1,671,000 Mcf per year for the West Phoenix Plant, 5,470,000 Mcf per year for the Saguaro Plant, and 2,808,000 Mcf per year for the Yuma Plant, with the Administrator of the Economic Regulatory Administration (ERA) on May 30, 1980. The application states that the eligible seller of the gas is Bixco, Inc. (Bixco) and that the gas will be transported by the El Paso Natural Gas Company. The eligible seller in the previous certificate (ERA Docket No. 79-CERT-084) for the same volumes is the Delhi Gas Pipeline Company (Delhi). Arizona Public requested that ERA terminate the earlier Certification of Eligible Use in Docket No. 79-CERT-084 and include both Bixco and Delhi as eligible sellers in a new certification.

This application indicates that the use of this natural gas is estimated to displace the following volumes of No. 6 and No. 2 fuel oil per year:

Estimated Barrels of Fuel Oil Displacement

	No. 6 fuel oil (0.9 percent sulfur)	No. 2 fuel oil (0.5 percent sulfur)
Ocotillo Plant	1,635,000	250,000
West Phoenix Plant	53,200	251,400
Saguaro Plant	715,800	243,800
Yuma Plant	346,300	147,800

The application also indicates that neither the gas nor the displaced fuel oil will be used to displace coal in the applicant's facilities.

Certification

Based upon a review of the information contained in the application, as well as other information available to ERA, the ERA hereby certifies, pursuant to 10 CFR Part 595, that the use of the following volumes of natural gas per year at Arizona Public's various plants purchased from Bixco and/or Delhi is an eligible use of gas within the meaning of 10 CFR Part 595:

Ocotillo Plant	10,832,000	Mcf/yr.
West Phoenix Plant	1,671,000	Mcf/yr.
Saguaro Plant	5,470,000	Mcf/yr.
Yuma Plant	2,808,000	Mcf/yr.

Effective Date

This certification is effective upon the date of issuance, and expires one year from that date, unless a shorter period of time is required by 18 CFR Part 284, Subpart F. It is effective during this period of time for the use of up to the same certified volumes of natural gas at the same facilities purchased from the same eligible sellers.

Upon the date of issuance of this certificate, the previous certificate in ERA Docket No. 79-CERT-084 is terminated.

Issued in Washington, D.C., on July 31, 1980.

F. Scott Bush,

Assistant Administrator, Regulations and Emergency Planning, Economic Regulatory Administration.

BILLING CODE 6450-01-M

[ERA Docket No. 80-CERT-022]

International Harvester Co.; Certification of Eligible Use of Natural Gas To Displace Fuel Oil

International Harvester Company (International Harvester), 401 North Michigan Avenue, Chicago, Illinois 60611, filed an application for certification of an eligible use of natural gas to displace fuel oil at its foundry and factory complex located in Memphis, Tennessee, with the Administrator of the Economic Regulatory Administration (ERA) pursuant to 10 CFR Part 595 on June 9, 1980. Notice of that application was published in the Federal Register (45 FR 48182, July 18, 1980) and an opportunity for public comment was provided for a period of ten (10) calendar days from the date of publication. No comments were received.

The ERA has carefully reviewed International Harvester's application in accordance with 10 CFR Part 595 and the policy considerations expressed in the Final Rulemaking Regarding Procedures for Certification of the Use of Natural Gas to Displace Fuel Oil (44 FR 47920, August 16, 1979). The ERA has determined that International Harvester's application satisfies the criteria enumerated in 10 CFR Part 595, and, therefore, has granted the certification and transmitted that certification to the Federal Energy Regulatory Commission. A copy of the transmittal letter and the actual certification are appended to this notice.

Issued in Washington, D.C., on July 31, 1980.

F. Scott Bush,

Assistant Administrator, Regulations and Emergency Planning, Economic Regulatory Administration.

Department of Energy,
Washington, D.C., July 31, 1980.

Re ERA Certification of Eligible Use, ERA Docket No. 80-CERT-022, International Harvester Company.

Mr. Kenneth F. Plumb,
Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C.

Dear Mr. Plumb: Pursuant to the provisions of 10 CFR Part 595, I am hereby transmitting to the Commission the enclosed certification of an eligible use of natural gas to displace fuel oil. This certification is required by the Commission as a precondition to interstate transportation of fuel oil displacement gas in accordance with the authorizing procedures in 18 CFR Part 284, Subpart F. As noted in the certificate, it is effective for one year from the date of issuance, unless a shorter period of time of time is required by 18 CFR Part 284, Subpart F. A copy of the enclosed certification is also being published in the Federal Register and provided to the applicant.

Should the Commission have any further questions, please contact Mr. Albert F. Bass, Deputy Director, Division of Natural Gas, Economic Regulatory Administration, 2000 M Street, N.W., Room 7108 Washington, D.C. 20461, telephone (202) 653-3286. All correspondence and inquiries regarding this certification should reference ERA Docket No. 80-CERT-022.

Sincerely,

F. Scott Bush,

Assistant Administrator, Regulations and Emergency Planning, Economic Regulatory Administration.

Certification by the Economic Regulatory Administration to the Federal Energy Regulatory Commission of the Use of Natural Gas for Fuel Oil Displacement by the International Harvester Co.

ERA Docket No. 80-CERT-022

Application for Certification. Pursuant to 10 CFR Part 595, International Harvester Company (International Harvester) filed an application for certification of an eligible use of up to 75,000 Mcf of natural gas per year for its foundry and factory complex located in Memphis, Tennessee, with the Administrator of the Economic Regulatory Administration (ERA) on June 9, 1980. The application states that the eligible seller of the gas is the Southern Ohio Energy Company (Southern Ohio), a wholly owned subsidiary of International Harvester and the gas will be transported by the Columbia Gas Transmission Corporation, the Texas Gas Transmission Corporation, and The Memphis Light, Gas and Water Division. The application indicates that the use of this natural gas is estimated to displace approximately 500,000 gallons (11,905 barrels) of No. 6 fuel oil (0.3 percent sulfur) per year. The application also indicates that neither the gas nor the displaced fuel oil will be used to displace coal in the applicant's facilities.

Certification. Based upon a review of the information contained in the application, as well as other information available to ERA, the ERA hereby certifies, pursuant to 10 CFR Part 595, that the use of up to 75,000 Mcf of natural gas per year at International Harvester's foundry and factory complex purchased from Southern Ohio is an eligible use of gas within the meaning of 10 CFR Part 595.

Effective Date. This certification is effective upon the date of issuance, and expires one year from that date, unless a shorter period of time required by 18 CFR Part 284, Subpart F. It is effective during this period of time for amounts not to exceed the certified volume when used to displace oil at the named facilities and when the gas is purchased from the eligible seller named in the certificate.

Issued in Washington, D.C., on July 31, 1980.

F. Scott Bush,

Assistant Administrator, Regulations and Emergency Planning, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket No. TA80-2-1 (PGA-80-2A)]

Alabama-Tennessee Natural Gas Co.; Proposed PGA Rate Adjustment

July 30, 1980.

Take notice that on July 25, 1980, Alabama-Tennessee Natural Gas Company (Alabama-Tennessee), P.O. Box 918, Florence, Alabama 35630, tendered for filing as part of its FPC Gas Tariff, Third Revised Volume No. 1, the following tariff sheet:

First Substitute Thirty-Third Revised Sheet No. 3-A

This tariff sheet has been filed to reflect a slight reduction in a similar filing by Alabama-Tennessee's supplier, Tennessee Gas Pipeline Company, a Division of Tenneco Inc., made on July 18, 1980 in Docket Nos. TA80-2-9 (PGA80-2) to become effective July 1, 1980. Accordingly, Alabama-Tennessee requests that its revised tariff sheet be made effective July 1, 1980 and, to permit this effective date, further requests a waiver of § 154.22 of the Commission's regulations to accomplish such effective date.

The revised tariff sheet provides for the following reduced rates:

Rate schedule	Rate after current adjustment
G-1:	
Demand	$2.12
Commodity	2.5032

V 45 / 153 3 AG 6 80 0 UMI

Rate schedule		Rate after current adjustment
SG-1:		
	Commodity	2.6581
I-1:		
	Commodity	2.5728

Alabama-Tennessee states that copies of the filing have been mailed to all of its jurisdictional customers and affected State regulatory Commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 15, 1980. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 80-23688 Filed 8-5-80; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. CP80-434]

Alaskan Northwest Natural Transportation Co.; Application

July 31, 1980.

Take notice that on July 1, 1980,[1] Alaskan Northwest Natural Gas Transportation Company (Applicant), P.O. Box 1528, Salt Lake City, Utah 84110, filed in Docket No. CP80-434 an application pursuant to Executive Order 10485, Executive Order 12038, and Delegation Order 0204-8 for a Permit to construct, operate, connect and maintain facilities at the international boundary in Alaska, United States, and the Yukon Territory, Canada, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant herein proposes to construct, operate, connect and maintain at the international boundary between Alaska and the Yukon territory a fully enclosed meter building, four 24-inch diameter by 39-foot long meter runs, and a section of 48-inch pipeline. It is stated that these facilities are necessary to permit the transportation and delivery of natural gas from the Prudhoe Bay Area on the North Slope of Alaska to a point of interconnection with the proposed facilities of Foothills Pipeline, (Yukon) Ltd. (Foothills). Applicant states that all of the gas delivered by Applicant to Foothills (adjusted for heating value less fuel and unaccounted-for gas) would be transported and redelivered to the lower 48 states of the United States. Applicant asserts that this point of crossing of the Alaska segment of the Alaska Natural Gas Transportation System would be two miles south of the Alaska Highway intersection with the Alaska-Yukon border, and the metering station would be built in the vicinity of the nearby U.S. Customs Border Station.

Any person desiring to be heard or to make any protest with reference to said application should on or before August 22, 1980, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission Rules.

Kenneth F. Plumb,

Secretary.

[FR Doc. 80-23709 Filed 8-5-80; 8:45 am]

BILLING CODE 6450-85-M

[1] The application was initially tendered for filing on July 1, 1980; however, the fee required by § 159.1 of the Regulations under the Natural Gas Act (10 CFR 159.1) was not paid until July 2, 1980, thus the filing was not completed until the latter date.

[Docket No. EL78-13]

Central Virginia Electric Cooperative v. Appalachian Power Co.; Informal Settlement Conference

July 31, 1980.

There will be an informal settlement conference held on August 12, 1980 at the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426 at 10:00 a.m. The room number will be posted on the second floor notice board.

Kenneth F. Plumb,

Secretary.

[FR Doc. 80-23710 Filed 8-5-80; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. CP80-452]

Cimarron Transmission Co., Natural Gas Pipeline Co. of America, and United Gas Pipe Line Co.; Application

July 31, 1980.

Take notice that on July 17, 1980, Chevron Chemical Company (Chemical), 575 Market Street, San Francisco, California 94105, filed on behalf of Cimarron Transmission Company (Cimarron), 58 Broadlawn Village, Ardmore, Oklahoma 73401, Natural Gas Pipeline Company of America (Natural), 122 South Michigan Avenue, Chicago, Illinois 60603, and United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77001, in Docket No. CP80-452 a joint application pursuant to Section 7(c) of the Natural Gas Act and Section 157.100 of the Regulations thereunder (18 CFR 157.100) for a certificate of public convenience and necessity authorizing the transportation of gas purchased by Chemical from Love County, Oklahoma, to Luling, Louisiana, and the construction and operation of facilities to effectuate such transportation, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicants state that Chemical purchases the natural gas at Marietta field, Love County, Oklahoma, and has entered into contracts with the other three companies to transport the gas to an anhydrous ammonia plant in Luling, Louisiana.

Under the five-year transportation agreement between Chemical and Cimarron dated July 1, 1980, Cimarron would take Chemical's gas from existing connections in the Marietta field, and transport the gas to an existing interconnection with Natural's facilities located at the outlet of Cimarron's measurement station in Love County, Oklahoma (Love Point). Applicants assert that Cimarron would not have to build any new facilities to transport and redeliver the contract maximum of 10,000 Mcf per day. Applicants further state that in the event Chemical does not take the entire amount of gas produced for its account, Cimarron has the option to purchase those non-taken quantities, predicated upon Natural's need for the gas.

It is stated that Chemical agrees to pay a monthly transportation and dehydration charge estimated to be $33,479.93, which when multiplied by the cost distribution factor of .166667 equals $5,580.

It is noted that Chemical and Natural entered into a separate five-year transportation agreement dated June 23, 1980. Pursuant to this agreement, Applicants state that Natural would redeliver thermally equivalent volumes less 7 percent retained for fuel usage of Chemical's gas received at the Love Point to an existing interconnection with United's facilities in Vermilion Parish, Louisiana (Vermilion Point). It is stated that Natural would transport 5,000 Mcf per day on a firm basis with up to a total of 10,000 Mcf per day on a firm basis with up to a total of 10,000 Mcf per day subject to capacity availability. Applicants assert that Natural would not build any new facilities as a result of this transportation, but if its mainline to its principle markets needs future capacity expansion, Chemical would either contribute a *pro rata* share of costs or suffer reduction in firm transportation volumes. Applicants further assert that Natural would charge Chemical 13.1 cents per Mcf for the transportation service.

Applicants state that pursuant to a 5-year transportation contract between Chemical and United dated June 20, 1980, United would receive Chemical's gas from Natural at the Vermilion Point. It is stated that United would then redeliver the gas, or equivalent quantities, less 2.3 percent for fuel use, to Chemical at the ammonia manufacturing facility located near Luling, St. Charles Parish, Louisiana, and would charge Chemical 19.4 cents per Mcf for the transportation service.

Applicants state that to facilitate United's redeliveries to Chemical, a new measuring and regulating facility would be built at a mutually agreeable point on United's Paradis Line in St. Charles Parish, Louisiana. It is stated that Chemical would reimburse United for all expenses incurred in constructing the new facilities which are estimated to be $32,000. Applicants state that United would operate and maintain the facility which Chemical would own.

Applicants further state that pursuant to § 157.103 of the Commission's Regulations, the subject gas would be used as process fuel and/or feedstock in the ammonia production process as an essential agricultural use.

Any person desiring to be heard or to make protest with reference to said application should on or before August 22, 1980, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action be taken will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 80-23711 Filed 8-5-80; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. CP80-455]

Consolidated Gas Supply Corp.; Application

July 31, 1980.

Take notice that on July 21, 1980, Consolidated Gas Supply Corporation (Applicant), 445 West Main Street, Clarksburg, West Virginia 26301, filed in Docket No. CP80-445 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of approximately 9.5 miles of pipeline in Wetzel and Tyler Counties, West Virginia, and for authorization to convert an existing pipeline to production service, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that its existing Line No. F-9, which is the principal supply feed for Sustersville and Paden City, West Virginia, has become pitted, corroded, and damaged by soil slippage. Moreover, it is stated, that the annual and peak day requirements in the Sisterville/Paden area have been increasing and are expected to increase further in the future, and that the Line No. F-9 in its present condition is unable to handle the increase in flows and gas pressure sufficient to meet these peak demands. Therefore, Applicant proposes to construct and operate approximately 9.5 miles of new 8-inch pipeline from a point on its existing line in Wetzel County, West Virginia, to a point near the present western terminus of Line No. F-9 at Buck Run in Tyler County. Applicant estimates the cost of the proposed pipeline facilities to be $1,494,559 which would be financed from funds on hand and funds to be obtained from Applicant's parent, Consolidated Natural Gas Company.

Applicant further notes that it is willing to purchase new local gas supplies, but because of this gas' high levels of water content it is unsuitable for direct market delivery. Applicant proposes to retain Line No. F-9 from Buck Run to its eastern terminus at Applicant's Hastings, West Virginia, extraction plant and to integrate the line with Applicant's low-pressure production facilities in this area. Applicant states that this new facility configuration would permit Applicant to purchase present and future locally produced gas and condition these supplies in its Hastings plant, thereby lowering Line No. F-9 operation pressure and more economically modernizing the supply feed to the Sistersville/Paden market area.

Any person desiring to be heard or to make any protest with reference to said application should on or before August 22, 1980, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is

V 45 / 153 AUG 6 80 UMI

filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 80-23712 Filed 8-5-80; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. CP80-450]

El Paso Natural Gas Co.; Application

July 31, 1980.

Take notice that on July 11, 1980, El Paso Natural Gas Company (Applicant), P.O. Box 1492, El Paso, Texas 79978, filed in Docket No. CP80-450 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation and delivery of up to 750 Mcf of natural gas per day, on an exchange basis, with Warren Petroleum Company (Warren) at an existing point of delivery located in Lea County, New Mexico, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it and Warren are parties to certain residue gas purchase agreements dated February 3, 1954, and March 1, 1972, as amended, which agreements provide for the sale by Warren and the purchase by Applicant at the outlet of Saunders Gas Processing Plant located in Lea County, New Mexico, of all volumes of surplus residue gas processed in said plant and attributable to certain sources set forth in the agreements. In addition, it is stated that Warren processes at the Saunders Gas Processing Plant and delivers to Applicant certain quantities of gas attributable to Applicant's production in the vicinity of said plant. In the daily operation of the Saunders Gas Processing Plant, Warren purchases from Applicant up to 750 Mcf of natural gas per day at a point of interconnection of the pipeline facilities of Applicant and Warren located in Lea County, New Mexico, for use as fuel at its Saunders Field Booster Station, it is said. Applicant states that the said volumes of natural gas sold to Warren by Applicant are now classified as Priority 3 deliveries under Applicant's currently effective interim curtailment plan prescribed by the Commission in Docket No. RP72-6.

Applicant additionally states that in view of the reclassification of the subject deliveries of natural gas to Warren from a Priority 2 delivery to a Priority 3 delivery, Warren has expressed concern that its continued operation of the Saunders Gas Processing Plant could be seriously affected, and the sale and delivery of residue gas to Applicant may be partially or totally interrupted from time to time as a result of the extensive periods of partial or total curtailment of Priority 3 deliveries which have occurred and are expected to continue to occur on Applicant's interstate transmission system. Similary, Applicant asserts that it is concerned that during periods of curtailment of Priority 3 deliveries, Warren's Saunders Field Booster Station may experience difficulties due to the use by Warren of casinghead gas for fuel thereby causing a shutdown of such facilities, which shutdown would force Warren also to shut down its Saunders Gas Processing Plant. Applicant further submits that such a shutdown, whether it be caused by Applicant's curtailment of Priority 3 deliveries or difficulties in the operation of Warren's compressor facilities due to the use of casinghead gas, would interrupt the flow of gas (approximately 11,133 Mcf per day) which Applicant would otherwise have received and purchased from Warren and utilized in serving its system requirements.

It is stated that in consideration of Warren's concern, as well as Applicant's desire to insure continuity of deliveries of gas from Warren's Saunders Gas Processing Plant, applicant and Warren have entered into a gas exchange agreement dated April 7, 1980, wherein Applicant has agreed to deliver to Warren and Warren has agreed to accept and receive from Applicant, at the existing point of interconnection between the pipeline facilities of Applicant and Warren in Lea County, New Mexico, such quantity of pipeline quality natural gas as Warren may need, from time to time, not to exceed 750 Mcf per day for use in the operation of Warren's Saunders Field Booster Station which serves its Saunders Gas Processing Plant. In exchange therefor, Warren has agreed to deliver concurrently to Applicant at Applicant's existing meter station located at the outlet of the Saunders Gas Processing Plant and Applicant has agreed to accept and receive for the account of Warren a quantity of surplus residue gas equivalent, on a million Btu basis, to the total quantities of pipeline quality natural gas delivered by Applicant to Warren, it is said.

The exchange arrangement set forth herein would insure that pipeline quality natural gas would be available to Warren without interruption for use in fueling its Saunders Field Booster Station and thereby operating its Saunders Gas Processing Plant. In addition, it is asserted that the exchange arrangement would insure Applicant of the uninterrupted availibilty of residue gas from Warren's Saunders Gas Processing Plant for use on Applicant's interstate transmission system.

Any person desiring to be heard or to make any protest with reference to said application should on or before August 22, 1980, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 80-23713 Filed 8-5-80; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. CP80-449]

El Paso Natural Gas Co.; Application

July 31, 1980.

Take notice that on July 11, 1980, El Paso Natural Gas Company (Applicant), P.O. Box 1492, El Paso, Texas 79978, filed in Docket No. CP80-449 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain facilities and the transportation and delivery of natural gas, on an exchange basis, with Amoco Production Company (Amoco) at a proposed point of delivery located in Andrews County, Texas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it and Amoco are parties to the 3-Bar Residue Gas Purchase Agreement dated March 1, 1966, as amended (3-Bar Agreement), which agreement provides for the sale by Amoco and the purchase by Applicant, at the outlet of the South Fullerton Gasoline Plant located in Andrews County, Texas, of all volumes of surplus residue gas processed in said plant attributable to certain sources set forth in the 3-Bar Agreement.

It is said that Amoco has, in the past, utilized a portion of the treated casinghead gas attributable to production from the 3-Bar Field for use in operating its 3-Bar Field facilities and appurtenances thereto. However, with the past decline in gas reserves available from the 3-Bar Field, Applicant states that Amoco has determined that its field processing facilities could no longer be efficiently operated and has, therefore, removed such processing facilities from the 3-Bar Field. Upon the removal of the above-mentioned facilities, Amoco utilized the untreated casinghead gas to fuel its 3-Bar Field facilities, it is said. Applicant asserts that the continued use of such rich high Btu casinghead gas in Amoco's 3-Bar Field facilities has caused difficulties which could force Amoco to shut down such field facilities, thereby ceasing the flow of casinghead gas from the 3-Bar Field to the South Fullerton Gasoline Plant and interrupting the sale and delivery of surplus residue gas to Applicant. Applicant further asserts that Amoco believes that processing in its South Fullerton Gasoline Plant of the volumes of casinghead gas now utilized by Amoco as fuel in the 3-Bar Field facilities would increase the efficiency of its South Fullerton Gasoline Plant.

In order that Amoco may have a constant and reliable supply of pipeline quality natural gas available to it for use in the operation of its 3-Bar Field facilities, which are an integral part of its South Fullerton Gasoline Plant operations, and in order to insure the continuity of the gas supply delivered from the South Fullerton Gasoline Plant by Amoco to Applicant for use on Applicant's interstate transmission system, Applicant states that it and Amoco have entered into a gas exchange agreement, dated June 12, 1980, wherein Applicant has agreed to deliver to Amoco and Amoco has agreed to accept and receive from Applicant, at a proposed point of delivery to be located in Andrews County, Texas, such quantities of pipeline quality natural gas as Amoco may need, from time to time, not to exceed 500 Mcf per day, for use in the operation of its 3-Bar Field facilities and/or appurtenances thereto. In exchange therefor, Applicant further states that Amoco has agreed to deliver concurrently to Applicant at Applicant's existing meter station located at the outlet of Amoco's South Fullerton Gasoline Plant, and Applicant has agreed to accept and receive, for the account of Amoco, a quantity of surplus residue gas equivalent, on an Mcf basis, to the total quantities of pipeline quality natural gas delivered by Applicant to Amoco.

In order to effectuate the delivery of pipeline quality natural gas to Amoco for use at its 3-Bar Field facilities, Applicant proposes to construct and operate the following facilities:

A 1-inch O.D. tap and valve assembly, with appurtenances, including one 2⅜-inch O.D. standard orifice-type meter station to be located at a point on Applicant's existing 20-inch O.D. Goldsmith-Dumas pipeline located in Andrews County, Texas.

Applicant further states that as a part of such arrangement, Amoco would be required to construct and operate, at its sole cost and expense, certain pipeline and regulating facilities required to receive deliveries of pipeline quality natural gas from Applicant at the proposed point of delivery.

The exchange agreement would continue in full force and effect for a period coterminous with the term of the 3-Bar Residue Gas Purchase Agreement dated March 1, 1966, between Applicant and Amoco.

Applicant states that the total estimated cost of those facilities proposed to be constructed and operated by Applicant is $6,200. Applicant further states that Amoco has agreed to reimburse Applicant for all actual costs and expenses incurred in the construction of such facilities.

Any person desiring to be heard or to make any protest with reference to said application should on or before August 22, 1980, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 80-23710 Filed 8-5-80; 8:45 am]

BILLING CODE 6450-85-M

[Project No. 3226]

Harrison Western Corp.; Application for Preliminary Permit

July 30, 1980.

Take notice that Harrison Western Corporation (Applicant) filed on June 24, 1980, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)-825(r)] for proposed Project No. 3226 to be known as the Horsetooth Project located on the Cache La Poudre River near the Town of Fort Collins, Larimer County, Colorado, at the existing Horsetooth Dam owned by the United States Water and Power Resources Service (Township 7 North

Range 70 West N.M.P.M.). Correspondence with the Applicant should be directed to: Mr. Warren Harrison, Engineering Manager, Harrison Western Corporation, 1208 Quail Street, Lakewood, Colorado 80215.

Project Description—The proposed project would utilize an existing government dam and would consist of a powerhouse with four Ossberger turbines connected to four generators with a total rated capacity of 2,300 kW. A transmission line with a minimum length of 6,000 feet would be required. The project could generate up to 17,900,000 kWh annually, which would save the equivalent of 29,400 barrels of oil or 8,300 tons of coal.

Purpose of Project—Power generated by the project would be sold to either the Rural Electric Associate or Public Service Company of Colorado.

Proposed Scope and Cost of Studies under Permit—The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on results of these studies, Applicant would decide whether to proceed with more detailed studies and the preparation of an application for license to construct and operate the project. Applicant estimates that the cost of the work to be performed under the preliminary permit would be $60,000.

Purpose of Preliminary Permit—A preliminary permit does not authorize construction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary studies and examinations to determine the engineering, economic, and environmental feasibility of the proposed project, the market for the power, and all other information necessary for inclusion in an application for a license.

Agency comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are invited to submit comments on the described application for preliminary permit. (A copy of the application may be obtained directly from the Applicant.) Comments should be confined to substantive issues relevant to the issuance of a permit and consistent with the purpose of a permit as described in this notice. No other formal request for comments will be made. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before October 6, 1980, either the competing application itself or a notice of intent to file a competing application. Submission of a timely notice of intent allows an interested person to file the competing application no later than December 5, 1980. A notice of intent must conform with the requirements of 18 CFR 4.33 (b) and (c), (*as amended* 44 FR 61328, October 25, 1979). A competing application must conform with the requirements of 18 CFR, 4.33 (a) and (d), (as amended, 44 FR 61328, October 25, 1979).

Comments, protests, or Petitions to Intervene—Anyone desiring to be heard or to make any protest about this application should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, in accordance with the requirements of the Commission's Rules of Practice and Procedure, 18 CFR, 1.8 or 1.10 (1979). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be filed on or before October 6, 1980. The Commission's address is: 825 North Capitol Street, NE., Washington, D.C. 20426. The application is on file with the Commission and is available for public inspection.

Kenneth Plumb,

Secretary.

[FR Doc. 80-23700 Filed 8-5-80; 8:45 am]

BILLING CODE 6450-85-M

[Project No. 3225]

Harrison Western Corp.; Application for Preliminary Permit

July 30, 1980.

Take notice that Harrison Western Corporation (Applicant) filed on June 24, 1980, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for proposed Project No. 3225 to be known as the Ruedi Project located on the Fryingpan River near the Town of Basalt, Eagle and Pitkin Counties, Colorado, at the existing Ruedi Dam owned by the United States Water and Power Resources Service (Township 8 South, Range 84 West N.M.P.M.). Correspondence with the Applicant should be directed to: Mr. Warren Harrison, Engineering Manager, Harrison Western Corporation, 1208 Quail Street, Lakewood, Colorado 80215.

Project Description—The proposed project would utilize an existing government dam and would consist of a powerhouse with seven Ossberger turbines connected to seven generators with a total rated capacity of 4,200 kW. A transmission line with a minimum length of 4,400 feet would be required. The project could generate up to 32,700,000 kWh annually, which would save the equivalent of 53,700 barrels of oil or 15,140 tons of coal.

Purpose of Project—Power generated by the project would be sold to either the Rural Electric Associate or Public Service Company of Colorado.

Proposed Scope and Cost of Studies under Permit—The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on results of these studies, Applicant would decide whether to proceed with more detailed studies and the preparation of an application for license to construct and operate the project. Applicant estimates that the cost of the work to be performed under the preliminary permit would be $60,000.

Purpose of Preliminary Permit—A preliminary permit does not authorize construction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary studies and examinations to determine the engineering, economic, and environmental feasibility of the proposed project, the market for the power, and all other information necessary for inclusion in an application for a license.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are invited to submit comments on the described application for preliminary permit. (A copy of the application may be obtained directly from the Applicant.) Comments should be confined to substantive issues relevant to the issuance of a permit and consistent with the purpose of a permit as described in this notice. No other formal request for comments will be made. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before October 6, 1980, either the competing application itself or a notice of intent to file a competing application. Submission of a timely notice of intent allows an interested person to file the competing application no later than Dec. 5, 1980. A notice of intent must conform with the requirements of 18 CFR 4.33 (b) and (c), (as amended 44 FR 61328, October 25, 1979). A competing application must conform with the requirements of 18 CFR 4.33 (a) and (d), (as amended 44 FR 61328, October 25, 1979).

Comments, Protests, or Petitions to Intervene—Anyone desiring to be heard or to make any protest about this application should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, in accordance with the requirements of the Commission's Rules of Practice and Procedure, 18 CFR, 1.8 or 1.10 (1979). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be filed on or before October 6, 1980. The Commission's address is: 825 North Capitol Street, NE., Washington, D.C. 20426. The application is on file with the Commission and is available for public inspection.

Kenneth Plumb,

Secretary.

[FR Doc. 80-23701 Filed 8-5-80; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. SA80-134]

Michigan Wisconsin Pipe Line Co.; Application for Adjustment

July 30, 1980.

Take notice that on July 10, 1980, Michigan Wisconsin Pipe Line Company (Applicant), One Woodward Avenue, Detroit, Michigan 48226, filed in Docket No. SA80-134 an application pursuant to section 502(c) of the Natural Gas Policy Act of 1978 and section 1.41 of the Commission's Rules of Practice and Procedure (18 CFR 1.41) for an interim and permanent exemption for the filing requirements of § 281.204(b)(2) of the Commission's Regulations, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Section 281.204(b)(2) of the Regulations requires an interstate natural gas pipeline company to update its index of customer requirements annually in order to reflect changes, if any, in its priorities of service. Applicant asserts that preparation of the annual update requires substantial time and expense on its part and the part of its customers and the Data Verification Committee. Applicant anticipates that it would be able to meet the full requirements of its customers in the near term as indicated in its Form No. 15 for the year ended December 31, 1979, and that it can meet its customers' requirements through 1981 on the basis of presently contracted and certificated gas supplies. Accordingly, Applicant submits that compliance with the filing requirements of § 281.204(b)(2) is unnecessary and would result in special hardship and unfair distribution of burdens to it and its customers.

Applicant states that although it believes that compliance with § 281.204(b)(2) is unnecessary at this time, at such time as its Form No. 16 indicates that it would not be able to meet the full requirements of its customers, Applicant would timely make the necessary tariff filings to comply with the Commission's Regulations.

Applicant states further that it is currently required to update its index of requirements by November 1, 1980, and that in order to provide sufficient time for the Commission to consider its request for a permanent exemption, Applicant also requests interim relief.

The procedures applicable to the conduct of this adjustment proceeding are found in Section 1.41 of the Commission's Rules of Practice and Procedure, Order No. 24, issued March 22, 1979.

Any person desiring to participate in this adjustment proceeding shall file a petition to intervene in accordance with the provisions of § 1.41. All petitions to intervene must be filed on or before August 21, 1980.

Kenneth F. Plumb,

Secretary.

[FR Doc. 80-23702 Filed 8-5-80; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. CP79-189

Michigan Wisconsin Pipe Line Co.; Trunkline Gas Co.; Petition To Amend

July 31, 1980.

Take notice that on July 16, 1980, Michigan Wisconsin Pipe Line Company (Mich Wis), One Woodward Avenue, Detroit, Michigan 48226, and Trunkline Gas Company (Trunkline), P.O. Box 1642, Houston, Texas 77001, filed in Docket No. CP79-189 a joint petition to amend the order issued May 17, 1979, in the instant docket pursuant to Section 7(c) of the Natural Gas Act by authorizing the exchange of gas at additional delivery and redelivery points and the increase of the quantity of gas which would be exchanged, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Petitioners state that by order issued May 17, 1979, they were authorized to exchange up to 6,000 Mcf of natural gas per day pursuant to the terms of an exchange agreement between Trunkline and Mich Wis dated November 14, 1978. Petitioners state that Mich Wis makes deliveries of gas to Trunkline at the pipeline facilities of Stingray Pipeline Company (Stingray) in West Cameron Area Block 269, offshore Louisiana, and that Trunkline delivers equivalent volumes of exchange gas for Mich Wis at the High Island Offshore System (HIOS) pipeline at High Island Area Block A-332, offshore Texas, and/or an existing point of interconnection between the pipeline systems of Stingray and HIOS located in High Island Area Block A-330, offshore Texas.

Subsequent to the order, it is stated, Mich Wis acquired the right to purchase the gas reserves underlying West Cameron Area Blocks 537, 551, and 552, and agreed to participate as a joint owner in the lateral pipeline which connects the gas reserves underlying Block 537 to the Stingray pipeline facilities. Petitioners state that they have now amended their November 14, 1978, exchange agreement to provide for a new exchange point at Block 537 whereby Mich Wis can make deliveries of gas to Stingray for the account of Trunkline and permit Mich Wis to effectuate receipt of its Blocks 537, 551, and 552 gas supplies by exchange. It is further stated that the amended exchange agreement provides for an increase in the daily quantity of gas which can be exchanged from 6,000 Mcf per day to 15,000 Mcf per day. Moreover, Petitioners propose four additional points in the new exchange agreement where Trunkline can make redeliveries of exchange gas to Mich Wis. Petitioners describe the four points as follows:

(1) the outlet for the measurement facilities located on the High Island Block A-313 production platform at which point gas may be delivered by Trunkline for the account of Mich Wis

V 45 / 153
AG 6 80
UMI

with measurement to be conducted at the High Island Block A-313 platform;

(2) an existing tap in High Island Block A-539 where deliveries can be made to HIOS by Trunkline for the account of Mich Wis with measurement to be conducted at High Island Block A-511;

(3) an existing tap in High Island Block A-316 where deliveries can be made to HIOS by Trunkline for the account of Mich Wis with measurement to be conducted at High Island Block A-317; and

(4) the existing tap in High Island Block A-343 between the outlet of the 20-inch pipeline owned by Trunkline and others and the platform manifold owned by HIOS where a portion of Trunkline's gas may be delivered to HIOS for the account of Mich Wis with measurement to be conducted at High Island Block A-342.

Petitioners contend that they would use their best efforts to balance volumes of gas received and redelivered. Moreover, it is stated that no charge would be made, and no new facilities required by either of the Petitioners in providing the amended exchange service.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before August 22, 1980, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

[FR Doc. 80-23715 Filed 8-5-80; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. CP79-223]

Michigan Wisconsin Pipe Line Co.; Petition To Amend

July 31, 1980.

Take notice that on July 14, 1980, Michigan Wisconsin Pipe Line Company (Petitioner), One Woodward Avenue, Detroit, Michigan 48226, filed in Docket No. CP79-223 a petition to amend the Commission's order issued June 8, 1979, in said docket pursuant to Section 7(c) of the Natural Gas Act and Section 157.7(b) of the Regulations thereunder (18 CFR 157.7(b)) so as to authorize the construction of a gas-purchase facility costing in excess of the prescribed single offshore project cost limitation of $3,500,000, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Petitioner states that by order of June 8, 1979, it was issued a budget-type certificate authorizing the construction of gas-purchase facilities aggregating $18 million pursuant to Section 157.7(b) of the Commission's Regulations.

Subsequently, Petitioner asserts that although anticipated total costs are still within the $18 million authorization, it has ascertained that one project has exceeded its budget such that its costs are now in excess of the single offshore project limitation of $3.5 million. Petitioner states that the project is a gas purchase facility comprised of 7.15 miles of 12-inch pipeline for the transportation of gas reserves from South Marsh Island Block 260, offshore Louisiana, to South Marsh Island Block 249. The costs of this project, Petitioner asserts, were originally estimated to be $3,114,300. Petitioner states that the project was completed on April 1, 1980, and put into service in late May 1980 and asserts that a revised work order has been compiled which reflects an estimated net upward revision in the cost of the project of $815,963 to $3,930,263.

Accordingly, Petitioner requests that the $3.5 million limitation contained in Section 157.7(b)(1)(iii) of the Commission's Regulations be waived to the extent required to authorize the construction of said gas-purchase facility project at a cost not to exceed $4,100,000.

Petitioner attributes the cost overruns experienced on the gas-purchase facility to four major factors. Petitioner asserts that the first factor was standby time for barge rental due to adverse weather conditions in November 1979. Petitioner submits that the second major factor concerned two incidents of damage to the pipeline during the initial construction period which delayed completion.

In addition, Petitioner states that Amoco as operator advised Petitioner in early December of 1979 of its plans to drill additional wells. Petitioner also states that by mutual agreement between it and Amoco, the commencement date of production initially projected to commence in November 1979 was postponed until the summer of 1980, and the contractor worked only intermittently on the project during the winter of 1979-1980. The third major factor which Petitioner attributes to the cost overrun was unexpected difficulty during late March 1980 in locating a subsea valve assembly in South Marsh Island Block 249 which, it is asserted, was necessary in order to connect the 12-inch pipeline to the existing system and stop the flow of gas through three leaking valves which had to be closed in order to complete the project. Petitioner submits that the fourth major factor was standby time for test boat rental due to adverse fog conditions in March 1980.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before August 22, 1980, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

[FR Doc. 80-23716 Filed 8-5-80; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. ER80-456]

Monongahela Power Co., West Penn Power Co., and Potomac Edison Co., Filing

July 31, 1980.

The filing Company submits the following:

Take notice that Allegheny Power Service Corporation (APSC) on July 23, 1980, tendered for filing on behalf of Monongahela Power Company (Monongahela), The Potomac Edison Company (Potomac), and West Penn Power Company (West Penn), the electric utilities which make up the integrated Allegheny Power System, Amendment No. 8 dated July 21, 1980 to the Operating Agreement dated January 1, 1973 between Monongahela, Potomac, and West Penn and Virginia Electric Power Company (Vepco) designated Monongahela Rate Schedule FPC No. 32, Potomac Rate Schedule FPC No 33, West Penn Rate Schedule FPC No. 31, and Vepco Schedule FPC No. 99.

Amendment No. 8: (1) provides for increases in the demand charges for Short Term power from $0.70 to $0.85 per kilowatt-week and Short Term power obtained by the supplying party from another system from $0.24 per kilowatt-week; (2) provides for increases in the demand charges for Limited Term power from $3.75 to $4.50 per kilowatt-month and Limited Term power obtained by the supplying party from another system from 0.75 to $1.00 per kilowatt-month; and (3) places a $0.002 per kilowatt-hour cap ($0.001 when coming from a third party as required by the Commission in Rule 35.23 (f)) on the adders to the out-of-pocket costs of providing energy sold under the Short Term and Limited Term Schedules.

APSC requests waiver of the Commission's notice requirements to allow these increases to become effective August 1, 1979. APSC states that since Short Term Power and Energy transactions and Limited Term Power and Energy transactions are scheduled from time to time as load and capacity conditions on the systems of the parties dictate it is impossible to estimate the increases in revenues which would result from Amendment No. 8.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426 in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure. All such petitions or protests should be filed on or before August 22, 1980. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 80-23715 Filed 8-5-80; 8:45 am]

BILLING CODE 6450-85-M

[TA 80-2-26 (PGA 80-3, IPR 80-3, AP 80-2, LFUT 80-2, and TT 80-2)]

Natural Gas Pipeline Co. of America; Change in Rates

July 31, 1980.

Take notice that on July 24, 1980, Natural Gas Pipeline Company of America (Natural) Submitted for filing as part of its FERC Gas Tariff, Third Revised Volume No. 1, the below listed tariff sheets to be effective September 1, 1980:

Third Substitute Fortieth Revised Sheet No. 5
Second Revised Sheet No. 5C
Second Revised Sheet No. 5D

Natural states the purpose of the filing is to reflect rate adjustments under various sections of the General Terms and Conditions of its tariff and various articles of the Stipulation and Agreement in Docket No. RP78-78 (hereinafter Settlement) which was approved by Commission letter order issued October 4, 1979. The overall effect of the filed for adjustments to Natural's DMQ-1 sales rate is a decrease of $0.01 in the demand component and an increase of 2.19¢ in the commodity component. Appropriate adjustments were also made to Natural's other sales rate schedules. The annualized revenue increase amounts to approximately $20.1 million. The various components are summarized below:

	Rate schedule DMQ-1 rate adjustment		Annualized jurisdictional revenue increase (decrease)
	Demand	Commodity	
Purchased Gas Cost Adjustment:			
Producer Supplier		[1]7.76	$72.4
Pipeline Supplier		1.22	11.4
Deferred Purchased Gas Cost		(2.80)	(26.1)
Total PGA		[1]6.18	57.7
Louisiana First Use Tax		[1](0.84)	(7.8)
Advance Payments		[1](0.55)	(5.1)
Transportation Tracker	(0.01)	[1](2.60)	(24.7)
Total	(0.01)	[1]2.19	20.1

[1] In cents.

Sheet Nos. 5C and 5D reflect the fact that all of Natural's sale-for-resale customers reported zero MSAC. Natural's four direct industrial customers have either furnished exemption affidavits or are exempt based on information contained in Natural's records. Therefore, there is no PGA reduction due to incremental pricing.

Natural also states that it has credited its Deferred Purchased Gas Cost account for approximately $8.4 million principal and interest under the terms of Settlement Article XVI, Sales Refund Obligation.

Natural requests waiver of the Commission regulations to the extent, if any, required to put the proposed tariff sheets into effect on September 1, 1980.

A copy of this filing has been mailed to Natural's jurisdictional customers and to interested state regulatory agencies.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.W., Washington, D.C. 20426, in accordance with Section 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 22, 1980. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 80-23718 Filed 8-5-80; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. CP80-446]

Natural Gas Pipeline Co. of America; Application

July 31, 1980.

Take notice that on July 11, 1980, Natural Gas Pipeline Company of America (Applicant), 122 South Michigan Avenue, Chicago, Illinois 60603, filed in Docket No. CP80-446 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the installation and operation of two leased 3250 horsepower compressor units and related facilities, one in Lea County, New Mexico, and the other in Eddy County, New Mexico, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that its Permian System, which is the redelivery point of its only existing transportation agreement linking its two main supply lines, was certificated to operate at a design day capacity of 508,000 Mcf. However, Applicant states that due to declining wellhead pressures and contractual exchange agreements with lower delivery pressures, Applicant is currently limited to a line capacity of approximately 456,000 Mcf per day. Applicant states that the loss of capacity in the Permian System lessens its operational flexibility and restricts its ability to move gas during the upcoming heating season.

V 45 / 153 AG 6 80 UMI

Applicant proposes to restore the lost capacity needed to deliver existing and new gas supplies by installing compression at two points on the system. However, Applicant states that it projects a decline subsequent to the 1981–82 heating season which might eliminate the need for the additional compression, so it wishes to lease the compression units with an option to purchase. Applicant states it would install a 3250 horsepower compressor and related facilities on its Lockridge Line in Lea County, New Mexico, and a second 3250 horsepower unit and related facilities on its Indian Basin Line in Eddy County, New Mexico. It is asserted that the proposed facilities would restore the daily design capacity of the Permian System to approximately 508,000 Mcf per day and provide for a maximum capability of 570,000 Mcf per day.

Applicant estimates the cost of installation of the units to be $1,284,000 which would be financed from funds on hand.

Any person desiring to be heard or to make any protest with reference to said application should on or before August 22, 1980, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 80-23719 Filed 8-5-80; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. CP79-357]

Panhandle Eastern Pipe Line Co.; Petition To Amend

July 31, 1980.

Take notice that on July 15, 1980, Panhandle Eastern Pipe Line Company (Petitioner), 3000 Bissonnet, Houston, Texas 77001, filed in Docket No. CP79-357 a petition to amend the order issued February 27, 1980, in the instant docket pursuant to Section 7(c) of the Natural Gas Act so as to authorize an increase in the horsepower to be contained in the proposed Warren Compressor Station, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

By order of February 27, 1980, Petitioner was authorized to construct the Warren Compressor Station, in Carson County, Texas, and to install therein 1,200 horsepower of compression facilities the first year and an additional 600 horsepower the second year, it is said.

Subsequently, Petitioner states that it has reevaluated the operating conditions as well as the initial recoverable reserves estimated in the vicinity of the Warren Station and has determined that such reserves are more extensive than originally thought. Because of this reevaluation, Petitioner requests that the horsepower of one of the certified compression engines be increased from 600 to 730 horsepower, and that it be permitted to install an additional 2,920 horsepower of new compression to the Warren Compressor Station.

Petitioner asserts that the increased compression is necessary in order to provide it with the ability to deliver natural gas supplies from the Carson County, Texas, production area into its mainline system. The total cost of the additional proposed facilities is estimated to be $3,147,000, which cost would be financed from Petitioner's available funds, it is said.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before August 22, 1980, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

would henceforth be conducted under the name of People's Natural Gas Company, Division of InterNorth, Inc. It is stated that Northern Natural Gas Company then filed an amendment to its corporate charter with the Secretary of the State of Delaware, the state of incorporation, effectuating the name change. Petitioner contends that under its new name the company would continue without interruption or cessation the identical operation and corporate activities formerly carried out by Northern Natural Gas Company, operating as People's Natural Gas Division.

[1] Abandonments.

[2] Construction and abandonments.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before August 22, 1980, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

[Docket No. ER80-543]

Public Service Co. of Colorado; Filing

July 31, 1980.

The filing Company submits the following:

Take notice that Public Service Company of Colorado (PSCo) on July 23, 1980, tendered for filing an Energy Sales and Banking Agreement (Agreement) with Tri-State Generation and Transmission Association, Inc. (Tri-State).

PSCo states that the Agreement provides, *inter alia*, for exchanges of capacity and energy between the electric systems of PSCo and Tri-State either directly or through the systems of other parties. The Agreement provides for establishing terms and conditions of such exchanges, such as maintenance, standards for spinning reserve, standards for maintenance and settlement of accounts, and procedures for designating authorized representatives and their responsibilities.

PSCo states that copies of the filing were served upon all parties and affected stated commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 20, 1980. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6450-85-M

[Docket No. ER80-545]

Public Service Co. of Colorado; Filing

July 31, 1980.

The filing Company submits the following:

Take notice that Public Service Company of Colorado (PSCo) on July 23, 1980, tendered for filing as a rate schedule a contract for interconnections and transmission service between Tri-State Generation and Transmission Association, Inc., and PSCo.

The Agreement provides for the accepting and transmitting of power and energy by each party for delivery on the system of the other party. In addition, PSCo will provide emergency transmission back-up service for Tri-State during tempofary outages of the Craig-Ault 345 KV transmission line. Under the conditions of the Agreement, either PSCo or Tri-State may provide non-firm transmission service for the other party to the extent that it has transmission capacity available for such purposes as a cost established in the Agreement.

PSCo states that copies of the filing were served upon all parties and affected state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such protests or petitions should be filed on or before August 20, 1980. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6450-85-M

[Docket No. ER80-544]

Public Service Co. of Colorado; Filing

July 31, 1980.

The filing Company submits the following:

Take notice that Public Service Company of Colorado (PSCo) on July 23, 1980, tendered for filing proposed changes in its FERC Electric Tariff. PSCo states that the proposed changes are Supplement No. 10, a Letter Agreement signed October 19, 1978, Supplement No. 11, Revision No. 17 of Exhibit A, and Revision No. 4 of Exhibit D to PSCo's Contract for Interconnections and Transmission Service with Western Area Power Administration, formerly the United States Department of the Interior, on file with the Commission under PSCo's FERC Rate Schedule No. 7.

Supplement No. 10, dated August 21, 1978, privides, *inter alia*, for extending the provisions covering the Henderson Temporary Point of Delivery. The Supplement also specifies the PSCo's Happy Jack Tap and Fort Morgan North Circuit Tap as additional points of delivery.

The Letter Agreement signed October 19, 1978, provides for the transmission of power and energy by WAPA for Company to the City of Julesburg, Colorado.

Supplement No. 11, dated December 29, 1978, provides, *inter alia*, for the transmission of electric power and energy by WAPA for PSCo to the City of Julesburg, Colorado. Supplement No. 11 also amends PSCo's compensatory arrangements with the United States for the transmission service provided by WAPA.

Revision No. 17 of Exhibit A, dated January 1, 1980, established a maximum kilowatt demand for the 1983 calendar year and deletes Colorado-Ute Electric Association from the Exhibit.

Revision No. 4 of Exhibit D, dated May 28, 1980, removes Loveland East Tap from WAPA wheeling service,

V 45 / 153 AUG 6 80 UMI

increases the amount of "Exchange Wheeling" from 124.5 MW to the amounts shown, changes to "Seasonal" Maximum Rates of Delivery and includes format changes.

PSCo states that copies of the filing were served upon all parties and affected stated commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426 in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 20, 1980. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6450-85-M

[[Docket No. ER80-313]

Public Service Co. of New Mexico; Order Granting Rehearing for Further Consideration

Issued July 30, 1980.

On June 30, 1980, the City of Gallup, New Mexico filed a petition for rehearing of the Commission's order issued May 30, 1980, in this proceeding. In that order, we *inter alia*, accepted for filing and suspended proposed increased rates and established procedures for determining the justness and reasonableness of those rates. The City of Gallup seeks review of Commission's determination of the applicable burden of proof for permitting the rates to be changed under the existing contract between it and Public Service Company of New Mexico.

In order to afford time for further evaluation of the issue raised by the City of Gallup, we shall grant rehearing for the limited purpose of further consideration. Under Section 1.34(d) of the Commission's regulations, no answers to the application for rehearing will be entertained since this order does not grant rehearing on any substantive issues.

The Commission orders: (A) Rehearing of our order of May 30, 1980, is hereby granted for the limited purpose of further consideration.

(B) The Secretary shall promptly publish this order in the **Federal Register.**

By the Commission.

Kenneth F. Plumb,

Secretary.

[Dockets Nos. RP73-114 (PGA79-2), RP74-24 (DCA79-2), RP74-73 (R&D79-2), and RP79-52]

Tennessee Gas Pipeline Co., a Division of Tenneco, Inc.; Motion of Tennessee Gas Pipeline Co. To Terminate Refund Obligation

July 30, 1980.

Take notice that on April 16, 1980, Tennessee Gas Pipeline Company (Tennessee) filed, pursuant to 18 CFR 1.12, a motion to terminate certain refund obligations imposed by Commission orders issued June 29, 1979, and August 24, 1979, in the above-listed proceeding.

Tennessee states that by Commission order issued on June 29, 1979, the Commission accepted certain tariff sheets, suspended their effectiveness and allowed them to become effective, on July 1, 1979, but subject to refund obligations. Specifically, the June 29, 1979, Commission order provides that the costs associated with purchases from producer-affiliates of the company are collected, subject to refund, pending the ultimate determination of the appropriate maximum lawful price to be charged such affiliated purchases under the regulations implementing the Natural Gas Policy Act of 1978 (NGPA), 15 U.S.C. 3301 *et seq.*

In addition, Tennessee notes that on August 24, 1979, the Commission in its subsequent rehearing order expressly limited the refund obligation with respect to Tennessee's May 21, 1979 filing to that portion of the attributable to pipeline-affiliate production.

Finally, Tennessee states that the Commission has promulgated final regulations governing the maximum lawful prices for pipeline-affiliated production [1] and that such regulations establish the justness and reasonableness of the purchases by the pipeline from its affiliates. Accordingly, Tennessee asserts that the refund obligations imposed on its May 31, 1979 filing respecting pipeline affiliate purchases should be removed and that the tariff sheets filed by Tennessee on May 31, 1979, be made fully effective.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.W., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 15, 1980. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6450-85-M

[Docket No. CP80-448]

Trunkline Gas Co.; Application

July 31, 1980.

Take notice that on July 11, 1980, Trunkline Gas Company (Applicant), P.O. Box 1642, Houston, Texas 77001, filed in Docket No. CP80-448 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain pipeline and related facilities in its natural gas supply area situated in Terrebonne Parish and offshore Louisiana, all as more fully represented in the application which is on file with the Commission and open to public inspection.

Applicant states that recent increases in the deliverability of some of Applicant's existing supply sources in South Timbalier Blocks 165 and 171 as well as new supplies attached in South Timbalier Blocks 190 and 156 have, in part, necessitated an increase in the capacity of Applicant's Terrebonne System in the eastern part of offshore Louisiana. Applicant also states that it has acquired new supplies of natural gas in Eugene Island Block 392 and is negotiating to purchase new supplies of natural gas from South Timbalier Block 53. Applicant further asserts that a significant potential supply of natural gas has become available in South Timbalier Block 170 and that it is currently negotiating the purchase of this gas from Exxon Company, U.S.A.

It is stated that Applicant's Terrebonne System is being utilized to transport approximately 200,000 Mcf of natural gas per day for several other parties, in addition to Applicant's own purchases of natural gas. Applicant has agreed to increase the volumes of gas being transported on behalf of Consolidated Gas Supply Corporation and Transcontinental Gas Pipe Line Corporation from South Timbalier Block 185, it is stated. Applicant states that it is making arrangements with Northern Natural Gas Company, Division of InterNorth, Inc. (Northern), to transport approximately 40,000 Mcf per day for Northern from Grand Isle Block 83 and West Delta Block 138.

To accommodate the additional volumes which have become available to Applicant from its offshore supply area, as well as the volumes of natural gas which other pipeline companies may have available for transportation onshore, Applicant proposes the construction of new pipeline facilities and additional looping of its Terrebonne System facilities. Specifically, Applicant proposes to construct 54.3 miles of 30-inch loop pipeline from Terrebonne Parish, Louisiana, to Ship Shoal Block 139, 18.4 miles of 20-inch pipeline from Ship Shoal Block 139 to South Timbalier Block 165, 6.9 miles of 16-inch new gathering pipeline from South Timbalier Block 170 and additions to its gas scrubber system at Applicant's compressor station near Patterson, Louisiana. Applicant asserts that the proposed facilities would increase the daily capacity of the Terrebonne System by 250,000 Mcf. Applicant estimates that the pipeline and related facilities would cost approximately $64,197,000 which would be financed from funds on hand and short-term bank borrowing.

Any person desiring to be heard or to make any protest with reference to said application should on or before August 22, 1980, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 80-23725 Filed 8-5-80; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. CP80-451]

United Gas Pipe Line Co.; Application

July 31, 1980.

Take notice that on July 16, 1980, United Gas Pipe Line Company (Applicant), P.O. Box 1478, Houston, Texas 77001, filed in Docket No. CP80-451 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the continued transportation of natural gas for Natural Gas Pipeline Company of America (Natural), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to continue the transportation of up to 5,000 Mcf of natural gas per day for Natural, as required by the gas transportation agreement of March 25, 1980, between Natural and Applicant. It is stated that this transportation service was commenced on June 11, 1980, under Applicant's blanket authorization in Docket No. CP80-137 issued pursuant to Section 284.221 of the Commission's Regulations.

Accordingy to Applicant, Natural has aquired a right to purchase natural gas produced from Eugene Island Block 72, offshore Louisiana. It is stated that gas delivered by, or for the account of, Natural to Applicant would be received at the producer's platform in Eugene Island Block 95, offshore Louisiana. Applicant would redeliver gas to Natural at:

(1) An existing interconnection located near Goodrich, Polk County, Texas;

(2) A newly certificated point on interconnection located in or near the James A. Williams Survey, A-717, Panola County, Texas; and/or

(3) An existing interconnection of the U-T Offshore System and Natural near Johnson's Bayou, Cameron Parish, Louisiana.

Applicant states that the transportation agreement between Applicant and Natural would remain in full force and effect for a primary term of 10 years beginning June 11, 1980, and

V45/153 AG 6 80 UMI

continuing from year to year thereafter until cancelled by either party upon proper notice. Applicant indicates that Natural would pay the rate in effect in the Northern and/or Southern Rate Zone, as applicable, less any amount attributable to gas consumed in the operation of Applicant's system. The transportation rate is currently 23.29 cents in the Northern Zone and 19.40 cents in the Southern Zone, it is stated.

Any person desiring to be heard or to make any protest with reference to said application should on or before August 22, 1980, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

[Docket No. ER80-537]

Virginia Electric & Power Co.; Notice of Filing

July 30, 1980.

The filing Company submits the following:

Take notice that on July 21, 1980, Virginia Electric and Power Company (VEPCO) tendered for filing a Contract Supplement dated June 6, 1980 to the Rate Contract between VEPCO and the Central Virginia Electric Cooperative.

Said Supplement requests the Commission's authorization for connection of a new delivery point designated as Trevilians Delivery Point, located in Louisa County, Virginia.

VEPCO requests an effective date for the new delivery point of June 11, 1980, the date of connection of the new facilities.

Any person desiring to be heard or to make any protests with reference to said application should on or before August 18, 1980, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules. The application is on file with the Commission and is available for public inspection.

[Volume 246]

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

Issued July 30, 1980.

The Federal Energy Regulatory Commission received notices of determination from the jurisdictional agencies listed herein, for the indicated wells, pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a (D) in the DEN column. Estimated annual production is in million cubic feet (MMcf).

The applications for determination in these proceedings together with a copy or description of other materials in the record on which such determinations were made are available for inspection, except to the extent such material is treated as confidential under 18 CFR 275.206, at the Commission's Office of Public Information, Room 1000, 825 North Capitol Street, N.E., Washington, D.C. 20426.

Persons objecting to any of these final determinations may, in accordance with 18 CFR 275.203 and 18 CFR 275.204, file a protest with the Commission within fifteen (15) days of the date of publication of this notice in the **Federal Register.**

Please reference the FERC Control Number in all correspondence related to these determinations.

Kenneth F. Plumb,

Secretary.

[Volume 247]

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

Issued July 31, 1980.

The Federal Energy Regulatory Commission received notices of determinations from the jurisdictional agencies listed herein, for the indicated wells, pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a (D) in the DEN column. Estimated annual production is in million cubic feet (MMcf).

The applications for determination in these proceedings together with a copy or description of other materials in the record on which such determinations were made are available for inspection, except to the extent such material is treated as confidential under 18 CFR 275.206, at the Commission's Office of Public Information, Room 1000, 825 North Capitol Street NE., Washington, D.C. 20426.

Persons objecting to any of these final determinations may, in accordance with 18 CFR 275.203 and 18 CFR 275.204, file a protest with the Commission on or before August 21, 1980.

Please reference the FERC Control Number in all correspondence related to these determinations.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6450-85-C

[Vol. 248]

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

Issued July 31, 1980.

The Federal Energy Regulatory Commission received notices of determination from the jurisdictional agencies listed herein, for the indicated wells, pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a (D) in the DEN column. Estimated annual production is in million cubic feet (MMcf).

The applications for determination in these proceedings together with a copy or description of other materials in the record on which such determinations were made are available for inspection, except to the extent such material is treated as confidential under 18 CFR 275.206, at the Commission's Office of Public Information, Room 1000, 825 North Capitol Street, N.E., Washington, D.C. 20426.

Persons objecting to any of these final determinations may, in accordance with 18 CFR 275.203 and 18 CFR 275.204, file a protest with the Commission on or before August 21, 1980.

Please reference the FERC Control Number in all correspondence related to these determinations.

Kenneth F. Plumb,
Secretary.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 1564-3]

Science Advisory Board; Meeting

The meeting is to be held in less than the 15 days required because the nature of the sampling to be performed must commence at once if it is to be completed before the onset of winter. Under Pub. L. 92-463, notice is hereby given for a meeting of the Study Group on Sampling Protocal of the Science Advisory Board of the U.S. Environmental Protection Agency to be held on August 8, 1980, starting at 8:30 a.m. and ending 5:00 p.m. The meeting location is: National Environmental Research Laboratory, Conference Room P 303, Research Triangle Park, North Carolina 27711.

This facility is located adjacent to the intersection of Highway 54 and Alexander Drive in Research Triangle Park, North Carolina. Visitors will be directed to the meeting room by the guard.

The purpose of the meeting is to provide review and comment on the sampling protocals that have been proposed for the Love Canal area, as requested by the Office of Research and Development.

The meeting is open to the public but the seating capacity is limited. Members of the public desiring to attend should preregister with Ms. Janice Phillips at 919-541-2106 no later than close of business August 7, 1980. Persons desiring additional information may contact Dr. Douglas Seba, Science Advisory Board, Environmental Protection Agency, Phone No. 202-472-9444.

Richard Dowd,

Staff Director, Science Advisory Board.

[FRL 1562-3; PP OG2275/T254]

American Cyanamid Co.; Pendimethalin; Establishment of a Temporary Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: A temporary tolerance has been established for the combined residues of the herbicide pendimethalin [N-(1-ethylpropyl)-3,4-dimethyl-2,6-dinitrobenzenamine] and its metabolite 4-[(1-ethylpropyl)amino]-2-ethyl-3,5-dinitrobenzyl alcohol in or on wheat grain and wheat straw at 0.1 part per million (ppm).

FOR FURTHER INFORMATION CONTACT: Robert J. Taylor, Product Manager (PM) 25, Registration Division, (TS-767), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street, SW, Washington, D.C. 20460, 202/755-2916.

SUPPLEMENTARY INFORMATION: American Cyanamid Company, Agricultural Division, P.O. Box 400, Princeton, NJ 08540 submitted a pesticide petition (PP OG2275) to the EPA. The petition requested that a temporary tolerance be established for the combined residues of the herbicide pendimethalin [N-(1-ethylpropyl)-3,4-dimethyl-2,6-dinitrobenzenamine] and its metabolite 4-[(1-ethylpropyl)amino]-2-ethyl-3,5-dinitrobenzyl alcohol in or on wheat grain and wheat straw at 0.1 ppm.

These tolerances will permit the marketing of the above raw agricultural commodities when treated in accordance with an experimental use permit being issued under the Federal Federal Insecticide, Fungicide, and Rodenticide Act (Pub. L. 80-104, 61 Stat. 163, as amended by Pub. L. 92-516, 86 Stat. 975; Pub. L. 94-140, 89 Stat. 754, Pub. L. 95-396, 92 Stat. 819; 7 U.S.C. 136).

The scientific data reported and other relevant material have been evaluated, and it has been determined that the tolerances will protect the public health.

The temporary tolerance has been established on the condition that the experimental use permit be used with the following provisions:

1. The total amount of the active herbicide to be used will not exceed the amount authorized in the experimental use permit.

2. American Cyanamid will immediately notify the Environmental Protection Agency of any findings from the experimental use that have a bearing on safety. The firm will also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

This temporary tolerance expires on September 1, 1981. Residues not in excess of the tolerance remaining in or on the raw agricultural commodities after the expiration date will not be considered actionable if the pesticide is legally applied during the term of, and in accordance with the provisions of the experimental use permit and temporary tolerance. This tolerance may be revoked if the experimental use permit is revoked of if any scientific data or experience with this pesticide indicate such revocation is necessary to protect the public health.

(Sec. 408(j), 68 Stat. 561, (21 U.S.C. 346a(j)))

Dated: July 28, 1980.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

Polyisobutenyl Succinic Anhydride Reaction Products With Substituted Ethanol; Premanufacture Notice

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA to least 90 days before manufacture or import commences. Section 5(d)(2) requires EPA to publish in the **Federal Register** certain information about each PMN within 5 working days after receipt. This Notice

V45/153 AG 6 80 UMI

announces receipt of a PMN and provides a summary.

DATE: Written comments by September 14, 1980.

ADDRESS: Written comments to: Document Control Officer (TS–793), Office of Pesticides and Toxic Substances, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460, 202–755–8050.

FOR FURTHER INFORMATION CONTACT: Ann Radosevich, Premanufacturing Review Division (TS–794), Office of Pesticides and Toxic Substances, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460, 202/426–2601.

SUPPLEMENTARY INFORMATION: Section 5(a)(1) of TSCA [90 Stat. 2012 (15 U.S.C. 2604)], requires any person who intends to manufacture or import a new chemical substance to submit a PMN to EPA at least 90 days before manufacture or import commences. A "new" chemical substance is any substance that is not on the Inventory of existing substances compiled by EPA under Section 8(b) of TSCA. EPA first published the Initial Inventory on June 1, 1979. Notice of availability of the Initial Inventory was published in the **Federal Register** of May 15, 1979 (44 FR 28558). The requirement to submit a PMN for a new chemical substances manufactured or imported for commercial purposes became effective on July 1, 1979.

EPA has proposed premanufacture notification rules and forms in the **Federal Register** issues of January 10, 1979 (44 FR 2242) and October 16, 1979 (44 FR 59764). These regulations, however, are not yet in effect. Interested persons should consult the Agency's Interim Policy published in the **Federal Register** of May 15, 1979 (44 FR 28564) for guidance concerning premanufacture notification requirements prior to the effective date of these rules and forms. In particular, see page 28567 of the Interim Policy.

A PMN must include the information listed in Section 5(d)(1) of TSCA. Under section 5(d)(2) EPA must publish in the **Federal Register** nonconfidential information on the identity and use(s) of the substance, as well as a description of any test data submitted under section 5(b). In addition, EPA has decided to publish a description of any test data submitted with the PMN and EPA will publish the identity of the submitter unless this information is claimed confidential.

Publication of the section 5(d)(2) notice is subject to section 14 concerning disclosure of confidential information. A company can claim confidentiality for any information submitted as part of a PMN. If the company claims confidentiality for the specific chemical identity or use(s) of the chemical, EPA encourages the submitter to provide a generic use description, a nonconfidential decription of the potential exposures from use, and a generic name of the chemical. EPA will publish the generic name, the generic use(s), and the potential exposure descriptions in the **Federal Register.**

If no generic use description or generic name is provided, EPA will developed one and after providing due notice to the submitter, will publish an amended **Federal Register** notice. EPA immediately will review confidentiality claims for chemical identity, chemical use(s), the identity of the submitter, and for health and safety studies. IF EPA determines that portions of this information are not entitled to confidential treatment, the Agency will publish an amended notice and will place the information in the public file, after notifying the submitter and complying with other applicable procedures.

After receipt, EPA has 90 days to review a PMN under section 5(a)(1). The section 5(a)(2) **Federal Register** notice indicates the date when the review period ends for each PMN. Under section 5(c), EPA may, for good cause, extend the review period for up to an additional 90 days. If EPA determines that an extension is necessary, it will publish a notice in the **Federal Register.**

Once the review period ends, the submitter may manufacture the substance unless EPA has imposed restrictions. When the submitter begins to manufacture the substance, he must report to EPA, and the Agency will add the substance to the Inventory. After the substance is added to the Inventory, any company may manufacture it without providing EPA notice under section 5(a)(1)(A).

Therefore, under the Toxic Substances Control Act, a summary of the data taken from the PMN is published herein.

Interested persons may, on or before September 14, 1980, submit to the Document Control Officer (TS–793), Rm. E–447, Office of Pesticides and Toxic Substances, 401 M St., SW, Washington, DC 20460, written comments regarding this notice. Three copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the document control number "[OPTS–51105]" and the PMN number. Comments received may be seen in the above office between 8:00 a.m. and 4:00 p.m., Monday through Friday, excluding holidays.

(Sec. 5, 90 Stat. 2012 (15 U.S.C. 2604))

Dated: July 29, 1980

Warren R. Muir,

Acting Deputy Assistance Administrator for Chemical Control.

PMN 80–172.

Close of Review Period. October 14, 1980.

Manufacturer's Identity. Claimed confidential.

Specific Chemical Identity. Claimed confidential. Generic name provided: Polyisobutenyl succinic anhydride reaction products with substituted ethanol.

The following summary is taken from data submitted by the manufacturer in the PMN.

Use. Claimed confidential.

Production Estimates. Claimed confidential.

Physical/Chemical Properties. Claimed confidential.

Toxicity Data. The manufacturer did not submit toxicity data with the PMN, but stated that results of various toxicity tests will be provided the Agency at a later date.

Exposure. Claimed confidential.

Environmental Release/Disposal. Claimed confidential.

[FR Doc. 80–23647 Filed 8–5–80; 8:45 am]

BILLING CODE 6560–01–M

[OPTS–59031; FRL 1561–7]

Certain Chemical Premanufacture Exemption; Application

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1)(A) of the Toxic Substances Control Act (TSCA) requires any person intending to manufacture or import a new chemical substance for a commercial purpose in the United States to submit a premanufacture notice (PMN) to EPA at least 90 days before he commences such manufacture or import. Under Section 5(h) the Agency may, upon application, exempt any person from any requirement of section 5 to permit such person to manufacture or process a chemical for test marketing purposes. Section 5(h)(6) requires EPA to issue a notice of receipt of any such application for publication in the **Federal Register.** This notice announces receipt of an application for an exemption from the premanufacture reporting requirements for test marketing purposes and requests comments on the appropriateness of granting the exemption.

DATE: The Agency must either approve or deny this application by September 5, 1980. Persons should submit written comments on the applications no later than August 21, 1980.

ADDRESS: Written comments to: Document Control Officer (TS–793), Office of Pesticides and Toxic Substances, Environmental Protection Agency, 401 M St. SW., Washington, DC 20460, 202–755–8050.

FOR FURTHER INFORMATION CONTACT: Robert Smith, Premanufacturing Review Division (TS–794), Office of Pesticides and Toxic Substances, Environmental Protection Agency, Washington, DC 20460, 202–426–8816.

SUPPLEMENTARY INFORMATION: Under Section 5 of TSCA [90 Stat. 2012 (15 U.S.C. 2604)], any person who intends to manufacture or import a new chemical substance for commercial purposes in the United States must submit a notice to EPA before the manufacture or import begins. A "new" chemical substance is any chemical substance that is not on the Inventory of existing chemical substances compiled by EPA under Section 8(b) of TSCA. EPA first published the Initial Inventory on June 1, 1979. Notice of availability of the Initial Inventory was published in the **Federal Register** on May 15, 1979 (44 FR 28558). The requirement to submit a PMN for new chemical substances manufactured or imported for commercial purposes became effective on July 1, 1979.

Section 5(a)(1) requires each PMN to be submitted in accordance with section 5(d) and any applicable requirement of chemical substances that are subject to testing rules under section 4. Section 5(b)(2) requires additional information in PMN's for substances which EPA, by rules under section 5(b)(4), has determined may present unreasonable risks of injury to health or the environment.

Section 5(h), "Exemptions," contains several provisions for exemptions from some or all of the requirements of section 5. In particular, section 5(h)(1) authorized EPA, upon application, to exempt persons from any requirement of section 5(a) or section 5(b) to permit the persons to manufacture or process a chemical substance for test marketing purposes. To grant such an exemption, the Agency must find that the test marketing activities will not present any unreasonable risk of injury to health or the environment. EPA must either approve or deny the application within 45 days of its receipt, and the Agency must publish a notice of its disposition in the **Federal Register.** If EPA grants a test marketing exemption, it may impose restrictions on the test marketing activities.

Under section 5(h)(6), EPA must publish in the **Federal Register** a notice of receipt of an application under section 5(h)(1) immediately after the agency receives the application. The notice identifies and briefly describes the application (subject to section 14 confidentiality restrictions) and gives interested persons an opportunity to comment on it and whether EPA should grant the exemption. Because the Agency must act on the application within 45 days, interested persons should provide comments within 15 days after the notice appears in the **Federal Register.**

EPA has proposed Premanufacture Notification Requirements and Review Procedures published in the **Federal Register** of January 10, 1979 (44 FR 2242) and October 16, 1979 (44 FR 59764) containing proposed premanufacture rules and notice forms. Proposed 40 CFR 720.15 (44 FR 2268) would implement section 5(h)(1) concerning exemptions for test marketing and includes proposed 40 CFR 720.15(c) concerning the section 5(h)(6) **Federal Register** notice. However, these requirements are not yet in effect. In the meantime, EPA has published a statement of Interim Policy published in the **Federal Register** of May 15, 1979 (44 FR 28564) which applies to PMN's submitted prior to promulgation of the rules and notice forms.

Interested persons may, on or before August 21, 1980, submit to the Document Control Officer (TS–793), Rm. E–447, Office of Pesticides and Toxic Substances, 401 M St., SW, Washington, DC 20460, written comments regarding this notice. Three copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the document control number "[OPTS–59031]". Comments received may be seen in the above office between 8:00 a.m. and 4:00 p.m., Monday through Friday excluding holidays.

(Sec. 5, 90 Stat. 2012 (15 U.S.C. 2604))

Dated: July 28, 1980.

Polyester Reaction Product With Toluene Diisocyanate Acrylate Terminated; Premanufacture Notice

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Section 5(d)(2) requires EPA to publish in the **Federal Register** certain information about each PMN within 5 working days after receipt. This Notice announces receipt of APMN and provides a summary.

DATE: Written comments by September 15, 1980.

ADDRESS: Written comments to: Document Control Officer (TS–793), Office of Pesticides and Toxic Substances, Environmental Protection Agency, 401 M St., SW, Washington, DC 20460, 202–755–8050.

FOR FURTHER INFORMATION CONTACT: Robert Smith, Premanufacturing Review Division (TS–794), Office of Pesticides and Toxic Substances, Environmental Protection Agency, 401 M St., SW, Washington, DC 20460, 202/426–8815.

SUPPLEMENTARY INFORMATION: Section 5(a)(1) of TSCA [90 Stat. 2012 (15 U.S.C. 2604)], requires any person who intends to manufacture or import a new chemical substance to submit a PMN to EPA at least 90 days before manufacture or import commences. A "new" chemical substance is any substance that is not on the Inventory of existing substances compiled by EPA under Section 8(b) of TSCA. EPA first published the Initial Inventory on June 1, 1979. Notice of availability of the Initial Inventory was published in the **Federal Register** of May 15, 1979 (44 FR 28558). The requirement to submit a PMN for new chemical substances manufactured or imported for commercial purposes became effective on July 1, 1979.

EPA has proposed premanufacture notification rules and forms in the **Federal Register** issues of January 10,

V 45 / 153 AG 6 80 UMI

1979 (44 FR 2242) and October 16, 1979 (44 FR 59764). These regulations, however, are not yet in effect. Interested persons should consult the Agency's Interim Policy published in the **Federal Register** of May 15, 1979 (44 FR 28564) for guidance concerning premanufacture notification requirements prior to the effective date of these rules and forms. In particular, see page 28567 of the Interim Policy.

A PMN must include the information listed in Section 5(d)(1) of TSCA. Under Section 5(d)(2) EPA must publish in the **Federal Register** nonconfidential information on the identity and use(s) of the substance, as well as a description of any test data submitted under section 5(b). In addition, EPA has decided to publish a description of any test data submitted with the PMN and EPA will publish the identity of the submitter unless his information is claimed confidential.

Publication of the section 5(d)(2) notice is subject to section 14 concerning disclosure of confidential information. A company can claim confidentiality for any information submitted as part of a PMN. If the company claims confidentiality for the specific chemical identity or use(s) of the chemical, EPA encourages the submitter to provide a generic use description, a nonconfidential description of the potential exposures from use, and a generic name for the chemical. EPA will publish the generic name, the generic use(s), and the potential exposure descriptions in the **Federal Register.**

If no generic use description or generic name is provided, EPA will develop one and after providing due notice to the submitter, will publish an amended **Federal Register** notice. EPA immediately will review confidentiality claims for chemical identity, chemical use(s), the identity of the submitter, and for health and safety studies. If EPA determines that portions of this information are not entitled to confidential treatment, the Agency will publish an amended notice and will place the information in the public file, after notifying the submitter and complying with other applicable procedures.

After receipt, EPA has 90 days to review a PMN under section 5(a)(1). The section 5(d)(2) **Federal Register** notice indicates the date when the review period ends for each PMN. Under section 5(c), EPA may, for good cause, extend the review period for up to an additional 90 days. If EPA determines that an extension is necessary, it will publish a notice in the **Federal Register.**

Once the review period ends, the submitter may manufacture the substance unless EPA has imposed restrictions. When the submitter begins to manufacture the substance, he must report to EPA, and the Agency will add the substance to the Inventory. After the substance is added to the Inventory, any company may manufacture it without providing EPA notice under section 5(a)(1)(A).

Therefore, under the Toxic Substances Control Act, a summary of the data taken from the PMN is published herein.

Interested persons may, on or before September 15, 1980, submit to the Document Control Officer (TS–793), Rm. E–447, Office of Pesticides and Toxic Substances, 401 M St., SW, Washington, DC 20460, written comments regarding this notice. Three copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the document control number "[OPTS–51103]" and the PMN number. Comments received may be seen in the above office between 8:00 a.m. and 4:00 p.m., Monday through Friday, excluding holidays.

(Sec. 5, 90 Stat. 2012 (15 U.S.C. 2604))

Dated: July 29, 1980.

Warren R. Muir,

Acting Deputy Assistant Administrator for Chemical Control.

PMN 80–174.

Close of Review Period. October 15, 1980.

Manufacturer's Identity. Claimed confidential. Generic information provided:

Annual sales—$500 million.

Manufacturing site—South Atlantic region, U.S.

Standard Industrial Classification Code—2821.

Specific Chemical Identity. Claimed confidential. Generic name provided: Polyester reaction product with toluene diisocyanate acrylate terminated.

The following summary is taken from data submitted by the manufacturer in the PMN.

Use. Electronics photoresists coating.

Production Estimates. Claimed confidential.

Physical/Chemical Properties. Claimed confidential.

Toxicity Data.

Acute dermal toxicity (rabbits)—Non-toxic at 2 g/kg.

Acute oral toxicity (rats)—Toxic at 5 g/kg.

Primary skin irritation (rabbits)—Draize 3.63 (Moderately irritating).

Primary eye irritation (rabbits)—Extremely irritating.

Occupational Exposure.

Activity	Exposure Route	Max. No. Exposed	Max Duration Hr/Da	Max Duration Da/Yr	Concentration Average	Concentration Peak (PPM)
Manufacture.	Dermal	3	1	150		0–1
Commercial use.	Dermal	5				

The manufacturer states that the manufacturing process is through a closed system and that the only exposure personnel would be subject to is during discharge. Minimum exposure would be expected as discharge goes directly form reactor to drums.

For commerical use, submitter will recommend that material be used in well ventilated areas and that personnel wear goggles and gloves.

Environmental Release/Disposal. The manufacturer claims that there will be no release to the environment of the PMN substance.

[FR Doc. 80–23645 Filed 8–5–80; 8:45 am]

BILLING CODE 6560–01–M

FEDERAL COMMUNICATIONS COMMISSION

[BL Docket No. 80–381, et al]

Casey Broadcasting Co., Inc., et al.; Designating Applications for Consolidated Hearing on Stated Issues

Hearing Designation Order

Adopted: June 26, 1980.

Released: July 30, 1980.

In re Applications of Casey Broadcasting Company, Inc. St. Marys, Georgia, Req: 93.5 MHz, Channel 228 3 kW (H&V) 288 feet, BC Docket No. 80–381 File No. BPH–781215AH; Camden Broadcasting Corporation, St. Marys, Georgia, Req: 93.5 MHz, Channel 228 3 kW (H&V) 297.3 feet, BC Docket No. 80–382, File No. BPH–790228AF; Radio Charlton, Inc. St. Marys/Kingsland, Georgia, Req: 93.5 MHz, Channel 228 3 kW (H&V) 300 feet, BC Docket No. 80–383, File No. BPH–790328AD; Lloyd Brinks St. Marys, Georgia, Req: 93.5 MHz, Channel 228 3 kW (H&V) 298 feet, BC Docket No. 80–384, File No. BPH–790328AM.

1. The Commission, by the Chief, Broadcast Bureau, acting pursuant to delegated authority, has under consideration the above captioned mutually exclusive applications filed by Casey Broadcasting Company, Inc. (Casey), Camden Broadcasting Corporation (Camden), Radio Charlton, Inc. (Charlton), and Lloyd Brinks (Brinks).

2. *Camden.* Applicants for new broadcast stations are required by Section 73.3580(f) of the Commission's Rules to give local notice of the filing of their applications. They must then file with the Commission the statement described in Section 73.3580(h) of the Rules. We have no evidence that Camden published the required notice. To remedy this deficiency, Camden will be required to publish local notice of its application, if it has not already done so, and to file a statement of publication with the presiding Administrative Law Judge.

3. Camden has failed to comply with the requirements of the *Primer on Ascertainment of Community Problems by Broadcast Applicants,* 27 FCC 2d 650, 21 RR 2d 1507 (1971). From the information before us, it appears that the applicant has filed to survey leaders of significant population groups, specifically blacks and the elderly, as required by Questions and Answers 4 and 20. In addition, Camden failed to specify the dates of the community and general public surveys in accordance with Questions and Answers 2 and 15. As a result, a limited ascertainment issue will be specified.

4. *Brinks.* Applicants for new broadcast stations are required by Section 73.3580(f) of the Commission's Rules to give local notice of the filing of their applications. They must then file with the Commission the statement described in Section 73.3580(h) of the Rules. We have no evidence that Brinks published the required notice. To remedy this deficiency, Brinks will be required to publish local notice of his application, if he has not already done so, and to file a statement of publication with the presiding Administrative Law Judge.

5. Analysis of the financial portion of Brinks' application reveals that Brinks will require $44,446 to construct his proposed facility and operate for three months, without revenue, itemized as follows:

Equipment down payment	$14,500
Equipment payments with interest	4,446
Bank loan payments	1,000
Miscellaneous	14,500
Three months' operating expenses	10,000
Total	$44,446

To meet this requirement, Brinks intends to rely on a loan from the First National Bank of Dothan in the amount of $25,000, existing capital in the amount of $20,000 and deferred credit from an equipment supplier. The commitment letter in support of the loan did not specify the interest rate or terms of repayment in accordance with Paragraph 4(e), Section III of Form 301. An examination of Brinks' balance sheet reveals that his current liabilities exceed his current assets. Brink states in Section III that he has $13,000 on hand in the Fulton National Bank, but this is nowhere reflected in this balance sheet. As a result, we cannot find that he has any amount in existing capital to support his commitment. In addition, Brinks failed to submit a commitment letter from an equipment supplier showing that deferred credit is available. Accordingly, a general financial issue will be specified.

6. Brinks' ascertainment survey is not in substantial compliance with the *Primer.* The applicant has failed to consult leaders of the elderly in accordance with Questions 4 and 20. Furthermore, Brinks also failed to state (i) the dates of the community leader and general public surveys, and (ii) whether the general public survey was conducted in a manner which assured that a random sample of the population was contacted. Accordingly, a limited ascertainment issue will be specified.

7. *Casey.* The applicant has requested a waiver of Section 73.210 of the Commission's Rules to permit its main studio to be located outside the city of license. We will not rule on the request at this juncture. Rather, an issue will be specified so that the matter may be explored in hearing.

8. Casey has yet to receive FAA clearance for its proposed tower. Therefore, an air hazard issue will be specified.

9. The applicant originally filed as Lois V. Casey, an individual. Subsequently Ms. Casey amended her application to reflect a change to corporate status. The original notice published by Ms. Casey reflected only her status as an individual. Casey did not republish notice of the major amendment. To remedy this deficiency, the applicant will be required to republish local notice, if it has not already done so, and file a statement of publication with the presiding Administrative Law Judge.

10. *Charlton.* The applicant has requested that it be licensed to serve both St. Marys and Kingsland pursuant to Section 72.210(b) of the Rules. The Rule requires that the applicant make a "satisfactory showing that an unreasonable burden would be placed on the station if it were licensed to serve only one city, town, political subdivision or community," and the proposed co-communities of license must exhibit" an identity of interests for programming and other purposes sufficient to warrant dual city identification." *Saul M. Miller,* 4 FCC 2d 150, 8 RR 2d 148, *aff'd per curiam, Miller v. FCC,* 9 RR 2d 2031 (D.C. Cir. 1967). St. Marys and Kingsland do exhibit such an identity of interests. Both communities have common problems and needs, and Charlton has proposed programming designed to meet the needs of both communities. Charlton will divide equally 90% of its proposed 300 PSA's per week between St. Marys and Kingsland. Charlton has stated that serving only one community would result in unnecessary hardship and that there is a direct benefit to the applicant to be able to identify as "local" to both communities for purposes of attracting advertising revenue and public support. The Commission has traditionally required only a minimal showing with respect to economic and programming hardship. *Hymen Lake,* 46 FCC 2d 561, 565 (Rev. Bd. 1974). Accordingly, Radio Charlton has made a satisfactory showing under Section 73.210(b) of the Rules and its request for dual city licensing is granted.

11. Charlton will not be able to provide a 3.16 mV/m signal to the entire city of St. Marys as required by Section 73.315(a) of the Commission's Rules. Charlton has asked for a waiver of this provision. Only 2.3% of the population of St. Marys would lie beyond the 3.16 mV/m signal contour. We will not rule on the waiver request at this juncture. Rather, a city coverage issue will be specified so that the matter may be explored in hearing.

12. Except as indicated by the issues specified below, the applicants are qualified to construct and operate as proposed. However, since the proposals are mutually exclusive, they must be designated for hearing in a consolidated proceeding on the issues specified below.

13. Accordingly, it is ordered, That, pursuant to Section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine whether the proposal of Casey to locate its main studio outside its community of license is in compliance with Section 73.315(a) of the Commission's Rules with respect to location of the main studio and, if not, whether circumstances exist which warrant a waiver of that Section.

2. To determine whether there is a reasonable possibility that the tower height and location proposed by Casey would constitute a hazard to air navigation.

V45/153 AG 6 80 UMI

3. To determine with respect to the efforts of Camden to ascertain the needs of its proposed service area:

(a) Whether the applicant interviewed leaders of blacks and the elderly in accordance with Questions 4 and 20;

(b) Whether the applicant specified the dates of the community leader and general public survey in accordance with Questions and Answers 2 and 15.

4. To determine whether the proposal of Charlton would provide coverage of the city sought to be served as required by Section 73.315(a) of the Commission's Rules, and, if not, whether circumstances exist which warrant a waiver of that Section.

5. To determine whether Brinks is financially qualified to construct and operate the proposed station.

6. To determine with respect to the efforts of Brinks to ascertain the needs of its proposed service area:

(a) Whether the applicant interviewed leaders of the elderly in accordance with Questions and Answers 4 and 20;

(b) Whether the applicant specified the dates of the community leader and general public survey in accordance with Questions and Answers 2 and 15;

(c) Whether the interviews with members of the general public were conducted in such a manner to assure that a random sample of the population was contacted.

7. To determine the areas and populations which would receive primary aural service (1 mV/m or greater in the case of FM) from the respective proposals and the availability of other primary service to such areas and populations.

8. To determine, in the light of Section 307(b) of the Communications Act of 1934, as amended, which of the proposals would best provide a fair, efficient and equitable distribution of radio service.

9. To determine, in the event it is concluded that a choice between the applications should not be based solely on considerations relating to Section 307(b), which of the proposals would, on a comparative basis, best serve the public interest.

10. To determine, in the light of the evidence adduced pursuant to the foregoing issues, which, if any, of the applications should be granted.

14. It is further ordered, That Camden Brinks and Casey file a statement of publication with the presiding Administrative Law Judge as described in Section 73.3580(h) of the Rules.

15. It is further ordered, That if the Casey application is granted, the permit shall specify that the provisions of Section 73.210 of the Commission's Rules are waived to permit the studio to be located outside the city of license.

16. It is further ordered, That the Federal Aviation Administration is made a party to the proceeding.

17. It is further ordered, That if the Charlton application is granted, the permit shall specify that the provisions of Section 73.315(a) of the Commission's Rules are waived to permit a signal level of less than 3.16 mV/m over the entire city of St. Marys, Georgia.

18. It is further ordered, That, to avail themselves of the opportunity to be heard, the applicants herein shall, purusuant to Section 1.221(c) of the Commission's Rules, in person or by attorney, within 20 days of the mailing of this Order, file with the Commission in triplicate a written appearance stating an intention to appear on the date fixed for the hearing and to present evidence on the issues specified in this Order.

19. It is further ordered, That the applicants herein shall, pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and Section 73.3594(g) of the Commission's Rules, give notice of the hearing (either individually or, if feasible and consistent with the Rules, jointly) within the time and in the manner prescribed in such Rule, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the Rules.

Federal Communications Commission.

Jerold L. Jacobs,

Chief, Broadcast Facilities Division.

[FR Doc. 80-23585 Filed 8-5-80; 8:45 am]

BILLING CODE 6712-01-M

[BC Docket Nos. 80-403—80-405; File Nos. BPH 780717AC, etc.]

Denair Broadcasting Co., Inc., et al; Hearing Designation Order Designating Applications for Consolidated Hearing on Stated Issues

Adopted: July 16, 1980.

Released: July 30, 1980.

In re applications of Denair Broadcasting Company, Inc. Denair, California, BC DOCKET NO. 80-403, File No. BPH-780717AC, Req: 95.9 MHz, Channel 240A 3.0 kW (H&V), 177 feet; Denair Wireless Co., Inc., Denair, California, BC DOCKET NO. 80-404, File No. BPH-790115AC, Req: 95.9 MHz, Channel 240A 3.0 kW (H&V), 300 feet; Robert J. Parreno, R. C. Duckett and William H. Colclough, a Joint Venture d.b.a. All-American Broadcasting Company, Delhi, California, BC DOCKET NO. 80-405, File No. BPH-790117AB; Req: 95.9 MHz, Channel 240A 3.0 kW (H&V), 300 feet; for a construction permit for a New FM Station.

1. The Commission, by the Chief, Broadcast Bureau, acting pursuant to delegated authority, has before it for consideration the above-captioned mutually exclusive applications of Denair Broadcasting Company, Inc. (DBC), Denair Wireless Co., Inc. (Wireless), and Robert J. Parreno, R. C. Duckett and William H. Colclough, a Joint Venture d.b.a. All-American Broadcasting Company (All-American) for a construction permit for a new FM station.

2. *DBC.* The applicant has not provided us with a current FAA clearance. Accordingly, an appropriate issue will be specified.

3. *Wireless.* Anthony D. Naish, a principal of the applicant, is an alien and has subscribed for a permissible 20% of the applicant's stock. Naish, however, is also an officer of RNF Media Corporation, Inc. (RNF), an entity in which three of the applicant's four principals own 99% of the stock. Of the $86,000 which the applicant claims it possesses to finance its proposal to construct and operate the station, RNF has agreed to loan the applicant $85,000. The loan is unsecured and need be repaid only at the demand of RNF. In view of RNF's financial control over the applicant and the substantial identity of RNF and the applicant, we believe that an issue is warranted as to whether Wireless is in violation of Section 310(b)(4) of the Communications Act of 1934, as amended. That section provides that no entity, of which an alien is an officer, may indirectly control an applicant for a broadcast license. An issue will, therefore, be specified to determine whether RNF indirectly controls Wireless.

4. Applicants for new broadcast stations are required by Section 73.3580(f) of the Commission's Rules to give local notice of the filing of their applications. They must then file with the Commission the statement described in Section 73.3580(h) of the Rules. We have no evidence that Wireless published the required notice. To remedy this deficiency, Wireless will be required to publish local notice of its application and to file a statement of publication with the presiding Administrative Law Judge.

5. *All-American.* The applicant filed a petition for leave to amend on May 9, 1980, beyond the date prescribed by the Commission for amending its application as of right. The amendment consists of a Small Business Administration guarantee of a loan procured by the applicant. The loan agreement was filed within the time for amending the application as of right. Since the guarantee of the loan does not improve the applicant's comparative position, the petition for leave to amend will be granted and the corresponding amendment will be accepted under Section 73.3522(a)(2) of the Commission's Rules.

6. The applicant indicated that it will establish an auxiliary studio at its transmitter site, in addition to the main studio in Delhi, the community of license. All-American requested a waiver of Section 73.1130 of the Commission's Rules, consistent with *Arizona Communications Corporation,* 25 FCC 2d 837 (1970), *recon. denied,* 27 FCC 2d 283 (1971), as it appears to have proposed to originate a majority of its programs, exclusive of all its recorded music programs, at the Delhi main studio, with the remainder originating from the auxiliary studio. Therefore, the applicant's waiver request will be granted.

7. The respective proposals are for different communities. Consequently, it will be necessary to determine pursuant to Section 307(b) of the Communications Act of 1934, as amended, which of the proposals would best provide a fair, efficient and equitable distribution of radio services.

8. Except as indicated by the issues specified below, the applicants are qualified to construct and operate as proposed. However, since the proposals are mutually exclusive, they must be designated for hearing in a consolidated proceeding on the issues specified below.

9. Accordingly, It Is Ordered, That pursuant to Section 309(e) of the Communications Act of 1934, as amended, the applications Are Designated For Hearing in a Consolidated Proceeding, at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine whether there is a reasonable possibility that the tower height and location proposed by Denair Broadcasting Company, Inc. would constitute a hazard to air navigation.

2. To determine whether Denair Wireless Co., Inc.'s proposal complies with Section 310(b)(4) of the Communications Act of 1934, as amended.

3. To determine the areas and population which would receive primary aural service (1 mV/m or greater in the case of FM) from the proposals and the availability of other primary service to such areas and populations.

4. To determine, in the light of Section 307(b) of the Communications Act of 1934, as amended, which of the proposals would best provide a fair, efficient and equitable distribution of radio service.

5. To determine, in the event it is concluded that a choice between the applications should not be based solely on considerations relating to Section 307(b), which of the proposals would, on a comparative basis, best serve the public interest.

6. To determine, in the light of the evidence adduced pursuant to the foregoing issues, which of the applications should be granted.

10. It is Further Ordered, That Wireless file a statement of publication of local notice of its application with the presiding Administrative Law Judge, in accordance with § 73.3580(f) of the Commission's Rules.

11. It is Further Ordered, That the petition for leave to amend filed by All-American Is Granted, and the corresponding amendment is Accepted.

12. It is Further Ordered, That the Federal Aviation Administration IS MADE A PARTY to the proceeding.

13. It is Further Ordered, That if the All-American application is granted, the permit shall specify that the provisions of § 73.1130 of the Commission's Rules are waived.

14. It is Further Ordered, That in the event of a grant of the application of either DBC, Wireless or All-American, the construction permit shall contain the following condition:

Program tests will not be authorized until KLBS-FM, Los Banos, California, is authorized program tests on Channel 284; and a license will not be issued until KLBS-FM is issued a license on Channel 284.

15. It is Further Ordered, That, to avail themselves of the opportunity to be heard, the applicants herein shall, pursuant to Section 1.221(c) of the Commission's Rules, in person or by attorney, within 20 days of the mailing of this Order, file with the Commission in triplicate a written appearance stating an intention to appear on the date fixed for the hearing and to present evidence on the issues specified in this Order.

16. It is Further Ordered, That the applicants herein shall, pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and § 73.3594(g) of the Commission's Rules, give notice of the hearing (either individually or, if feasible and consistent with the Rules, jointly) within the time and in the manner prescribed in such Rule, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the Rules.

Federal Communications Commission.

Jerold L. Jacobs,

Chief, Broadcast Facilities Division,[1] *Broadcast Bureau*

[FR Doc. 80-23593 Filed 8-5-80; 8:45 am]

BILLING CODE 6712-01-M

[BC Docket Nos. 80-413—80-414; File No. BPH-780929 AP, BPH-790328AE]

Everybody's Mood, Inc., and Hilltop Radio, Inc.; Hearing Designation Order Designating Applications for Consolidated Hearing on Stated Issues

In re Applications of Everybody's Mood, Inc., West Salem, Wisconsin, BC Docket No. 80-413, File No. BPH-780929AP, Req: 100.1 MHz, Channel 261, 2.5 KW (H&V), 344 feet; Hilltop Radio, Inc., West Salem, Wisconsin, BC Docket No. 80-414, File No. BPH-790328AE, Req: 100.1 MHz, Channel 261 3.0 KW (H&V), 300 feet; For construction permit for a New FM Station.

Adopted: July 2, 1980.

Released: July 29, 1980.

1. The commission, by the Chief, Broadcast Bureau, acting pursuant to delegated authority, has under consideration: (1) the above-captioned mutually exclusive applications of Everybody's Mood, Inc. (Everybody) and Hilltop Radio, Inc. (Hilltop), (ii) a petition to dismiss or deny filed by Everbody,[1] and (iii) related pleadings thereto.

2. On September 29, 1978, Everybody tendered for filing its application for Channel 261 in West Salem. The cut-off date for filing applications for that channel was March 28, 1979 and on that date the Hilltop application was filed. On May 21, 1979, Everybody filed its petition to dismiss or deny. The substance of this petition alleged that Hilltop's application was not substantially complete by the March 28, 1979 cut-off date in that it failed to list a properly available transmitter site. However Hilltop, by amendment dated May 7, 1979 rectified its application by specifying an available site. In its opposition to Everybody's petition filed on June 5, 1979, Hilltop included the affidavit of Dr. Bruce A. Polender, President of Hilltop, which attempted to explain the change in tower sites. This affidavit states: "Our group felt the original site would be available * * * and so instructed our engineer * * *. At the time of filing our application, we

[1] Pursuant to the Commission's recent decision in *K&L Communications, Inc.,* 70 FCC 2d 1987, 45 RR 2d 187 (1979), everybody's petition will be treated as an informal objection and will be disposed of in accordance with the policies expressed in Section 0.281(b)(1) of the Rules.

V 45 / 153 AG 6 80 UMI

discovered that the proposed site * * * was not available due to an exclusive option to lease to the other applicant * * *. We then immediately sought another acceptable site * * *. We did not have enough time to complete the new engineering data prior to submitting our application. We obtained an option for land use * * * and completed the new required engineering as rapidly as possible." It is these facts that from, the basis for Everybody's position that the Hilltop application must be dismissed "for deliberate misstatement and gross errors in significant areas."

3. Upon review of the facts and legal arguments before us, it is unclear whether Hilltop's actions constitute either deliberate misrepresentation or a violation of Commission requirements for substantial completeness of an application. The affidavit of Dr. Polender, as well as failing to meet the personal knowledge requirements of Section 309(d)(1) of the Act, as amended, is ambiguous as to how and when the events surrounding Hilltop's application transpired. Such ambiguity makes resolution of the issued raised by Everybody impossible at this stage of the proceedings. Therefore, on the basis of the foregoing, we conclude that further inquiry at hearing is warranted and a misrepresentation issue will be added.

4. As a further matter, the balance sheet submitted by Ellsworth Dissmore fails to support his commitment to donate certain equipment worth $15,326, and an appropriate issue is required.

5. Except as indicated by the issues specified below, the applicants are qualified to construct and operate as proposed. However, since the proposals are mutually exclusive, they must be designated for hearing in a consolidated proceeding on the issues specified below.

6. Accordingly, it is ordered, That, pursuant to Section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, at a time and place specified in a subsequent Order, upon the following issues:

1. To determine whether Hilltop misrepresented the availability of a transmitter site in its application and, if so, the effect thereof on the applicant's qualifications to be a Commission licensee.

2. To determine with respect to Hilltop:

(a) the source and availability of equipment worth $15,236 to be donated by Ellsworth Dissmore; and

(b) whether in light of the evidence adduced pursuant to (a) above, the applicant is financially qualified.

3. To determine which of the proposals would, on a comparative basis, better serve the public interest.

4. To determine, in light of the evidence adduced pursuant to the foregoing issues, which of the applications should be granted.

7. It is further ordered, That the petition to dismiss or deny filed by Everybody is Granted to the extent indicated herein, and is Denied in all other respects.

8. It is further ordered, That, to avail themselves of the opportunity to be heard, the applicants herein shall, pursuant to Section 1.221(c) of the Commission's Rules, in person or by attorney, within 20 days of the mailing of this Order, file with the Commission, in triplicate, a written appearance stating an intention to appear on the date fixed for the hearing and to present evidence on the issues specified in this Order.

9. It is further ordered, That the applicants herein shall, pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and §73.3594(g) of the Commission's Rules, give notice of the hearing (either individually or, if feasible and consistent with the Rules, jointly within the time and in the manner prescribed in such Rule, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the Rules.

Federal Communications Commission.

BILLING CODE 6712-01-M

[BC Docket Nos. 80-352—80-353; File Nos. BPH-10877, BPH-780719AA]

Grants Pass Broadcasting Co. et al.; Designating Applications for Consolidated Hearing on Stated Issues

Hearing Designation Order

Adopted: June 20, 1980.

Released: July 29, 1980.

In the matter of applications of James O. Wilson, Jr. and Elzie B. Parker, d/b/a Grants Pass Broadcasting Company, Grants Pass, Oregon, Req: 96.9 MHz, Channel 245 27.1 kW (H&V),—450 feet, BC Docket No. 80-352, File No. BPH-10877; William John Miner, Linda Jo Miner and Lawrence Brent Miner, d/b/a Lindavox, Grants Pass, Oregon, Req: 96.9 MHz, Channel 245 25 kW (H&V), 565 feet, BC Docket No. 80-353, File No. BPH-780719AA, for a construction permit for a New FM station.

1. The Commission, by the Chief, Broadcast Bureau, acting pursuant to delegated authority, has under consideration the above-captioned mutually exclusive applications of James O. Wilson, Jr. and Elzie B. Parker, d/b/a Grants Pass Broadcasting Company (Wilson) and William John Miner, Linda Jo Miner and Lawrence Brent Miner, d/b/a Lindavox (Lindavox).

2. *Wilson.* The applicant proposes to duplicate the existing programming of its commonly owned station, KAJO. Therefore, evidence regarding program duplication will be admissible under the standard comparative issue. When duplicated programming is proposed, the showing permitted will be limited to evidence concerning the benefits to be derived from the proposed duplication which would offset its inefficiency. *Jones T. Sudbury,* 8 FCC 2d 360, 10 RR 2d 114 (1967).

3. *Lindavox.* Analysis of the financial data submitted by Lindavox reveals that $78,462 will be required to construct the proposed station and operate for three months, itemized as follows:

Equipment payments	$53,962
Land	500
Buildings	4,000
Miscellaneous	8,500
Operating costs (three months)	11,500
Total	78,462

Lindavox plans to finance construction and operation with the following funds:

Cash from William and Linda Miner	$8,000
Cash from Lawrence Miner	12,600
Aged and certified accounts receivable at 75%	13,105
Loan from Family Bank of Commerce	50,000
Loan from Zion First National Bank	40,000
Total	123,905

Lindavox has not however, provided documentation that the accounts receivable are actually aged and certified for the indicated value. The $50,000 loan letter from the Family Bank of Commerce fails to comply with Paragraph 4(e) of Section III in that it does not specify the interest rate of the loan or the terms of repayments. Also, the $90,000 loan commitment letter from Zion First National Bank, of which Lindavox proposes to use only $40,000 for its station, expired by its own terms on June 16, 1979, because Lindavox did not apply for the loan by that date. The applicant has, therefore, shown only $20,800 available to meet a requirement of $78,462. The applicant has also failed to file a balance sheet for the partnership showing current assets and current liabilities, as required by Paragraph 2(a) of Section III. Accordingly, a limited financial issue will be specified.

4. Informal objections to the Lindavox application were filed by the Oregon State Department of Forestry (Forestry) and Pacific Power and Light Company (Pacific) alleging that operation as proposed with 25 kW effective radiated power from the Beacon Hill transmitter site might cause interference to Forestry's station KXU-350 in the Forestry—Conservation Radio Service and Pacific's station KOC-480 in the Power Radio Service. Under normal circumstances, interference between these existing operations and the Lindavox proposal would not occur. Thus, the objections are based solely on speculation. Nevertheless, it has long been our policy to require new stations to be responsible, financially and otherwise, for the elimination of any problems which may occur. In light of this policy, neither the exploration of this matter in hearing nor the imposition of a condition on Lindavox's construction permit, should it prevail in this proceeding, is necessary. *Athens Broadcasting Co. Inc.,* 68 FCC 2d 920 (1978). Accordingly, the objections will be denied.

5. *Other matters.* Data submitted by the applicants indicate that there would be a significant difference in the size of the areas and populations which would receive service from the proposals. Consequently, for the purpose of comparison, the areas and populations which would receive FM service of 1 mV/m or greater strength, together with the availability of other primary aural services in such areas will be considered under the standard comparative issue for the purpose of determining whether a comparative preference should accrue to either of the applicants.

6. Except as indicated by the issues specified below, the applicants are qualified to construct and operate as proposed. However, since the proposals are mutually exclusive, they must be designated for hearing in a consolidated proceeding on the issues specified below.

7. Accordingly, it is ordered, that pursuant to Section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine with respect to William John Miner, Linda Jo Miner and Lawrence Brent Miner, d/b/a/ Lindavox:

(a) The source and availability of additional funds over and above the $20,800 indicated; and

(b) The light of the evidence adduced pursuant to (a) above, whether the applicant is financially qualified to construct and operate the proposed station.

2. To determine which of the proposals would, on a comparative basis, better serve the public interest.

3. To determine, in light of the evidence adduced pursuant to the foregoing issues, which, if either, of the applications should be granted.

8. It is further ordered, that the informal objections by the Oregon State Department of Forestry and the Pacific Power & Light Company are denied.

9. It is further ordered, that, to avail themselves of the opportunity to be heard, the applicants herein shall, pursuant to § 1.221(c) of the Commission's rules, in person or by attorney, within 20 days of the mailing of this Order, file with the Commission in triplicate a written appearance stating an intention to appear on the date fixed for the hearing and to present evidence on the issues specified in this Order.

10. It is further ordered, that the applicants herein shall, pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and § 73.3594 of the Commission's rules, give notice of the hearing (either individually or, if feasible and consistent with the rules, jointly) within the time and in the manner prescribed in such rule, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the rules.

Federal Communications Commission.

BILLING CODE 6712-01-M

[BC Docket Nos. 80-356—80-359; File Nos. BPH-790129AE etc.]

Hispanic Broadcasting Co., et al.; Designating Applications for Consolidated Hearing on Stated Issues

Hearing Designation Order

Adopted: June 26, 1980.

Released: July 29, 1980.

In the matter of applications of Hispanic Broadcasting Co., Las Vegas, Nevada, Req: 96.3 MHz, Channel 242, 31.5 kW (H&V), 1529 feet, BC Docket No. 80-356, File No. BPH-790129AE; Pan American Broadcasting Company, Inc., Las Vegas, Nevada, Req: 96.3 MHz, Channel 242, 31.38 kW (H&V), 1252 feet, BC Docket No. 80-357, File No. BPH-790524AC; Jomay Broadcasting, Inc., Las Vegas, Nevada, Req: 96.3 MHz, Channel 242, 100 kW (H&V), 1131 feet, BC Docket No. 80-358, File No. BPH-790529AH; Galaxy Broadcasting Corp., Las Vegas, Nevada, Req: 96.3 MHz, Channel 242, 100 kW (H&V), minus 11 feet, BC Docket No. 80-359, File No. BPH-790530AI, For Construction Permit For A New FM Station.

1. The Commission, by the Chief, Broadcast Bureau, acting pursuant to delegated authority, has under consideration: (i) The above captioned mutually exclusive applications filed by Hispanic Broadcasting Co. (Hispanic), Pan American Broadcasting Company, Inc. (Pan American), Jomay Broadcasting, Inc. (Jomay) and Galaxy Broadcasting Corp. (Galaxy); (ii) a petition to reject and/or dismiss filed by Jomay against Galaxy; and (iii) related pleadings.

2. *Hispanic.* Analysis of the financial data submitted by Hispanic reveals that $41,893 will be required to construct the proposed station and operate for three months, itemized as follows:

Equipment (lease)	$1,815
Building	1,000
Miscellaneous	11,500
Operating Costs (three months)	27,578
Total	41,893

Though applicant is leasing the equipment for the purpose of deferring credit, its failure to provide a copy of the lease-purchase agreement makes it impossible to determine the extent of the deferred credit. Hispanic plans to finance construction and operation with the following funds: (i) Existing capital of $5,500; and (ii) new capital of $36,393. Because Hispanic has not complied with FCC Form 301, Section III paragraph 2(a)'s request for applicant's balance sheet, it is impossible to evaluate Hispanic's claim of $5,500 of existing capital. David P. Boyer, Jr. is, after various amendments, the only shareholder who will furnish funds to the applicant and the sole source of new capital, yet no evidence of any commitment by Mr. Boyer exists as required by Section III, Paragraph 4(a) of Form 301. Analysis of Mr. Boyer's balance sheet reveals that his net liquid assets do not exceed $4,000. This amount is insufficient to meet applicant's construction and operating expenses. Accordingly, a general financial issue will be specified.

3. Hispanic has failed to comply with the requirements of the *Primer on Ascertainment of Community Problems by Broadcast Applicants*, 27 FCC 2d 650, 21 RR 2d 1507 (1971). From the information before us, Hispanic has not included a description of the composition of Las Vegas, indicating "the minority, racial or ethnic breakdown of the community, its economic activities, governmental activities, public service organizations, and any other factors or activities that make the particular community distinctive" as required by Question and Answer 9 of the *Primer*. While the absence of a demographic study makes it difficult to determine which groups in Las Vegas are significant for the purpose of the community leader survey, it is apparent that applicant has failed to interview leaders of groups that would seem significant in Las Vegas, such as blacks, elderly, labor, and the military, among others, as required by Questions and Answers 10, 13(a) and 16 of the *Primer*. Because applicant failed to identify the community of the leaders it did interview, it is impossible to determine the extent of applicant's ascertainment of the problems of major communities which are outside the city of license and which the applicant intends to serve as required by Question and Answer 7 of the *Primer*. Accordingly, a general ascertainment issue will be specified.

4. *Pan American.* Analysis of the financial data submitted by Pan American reveals that $66,203.75 will be required to construct the proposed station and operate for three months, itemized as follows:

Equipment down payment	$4,857
Equipment payments with interest	12,142.50
Land	4,500
Building	1,750
Miscellaneous	15,000
Operating Costs (3 months)	27,954.25
Total	66,203.75

Both the equipment payment terms from Dyma Engineering and the lease agreement for applicant's transmitter site have expired, thus increasing costs. Applicant plans to finance construction and operation with the following funds: (i) $10,000 in cash; (ii) stock commitments by Jorge Santanilla for $10,000; by Doris Drucker for $10,000; by Donna Wiley for $40,000; and by John McDermott for $5,000; and (iii) a $100,000 loan from the Marquette Partnership. It is impossible to determine applicant's financial position within ninety days of the date of the application, as required by FCC Form 301, Section III 2(a), because applicant's balance sheet is not dated. Analyzing the balance sheets of the prospective stock purchasers, neither Mr. Santanilla nor Ms. Drucker has any current liquid assets in excess of current liabilities and thus cannot meet any part of their respective commitments.[1] Ms. Wiley can meet her commitment while Mr. McDermott has only $3,200 in net liquid assets to contribute to the applicant.[2] Applicant has not submitted any evidence of a commitment of a $100,000 loan by the Marquette Partnership, as required by Section III, Para. 4(a) of Form 301, and analysis of the Marquette's balance sheet shows no current liquid assets in excess of current liabilities, resulting in a total inability to meet its loan commitment. Applicant has only $43,200 in funding, an amount insufficient to meet construction and operating costs of $66,203.75. Accordingly, a limited financial issue will be specified.

5. Pan American has not shown Federal Aviation Administration approval for its tower site. Accordingly, an issue will be specified and the FAA will be made a party to the proceeding.

6. *Jomay.* Analysis of the financial data submitted by applicant reveals that $133,084.04 will be required to construct the proposed station and operate for three months, itemized as follows:

Equipment purchase outright	$3,000.00
Equipment down payment	31,054.63
Equipment payments with interest	8,229.41
Building	5,000.00
Miscellaneous	31,000.00
Operating Costs (3 months)	54,800.00
Total	133,084.04

Jomay plans to finance construction and operation with the following funds: (i) $8,500.00 in existing capital; and (ii) $144,000 in loan commitments from shareholders apportioned as follows: (a) Donald S. Gilday, $169,120; (b) Phillip Engel, $24,000; (c) Jerry Engel, $24,000; (d) M. V. Stober, $19,200; and (e) Thomas J. Graves, $7,680. While commitment letters and balance sheets have been submitted in support of these loans, no interest rate, repayment or collateral terms are shown. Moreover, Mr. Gilday has submitted a balance sheet of his and his wife's assets, while the loan commitment is solely his. Analysis of the balance sheets supporting the proposed loans shows that while Messrs. P. Engel and Stober have sufficient net liquid assets to meet their commitments of $24,000 and $19,200 respectively, Mr. Gilday has only $8,293 in net liquid assets, an amount insufficient to meet his commitment of $69,120, and Messrs. J. Engel and Graves have no net liquid assets to meet their commitments of $24,000 and $7,680 respectively. Thus, the applicant has $55,993 in funding, an amount insufficent to meet expenses of $133,084.04. Accordingly, a limited financial issue will be specified.

7. Jomay has failed to comply with the requirements of Questions and Answers 10, 13(a) and 16 of the *Primer* in failing to survey leaders of significant population groups set forth in its demographic study. For example, blacks constituted approximately 8 percent of the population of Las Vegas in the 1970 Census, yet applicant has interviewed no leaders of black groups. The applicant's compositional study states that Nellis Air Force Base is one of the largest employers in Southern Nevada, but no leaders of the military have been interviewed. Jomay has also not interviewed any leaders of recreation groups or professional groups. Therefore, a limited ascertainment issue will be specified.

8. *Galaxy.* Analysis of the financial data submitted by Galaxy reveals that $136,038 will be required to construct the proposed station and operate for three months, itemized as follows:

Equipment down payment	$43,400
Equipment payments with interest	8,638
Building	10,000
Miscellaneous	14,000
Operating Costs (3 months)	60,000
Total	136,038

The equipment down payment and payments with interest costs could not be verified as Galaxy has not included the equipment supplier's letter evidencing its willingness to supply credit as required by Section III, Para. 4(e) of FCC Form 301. Galaxy plans to finance construction and operation with the following funds: (i) $10,000 in existing capital; and (ii) $300,000 in stock subscriptions from 10 subscribers. Because applicant's balance sheet is not dated it cannot be determined whether the balance sheet reflects applicant's financial position at the close of a month within 90 days of the date of application as required by Section III, Para. 2 of Form 301. None of the anticipated stock subscriptions totalling $300,000 can be verified because none are supported by commitment letters as required by Section III, Para. 4(a) of Form 301, and none, except one, are supported by balance sheets, as required by Section III, Para 4(b). While the applicant has submitted the balance sheet of Rafael E. and Charleen Vega, only Mr. Vega is listed as a stock subscriber, and there is no evidence that joint assets could be relied upon. Moreover, analysis of the balance sheet shows that there are no net liquid assests to meet Mr. Vega's commitment of $16,140. Accordingly, a general financial issue will be specified.

9. Galaxy has failed to comply with the requirements of the *Primer*. From the information before us, it appears that the applicant has failed to survey leaders of significant population groups set forth in its demographic study, as required by Questions and Answers 10, 13(a) and 16 of the *Primer*. For example, according to applicant's compositional study, women constitute 49.9% and blacks 11% of Las Vegas' population (1970 Census), yet applicant surveyed no leaders of groups representing women or blacks. The applicant has also not surveyed leaders of groups representing labor, military, professionals, consumer services, culture or religion. Additionally, it is impossible to determine whether applicant had conducted the general public survey within six months prior to filing, as required of Question and Answer 15, as the date was not disclosed. Since applicant has not discussed the methodology of its general public survey, it is impossible to determine whether the random sample required by Question and Answer 13(b) was achieved. Accordingly, a general ascertainment issue will be specified.

10. *Other matters.* Jomay filed a petition to reject and/or dismiss the application of Galaxy, on August 21, 1979, on the grounds that Galaxy's application as tendered for filing was not substantially complete at the close of business on May 30, 1979, the cut-off date, as required by the Commission's April 11, 1979 Public Notice establishing the cutoff date, and § 73.3564 of the Commission's rules.[3] The "omissions and/or deficiencies" enumerated by petitioner include: (1) No certified articles of incorporation; (ii) no certified By-Laws; (iii) failure to include a variety of information and documents required by Section III of Form 301; and (v) an incomplete ascertainment survey. Thus, petitioner argues, Galaxy's application was incomplete as filed and should be either rejected or dismissed. Galaxy's opposition to the petition, filed September 20, 1979 asserts that its application was substantially complete when filed, that the Commission was notified at the time of filing that certified copies of the articles of incorporation and the by-laws would be filed later and were subsequently filed, and that the application, as substantially complete, must be accepted for filing and processed by the Commission. Jomay's reply to Galaxy's opposition asserts: (i) That Galaxy's pleading was tardy and should have been filed September 6, 1979 according to § 1.45 of the Commission's rules; and (ii) that Galaxy's community leader survey was filed after the May 30 cutoff date.

11. Following the ruling in *K & L Communications, Inc.*, 70 FCC 2d 1987, 45 RR 2d 187 (1979), petitions to dismiss applications which have been accepted for filing on the grounds that these applications are defective or incomplete will be treated by the staff as informal objections and disposed of in accordance with § 0.281(b)(1). We find that the application, as originally filed, was not so patently violative of the rules as to render processing a "futile gesture", *K & L Communications, Inc., supra*, since the deficiencies could have been made the subject of issues in the hearing order and, in fact, have been insofar as they still remain. Moreover, the absence of the articles of incorporation, by-laws and portions of the community leader survey have been resolved by amendments filed as of right before the amendment cut-off date of February 8, 1980. Accordingly, the petition will be granted to the extent indicated, and denied in all other respects.

12. Data submitted by the applicants indicate that there would be a significant difference in the size of the areas and populations which would receive service from the proposals. Consequently, for the purpose of comparison, the areas and populations which would receive FM service of 1 mV/m or greater intensity, together with the availability of other primary aural services in such area, will be considered under the standard comparative issue, for the purpose of determining whether a comparative preference should accrue to any of the applicants.

13. Except as indicated by the issues specified below, the applicants are qualified to construct and operate as proposed. However, since the proposals are mutually exclusive, they must be designated for hearing in a consolidated proceeding on the issues specified below.

14. Accordingly, it is ordered, That, pursuant to Section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine whether Hispanic is financially qualified to construct and operate the proposed station.

2. To determine the efforts made by Hispanic to ascertain the community needs and problems of the area to be served and the means by which the

[1] Current liabilities were not segregated from long term liabilities and therefore all liabilities were considered current.

[2] Mr. McDermott proposed to rely upon his stock holding as well as his cash on hand. However Question 4b of FCC Form 301 requires that securities must be identified by the type of security, name of issuer, name of the market on which it is traded, and current value. Mr. McDermott did not offer any of the required information.

[3] The relevant subsections of § 73.3564 are (a) and (b) which provide as follows:

(a) Applications tendered for filing are dated upon receipt and then forwarded to the Broadcast Bureau, where an administrative examination is made to ascertain whether the applications are complete. Applications found to be complete or substantially complete are accepted for filing and are given a file number. In case of minor defects as to completeness, the applicant will be required to supply the missing information. Applications which are not substantially complete will be returned to the applicant.

(b) Acceptance of an application for filing merely means that it has been the subject of a preliminary review by the FCC's administrative staff as to completeness. Such acceptance will not preclude the subsequent dismissal of the application if it is found to be patently not in accordance with the FCC's rules.

V 45 / 153 AUG 6 80 UMI

applicant proposes to meet those needs and problems.

3. To determine with respect to Pan American:

(a) The source and availability of additional funds over and above the $43,200 indicated; and

(b) Whether, in light the evidence adduced pursuant to (a) above, the applicant is financially qualified.

4. To determine whether there is a reasonable possibility that the tower height and location proposed by Pan American would constitute a hazard to air navigation.

5. To determine with respect to Jomay:

The source and availability of additional funds over and above the $55,993 indicated; and

(b) Whether in light of the evidence adduced pursuant to (a) above, the applicant is financially qualified.

6. To determine whether Jomay interviewed leaders of blacks, military, recreation and professions in connection with its ascertainment effort.

7. To determine whether Galaxy is financially qualified to construct and operate the proposed station.

8. To determine the efforts made by Galaxy to ascertain the community needs and problems of the area to be served and the means by which the applicant proposed to meet those needs and problems.

9. To determine which of the proposals would, on a comparative basis, best serve the public interest.

10. To determine, in the light of the evidence adduced pursuant to the foregoing issues, which of the applications, if any, should be granted.

15. It is further ordered, that the Federal Aviation Administration IS MADE A PARTY to the proceeding.

16. It if further ordered, that the petition to reject and/or dismiss filed by Jomay is granted to the extent indicated above and is denied in all other respects.

17. It is further ordered, that, to avail themselves of the opportunity to be heard, the applicants herein shall, pursuant to § 1.221(c) of the Commission's rules, in person or by attorney, within 20 days of the mailing of this Order, file with the Commission in triplicate a written appearance stating an intention to appear on the date fixed for the hearing and to present evidence on the issues specified in this Order.

18. It is further ordered, that the applicants herein shall, pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and § 73.3594 of the Commission's rules, give notice of the hearing (either individually or, if feasible and consistent with the rules, jointly) within the time and in the manner prescribed in such rule, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the Rules.

Federal Communications Commission.

Jerold L. Jacobs,

Chief, Broadcast Facilities Division Broadcast Bureau.

[FR Doc. 80-23589 Filed 8-5-80; 8:45 am]

BILLING CODE 6712-01-M

[BC DOCKET NO 80-333 File No. BPH-11,097; FCC 80-374]

Dick Lashbrook Corp. (WSIV-FM); Designating Applications for Consolidated Hearing on Stated Issues

Memorandum Opinion and Order

Adopted: June 25, 1980.

Released: July 28, 1980.

In re Application of DICK LASHBROOK CORPORATION (WSIV-FM) Pekin, Illinois, Has: 95.3 MHz, Channel 237 2.8 KW, 89 feet; Req: 95.3 MHz, Channel 237 1.1 KW, 461 feet, For Construction Permit for Modification of Facilities.

By the Commission: Commissioners Lee and Brown absent.

1. The Commission has before it for consideration: (i) the above-captioned application, (ii) a request by Dick Lashbrook Corporation (DLC) for a waiver of Section 73.207 of the Commission's Rules, (iii) petitions to deny the application of DLC filed by Virginia Broadcasting Corporation (VBC) and Kankakee TV Cable Co. (Kankakee); and (iv) related pleadings thereto.

2. DLC has applied to the Commission for a construction permit to change the transmitter location of Station WSIV-FM, Pekin, Illinois. The new site which is 62.6 miles from the transmitter site of co-channel Station WRKX (FM) in Ottawa, Illinois, would put DLC in violation of Section 73.207 of the Commission's Rules which requires that co-channel Class A FM stations be spaced at least 65 miles apart. The Commission has granted DLC a waiver of Section 73.207 for the purpose of accepting DLC's application only.[1] However, VBC, licensee of WRKX, has petitioned the Commission to deny the grant of DLC's application on the ground that it objects to being short-spaced with WSIV-FM. Kankakee, licensee of FM station WSWT, Peoria, Illinois also petitioned to deny the grant of DLC's application based upon short-spacing with WRKX.

[1] Under similar circumstances, the Commission has granted waivers for short-spacing of one or two miles.

3. The Commission's Rules define interference to FM stations solely on the basis of minimum assignment and station separation requirements, maximum power, and antenna height rules. Section 73.209(b). Since VBC has filed an objection to the application, it must be given an opportunity under Section 316(a) of the Communications Act of 1934, as amended, to show in hearing why its license should not be modified. *FCC* v. *National Broadcasting Company Inc., (KOA),* 319 U.S. 239 (1943).

4. Except as indicated by the issues specified below, the applicant is qualified to construct and operate as proposed. However, the Commission is unable to make the statutory finding that a grant of the above application would serve the public interest, convenience and necessity, and is of the opinion that the application must be designated for hearing.

5. It is ordered, That pursuant to Section 309(e) of the Communications Act of 1934, as amended, the application is designated for hearing, at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine the nature and extent of the applicant's violation of Section 73.207 of the Commission's Rules, and whether circumstances exist which warrant a waiver of that Rule.

2. To determine, in light of the evidence adduced pursuant to the foregoing issue, whether a grant of the application would serve the public interest, convenience, and necessity.

6. It is further ordered, That Virginia Broadcasting Corporation, licensee of WRKX, Ottawa, Illinois, and Kankakee TV Cable Co., licensee of WSWT, Peoria, Illinois ARE MADE PARTIES to the proceeding.

7. It is further ordered, That the petitions to deny filed by Virginia Broadcasting Corporation and Kankakee TV Cable Co., ARE GRANTED to the extent indicated above and ARE DENIED in all other respects.

8. It is further ordered, That the request by Dick Lashbrook Corporation for waiver of Section 73.207 of the Commission's Rules with respect to the short-spacing with WRKX is granted insofar as it requests acceptance for filing; and that insofar as it requests grant of the application is deferred pending outcome of this proceeding.

9. It is further ordered, That to avail themselves of the opportunity to be heard, the applicant and parties respondent herein, pursuant to § 1.221(c) of the Commission's Rules, in person or by attorney, shall within twenty (20) days of the mailing of this Order, file with the Commission in triplicate, a written appearance stating an intention to appear on the date fixed for the hearing and present evidence on the issues specified in this Order.

10. It is further ordered, That the applicant herein shall pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and Section 73.3594 of the Commission's Rules, give notice of the hearing within the time and in the manner prescribed in such Rule, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the Rules.

Federal Communications Commission.

William J. Tricarico,

Secretary.

[FR Doc. 80-23587 Filed 8-5-80; 8:45 am]

BILLING CODE 6712-01-M

[BC Docket Nos. 80-423—80-424; File Nos. BPH-790209AC, 790920AB]

Jim T. Payne and Ritchey Communications Co.; Designating Applications for Consolidated Hearing on Stated Issues

Hearing Designation Order

Adopted: July 28, 1980.

Released: July 30, 1980.

In the matter of applications of Jim T. Payne, Yoakum, Texas, Req: 102.3 MHz, Channel 272 3.0 kW (H & V), 300 feet, BC Docket No. 80-423, File No. BPH-790209AC, Ritchey Communications Co., Yoakum, Texas, Req: 102.3 MHz, Channel 272 3.0 kW (H & V), 299.875 feet, BC Docket No. 80-424, File No. BPH-790920AB, for a construction permit for a new FM station.

1. The Commission, by the Chief, Broadcast Bureau, acting pursuant to delegated authority, has under consideration the above-captioned mutually exclusive applications of Jim T. Payne (Payne) and Ritchey Communications Co. (Ritchey) for a construction permit for a new FM station.

2. *Ritchey.* Analysis of the financial data submitted by Ritchey reveals that $41,050 will be required to construct the proposed station and operate for three months, itemized as follows:

Equipment down payment	$2,600
Principal and interest payments on equipment (4 months)	6,200
Buildings	1,000
Miscellaneous	26,000
Operating expenses (3 months)	6,250
Total	41,050

The applicant plans to finance its proposal with existing cash of $32,000 and profits from its existing AM station, KRJH, of which we can give credit for $6,410. Because Ritchey indicates only $38,410 available to meet a requirement of $41,050, a limited financial issue will be specified.

3. Except as indicated by the issue specified below, the applicants are qualified to construct and operate as proposed. However, since the proposals are mutually exclusive, they must be designated for hearing in a consolidated proceeding on the issues specified below.

4. Accordingly, it is ordered, that, pursuant to Section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine with respect to Ritchey Communications Co.:

a. The source and availability of additional funds over and above the $38,410 indicated; and

b. In light of the evidence adduced pursuant to (a) above, whether the applicant is financially qualified to construct and operate the proposed station.

2. To determine which of the proposals would, on a comparative basis, better serve the public interest.

3. To determine, in the light of the evidence adduced pursuant to the foregoing issues, which of the applications should be granted.

5. It is further ordered, that, to avail themselves of the opportunity to be heard, the applicants herein shall, pursuant to § 1.221(c) of the Commission's rules, in person or by attorney, within 20 days of the mailing of this Order, file with the Commission in triplicate a written appearance stating an intention to appear on the date fixed for the hearing and to present evidence on the issues specified in this Order.

6. It is further ordered, that the applicants herein shall, pursuant to § 311(a)(2) of the Communications Act of 1934, as amended, and § 73.3594 of the Commission's rules, give notice of the hearing (either individually or, if feasible and consistent with the rules, jointly) within the time and in the manner prescribed in such rule, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the rules.

Federal Communications Commission.

Jerold L. Jacobs,

Chief, Broadcast Facilities Division.

BILLING CODE 6712-01-M

[BC Docket Nos. 80-364-80-365; File Nos. BP-21,113, BP-781205AJ]

Rockbridge Communications, Inc., and Erwin S. Solomon; Designation Applications for Consolidated Hearing on Stated Issues

Hearing Designation Order

Adopted: June 25, 1980.

Released: July 30, 1980.

In re applications of Rockbridge Communications, Inc., Buena Vista, Virginia, Req: 1270 kHz, 1 kW, Day, BC Docket No. 80-364, File No. BP-21,113; Erwin S. Solomon, Hot Springs, Virginia, Req: 1270 kHz, 1 kW, Day, BC Docket No. 80-365, File No. BP-781205AJ, for construction permit.

1. The Commission, by the Chief, Broadcast Bureau, acting pursuant to delegated authority, has under consideration the above-captioned mutually exclusive applications for new AM broadcast stations.

2. *Rockbridge Communications, Inc.* There is a discrepancy between the four corporate directors listed in Table I of Section II of the application form, and the three directors authorized in Article II of the corporation's by-laws. This discrepancy must be resolved by amendment.

3. Rockbridge has failed to comply with the requirements of the *Primer on Ascertainment of Community Problems by Broadcast Applicants,* 27 FCC 2d 650 (1971). Its compositional study of Buena Vista says little about governmental activities, and does not list local public service organizations. Further, it is not clear whether the representatives of local cultural groups it interviewed are in fact leaders of those groups. Therefore, a limited ascertainment issue will be specified.

4. *Erwin S. Solomon.* Applicants for new broadcast stations are required by § 73.3580 of the Commission's rules to give local notice of the filing of their applicaitons. They must then file with the Commission the statement described in § 73.3580(h) of the rules. We have no evidence that Erwin Solomon published the required notice. To remedy this deficiency, the applicant will be required to demonstrate his compliance with the rule.

5. Analysis of the financial portion of Erwin Solomon's applicaiton indicates that he will require $67,175 to construct the proposed facility and operate for three months, itemized as follows:

Equipment	$25,000
Building	10,000
Legal costs	3,000
Other construction costs	9,000
Operating costs	20,175
Total	967,175

V 45 / 153 AG 6 80 UMI

Mr. Solomon has shown bank loans totaling $100,000 (gross) available to finance construction and operation. Allowing for loan repayments through the first three months of operation, there is a cushion over the estimated costs. However, the accuracy of the cost estimates is subject to doubt. While Instruction 1(b) of Section III of the application form requires applicants to state the basis for their estimates, this applicant only says that his "are based on figures supplied * * * by persons knowledgeable in the field of broadcasting." No allowance appears to have been made for acquiring a transmitter, or monitoring and test equipment; and the amount estimated for legal fees appears insufficient to cover the costs of a comparative hearing. In addition, there is no itemization of operating costs, as also required by Instruction 1(b). Therefore, a limited financial issue will be specified.

6. Erwin Solomon has also failed to comply with the requirements of the ascertainment *Primer*. First, his compositional study does not contain any information about Hot Springs. It notes that Census data is not available for the community, so provides only county-wide population, racial, and economic information. There is no discussion of governmental activities or public service organizations. We are therefore unable to determine what groups are significant in Hot Springs. Second, because purported community leaders are not fully identified, it appears that only a few groups were represented in the leader interviews, and it is not clear whether leaders of outlaying communities to be served were adequately contacted. Third, the description of the general public survey does not establish how many Hot Springs residents were interviewed, so we cannot determine whether a random sample was in fact achieved. Fourth, the dates of the interviews have not been stated, so we cannot determine they were timely. Because of these serious defects, a general ascertainment issue will be specified.

7. Finally, Mr. Solomon has not supplied the photographs of his proposed sited called for by Instruction 11 of Section V–A of the application form, so we cannot determine whether the site is suitable for the proposed antenna. An appropriate issue will be specified.

8. *Other matters.* The respective proposals, although for different communities, would serve substantial areas in common. Consequently, in addition to determining pursuant to Section 307(b) of the Communications Act of 1934, as amended, which of the proposals would better provide a fair, efficient, and equitable distribution of radio service, a contingent comparative issue will also be specified.

9. Except as indicated by the issues specified below, both applicants are qualified to construct and operate as proposed. However, since the proposals are mutually exclusive, they must be designated for hearing in a consolidated proceeding.

10. Accordingly, it is ordered, that pursuant to Section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine with respect to the efforts of Rockbridge Communications, Inc. to ascertain the needs of its proposed service area:

a. Whether the applicant determined the governmental activities and public service organizations in Buena Vista, and

b. Whether the applicant interviewed leaders of Buena Vista cultural groups.

2. To determine with respect to Erwin S. Solomon:

a. Whether the applicant has accurately estimated the costs of constructing and operating the proposed station for three months, including legal costs incident to a comparative hearing, and

b. Whether in light of the evidence adduced pursuant to (a) above, the applicant is financially qualified.

3. To determine the efforts mady by Erwin S. Solomon to ascertain the community needs and problems of the area to be served, and the means by which the applicant proposes to meet those needs and problems.

4. To determine whether the transmitter site proposed by Erwin S. Solomon is satisfactory, with particular regard to possible conditions in the vicinity of the antenna system which would distort the proposed non-directional radiation pattern.

5. To determine the areas and populations which would receive primary aural service from each proposal, and the availability of other primary service to such areas and populations.

6. To determine, in the light of Section 307(b) of the Communications Act of 1934, as amended, which of the proposals would better provide a fair, efficient, and equitable distribution of radio service.

7. To determine, in the event it is concluded that a choice between the applications should not be based solely on considerations relating to Section 307(b), which of the proposals would, on a comparative basis, better serve the public interest.

8. To determine in light of the evidence adduced pursuant to the foregoing issues, which of the applications, if either, should be granted.

11. It is further ordered, that Rockbridge Communications, Inc. shall file the amendment specified in paragraph 2, above, within 30 days after this Order is published in the **Federal Register.**

12. It is further ordered, that Erwin S. Solomon shall publish local notice of his application (if he has not already done do) and shall file a statement of publication with the presiding Administrative Law Judge within 40 days after this Order is published in the **Federal Register.**

13. It is further ordered, that to avail themselves of the opportunity to be heard, the applicants herein shall, pursuant to § 1.221(c) of the Commission's rules, in person or by attorney, file with the Commission in triplicate a written appearance stating an intention to appear on the date fixed for the hearing and to present evidence on the issues specified in this order.

14. It is further ordered, that the applicants herein shall, pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and § 73.3594 of the Commission's rules, give notice of the hearing within the time and in the manner prescribed in such rule, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the rules.

[BC Docket Nos. 80–360—80–361; File Nos. BPCT–790615KG, BPCT–791026KJ]

Southwest Television, Ltd.; Designating Applications for Consolidated Hearing on Stated Issues

Hearing Designation Order

Adopted: June 20, 1980.

Released: July 28, 1980.

In re applications of Southwest Television, Ltd. (Eugene D. Adelstein and Edward B. Berger, General Partners), Spokane, Washington, Req: Ch. 22, New Commercial, BC Docket No. 80–360, File No. BPCT–790615KG; Frontier Media, Inc., Spokane, Washington, Req: Ch. 22 New Commercial, BC Docket No. 80–361, File No. BPCT–791026KJ, for construction permit.

Hearing Designation Order

1. The Commission, by the Chief, Broadcast Bureau, acting pursuant to delegated authority, has under consideration the above-captioned mutually exclusive applications.

2. Except as indicated by the issues specified below, the Commission finds Southwest Television, Ltd. and Frontier Media, Inc. legally, financially, technically and otherwise qualified. Since these applications are mutually exclusive, the Commission is unable to make the statutory finding that grant of the applications will serve the public interest, convenience and necessity. The applications must, therefore, be designated for hearing in a consolidated proceeding on the issues set out below. [1]

3. Accordingly, it is ordered, that, pursuant to Section 309(e) of the Communications Act of 1934, as amended, the above-captioned applications are designated for hearing in a consolidated proceeding, to be held before an Administrative Law Judge at a time and place to be specified in a subsequent Order, upon the following issues:

(a) To determine which of the applications would better serve the public interest.

(b) To determine, in light of the evidence adduced pursuant to the foregoing issue, which of the applications should be granted.

4. It is further ordered, that any grant to either applicant shall be conditioned upon Canada's consent regarding the applicant's authority to operate with maximum effective radiated power in excess of 1,000 kW.

5. It is further ordered, that, to avail themselves of the opportunity to be heard, the applicants herein, pursuant to § 1.221(c) of the Commission's rules, in person or by attorney, within twenty (20) days of the mailing of this Order, shall file with the Commission, in triplicate, a written appearance stating an intention to appear on the date fixed for hearing and to present evidence on the issues specified in this Order.

6. It is further ordered, that the applicants herein shall, pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and § 73.3594 of the Commission's rules, give notice of the hearing within the time and in the manner prescribed in such rule, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the rules.

Jerold L. Jacobs,

Chief, Broadcast Facilities Division.

[FR Doc. 80–23586 Filed 8–5–80; 8:45 am]

BILLING CODE 6712–01–M

[1] Southwest Television, Ltd. (Southwest) is awaiting FAA clearance for its antenna proposal. If, during the hearing, the FAA advises that this proposal constitutes an air hazard, the Administrative Law Judge is authorized to specify an air hazard issue with respect to Southwest. In the unlikely event that the FAA study is not completed by the end of the hearing process, and should it be determined that Southwest's application would better serve the public interest, the construction permit shall be conditioned to require FAA approval prior to construction.

[BC Docket Nos. 80–409—80–410; File Nos. BPH–781020AE, BPH–790530AF]

Valcom, Inc., and Fox Valley Broadcasting Corp.; Designating Applications for Consolidated Hearing on Stated Issues

Hearing Designation Order

Adopted: July 7, 1980.

Released: July 29, 1980.

In re applications of Valcom, Inc., Fort Valley, Georgia, Req: 106.3 MHz, Channel 292, 3 kW (H&V), 297 feet, BC Docket No. 80–409, File No. BPH–781020AE; Fox Valley Broadcasting Corporation, Fort Valley, Georgia, Req: 106.3 Mhz, Channel 292, 1.59 kW (H&V), 415 feet, BC Docket No. 80–410, File No. BPH–790530AF; for construction permits for a new FM station.

1. The Commission, by the Chief, Broadcast Bureau, acting pursuant to delegated authority, has under consideration the above captioned mutually exclusive applications.

2. *Valcom Inc.* In response to Question 14 of FCC Form 301 Valcom proposes 5 hours and 6 minutes (4.1 percent) news; 2 hours and 52 minutes (2 percent) public affairs; and 2 hours and 52 minutes (2 percent) other programming (exclusive of entertainment and sports) as being responsive to community problems. However, the total amount of public affairs programming listed by Valcom in its ascertainment survey, if regularly scheduled each week, is 1 hour and 25 minutes, or 1.1 percent. Yet, most of Valcom's programs will not be aired each week. In Valcom's Exhibit 8 the proposed programs, "Valley Forum" and "Tell Us Why," are limited series of fourteen parts and four parts respectively; "In the Public Interest" is a proposed five minute public affairs program, not scheduled on a regular basis; "Labor Speaks" is only a three part series; and "Campus Week In Review" will only be broadcast during the eight month school year. "Know Your Rights," and "Washington Reports" are the only programs regularly scheduled on a weekly basis. Considering both the limited series and the regularly scheduled programs over the full three year term of the license, Valcom is proposing to allocate only 0.4 percent of its time to public affairs programming. A question arises as to whether Valcom has proposed sufficient programming to meet the perceived needs and problems of Fort Valley, Georgia. A limited ascertainment issue will be specified.

3. Since no determination has been reached that the antenna proposed by Valcom would not constitute a menace to air navigation, an issue regarding this matter is required.

4. Data submitted by the applicants indicates that there would be a significant difference in the size of the areas and populations which would receive service from the proposals. Consequently, for the purpose of comparison, the areas and population which would receive FM service of 1 mV/m or greater intensity, together with the availability of other primary aural services in such areas, will be considered under the standard comparative issue, for the purpose of determining whether a comparative preference should accrue to either of the applicants.

5. Except as indicated by the issues specified below, the applicants are qualified to construct and operate as proposed. However, since the proposals are mutually exclusive, they must be designated for hearing in a consolidated proceeding.

6. Accordingly, it is ordered, that, pursuant to Section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine with respect to the efforts of Valcom to ascertain the needs of its proposed service area:

a. Whether Valcom has proposed sufficient programming to meet the perceived needs and problems of Fort Valley, Georgia.

2. To determine whether there is a reasonable possibility that the tower height and location proposed by Valcom, Inc. would constitute a hazard to air navigation.

3. To determine which of the proposals would, on a comparative basis, better serve the public interest.

V 45 / 153 AG 6 80 UMI

4. To determine, in the light of the evidence adduced pursuant to the foregoing issues, which of the applications should be granted.

7. It is further ordered, that, the Federal Aviation Administration is made a party to the proceeding.

8. It is further ordered, that, to avail themselves of the opportunity to be heard, the applicants herein shall, pursuant to § 1.221(c) of the Commission's rules, in person or by attorney, within 20 days of the mailing of this Order, file with the Commission in triplicate a written appearance stating an intention to appear on the date fixed for the hearing and to present evidence on the issues specified in this Order.

9. It is further ordered, That the applicants herein shall, pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and § 73.3594 of the Commission's rules, give notice of the hearing (either individually or, if feasible and consistent with the rules, jointly) within the time and in the manner prescribed in such rule, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the rules.

BILLING CODE 6712-01-M

[BC Docket Nos. 80-362—80-363; File Nos. BPH-11110, BPH-780908AB]

Van Buren Community Service Broadcasters, Inc. and Crawford County Communications, Inc.; Designating Applications for Consolidated Hearing on Stated Issues.

Hearing Designation Order

Adopted: June 20, 1980.
Released: July 28, 1980.

In re applications of Van Buren Community Service Broadcasters, Inc., Van Buren, Arkansas, Req: 102.3 MHz, Channel 272, 3 kW (H&V), 300 feet, BC Docket No. 80-362, File No. BPH-11110; Crawford County Communications, Inc., Van Buren, Arkansas, Req: 102.3 MHz, Channel 272, 3kW (H&V), 300 feet, BC Docket No. 80-363, File No. BPH-780908AB. For a construction permit for a new FM station.

1. The Commission, by the Chief, Broadcast Bureau, acting pursuant to delegated authority, has under consideration the above-captioned mutually exclusive applications of Van Buren Community Service Broadcasters, Inc. (Van Buren) and Crawford County Communications, Inc. (Crawford) a motion to specify issues filed by Crawford, and related pleadings.[1]

2. The applicants are qualified to construct and operate as proposed. However, since the proposals are mutually exclusive, they must be designated for hearing in a consolidated proceeding on the issues below.

3. Accordingly, it is ordered, that, pursuant to Section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine which of the proposals would, on a comparative basis, better serve the public interest.

2. To determine, in light of the evidence adduced to the foregoing issue, which of the applications, if either, should be granted.

4. It is further ordered, That, in the event of a grant of the application of Van Buren Community Service Broadcasting, Inc., the construction permit shall contain the following condition:

Prior to construction of the FM tower authorized herein, permittee shall notify AM station KFDF so that that station may determine operating power by the indirect method. Permittee shall be responsible for the installation and continued maintenance of detuning apparatus necessary to prevent adverse effects upon the radiation pattern of the aforementioned AM station. Subsequent to construction of the FM tower and installation of all appurtenances thereon, antenna impedance measurements of the AM antenna shall be made and sufficient field strength measurements, obtained at least 10 locations along each of eight equally spaced radials, shall be made to establish that the AM radiation pattern is essentially omnidirectional and, before FM program tests are authorized, the results submitted to the Commission in an application for the AM station to return to the direct method of power determination.

5. It is further ordered, that, to avail themselves of the opportunity to be heard, the applicants herein shall, pursuant to § 1.221(c) of the Commission's rules, in person or by attorney, within 20 days of the mailing of this Order, file with the Commission in triplicate a written appearance stating an intention to appear on the date fixed for the hearing and to present evidence on the issues specified in this Order.

6. It is further ordered, that the applicants herein shall, pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and § 73.3594(g) of the Commission's rules, give notice of the hearing (either individually or, if feasible and consistent with the Rules, jointly) within the time and in the manner prescribed in such rule, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the rules.

[BC Docket Nos. 80-349—80-351; File Nos. BPH-781113AO etc.]

Visionary Radio Euphonics Inc., et al. Designating Applications for Consolidated Hearing on Stated Issues

Hearing Designation Order

Adopted: June 25, 1980.
Released: July 28, 1980.

In re applications of Visionary Radio Euphonics, Inc., Cottage Grove, Oregon. Req: 95.3 MHz, Channel 237, 0.12 kW (H&V), 1480 feet, BC Docket No. 80-349, File No. BPH-781113AO; Creswell Wireless Co., Inc., Creswell, Oregon, Req: 95.3 MHz Channel 237, 0.20 kW (H&V), 1160 feet, BC Docket No. 80-350 File No. BPH-790328AA; Bear Mountain Radio, Inc., Cottage Grove, Oregon, Req: 95.3 MHz, Channel 237, 0.0891 kW (H&V), 1477 feet, BC Docket No. 80-351, Filed No. BPH-790328AP; for construction permit for a new FM station.

1. The Commission, by the Chief, Broadcast Bureau, acting pursuant to delegated authority, has under consideration the above-captioned mutually exclusive applications filed by Visionary Radio Euphonics, Inc. (Visionary), Creswell Wireless Co., Inc. (Creswell) and Bear Mountain Radio, Inc. (Bear Mountain).

2. *Bear Mountain.* Applicants for new broadcast stations are required by § 73.3580(f) of the Commission's rules to give local notice of the filing of their applications. They must then file with the Commission the statement described in § 73.3580(h) of the rules. We have no evidence that Bear Mountain published the required notice. To remedy this deficiency, Bear Mointain will be required to publish local notice of its application and to file a statement of publication with the presiding Administrative Law Judge.

3. The respective proposals, although for different communities, would serve substantial areas in common. Consequently, in addition to determining, pursuant to Section 307(b) of the Communications Act of 1934, as amended, which of the proposals would best provide a fair, efficient and equitable distribution of radio service, a contingent comparative issue will also be specified.

4. Except as indicated by the issues specified below the applicants are qualified to construct and operate as proposed. However, since the proposals are mutually exclusive, they must be designated for hearing in a consolidated proceeding on the issues specified below.

5. Accordingly, it is ordered, that, pursuant to Section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determne the areas and populations which would receive primary aural service (1 mV/m or greater in the case of FM) from the proposals and the availability of other primary service to such areas and populations.

2. To determine, in the light of Section 307(b) of the Communications Act of 1934, as amended, which of the proposals would best provide a fair, efficient and equitable distribution of radio service.

3. To determine, in the event it is concluded that a choice between the applications should not be based solely on considerations relating to Section 307(b), which of the proposals would, on a comparative basis, best serve the public interest.

4. To determine, in the light of the evidence adduced pursuant to the foregoing issues, which of the applications, if any, should be granted.

6. It is further ordered, that Bear Mountain Radio, Inc. shall file a statement with the presiding Administrative Law Judge showing compliance with the public notice requirements of § 73.3580(f) of the Commission's rules.

7. It is further ordered, that, to avail themselves of the opportunity to be heard, the applicants herein shall, pursuant to § 1.221(c) of the Commission's Rules, in person or by attorney, within 20 days of the mailing of this Order, file with the Commission in triplicate a written appearance stating an intention to appear on the date fixed for the hearing and to present evidence on the issues specified in this Order.

8. It is further ordered, that the applicants herein shall, pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and § 73.3594(g) of the Commission's rules, give notice of the hearing (either individually or, if feasible and consistent with the Rules, jointly) within the time and in the manner prescribed in such Rule, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the rules.

Federal Communications Commission.

Radio Technical Commission for Marine Services; Meetings

In accordance with Pub. L. 92-463, "Federal Advisory Committee Act," the schedule of future Radio Technical Commission for Marine Services (RTCM) meetings is as follows:

Executive Committee Meeting, Notice of August Meeting, Thursday, August 21, 1980—9:30 a.m., Conference Room 8240, Nassif (DOT) Building, 400 Seventh Street, S.W. at D Street, Washington, D.C.

Agenda

1. Administrative matters and committee reports.

2. Discussion concerning RTCM practices and procedures.

3. Consideration/discussion of petition received by National Ocean Industries Association to modify RTCM By-Laws.

The RTCM has acted as a coordinator for maritime telecommunications since its establishment in 1947. All RTCM meetings are open to the public. Written statements are preferred, but by previous arrangement, oral presentations will be permitted within time and space limitations.

Those desiring additional information concerning the above meeting(s) may contact either the designated chairman or the RTCM Secretariat (phone: (202) 632-6490).

Federal Communications Commission.
William J. Tricarico,
Secretary.

FEDERAL MARITIME COMMISSION

[Docket No. 80-51]

Missouri Pacific Railroad Co. v. Gulf European Freight Association, et al.; Filing of Complaint and Assignment

Notice is given that a complaint filed by Missouri Pacific Railroad Co. against Gulf European Freight Association; Lykes Brothers Steamship Co., Inc.; Barber Steamship Lines, Inc., as Agent for Gulf Europe Express; Biehl & Company, Inc., as Agent for Hapag Lloyd; Sea-Land Service, Inc.; United States Lines, Inc.; and Seatrain Lines, Inc. was served August 1, 1980. The complaint alleges that respondents' imposition of a surcharge for transportation of containers or trailers having a prior movement on various specifically named railroads results in violation of sections 15, 16 First, 17 and 18(a) of the Shipping Act, 1916.

This proceeding has been assigned to Administrative Law Judge William Beasley Harris. Hearing in this matter, if any is held, shall commence within the time limitations prescribed in 46 CFR 502.61. The hearing shall include oral testimony and cross-examination in the discretion of the presiding officer only upon a proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents or that the nature of the matter in issue is such that an oral hearing and cross-

BILLING CODE 6730-01-M

[Fact Finding Investigation No. 9]

Possible Rebates and Similar Malpractices in the United States Foreign Commerce; Extension of Investigation

By Order of August 6, 1979, the Federal Maritime Commission extended for a term of one year Fact Finding Investigation No. 9. This nonadjudicatory proceeding was instituted by Order of the Commission on July 9, 1976 (**Federal Register**, Vol. 41, No. 141, July 21, 1976), into the practices of rebates, absorptions, allowances in excess of those set forth in the tariff, and any other method of obtaining or allowing other persons to obtain transportation of property at less than the rates or charges which would otherwise be applicable in the United States foreign commerce.

Since its institution, Fact Finding Investigation No. 9 has been utilized as an integral part of the Commission's program into rebates and other malpractices in the foreign commerce of the United States. The Commission's continuing investigation into these matters raises the possibility that the compulsory processes authorized by Fact Finding Investigation No. 9 may have to be utilized to fully develop cases still pending final resolution.

In view of the above, the Commission has determined to extend the term of Fact Finding Investigation No. 9 for an additional two years. Further, that John Robert Ewers is designated Investigative Officer replacing James K. Cooper.

Therefore, it is ordered, that pursuant to sections 22 and 27 of the Shipping Act, 1916 (46 U.S.C. 821 and 826) and section 214(a) of the Merchant Marine Act of 1936 [46 U.S.C. 1124(a)], Fact Finding Investigation No. 9 is extended for two years after publication of this Order in the **Federal Register**.

It is further ordered, that John Robert Ewers is designated Investigative Officer replacing James K. Cooper.

It is further ordered, that Notice of this Order be published in the **Federal Register**.

By the Commission.

Francis C. Hurney,

Secretary.

[FR Doc. 80-23684 Filed 8-5-80; 8:45 am]

BILLING CODE 6730-01-M

[Docket No. 80-49]

Bultaco International, Ltd. and John Grace; Possible Violations of Allowable Rates and Charges; Order of Investigation and Hearing

Based on information developed by the Commission's Bureau of Enforcement, it appears that Bultaco International, Ltd. and John Grace may have obtained or attempted to obtain transportation by water for property at less than the rates or charges which would otherwise be applicable by unjust or unfair device or means.

The Commission's General Counsel asserted a claim for civil penalties against Bultaco and John Grace, President of Bultaco, jointly and severally, for receiving rebates from common carriers by water in connection with the importation of motorcycles from Spain for the period beginning on or before September 20, 1973 and continuing through June 10, 1976. However, as of this date the claim has not been settled.

Accordingly, the Commission believes an investigation and hearing is necessary in order to determine whether Bultaco International, Ltd. and John Grace have violated section 16, initial paragraph, Shipping Act, 1916, and, if so, whether penalties should be assessed for such violations.

Now, therefore, it is ordered, that pursuant to section 16, initial and penultimate paragraphs (46 U.S.C. 815, initial and penultimate paragraphs), and section 22 (46 U.S.C. 821) of the Shipping Act, 1916, this proceeding is hereby instituted to determine: (1) Whether or not Respondents violated section 16, initial paragraph, by obtaining or attempting to obtain transportation by water for property at less than the rates and charges which would otherwise be applicable by any unjust or unfair device or means; and (2) Whether penalties should be assessed against Respondents if found to have violated section 16, initial paragraph, and, if so, the amount of such penalties;

It is further ordered, that Bultaco International, Ltd. and John Grace, 3509 Virginia Beach Blvd., Virginia Beach, Virginia 23462, are hereby made Respondents in this proceeding and that the matter be assigned for public hearing before an Administrative Law Judge at a date and place to be determined by the Administrative Law Judge presiding in accordance with Rule 61 of the Commission's Rules of Practice and Procedure (46 CFR 502.61);

It is further ordered, that in accordance with Rule 42 of the Commission's Rules of Practice and Procedure (46 CFR 502.42), the Commission's Bureau of Hearing Counsel shall be a party to this proceeding.

It is further ordered, that any person other than Respondents and Hearing Counsel having an interest and desiring to participate in this proceeding shall file a petition for leave to intervene in accordance with Rule 72 of the Commission's Rules of Practice and Procedure (46 CFR 502.72); and

It is further ordered, that notice of this Order be published in the **Federal Register**, and a copy be served upon all parties of record.

By the Commission.

Francis C. Hurney,

Secretary.

[FR Doc. 80-23638 Filed 8-5-80; 8:45 am]

BILLING CODE 6730-01-M

[Docket No. 80-50]

Certified Corp., Seaway Distribution Corp.; Possible Violation of Allowable Rates; Order of Investigation and Hearing

Seaway Distribution Corporation is a non-vessel operating common carrier (NVOCC) in the trade to Hawaii from the U.S. West Coast. Certified Corporation, a wholesale distributor of grocery products in Hawaii, wholly owns Seaway. Certified ships its goods to Hawaii either by having the seller deliver directly to a vessel operating common carrier (VOCC) or by using Seaway as its agent to consolidate various goods and tender them to the VOCC in the name of Certified. At times Seaway will move the goods in its capacity as an NVOCC.

An investigation conducted by the Commission's Bureau of Enforcement indicates that between December 1, 1974 and August 5, 1975 Seaway, acting as a shipper, tendered VOCCs a total of 65 shipments destined to itself in Hawaii, the contents and/or weight or cube of which appear to have been knowingly misdeclared in order to obtain transportation at less than the applicable rate. The statute of limitations has run on 61 of these shipments; the remaining four shipments are listed in the Appendix.

Between March 4, 1975 and July 15, 1975 Seaway, as an agent for Certified, tendered five shipments to Matson Navigation Company for ocean carriage to Hawaii. Again, these shipments appear to have been misdeclared as to the nature of the commodity and/or its weight or cube. However, the statute of limitations has run on all shipments.

The shipments listed in the Appendix will be made the subject of an investigation to determine whether or not Certified or Seaway or both have violated section 16, Initial Paragraph, of the Shipping Act, 1916, and, if so, whether penalties should be assessed for such violations in accordance with Pub. L. 96-25 (93 Stat. 71).

Now therefore, it is ordered, that pursuant to section 16, Initial Paragraph (46 U.S.C. 815), and section 22 (46 U.S.C. 821) of the Shipping Act, 1916, this proceeding is hereby instituted to determine: (1) Whether or not Seaway Distribution Corporation and/or Certified Corporation violated section 16, Initial Paragraph, by knowingly and willfully misdeclaring the contents and/or the weight or cube of the shipments listed in the Appendix in order to obtain transporation at less than the applicable rate; and (2) whether penalties should be assessed against Respondents if they are found to have violated section 16, Initial Paragraph, and if so, the amount of such penalties;

It is further ordered, that Seaway Distribution Corporation and Certified Corporation are hereby made Respondents in this proceeding;

It is further ordered, that, in accordance with Rule 42 of the Commission's Rules of Practice and Procedure (46 CFR 502.42), the Commission's Bureau of Hearing Counsel is a party to this proceeding;

It is further ordered, That a public hearing be held in this proceeding and that the matter be assigned for hearing and decision by an Administrative Law Judge of the Commission's Office of Administrative Law Judges at a date and place to be hereafter determined by the Presiding Administrative Law Judge, but in no event later than the time limitation set forth in Rule 61 of the Commission's Rules of Practice and Procedure (46 CFR 502.61);

The hearing shall include oral testimony and cross-examination in the discretion of the Presiding Officer only upon a proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents or that the nature of the matters in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record;

It is further ordered, That notice of this Order be published in the **Federal Register**, and a copy be served upon all parties of record;

It is further ordered, That any person other than parties of record having an interest and desiring to participate in this proceeding shall file a petition for leave to intervene in accordance with Rule 72 of the Commission's Rules of Practice and Procedure (46 CFR 502.72);

It is further ordered, That all future notices, orders, and/or decisions issued by or on behalf of the Commission in this proceeding, including notice of the time and place of hearing or prehearing conference, shall be mailed directly to all parties of record;

It is further ordered, That, except as provided in Rules 159 and 201(a) of the Commission's Rules of Practice and Procedure, (46 CFR 502.159, 46 CFR 502.201(a)), all documents submitted by any party of record in this proceeding shall be filed in accordance with Rule 118 of the Commission's Rules of Practice and Procedure (46 CFR 502.118), as well as being mailed directly to all parties of record.

By the Commission.

Francis C. Hurney,

Secretary.

GENERAL ACCOUNTING OFFICE

Regulatory Reports Review; Receipt of Report Proposal

The following request for clearance of a report intended for use in collecting information from the public was received by the Regulatory Reports Review Staff, GAO, on July 28, 1980. See 44 U.S.C. 3512 (c) and (d). The purpose of publishing this notice in the **Federal Register** is to inform the public of such receipt.

The notice includes the title of the request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed NRC request are invited from all interested persons, organizations, public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed request, comments (in triplicate) must be received on or before August 25, 1980, and should be addressed to Mr. John M. Lovelady, Senior Group Director, Regulatory Reports Review, United States General Accounting Office, Room 5106, 441 G Street, NW, Washington, DC 20548.

Further information may be obtained from Patsy J. Stuart of the Regulatory Reports Review Staff, 202-275-3532.

Nuclear Regulatory Commission

The NRC requests an extension-without-change clearance of the Class Exemption for Reports Concerning Possible Generic Problems. As a part of its regulatory function the NRC conducts an inspection and enforcement program to ensure adequate protection of the health and safety of the public, common defense and security, and the quality of the environment. During the course of this process there have been occasions when an event or issue has or might have the potential for occurring at other facilities. This type of situation requires a prompt notificiation to others who may be similarly affected. Also, as a part of the NRC's licensing review process generic implications of events occur which may require licensees to then conduct a thorough evaluation of the problem and submit prompt formal reports to NRC. Currently there are 72 nuclear power plants licensed for operation and 89 plants which have received construction permits. In addition, applications for construction permits for 20 plants are under review. In the past, more than 90 percent of the generic problems identified have related to nuclear power plants. In addition to nuclear power plants, there are approximately 8,000 persons authorized by license to possess byproduct, source or special nuclear materials. Depending on the type of problem identified, the number of licensees affected could vary considerably. In the past notifications concerning possible generic problems have affected usually between 10 and 100 licensees. In one case in 1979, a notification of a possible generic problem was sent to approximately 4,900 licensees. The NRC estimates that respondent burden could average 139,000 hours annually per licensee depending on the number of events affecting each licensee and the complexity of reporting required for each event.

Norman F. Heyl,

Regulatory Reports Review Officer.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

Las Vegas District Grazing Advisory Board; Meeting

The Las Vegas District Grazing Advisory Board will meet Aug. 13 at 9 a.m. in the auditorium of the Caliente Elementary School, Caliente, NV.

The agenda is as follows: (1) Approval of previous meeting's minutes; (2) Introduction of the new district manager; (3) Discussion of FY–81 Range Betterment projects; (4) Discussion of the draft Barclay-Lime Mountain AMP; (5) Discussion of the Mustang AMP; (6) Public comment period; (7) Range tour of the Mustang Allotment.

The meeting is open to the public. Interested persons may make oral comments to the board during the public comment period or they may submit written comments for the board's consideration. Persons wishing to make an oral statement to the board must notify the District Manager (4765 W. Vegas Dr. or P.O. Box 5400, Las Vegas, NV 89102) prior to COB Aug. 12. Depending on the number of persons wishing to address the board, the District Manager may establish a per-person time limit.

Members of the public may also accompany the range tour, anticipated to leave Caliente at about 1 p.m., but they must provide their own transportation. Board members will be transported by BLM.

Summary minutes of the board meeting will be maintained at the district office. They will be available for inspection during regular business hours (7:30 a.m. to 4:15 p.m.) within 30 days after the meeting.

Dated: July 23, 1980.

Frank E. Bingham,

District Manager.

BILLING CODE 4310-84-M

District Grazing Advisory Board, Susanville, Calif.; Meeting

Notice is hereby given in accordance with Pub. L. 92–463 that a meeting of the Susanville District Grazing Advisory Board will be held on September 9, 1980.

The meeting will begin at 10:00 a.m. in the Surprise Area Office of the Bureau of Land Management, Cedarville, California.

The agenda for the meeting will include:

1. Report from Oregon Fish and Wildlife Service.
2. Range Betterment Project Priority Outlook for fiscal year 1981.
3. Cowhead/Massacre ES Status.
4. Cal Neva and Willow Creek ES Status.
5. Report on Tuledad AMP.
6. Base Property Requirements, Sec. 15, Memo CA–80–273.
7. Wilderness Study Review.
8. Wild Horse Gathering Report.
9. Advisory Board Funds.

The meeting is open to the public. Interested persons may make oral statements to the Board between 3:30 and 4:30 p.m., or file a written statement for the Board's consideration. Anyone wishing to make an oral statement must notify the District Manager, Bureau of Land Management, P.O. Box 1090, Susanville, California 96130, by September 5, 1980. Depending on the number of persons wishing to make oral statements, a per person list limit may be established.

Summary minutes of the Board Meeting will be maintained in the District Office and will be available for public inspection and reproduction (during regular business hours) within 30 days following the meeting.

Herman L. Kast,

Acting District Manager.

BILLING CODE 4310-84-M

Realty Action—Sale CA 6486; Public Lands in Plumas County, Calif.

July 28, 1980.

The following described land has been identified as suitable for disposal by sale under Section 203(a)(1) of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1713, at no less than the fair market value shown:

Legal description: Lot 18 in Sec. 24, T. 26 N., R. 9 E., Mount Diablo Meridian, California.

Acreage: 3.29.

Value: $22,500.00.

The above described land is being offered as a direct, noncompetitive sale to George and Alice Merrick, owners of the improvements on the sale tract. The land is bounded on three sides by privately-owned land. The Merricks own several structures on the land including a house which has been used by the family as their principal place of residence for many years. In 1978 the Merricks filed an application to obtain this land under the Color of Title Act, as amended, 43 U.S.C. 1068. However, the Merricks did not meet the requirements under the Act and their application was rejected. Therefore, disposal by direct sale, rather than public auction, will protect their equity investment in the improvements on the land, and eliminate an undue hardship if they were compelled to remove or otherwise dispose of the improvements. The lands are not required for any Federal purpose, and the public interest would be served by offering this land for sale.

The land will not be offered for sale until 60 days after the date of issuance of this notice.

The terms and conditions applicable to the sale are as follows:

1. All minerals in the land will be reserved to the United States in accordance with Section 209(a) of the Federal Land Policy and Management Act of 1976.
2. A right-of-way for ditches and canals will be reserved to the United States under 43 U.S.C. 945.
3. A right-of-way for a road will be reserved to the United States under Section 507 of the Federal Land Policy and Management Act of 1976.

Detailed information concerning the sale is available for review at the California State Office, Federal Office Building, 2800 Cottage Way, Sacramento, California 95825.

For a period of 45 days from the date of this notice, interested parties may submit comments to the Secretary of the Interior (LLM 320), Washington, D.C. 20240. Any adverse comments will be evaluated by the Secretary of the Interior who may vacate or modify this realty action and issue a final determination. In the absence of any action by the Secretary of the Interior, this realty action will become a final determination of the Department of the Interior.

Joan B. Russell,

Chief, Lands Section, Branch of Lands and Minerals Operations.

BILLING CODE 4310-84-M

Office of the Secretary

Oil Shale Tract Delineation—Tract Selection Criteria; Meetings

Notice is hereby given that meetings to establish criteria for tract delineation and tract selection for additional prototype oil shale leasing will be held on August 25, 1980, from 9:00 a.m. until 4:30 p.m. at the Salt Palace, Room 128, Salt Lake City, Utah; and on August 28, 1980, from 8:30 a.m. until 4:00 p.m., at the Wyer Auditorium, Denver Public Library, 13th Ave. and Broadway, Denver, Colorado.

On May 27, 1980 a decision was rendered by James A. Joseph, Under Secretary of the Interior, to expand the Department's Prototype Oil Shale Leasing Program and to prepare for a permanent oil shale leasing program.

Pursuant to that decision the Department is initiating the process to determine criteria for delineating and selecting tracts to be leased in the expanded prototype program. The purpose of the meetings announced herein is to solicit comments in establishing these criteria.

The meetings in Salt Lake City and Denver will cover the same agenda. The meetings are open to the public. It is expected that space will permit approximately 100 persons to attend in addition to Department representatives.

A portion of each meeting will be devoted to a presentation of the issues. Following will be a comment period when interested persons may make brief presentations or file written statements. Written statements also may be submitted from the date of this announcement until August 27, 1980, to Mr. Henry O. Ash, Office of the Oil Shale Environmental Advisory Panel, Department of the Interior, Room 690, Building 67, Denver Federal Center, Denver, Colorado 80225. Further information concerning these meetings may be obtained from Mr. Ash's office (telephone number 303–234–3275).

James W. Curlin,

Deputy Assistant Secretary, Land and Water Resources.

August 1, 1980.

BILLING CODE 4310-10-M

Oil Shale Task Force; Meetings

Notice is hereby given that meetings of the Oil Shale Task Force will be held on August 26, 1980, from 9:00 a.m. until 4:30 p.m., at the Salt Palace, Room 128, Salt Lake City, Utah; and on August 27, 1980, from 8:30 a.m. until 4:00 p.m., at the Wyer Auditorium, Denver Public Library, 13th Ave. and Broadway, Denver, Colorado.

The Oil Shale Task Force was established on May 17, 1980, pursuant to a decision of James A. Joseph, Under Secretary of the Interior, regarding expansion of the Department's Prototype Oil Shale Leasing Program and the preparation for a permanent oil shale leasing program. The purpose of the Task Force is to explore the issues involved in these two programs and present further information to the Under Secretary on the range of possible procedures that could be followed in achieving the objectives of his decisions and the effects that would flow from such procedures. The Task Force incorporates eleven Work Groups to address the issues involved. These Work Groups have met at various times throughout the summer and will provide consolidated reports of their findings to the Under Secretary on September 9, 1980 and October 1, 1980.

The purpose of the Task Force meetings announced herein is to solicit comment on Task Force findings prior to the submission of final reports to the Under Secretary.

The meetings in Salt Lake City and Denver will cover the same agenda. The meetings are open to the public. It is expected that space will permit approximately 100 persons to attend in addition to Task Force members. The first portion of each meeting will be devoted to presentation of Task Force work and findings. Following will be a comment period when interested persons may make brief presentations or file written statements. Written statements also may be submitted from the date of this announcement until August 27, 1980, to Mr. Henry O. Ash, Office of the Oil Shale Environmental Advisory Panel, Department of the Interior, Room 690, Building 67, Denver Federal Center, Denver, Colorado 80225. Further information concerning these meetings may be obtained from Mr. Ash's office (telephone number 303–234–3275).

James W. Curlin,

Deputy Assistant Secretary, Land and Water Resources.

INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Administrator; Agency for International Development; Delegation of Authority No. 3, Legal Services To Trade and Development Program

1. Pursuant to authority vested in me by the International Development Cooperation Agency (IDCA) Delegation of Authority No. 4, effective July 1, 1980, I hereby delegate to the Administrator of the Agency for International Development (AID) the authority to provide legal counsel to the Trade and Development Program including, but not limited to, the functions of:

(A) providing legal advice by clearing and recommending approval of proposed contracts and agreements for transmission to the appropriate offices in AID;

(B) making recommendations to the Director of the Trade and Development Program concerning approval of proposed projects and determinations under § 607(a) of the Foreign Assistance Act; and

(C) providing any of the legal services as necessary to the Trade and Development Program.

2. The authority delegated herein may be redelegated to the General Counsel in AID, and successively redelegated as appropriate, and may be exercised by persons who are performing the functions of designated officers on an acting basis.

3. Nothwithstanding any provision of this Delegation of Authority the Director or Acting Director of the Trade and Development Program may at any time exercise any function delegated by this Delegation of Authority.

4. This delegation of Authority shall be deemed effective as of July 30, 1980 and actions within the scope of this delegation and any redelegation thereunder undertaking prior hereto which are consistent with the terms and scope of this delegation are hereby ratified and confirmed.

Dated: July 30, 1980.

BILLING CODE 4710-02-M

INTERSTATE COMMERCE COMMISSION

Motor Carrier Permanent Authority Decisions; Decision-Notice

The following applications, filed on or after July 3, 1980, are governed by Special Rule 247 of the Commission's Rules of Practice, see 49 CFR 1100.247. Special rule 247 was published in the **Federal Register** of July 3, 1980, at 45 FR 45539.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.247(B). A copy of any application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings:

With the exception of those applications involving duly noted problems (e.gs., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated its proposed service warrants a grant of the application under the governing section of the Interstate Commerce Act. Each applicant is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests in the form of verified statements filed within 45 days of publication of this decision-notice (or, if the application later becomes unopposed) appropriate authority will be issued to each applicant (except those with duly noted problems) upon compliance with certain requirements which will be set forth in a notice that the decision-notice is effective. Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract".

Volume No. OPI–004

Decided: July 25, 1980.

By the Commission, Review Board Number 2, Members Chandler, Eaton and Liberman.

MC 119741 (Sub-271F), filed July 21, 1980. Applicant: GREEN FIELD TRANSPORT COMPANY, INC., 1515 Third Ave., NW., P.O. Box 1235, Fort Dodge, IA 50501. Representative: D. L. Robson (same address as applicant). Transporting *meats, meat products, and meat byproducts, and articles distributed by meat-packing houses,* as described in Sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates,* 61 M.C.C. 209 and 766 (except commodities in bulk and hides), from the facilities of Iowa Beef Processors, Inc., at or near Holcomb, KS, to points in IL, IN, IA, KS, KY, MI, MN, MO, NE, ND, OH, SD, and WI.

MC 139330 (Sub-6F), filed July 21, 1980. Applicant: F.V.T., INC., 106 Howard Dr., Williamstown Junction, NC 08094. Representative: Edward G. Villalon, 1032 Pennsylvania Bldg., Pennsylvania Ave. & 13th St., NW., Washington, DC 20004. Transporting (1) *fibrous glass products, mineral wool, mineral wool products, and insulating products,* and (2) *materials, equipment and supplies* used in the manufacture of the commodities in (1) above, between points in Baltimore County, MD, Middlesex and Camden Counties, NJ, DeKalb, Fulton, and Clarke Counties, GA, DuPage County, IL, Shelby County, TN, Dallas County, TX, Luzerne County, PA, Whitley County, KY, Wyandotte County, KS, Madera County, CA, Allen County, IN, and Marion and Shelby Counties, OH, on the one hand, and, on the other, points in the U.S. (except AK and HI).

MC 146451 (Sub-32F), filed July 21, 1980. Applicant: WHATLEY-WHITE, INC., 230 Ross Clark Circle, NE., Dothan, AL 36302. Representative: R. S. Richard, P.O. Box 2069, Montgomery, AL 36197. Transporting *wood burning furnace components,* from Dothan, AL, to Kewanee, IL.

Volume No. OP2–002

Decided: July 28, 1980.

By the Commission, Review Board Number 3, Members Parker, Fortier, and Hill.

MC 112713 (Sub-307F), filed July 17, 1980. Applicant: YELLOW FREIGHT SYSTEM, INC., P.O. Box 7270, Overland Park, KS 66207. Representative: John M. Records (same address as applicant). Over regular routes, transporting *general commodities* (except household goods as defined by the Commission and classes A and B explosives), moving on bills of lading of freight forwarders under 49 U.S.C. 10102(8), between the junction of Interstate Hwy 75 and U.S. Hwy 27, and Tampa, FL, over interstate Hwy 75, serving no intermediate points.

Note.—Applicant intends to tack the authority sought with its authority in MC 112713.

MC 127042 (Sub-300F), filed July 18, 1980. Applicant: HAGEN, INC., P.O. Box 3208, Sioux City, IA 51102. Representative: Fred E. Hagen (same address as applicant). Transporting *general commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment, from points in Cook, DuPage, Kane, Kendall, Lake and Will Counties, IL, to points in IA, KS, NE and SD.

MC 149443F filed July 8, 1980. Applicant: YELLOW FREIGHT SYSTEM, INC., P.O. Box 7270, Overland Park, KS 66207. Representative: John M. Records (same as applicant). Robert E. DeLand (same as applicant). *Contract carrier,* transporting *general commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between points in the U.S.

MC 151302F, filed July 16, 1980. Applicant: DONALD E. REYNOLDS d.b.a. BAR-TRAN, CO., 506 Manor, Box 119, Rock Port, MO 64482. Representative: Donald E. Reynolds (same as applicant). Transporting *petroleum and petroleum products,* in tank vehicles, between points in Wyandotte County, KS, on the one hand, and, on the other, points in DeKalb, Clay, Holt, and Atchison Counties, MO.

Volume No. OP2–005

Decided: July 28, 1980.

By the Commission, Review Board Number 3, Members Parker, Fortier, and Hill.

MC 123872 (Sub-117F), filed July 23, 1980. Applicant: W & L MOTOR LINES, INC., P.O. Box 3467, Hickory, NC 28601. Representative: Allen E. Bowman (same address as applicant). Transporting *meats, meat products, meat by-products and articles distributed by meat packinghouses* (except commodities in bulk and hides), between Finney County, KS, on the one hand, and, on the other, points in AL, FL, GA, IL, IN, IA, KS, KY, MI, MN, MS, MO, NE, NC, ND, OH, SC, SD, TN, VA and WI.

MC 123872 (Sub-118F), filed July 23, 1980. Applicant: W & L MOTOR LINES, INC., P.O. Box 3467, Hickory, NC 28601. Representative: Allen E. Bowman (same address as applicant). Transporting *plastic articles* (except in bulk) (1) between points in NC, on the one hand, and, on the other, points in AZ, CA, CO, FL, GA, ID, IL, IA, KS, MN, MO, MT, NE, NV, NM, ND, OK, OR, SD, TX, UT, WA, WI, and WY; and (2) between points in IL, on the one hand, and, on the other, points in AZ, CA, CO, FL, GA, ID, IA, KS, MN, MO, MT, NE, NV, NM, ND, NC, OK, OR, SC, SD, TN, TX, UT, VA, WA, WI, and WY.

MC 145102 (Sub-66F), filed July 21, 1980. Applicant: FREYMILLER TRUCKING, INC., 1400 S. Union Avenue, Bakersfield, CA 93307. Representative: Michael J. Wyngaard, 150 E. Gilman Street, Madison, WI 53703. Transporting *cheese and cheese products* from Livingston, WI to points in TX.

Volume No. OP3–002

Decided: July 25, 1980.

By the Commission, Review Board Number 1, Members Carleton, Joyce, and Jones.

MC 140665 (Sub-112F), filed July 21, 1980. Applicant: PRIME, INC., P.O. Box 4208, Springfield, MO 65804. Representative: H. J. Anderson (same address as applicant). Transporting *meats, meat products, meat byproducts, and articles distributed by meat packing houses,* as described in Sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates,* 61 M.C.C. 209 and 766, (except commodities in bulk and hides), from the facilities of Iowa Beef Processors, Inc., at or near Holcomb, KS, to points in AZ, CA, CO, ID, MT, NV, NM, OR, UT, WA, WY, IL, IN, IA, KS, KY, MI, MN, MO, NE, ND, OH, SD, WI, AR, LA, OK, TX, AL, FL, GA, MS, NC, SC, and TN.

BILLING CODE 7035-01-M

Motor Carriers Permanent Authority Decisions; Decision-Notice

The following applications, filed on or after July 3, 1980, are governed by Special Rule 247 of the Commission's Rules of Practice, see 49 CFR 1100.247. Special rule 247 was published in the **Federal Register** on July 3, 1980, at 45 FR 45539.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.247(B). Applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service and to comply with the appropriate statutes and Commission regulations. A copy of any application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.gs., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated its proposed service warrants a grant of the application under the governing section of the Interstate Commerce Act. Each applicant is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests in the form of verified statements filed on or before September (or, if the application later becomes unopposed) appropriate authority will be issued to each applicant (except those with duly noted problems) upon compliance with certain requirements which will be set forth in a notice that the decision-notice is effective. Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract".

BILLING CODE 7035-01-M

Motor Carrier Temporary Authority Application

The following are notices of filing of applications for temporary authority under Section 10928 of the Interstate Commerce Act and in accordance with the provisions of 49 CFR 1131.3. These rules provide that an original and two (2) copies of protests to an application may be filed with the Regional Office named in the **Federal Register** publication no later than the 15th calendar day after the date the notices of the filing of the application is published in the **Federal Register**. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the ICC Regional Office to which protests are to be transmitted.

Note.—All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

Motor Carriers of Property

Notice No. F-46

The following applications were filed in Region I. Send protests to Regional Authority Center, Interstate Commerce Commission, 150 Causway St., Rm. 501, Boston, MA 02114.

MC 151369 (Sub-1-1TA), filed July 25, 1980. Applicant: VIGEANT FREIGHT SYSTEM, INC., 676 Dartmouth Street, South Dartmouth, MA 02748. Representative: Francis E. Barrett, Jr., Esq., 10 Industrial Park Road, Hingham, MA 02043. *Ladies wearing apparel and accessories and materials and supplies used in the manufacture thereof* between No. Dartmouth, MA and points in PA, NJ, TN and New York, NY. [Notice No. 42]

Motor Carrier Temporary Authority Applications

July 31, 1980.

The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the **Federal Register** publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the **Federal Register.** One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

Note.—All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

Motor Carriers of Property

MC 56679 (Sub-158TA), filed December 5, 1979, and published in the **Federal Register** issue of February 19, 1980, and republished as corrected this issue. Applicant: BROWN TRANSPORT CORP., 352 University Avenue, SW, Atlanta, GA 30310. Representative: Leonard S. Cassell (same as applicant). Common carrier, regular routes, transporting *general commodities, with usual exceptions,* (1) between Dothan, AL and Memphis, TN serving points within fifteen (15) miles of Memphis, TN; from Dothan over US Hwy 231 to junction US HWY 31, thence over US Hwy 31 junction MS Hwy 72, thence over US Hwy 72 to Memphis, TN. (2) Between Atlanta, GA and Birmingham, AL; from Birmingham over Interstate Hwy 20 to Atlanta, GA. (3) Between Phenix City, AL and Montgomery, AL; from Phenix City over US Hwy 80 to Montgomery, AL. (4) Between Birmingham, AL and Memphis, TN; from Birmingham, AL over US Hwy 78 to Memphis, TN, and (5) between Montgomery, AL and Tupelo, MS; from Montgomery, AL, over US Hwy 82 to junction US Hwy 45, thence over US Hwy 45 to Tupelo, MS, serving Tupelo for purposes of joinder only. Serving all points in AL as intermediate or off-route points, for 180 days. An underlying ETA seeks 90-day authority. Carrier requests authority to tack the authority sought with its existing operating authority. Applicant requests to interline with other carriers at Birmingham, Montgomery, and Dothan, AL; Memphis, TN, and Atlanta, GA. Supporting shipper(s): There are 60 statements of support. Send protests to: Sara K. Davis, ICC, 1252 W. Peachtree St., N.W., Room 300, Atlanta, GA 30309. The purpose of this republication is to show tacking and interlining as previously omitted.

Agatha L. Mergenovich,
Secretary.

BILLING CODE 7035-01-M

Railroad Operating Rights Application(s) Directly Related To Finance Proceedings

The following operating rights application is filed in connection with pending abandonment applications under Section 10903 of the Interstate Commerce Act.

An application filed on or after March 1, 1979, is governed by Special Rule 247 of the Commission's *General Rules of Practice* also but is subject to petitions to intervene either with or without leave. An original and one copy of the petition must be filed with the Commission within 30 days after date of publication. A petition for intervention must comply with Rule 247(k) which requires petitioner to demonstrate that it (1) holds operating authority permitting performance of any of the service which the applicant seeks authority to perform, (2) has the necessary equipment and facilities for performing that service, and (3) has performed service within the scope of the application either (a) for those supporting the application, or, (b) where the service is not limited to the facilities of particular shippers, from and to, or between, any of the involved points. Persons unable to intervene under Rule 247(k) may file a petition for leave to intervent under rule 247(l) setting forth in the specific grounds upon which it is made, including a detailed statement of petitioner's interest, the particular facts, matters and things relied upon, the extent to which petitioner's interest will be represented by other parties, the extent to which petitioner's participation may reasonably be expected to assist in the development of a sound record, and the extent to which participation by the petitioner would broaden the issues or delay the proceeding.

Verified statements in opposition should not be tendered at this time. A copy of the protest or petition to

intervene shall be served concurrently upon applicant's representative.

The applicant states that approval of its application will not significantly affect the quality of the human environment nor involve a major regulatory action under the Energy Policy and Conservation Act of 1975.

MC 86779 M1F and MC 86779 (Sub-33M1F), filed July 7, 1980. Illinois Central Gulf Railroad Company, a Delaware Corporation, has filed a Petition for Modification of Certificates—Tennessee and Kentucky and an accompanying Application seeking removal of a restriction in its certificates affecting the following highway routes: Between Beaver Dam and Ownesboro, Kentucky, serving the intermediate points of Fordsville, Deanefield, Whitesville and Philpot, Kentucky. Between Princeton, Kentucky and Nashville, Tennessee, via Hopkinsville, Kentucky and Clarksville, Tennessee, serving various intermediate points. The restrictions sought to be removed require the carrier not to serve any point not a station on the Illinois Central Gulf Railroad. The justification given for removal of this restriction is that, pursuant to a plan of coordination of rail lines in Western Kentucky and Tennessee, the carrier has filed applications in Dockets AB-43 (Sub. No. 66) and AB-43 (Sub. No. 70) to abandon its rail lines between Fordsville and Ownesboro, Kentucky and between Hopkinsville, Kentucky and Nashville, Tennessee. Comments or objections to these proposed modifications of certificates should be filed with the Secretary, Interstate Commerce Commission, Washington, D.C. 20423, with copy properly served upon counsel for Petitioner whose address is as follows: John H. Doeringer, Senior General Attorney, Illinois Central Gulf Railroad Company, 233 North Michigan Avenue, Chicago, Illinois 60601; giving reasons for the objection if any.

By the Comission.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

[Docket No. AB-43 (Sub-No. 65F)]

Illinois Central Gulf Railroad Co., Abandonment Near Dwight, in Livingston County, IL; Findings

Notice is hereby given pursuant to 49 U.S.C. 10903 that by a Certificate and Decision decided July 18, 1980, a finding, which is administratively final, was made by the Commission, Review Board Number 5, stating that the present and future public convenience and necessity permit the abandonment of a line of railroad known as the Dwight District, extending from railroad milepost 74.624 to milepost 75.424 near Dwight, IL, in Livingston County, IL, a distance of 0.8 miles, subject to the conditions for the protection of employees discussed in *Oregon Short Line R. Co.—Abandonment Goshen*, 360 I.C.C. 91 (1979), and further that ICG shall keep intact all of the right-of-way underlying the track, including all the bridges and culverts for a period of 120 days from the decided date of the certificate and decision to permit any state or local government agency or other interested party to negotiate the acquisition for public use of all or any portion of the right-of-way. A certificate of public convenience and necessity permitting abandonment was issued to the Illinois Central Gulf Railroad Company. Since no investigation was instituted, the requirement of Section 1121.38(a) of the Regulations that publication of notice of abandonment decisions in the **Federal Register** be made only after such a decision becomes administratively final was waived.

Upon receipt by the carrier of an actual offer of financial assistance, the carrier shall make available to the offeror the records, accounts, appraisals, working papers, and other documents used in preparing Exhibit I (Section 1121.45 of the Regulations). Such documents shall be made available during regular business hours at a time and place mutually agreeable during regular business hours at a time and place mutually agreeable to the parties.

The offer must be filed and served no later than 15 days after publication of this Notice. The offer, as filed, shall contain information required pursuant to Section 1121.38(b)(2) and (3) of the Regulations. If no such offer is received, the certificate of public convenience and necessity authorizing abandonment shall become effective September 22, 1980.

Agatha L. Mergenovich,

Secretary.

[Docket No. AB-36 (Sub-No. 11)]

Oregon Short Line Railroad Co., Abandonment, and Discontinuance of Service by Union Pacific Railroad Co., Between Newdale and Belt, ID; Findings

Notice is hereby given pursuant to 49 U.S.C. 10903 that by a Certificate and decision decided July 18, 1980, a finding, which is administratively final, was made by the Commission, Review Board Number 5, stating that the present and future public convenience and necessity permit the physical abandonment by the Oregon Short Line Railroad Company and discontinuance of service by Union Pacific Railroad Company over a portion of a line of railroad known as the East Belt Branch extending from railroad milepost 38.56 near Newdale to milepost 44.28 at Belt, a distance of 5.72 miles in Fremont County, ID, subject to the conditions for the protection of employees discussed in *Oregon Short Line R. Co.—Abandonment Goshen*, 360 I.C.C. 91 (1979), and further that applicants shall keep intact all of the right-of-way underlying the track, including all the bridges and culverts for a period of 120 days from the decided date of the certificate and decision to permit any state or local government agency or other interested party to negotiate the acquisition for public use of all or any portion of the right-of-way. A certificate of public convenience and necessity permitting abandonment was issued to the Oregon Short Line Railroad Company and Union Pacific Railroad Gompany. Since no investigation was instituted, the requirement of § 1121.38(a) of the Regulations that publication of notice of abandonment decisions in the **Federal Register** be made only after such a decision becomes administratively final was waived.

Upon receipt by the carrier of an actual offer of financial assistance, the carrier shall make available to the offeror the records, accounts, appraisals, working papers, and other documents used in preparing Exhibit I (Section 1121.45 of the Regulations). Such documents shall be made available during regular business hours at a time and place mutually agreeable during regular business hours at a time and place mutually agreeable to the parties.

The offer must be filed and served no later than 15 days after publication of this Notice. The offer, as filed shall contain information required pursuant to § 1121.38(b) (2) and (3) of the Regulations. If no such offer is received, the certificate of public convenience and necessity authorizing abandonment shall become effective, September 22, 1980.

INTERNATIONAL TRADE COMMISSION

Chains and Parts Thereof of Cast-Iron or Steel From Italy; Request for Public Comments on Termination of Countervailing Duty Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Request for public comments on proposed termination of countervailing duty investigation under section 704(a) of the Tariff Act of 1930 and section 104(b) of the Trade Agreements Act of 1979, with regard to chains and parts thereof of cast-iron or steel from Italy.

EFFECTIVE DATE: August 6, 1980.

FOR FURTHER INFORMATION CONTACT: Mr. Lynn Featherstone, Office of Investigations, telephone number (202) 523-1376.

SUPPLEMENTAL INFORMATION: Section 104 of the Trade Agreements Act of 1979 contains the provisions for dealing with countervailing duty orders which had been issued under section 303 of the Tariff Act of 1930 as amended (19 U.S.C. 1303) prior to January 1, 1980. Where such orders are in effect, and have not been waived, section 104(b) requires the Commission to conduct an investigation upon the request of a government or a group of exporters of merchandise covered by the order, to determine whether an industry in the United States would be materially injured, threatened with material injury, or whether the establishment of such industry in the United States would be materially retarded if the order were to be revoked. Such investigation (similar to investigations carried under Title VII of the Trade Agreements Act) must be completed within three years of the date of its commencement (section 104(b)(3)).

On March 28, 1980, the Commission received a request from the Delegation of the Commission of European Communities for the review of the following countervailing duty order, *inter alia:*

Chains and parts thereof, of cast iron or steel from Italy. T.D. 77-249 (42 Fed. Reg. 54799, October 11, 1977).

The Commission has also been notified by counsel for the National Association of Chain Manufacturers, the original petitioner in the case leading to these countervailing duty orders, that the Association wishes to "withdraw its petition" with regard to chains and parts from Italy.

While there is no provision in the Trade Agreements Act of 1979, or in its legislative history, permitting termination of a transition case investigation, termination of a properly instituted countervailing duty investigation is permitted under section 704(a). That section directs the Commission to solicit public comment prior to termination and approve such termination only if it is in the public interest. Since termination is permitted under newly filed countervailing duty petitions, it should also be permitted in existing countervailing duty orders.

In light of the Commission's duty to consider the public interest, the Commission hereby requests written comments concerning the proposed termination of an investigation with regard to chains and parts thereof from Italy. These written comments must be filed with the Secretary of the Commission no later than September 5, 1980.

By order of the Commission.

Issued: July 30, 1980.

Kenneth R. Mason,

Secretary.

[FR Doc. 80-23699 Filed 8-5-80; 8:45 am]

BILLING CODE 7020-02-M

[Investigations Nos. 731-TA-27 and 28 (Preliminary)]

Menthol From Japan and the People's Republic of China

Determination

On the basis of the record in investigation No. 731-TA-27 (Preliminary), the Commission determines (Commissioners Bedell and Moore dissenting) [1] that there is no reasonable indication that an industry in the United States is being materially injured, or threatened with material injury, or that the establishment of an industry is being materially retarded by reason of imports from Japan of menthol, whether natural or synthetic, provided for in items 437.64 and 413.28 [2] of the Tariff Schedules of the United States (TSUS), which are allegedly sold or likely to be sold at less than fair value.

On the basis of the record in investigation No. 731-TA-28 (Preliminary), the Commission determines (Commissioner Stern dissenting) [3] that there is a reasonable indication that an industry in the United States is threatened with material injury [1] by reason of imports from the People's Republic of China of menthol, whether natural or synthetic, provided for in TSUS items 437.64 and 413.28,[2] which are allegedly sold or likely to be sold at less than fair value.

Background

On July 11, 1980, a petition was filed with the U.S. International Trade Commission and the U.S. Department of Commerce on behalf of Haarmann & Reimer Corporation, alleging that natural or synthetic menthol imported from Japan or from the People's Republic of China is being, or is likely to be, sold in the United States at less than fair value (LTFV). Accordingly, on June 16, 1980, the Commission instituted preliminary antidumping investigations Nos. 731-TA-27 and 28 (Preliminary) under section 733(a) of the Tariff Act of 1930 (19 U.S.C. 1673b(a)) to determine whether there is a reasonable indication that an industry in the United States is materially injured or is threatened with materials injury, or the establishment of an industry in the United States is materially retarded, by reason of imports of menthol, whether natural or synthetic, from Japan or from the People's Republic of China, as provided for in TSUS items 437.64 and 413.28. The statute directs that the Commission make its determination within 45 days of receipt of the petition, or in this case by July 28, 1980. On June 24, 1980, the Department of Commerce issued a notice announcing that it had found the petition to be properly filed within the meaning of its rules and that it was instituting an investigation. Notice to such effect was published in the **Federal Register** of July 2, 1980 (45 FR 44976). The product scope of the Commerce investigation is the same as that instituted by the Commission.

Notice of the institution of the Commission's investigations and of the public conference to be held in connection therewith was duly given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, D.C., and the Commission's office in New York City, and by publishing the notice in the **Federal Register** of June 19, 1980 (45 FR 41548). A public conference was held in Washington, D.C., on July 10, 1980.

In arriving at its determinations, the Commission has given due consideration to the information provided by the Department of Commerce, to all written submissions from interested parties, and to information adduced at the conference and obtained by the Commission's staff from questionnaires and other sources,

[1] Commissioners Bedell and Moore found reasonable indication of material injury or threat of material injury by reason of imports of menthol from Japan and the People's Republic of China.

[2] Item 408.60 for articles exported prior to July 1, 1980.

[3] Commissioner Stern finds that there not only is no indication of threat of material injury from alleged less-than-fair-value imports from the People's Republic of China of Menthol but also that there is no present injury from said imports.

V 45 / 153 AUG 6 80 UMI

all of which have been placed on the administrative record of these preliminary investigations.

Views of Chairman Bill Alberger and Vice Chairman Michael J. Calhoun

Determination and Conclusions of Law

On the basis of the record in investigation No. 731–TA–27 (Preliminary), we determine that there is no reasonable indication that an industry in the United States is materially injured or threatened with material injury, or that the establishment of an industry is materially retarded, by reason of imports from Japan of menthol, whether synthetic or natural, allegedly sold or likely to be sold at less than fair value (LTFV)

On the basis of the record in investigation No. 731–TA–28 (Preliminary), we determine that there is a reasonable indication that an industry in the United States is threatened with material injury by reason of imports from the People's Republic of China (China) of natural menthol allegedly sold or likely to be sold at less than fair value (LTFV).

Discussion

In these preliminary investigations, we consider the relevant domestic industry to be comprised of the four firms currently producing menthol in the United States. Section 771(4)(A) of the Tariff Act of 1930 (19 U.S.C. 1677(4)) provides, in part, guidance for determining what constitutes a domestic industry as follows:

(A) In general.—The term "industry" means the domestic producers as a whole of a like product, or those producers whose collective output of the like product constitutes a major proportion of the total domestic production of that product.

Section 771(10) of the Tariff Act of 1930 defines "like product" as "a product which is like, or in the absence of like, most similar in characteristics and uses with, the article subject to an investigation under this title."

The imported product alleged to be sold at LTFV is *l*-menthol. Imports of this product from Japan are synthetically produced while imports from China are exclusively natural menthol derived from the peppermint plant. The Ad Hoc Committee of American Importers of Natural Menthol argued in their post-conference submission that natural and synthetic menthols are not "like or similar" in characteristics and uses, and thus there exists no U.S. industry within the meaning of section 771(4)(A). The evidence indicates that synthetic and natural *l*-menthol have the same chemical formula and molecular structure, although synthetic menthol undergoes a chemical processing which natural menthol does not undergo. Apparently, while a small segment of endusers prefer the natural product because of actual or perceived qualitative differences, synthetic and natural menthol are used interchangeably by the vast majority of purchasers. We, therefore, find that domestically produced synthetic menthol is "like" the product imported from both Japan and China (synthetic and natural menthol, respectively) within the meaning of section 771(10) of the Tariff Act of 1930.

Having determined the nature of the domestic industry, Section 771(4)(D) of the Tariff Act of 1930 provides further guidance to the Commission in weighing the impact of alleged LTFV sales on that industry:

(D) Product Lines.—The effect of subsidized or dumped imports shall be assessed in relation to the United States production of a like product if available data permit the separate identification of production in terms of such criteria as the production process or the producers' profits. If the domestic production of the like product has no separate identity in terms of such criteria, then the effect of the subsidized or dumped imports shall be assessed by the examination of the production of the narrowest group or range or products, which includes a like product, for which the necessary information can be provided.

In accordance with section 771(4)(D), we have attempted where possible, to assess the impact of alleged LTVF imports on the production in the United States of *l*-menthol, that being potentially the narrowest "product line" comparable to the *l*-menthol being imported. *L*-menthol is the principal commercial form of menthol, and differs in characteristics and uses with the other commercial forms of menthol—*d*-menthol, racemic menthol,[4] and liquid menthol. Domestic producers, however, do not use separate facilities or specific workers in the production of *l*-menthol, since *d*-menthol, racemic menthol, and liquid menthol are all obtained as by products in the synthesis of *l*-menthol. Most U.S. producers do not keep profit and loss data which would enable us to clearly identify a separate product line for *l*-menthol. Therefore, the effects of alleged LTFV imports have been assessed on the production of all menthol where separate data on *l*-menthol in unavailable. U.S. producers' commercial shipments of *l*-menthol have also accounted for more than 70 percent of all U.S. producers' commercial shipments of menthol since 1978. For purposes of this preliminary investigation, therefore, we have assumed that the overall trends for the menthol industry would be indicative of the trends for *l*-menthol.

The recommended determination of the Commission's Director of Operations [5] concluded that since imports from Japan and China are fungible, similar in chemical structure and uses, and compete in the same markets they should be cumulated for the purposes of assessing their impact on the domestic industry. We disagree. The facts revealed by these two investigations indicate that the impact of increasing menthol imports from China is in sharp contrast to the insignificant effect of the declining imports from Japan.

Based on the declining imports of menthol from Japan and the declining ratio of these imports to apparent U.S. open-market consumption, as well as statements made by officials from Takasago, USA, the exclusive importer of menthol from Japan and a wholly owned subsidiary of the foreign producer,[6] we have concluded that the Japanese are withdrawing from the U.S. menthol market. Thus it seems inappropriate to cumulate imports of menthol from Japan with imports from China. Inventories of menthol from Japan also declined in the first quarter of 1980 relative to the corresponding period in 1979, and the pricing data available to the Commission indicate that prices paid for the Japanese product have been consistently higher than prices paid for the domestic product in 1978 and 1979. Considering all these factors, it is apparent that menthol imported from Japan is not contributing in any meaningful way to the material injury, or threat thereof, that might be caused by imports from other countries. We have, therefore, determined that there is no reasonable indication that an industry in the United States is materially injured or threatened with material injury by reason of alleged LTFV sales of menthol from Japan.

Although the Director of Operations recommended that imports of menthol from China be cumulated with those from Japan, he also stated that if imports from these two countries were *not* cumulated, he would nevertheless still recommend an affirmative determination of threat of material injury be reason of alleged LTFV imports from China.[7] We agree with his analysis and conclusion on this issue. The economic factors that we have analyzed pursuant to section 771(7) of the Tariff Act of 1930, point to a steady improvement in the production of menthol in the United States. However, U.S. producers' inventories of menthol have increased to very high levels, prices for *l*-menthol have declined steadily since 1978, and the profitability of U.S. producers of *l*-menthol on their menthol operations has declined steadily since 1977. Based on the sharply increasing imports of menthol from China, the sharply increasing inventories of these imports, and the increasing margins of underselling that appear in the period July 1979 through March 1980, evidence of price depression, declining profitability of U.S. menthol producers' and their increasing inventories of menthol, we have concluded that there is a reasonable indication that an industry in the United States is threatened with material injury by reason of alleged LTFV imports of menthol from China.

Findings of Fact

The following findings of fact are relevant to our determination in these investigations. These findings contain our analysis of the statutory criteria required by section 771(7) (B) and (C) of the Tariff Act of 1930.

A. *Volume of imports.*—1. The imported menthol alleged to be sold at LTFV is chemically and toxicologically the same as that produced in the United States, although there is a recognized difference between the natural and synthetic products. This difference resides in the odor, taste, and ability of the natural product to be certified as a natural ingredient. These differences, however, are only significant to a minor portion of the market (less than 10 percent). For the vast majority of end users of menthol, the synthetic and natural products appear to be interchangeable. (See Report at p. A–3)

2. Imports of menthol from Japan have declined steadily since 1978. They declined by more than 35 percent from 1978 to 1979, and by more than 15 percent in January–March 1980 over imports during the corresponding period in 1980. (See Report at p. A–28)

3. Imports of menthol from China increased dramatically from 29,000 pounds in 1977 to 649,000 pounds in 1979. (See Report at p. A–28)

4. Takasago, USA's end-of-period inventories of menthol increased by more than 50 percent from 1977 to 1979, but declined by more than 10 percent in January–March 1980 over those held for the corresponding period of 1979. (See Report at p. A–17)

5. U.S. importers' and end-of-period inventories of menthol from China have increased dramatically from virtually nothing in 1977 and 1978 to over 600,000 pounds in January–March 1980. Importers' inventories as of March 31, 1980, amounted to over 10 percent of apparent U.S. open-market consumption in 1979. Thus, inventories of menthol from China represent a significant overhang of the U.S. market. (See Report at p. A–17)

B. *The effect of imports on U.S. prices.*—6. U.S. producers' weighted average prices for *l*-menthol have generally declined since January 1978. the have declined from $7.30 per pound in January–March 1978 to $6.33 per pound in January–March 1980, or by 13 percent. (See Report at p. A–31)

7. The weighted average prices paid for *l*-menthol from Japan were consistently higher than prices paid for U.S. producers' *l*menthol from 1978 through 1979. Prices paid for imports from Japan dropped below U.S. producers' prices only in January–March 1980 and even then, the margin of underselling was less than 0.5 percent. (See Report at p. A–31)

8. The available data indicate that weighted average prices paid for menthol from China have declined at a faster rate than U.S. producers' weighted prices. Although these prices were generally higher than U.S. producers' weighted average prices throughout much of the period, they dropped below U.S. producers' prices in October–December 1979. The average margin of underselling in that quarter was three percent and increased to eight percent in January–March 1980. Prices of some importers of menthol from China were below the lowest U.S. prices from July 1979 through March 1980. In a market where menthol is sometimes traded within 10 cents per pound, these are significant margins. Moreover, since these prices generally reflect the delivered prices in contracts negotiated 1 to 2 years previous to the date of delivery, it may be assumed that the downward trend is significant and indicative of the trend for prices to be paid for menthol from China in 1980 and 1981. (See Report at p. A–31)

C. *Impact on the affected industry.*—9. After several years of sustained growth, U.S. producers' commercial shipments of menthol declined by 5 percent in January–March 1980 over shipments during the corresponding period of 1979. (See Report at p. A–8)

10. U.S. producers' inventories of menthol have increased to very high levels during the period under consideration. End-of-period inventories increased more than six-fold from 1977 to 1979 and nearly doubled in January–March 1980 relative to those in January–March 1979. As a ratio of net sales, U.S. producers' inventories of menthol more than doubled from 1977 to January–March 1980. (See Report at p. A–17)

11. Despite rapidly increasing sales, the profitability of domestic producers of *l*–menthol on their menthol operations has declined steadily since 1977. The ratio of net operating profits to net sales declined by more than 30 percent from 1977 to 1979. (See Report at p. A–23)

12. As a ratio of imports to apparent U.S. open-market consumption of menthol, imports from Japan have declined steadily since 1977. They declined from 10 percent in 1977 to 8 percent in January–March 1980, or by 24 percent. (See Report at p. A–28)

13. Imports from China have increased steadily and significantly as a ratio of apparent U.S. open-market consumption. The ratio increased from a nominal percentage in 1977 to over 30 percent in January–March 1980. (See Report at p. A–28)

14. The average number of production and related workers producing menthol declined slightly from 1978 to January–March 1980. (See Report at p. A–22)

15. Wages paid to all production and related workers producing menthol more than quadrupled from 1977 to 1979 and increased again in January–March 1980 over wages paid during the corresponding period in 1979. (See Report at p. A–22)

16. Overall U.S. capacity to produce menthol has increased steadily from 1977 to 1980 because Haarman & Reimer opened a new plant in 1978 which is still in the process of reaching optimal operating conditions. The capacity of other menthol producers has remained stable or declined. (See Report at p. A–14)

17. All information regarding U.S. producers' cash flow is considered "business confidential" and cannot be discussed publicly. Such information appears in the confidential version of the staff report at page A–36, and has been fully considered in our determination.

18. A $15 million investment was made by the petitioner Haarman & Reimer Corporation in a new U.S. production facility located in Bushy Park, South Carolina. Production at this plant was commenced in the first quarter of 1978. The inability of petitioner to operate this plant at a

[4] There are some similarities in characteristics between racemic menthol and *l*-menthol, and hence, some overlap in their applications.

[5] Chairman Alberger includes the recommended determination of the Director of Operations for informational purposes at the end of our opinion at pages 12–14.

[6] See transcript of Conference, page 92.

[7] Staff briefing at public Commission meeting, July 22, 1980.

V 45 / 153 AG 6 80 UMI

reasonable level of profit may threaten or impair the ability to raise additional capital necessary for future investments in U.S. facilities by petitioner and/or other firms. (Petition, public version, pages 37–41)

Supporting Statement by the Director of Operations for an Affirmative Preliminary Determination on Menthol From Japan and the People's Republic of China (Investigations Nos. 731–TA–27 and 28 (Preliminary))

I. *Recommendation.*—On the basis of my review of the information developed during these investigations, I recommend that the Commission determine that there is a reasonable indication that an industry in the United States is materially injured or is threatened with material injury by reason of the importation of menthol from Japan and the People's Republic of China (PRC) that is allegedly sold in the United States at less than fair value (LTFV). The question of material retardation of the establishment of an industry in the United States is not an issue in these investigations as there are four companies producing menthol in the United States.

II. *The industry.*—The industry in the United States is composed of four U.S. firms producing menthol. Although menthol is produced by the industry in four commercially signficant forms—*l*-menthol, *d*-menthol, racemic menthol, and liquid menthol, in 1979, *l* and racemic menthol represented over 90 percent of domestic production and over 98 percent of alleged LTFV imports. *D*-menthol is produced as a by-product of the petitioner's production process and internally consumed. Liquid menthol is dissimilar with all other forms of menthol in that it is a technical grade used in a limited number of industrial applications. Although the impact of LTFV imports appears to be on production of *l* and racemic menthol, all forms are produced in the same production facilities, utilizing the same equipment and the same employees. Most firms were unable to provide data in terms of labor and overhead costs or profitability on a product line basis. Therefore, the impact of alleged LTFV sales should be assessed on the domestic industry producing menthol.

III. *Material injury.*—(1) U.S. imports of menthol from Japan and the PRC are all alleged to be at LTFV prices. Alleged LTFV imports have increased substantially from over 300,000 pounds in 1977 to about 850,000 pounds in 1979. Imports from Japan and the PRC are fungiable, having the same chemical structures, the same end uses, similar prices and competing in the same markets. For these reasons the impact of imports from Japan and the PRC have been cumulated.

(2) The petition alleges significant price undercutting by imports from Japan and the PRC as compared with the price of like domestic products. The alleged result of such price undercutting was the 44 percent reduction of petitioner's price for *l*-menthol in slightly more than 3 years.

(3) Questionnaire data submitted to the Commission confirm a sharply downward trend in importers' and producers' prices. The prices of importers of Chinese and Japanese menthol began undercutting U.S. producers' prices for menthol delivered to U.S. customers beginning in the last quarter of 1979 and continuing into the first quarter of 1980.

(4) Despite rapidly increasing sales of menthol, profitability of U.S. producers' menthol operations declined sharply in 1979. Although net sales reported by the two largest U.S. producers increased by almost 15 percent from 1978 to 1979, the ratio of net operating profit to net sales declined by about 20 percent.

IV. *Threat of material injury.*—(1) Imports of menthol from Japan and the PRC, alleged to be sold at LTFV prices, increased by over 165 percent from 1977 to 1979.

(2) The share of the U.S. market accounted for by imports from Japan and the PRC increased from 11.0 percent in 1977 to 22.0 percent in 1979.

(3) U.S. producer's commercial shipments of menthol declined by 5 percent in Jan.–Mar. 1980 as compared to such shipments in Jan.–Mar. 1979.

(4) U.S. producers' inventories of menthol increased steadily during 1977–79 to extremely high levels. Inventories were equivalent to 21 percent of U.S. producers' sales in 1977 and to 33 percent in 1979. Inventories on March 31, 1980 were 85 percent greater than they were on March 31, 1979.

(5) The quantity of menthol held in inventory by producers' increased by more than 600 percent between December 31, 1977 and March 31, 1980.

(6) Importers of menthol from Japan and the People's Republic of China reported a thirteen-fold increase in inventories from 1977 to 1979. Importers' inventories continued to increase in 1980 reaching a level on March 31, 1980 over 200 percent greater than inventories on March 31, 1979.

(7) As a ratio of inventories to imports, importer's inventories represented 13 percent of imports in 1977 and over 74 percent of imports in 1979.

(8) According to data presented by the petitioner, the trend in price undercutting by alleged LTFV imports, confirmed by questionnaire data submitted to the Commission, is likely to worsen as deliveries on contracts negotiated in late 1979 and early 1980 are affected in late 1980 and in 1981.

(9) The PRC has dramatically increased its production of menthol from 1.1 million pounds in 1978 to an estimated 4.4 million pounds in 1980. Menthol has been designated by the Chinese Government as a product to be promoted for export to generate quick revenue without large investments. The PRC currently exports about 20 percent of its menthol production to the United States.

(10) The annual menthol production capacity of Takasago Perfumery, Ltd. is reported to be 1.0 million pounds. About 15 percent of Takasago's production in 1979 was exported to the U.S. In addition to Takasago, seven other Japanese firms produce menthol with a combined production capacity of over 600,000 pounds. These companies do not currently export to the United States.

V. *Conclusion.*—I recommend that the Commission determine that there is a reasonable indication that an industry in the United States is materially injured or is threatened with material injury by reason of the importation of menthol from Japan and the People's Republic of China that is allegedly sold in the United States at less than fair value.

Statement of Reasons of Commissioners George M. Moore and Catherine Bedell

On the basis of the information available in investigations Nos. 731–TA–27 and 28 (Preliminary), we determine that there is a reasonable indication that an industry in the United States is materially injured or threatened with material injury by reason of the importation of menthol from Japan and the People's Republic of China that is allegedly being sold or is likely to be sold at less than fair value (LTFV).

The following findings and conclusions, which are based on the record in these investigations, support our determination.

The Domestic Industry

The term "industry" is defined in section 771(4)(A) of the Tariff Act of 1930 (19 U.S.C. 1677(4)(A)) as meaning "the domestic producers as a whole of a like product, or those producers whose collective output of the like product constitutes a major proportion of the total domestic production of that product." The term "like product" is further defined in section 771(10) of the Tariff Act as meaning "a product which is like, or the absence of like, most similar in characteristics and uses with, the article subject to an investigation * * *"

In the present case, we find the industry to consist of the four U.S. firms producing menthol. There are four commercial forms of menthol—*l*-menthol, *d*-menthol, racemic menthol, and liquid menthol. Although the product alleged to be sold at LTFV is *l*-menthol, domestic producers do not use separate facilities or specific workers in the production of *l*-menthol. The other three commercial forms of menthol, *d*-menthol, racemic menthol, and liquid menthol are obtained as byproducts in the synthesis of *l*-menthol, in using the same equipment and labor as in the production of *l*-menthol. Most firms were unable to provide data in terms of labor, overhead costs, and profitability on a product-line basis.[8] Therefore, the alleged LTFV sales have been assessed on the basis of the domestic industry producing all types of menthol.

The imported menthol allegedly sold at LTFV is chemically and toxicologically the same as that produced in the United States. Although there is a perceived difference in the odor and taste of the natural product compared with those of the synthetic product, and although the natural product can be certified as a natural ingredient, these differences are significant only to a minority of end users, which account for less than 10 percent of U.S. consumption of menthol.[9] Thus, the vast majority of end users consider domestic menthol, as well as menthol from Japan and China, to be fungible articles, which have the same chemical structures, the same end uses, and similar prices and which compete in the same markets.

The Question of a Reasonable Indication of Material Injury or Threat Thereof

Section 733(a) of the Tariff Act of 1930 directs that the Commission "shall make a determination, based upon the best information available to it at the time of the determination * * *." Section 771(7)(A) defines the term "material injury" to mean "harm which is not inconsequential, immaterial, or unimportant." And section 771(7)B) and (C) directs that the Commission, in making its determination, consider, among other factors, (1) the volume of imports of the merchandise which is the subject of the investigations, (2) the effect of imports of such merchandise on prices in the United States for like products, and (3) the impact of such merchandise on domestic producers of like products.

Volume of imports.—Imports of *l*-menthol, which are allegedly being sold at LTFV, increased from 224,000 pounds in 1977 to 854,000 pounds in 1979, or by 280 percent, while total imports of menthol from Japan and China more than doubled.[10] As a share of apparent U.S. open-market consumption, imports from Japan and China increased steadily, from 11 percent in 1977 to over 30 percent in January–March 1980.[11] Thus the volume and relative market share of alleged LTFV imports showed dramatic increases over the period under consideration.

The Japanese have the capacity to produce 1 million pounds of menthol annually from a variety of feedstocks including *d*-limonene, *d*-citronella, thymol, and cornmint oil (dementholized peppermint oil).[12] The capability of the Chinese to produce menthol is virtually unlimited. Menthol has been designated by the Chinese government as a product to be promoted for exportation, and production has increased dramatically in the last 2 years. Estimated Chinese production of menthol is estimated to be 1.1 million pounds in 1978, 3.3 million pounds in 1979, and 4.4 million pounds in 1979.[13] If Chinese production should reach the estimated 1980 level, it would be much greater than estimated open-market consumption in the United States.[14]

Effect of imports on prices.—The data collected by the Commission on delivered prices for *l*-menthol demonstrate that U.S. prices have declined steadily and significantly since 1978. U.S. producers' weighted average prices declined from $7.30 per pound in January 1978 to $6.33 per pound in January–March 1980, or by 13 percent.[15] Although weighted average prices for *l*-menthol from Japan and China were generally higher, they declined at a faster rate than U.S. producers' prices.[16] In October–December 1979, weighted average prices for menthol from China dropped 3 percent below U.S. producer's weighted average prices, and in January–March 1980 this margin of underselling increased to 8 percent.[17]

In a market where menthol is sometimes traded within 10 cents a pound,[18] these margins are already significant. When they are viewed as indicative of a downward trend in contract prices for delivery in late 1980 or 1981, they have a clearly adverse effect on future prices as well. More than 90 percent of the menthol traded in the United States is bought and sold through contracts for future delivery.[19] These contracts can be negotiated anywhere from 6 months to 3 years before the date of delivery. They contain firm commitments on price and quantity by the supplier, but usually contain an escape clause which allows the purchaser to break the contract if it can find a supplier offering menthol at a lower price. When spot-market prices for menthol fall, prices for menthol throughout the market decline, bringing about price competition for contracts under negotiation, and thus effectively depressing prices for future delivery.

Impact of alleged LTFV imports on the affected industry.—After several years of sustained growth, U.S. producers' commercial shipments of menthol declined by 5 percent in January–March 1980 compared with shipments during the corresponding period of 1979.[20] Yet despite the generally increasing sales, U.S. producers' inventory levels have increased dramatically. The ratio of end-of-period inventories to sales of menthol increased from 21 percent in 1977 to 48 percent in 1979 and nearly doubled again in January–March 1980 relative to the ratio for January–March 1979.[21] As of March 31, 1980, inventories of all menthol amounted to more than 200 percent of the menthol sold during January–March 1980.[22]

Moreover, U.S. importers' inventories of menthol from Japan and China increased more than thirteenfold from December 31, 1977, to December 31, 1979.[23] Inventories continued their strong upward movement in 1980, more than tripling from March 31, 1979, to March 31, 1980.[24] Inventories of menthol from Japan and China held as of March 31, 1980, amounted to more than 2.5 times the menthol imported from these countries during January–March 1980.[25]

Despite rapidly increasing sales of menthol, U.S. producers' profitability on their menthol operations declined steadily after 1977.[26] The ratio of net operating profit to net sales declined by

more than 30 percent, reflecting the declining trend in prices.[27]

Conclusion

On the basis of the information developed during these investigations, we have concluded that there is a reasonable indication that an industry in the United States is materially injured or is threatened with material injury by reasons of alleged LTFV imports of menthol from Japan and China.

Views of Commissioner Paula Stern

I have determined that there is no reasonable indication of material injury or threat of such injury due to alleged less-than-fair-value (LTFV) imports of menthol from Japan or from the People's Republic of China (China). I would have reached the same conclusion had I found it appropriate to cumulate the effect of the imports from Japan and China.

The Imported Product

The Commission instituted these investigations with regard to all menthol, whether natural or synthetic, as provided for in items 437.64 and 413.68 of the Tariff Schedules of the United States. The imported product alleged to be sold at LTFV is *l*-menthol, which is the principal commercial form of menthol and differs in characteristics and uses with the other commercial forms of menthol—*d*-menthol, racemic menthol,[28] and liquid menthol. The domestic producers do not use separate facilities or workers in the production of *l*-menthol. Rather, *d*-menthol, racemic menthol, and liquid menthol are all obtained as by-products in the synthesis of *l*-menthol.

The product imported from China is a natural product obtained by distilling peppermint oil from peppermint plants followed by crystalization and separation of the menthol from the peppermint oil. The Japanese product is synthesized chemically, as is the menthol produced in the United States. While the imported *l*-menthol allegedly sold at LTFV is chemically and toxicologically the same as that produced in the United States, there remains a perceived difference in the odor and taste of the natural product as compared to the synthetic product. In addition, the natural product can be certified by food and flavor manufacturers as a natural ingredient. However, because the vast majority of purchasers now use synthetic and natural menthol interchangeably,[29] I find that domestically-produced synthetic menthol is a "like product" for both the synthetically-produced and natural imports, within the meaning of section 771(10) of the Tariff Act of 1930.

The Domestic Industry

The domestic industry consists of the four U.S. producers of menthol.[30] The smallest U.S. menthol producer, Givauden Corporation, produces only liquid menthol, not a marketable substitute for *l*-menthol. The next largest U.S. producer, Union Camp Corporation, also exclusively produces liquid menthol, which it consumes internally. SCM Corporation (SCM), the second largest firm, produces *l*-menthol and racemic menthol, which are primarily sold on the open market. SCM took no position on this investigation. Givauden, Union Camp, and SCM all produce menthol on equipment used to produce other chemicals. In contrast, the largest producer and petitioner in this investigation, Haarmann & Reimer, which makes *l*-menthol and its by-products, utilizes a plant dedicated exclusively to the production of menthol. Since its entry in the first quarter of 1978, Haarmann & Reimer has steadily increased its importance in the domestic industry.

I have attempted where possible to assess the impact of alleged LTFV imports on the production in the United States of *l*-menthol. However, most U.S. producers do not keep product line data as to production process, labor, overhead, or profits that would allow me to confine my analysis to *l*-menthol. Therefore, the effects of alleged LTFV imports have been assessed on the production of all menthol where seaparate data is unavailable. Thus, Givauden and Union Camp were included as parts of the domestic industry in spite of the fact that they produce only liquid menthol.

U.S. producers' commercial shipments of *l*-menthol have accounted for more than 70 percent of all U.S. producers' commercial shipments of menthol since 1978.[31] I have, therefore, necessarily made the assumption that the overall trends for the menthol industry would be indicative of the trends for the *l*-menthol industry.

The Question of a Reasonable Indication of Material Injury

Available data depict a rapidly growing and reasonably profitable industry. U.S. production of menthol has increased steadily and dramatically since 1977, by over 200 percent.[32] U.S. capacity to produce menthol has also increased steadily, by over 150 percent from 1977 to 1979, and again by more than five percent in January–March 1980 compared to the corresponding period in 1979.[33] Utilization of this greatly increased capacity has also increased steadily to an exceptionally high level in January–March 1980.[34] The average number of all employees in U.S. establishments producing menthol increased by more than 20 percent from 1977 to January–March 1980.[35] Wages paid to and manhours worked by all producers and related workers producing menthol also increased steadily and significantly since 1977.[36]

The aggregate figures for U.S. producers' profitability show a decline from 1977 to 1979.[37] Having individually examined the profitability of each producer of *l*-menthol, I have concluded that the data indicate adequate profits for the two relevant U.S. producers. SCM's profits can be characterized as adequate, if not good.

As to Haarmann & Reimer's profitability, one must consider the fact that it is but one part of a large, multinational corporation, Bayer AG, and its profits are to a large extent influenced by the transfer prices applicable to its purchase of feedstocks from and its sale of menthol to its corporate affiliates in other countries.[38] One must also take into consideration the fact that this firm has only been in business since 1978 and that it was entering a new, unfamiliar, market.[39] For example, it is questionable whether in making its decision, in 1975, to build production facilities to supply a subtantial segment of the U.S. market it factored in China as a possible reentrant into this market.[40] In addition, Haarmann & Reimer was marketing a new form of the product—a synthetic menthol made from a petrochemical rather than natural menthol—which was not readily accepted by consumers. Moreover, Haarmann & Reimer incurred all the costs inherent in the start-up process at its $15 million facility at Bushy Park, South Carolina. In light of these circumstances, Haarmann & Reimer's performance has been quite good.

U.S. producers' inventories of menthol have admittedly increased to high levels. However, the reasons for much of these increases are unrelated to the alleged LTFV imports. Haarmann & Reimer's production process requires the plant to operate at maximum potential capacity, twenty-four hours a day, seven days a week, three-hundred-sixty-five days a year in order to achieve reasonable production costs.[41] Thus, if the company cannot find buyers for its annual production of menthol, near its capacity of 1.5 million pounds, inventories necessarily build up.

A closer look at U.S. producers' inventories reveals that the by-products, *d*-menthol, racemic, and liquid menthol, not *l*-menthol, constitute a substantial portion of total menthol inventories.[42] Increasing inventories of *d*-menthol, liquid, and racemic menthol resulting from the increased production of *l*-menthol cannot be associated with the alleged LTFV imports of *l*-menthol. Moreover, these byproduct inventories can be classified as raw materials since Haarmann & Reimer recycles them into the production process of *l*-menthol. Haarmann & Reimer's increasing ratio of inventories to production of all menthol [43] appears more dramatic since it starts at zero. But in fact normal inventories for this firm cannot be known from its two year experience in the businesss.

I have been unable to find indications of injury to the domestic industry. I find the lack of a causal nexus between any possible injury or threat of injury and the alleged LTFV imports even more compelling toward a negative determination in this case.

Imports in the Menthol Commodity Market

Menthol is easy to store. It requires no special facilities or handling and deteriorates only minimally even after several years in storage. These characteristics, combined with the fact that the menthol market has traditionally been supplied with a natural product which is subject to the vagaries of nature, have apparently encouraged the development of a commodity market for menthol.[44] The impact of importers must be considered in light of the nature of this market.

Today, more than 90 percent of menthol in the United States is sold through contracts for future delivery.[45] These contracts may be negotiated six months to three years prior to the date of delivery. They represent a firm commitment of price and quantity by the supplier, but require less of a commitment from the purchaser. The purchaser can, in fact, opt out of his contract if he finds a supplier offering menthol at a lower price.[46] Thus, in the short run, the menthol market is price sensitive downward, *i.e.*, if spot-market prices fall, contract prices will decline, whereas if spot-market prices rise, the contract prices will remain the same and hold overall market prices down until the effect of prices in new contracts become significant.

In 1978 the supply to the U.S. market increased dramatically. Demand was increasing moderately, although apparent consumption, perhaps due to brokers' inventories, saw a marked increase.[47] Meanwhile, on the supply side, SCM had reentered as a supplier in 1975; Haarmann & Reimer entered with record production; imports from Brazil, the predominant supplier, increased; China reentered the market with a substantial quantity of menthol; and Japan continued as a supplier.

Imports of menthol from Japan have declined steadily as a ratio of apparent U.S. open market consumption, while imports from China have increased markedly as a ratio to apparent U.S. consumption.[48] This ratio increase for China appears large since we are witnessing China's reentry into the market from near zero. However, this increase is more than offset by the decline in the ratio of imports from all other countries.[49] The ratio of total imports of menthol to apparent U.S. open-market consumption has declined steadily, by 11 percent from 1977 to January–March 1980.[50] Thus, China is not increasing its market share at the expense of domestic producers, since domestic producers' share of the market is actually increasing.

Since 1978, the oversupply in the menthol market led to high inventories and decreasing prices.[51] These require examination as portents of injury.

The pricing information obtained by the Commission shows that prices have declined steadily since 1978. However, when one considers the significant oversupply that commenced at that time, it is not surprising that prices for both imported and domestically produced menthol declined, especially in light of the fact that the menthol market is price sensitive downward. Moreover, the pricing information obtained by the Commission indicates that during most of the period under consideration, prices paid for imports of menthol from Japan and China were considerably higher than prices paid for the domestic product.[52]

In the last quarter of 1979 and the first quarter of 1980, the delivered price of Chinese imports fell below domestic producer-delivered prices.[53] And in the first quarter of 1980 Japanese-delivered prices fell marginally below those of domestic producers.[54] However, delivered price data for a commodity sold essentially by contract for future delivery do not offer a meaningful picture. Furthermore, even if the same relationship between the imported and domestic product held for contract prices, it could not be assigned much weight without first establishing comparability in the lengths of the contracts. Because the Chinese were willing to make a longer-term contract than at least one major domestic producer,[55] establishing comparability could be quite complicated. An interesting price-related aspect of this investigation is that SCM decided to reenter and Haarmann & Reimer decided to start up production during this period of high prices following crop failures in Brazil.[56]

Growth of importers' inventories of a commodity contracted for future delivery results from increased purchases by consumers availing themselves of the opportunity to buy low and sell high when prices rise. In fact, importers' inventories of Chinese imports have increased, but there is nothing to show the *overall* inventories have also increased. Inventories of Japanese imports have in fact declined in 1979–1980.

Questionnaire data from one U.S. importer of menthol who inadvertently

[53] *See* report, p. A–31.

[54] *Ibid.*

[55] *Ibid.*, p. A–32.

[56] SCM had been driven out of the market in 1963 by plummeting prices due to a large supply of Brazilian menthol in the U.S. market.

V 45 / 153 AG 6 80 UMI

supplied total inventory data tends to support the conclusion that inventories of menthol imported from China, like total imports of menthol from China, while growing, are for the most part simply displacing inventories of menthol from other sources. Therefore, I am unable to find a threat of injury from these Chinese imports.

In attempting to verify Haarmann & Reimer's allegation of lost sales, the Commission's staff found no clear cut case of a sale lost to alleged LTFV imports for reason of price.[57] The four firms contacted confirmed purchasing imports from Japan or China. However, each stated that these purchases did not represent a change in the company's supply patterns. One company also stated that Haarmann & Reimer was unwilling to offer them the long-term contract it desired, whereas China was willing to break the traditional pattern of offering a contract for one or two years by extending a three-year contract.[58]

It also appears that U.S. consumers of menthol are moving to diversify sources of supply and have some interest in seeing their long-term traditional supplier, China, returned to the market.

Conclusion

By 1975 the steady growth of the U.S. market, the new technological methods for the production of menthol, and the two consecutive crop failures in Brazil enticed U.S.-based producers into the production of menthol. Since that time their production of menthol, the success of Brazil's crops, and normalization of trade relations with China have created an oversupply in the commodity market for menthol. Nevertheless, U.S. industry has been able to withstand the competition in this situation. The economic indicators are positive and profits, when considered in relation to each individual producer, are good. Thus, I find no reasonable indication that an industry in the United States is materially injured or threatened with material injury by reason of LTFV imports from the People's Republic of China and/or Japan.

DEPARTMENT OF JUSTICE

Antitrust Division

Proposed Final Judgment in United States v. Ashland Oil, Inc., et al., and Competitive Impact Statement Thereon

Notice is hereby given pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. 16(b)-(h), that a proposed Final Judgement and a Competitive Impact Statement (CIS) as set out below have been filed with the United States District Court for the Western District of Kentucky, at Louisville, in *United States* v. *Ashland Oil, Inc., et al.*, Civil No. 77-0342 L(A). the Complaint in this case alleges that four corporations (Ashland Oil, Inc., Cargill, Incorporated, Reichhold Chemicals, Inc., and Reliance Universal, Inc.) violated the Sherman Act by conspiring to fix the prices of coatings resins sold throughout the United States.

The proposed Judgment enjoins the defendants from engaging in or renewing the alleged conspiracy and from communicating with one another or with other coatings resins manufacturers about prices.

Ashland Oil, Inc. sold its coatings resins business before the filing of the proposed Judgment. It is enjoined from engaging in or renewing the alleged conspiracy, but is excused from certain other requirements of the proposed Judgment so long as it is not in the coatings resins business.

The CIS describes the terms of the proposed Judgment and the background of the action and concludes that the proposed Judgment provides appropriate relief against the violation alleged in the Complaint.

Public comment is invited within the 60-day comment period. Such comments, and responses thereto, will be published in the **Federal Register** and filed with the Court. Comments should be directed to John A. Weedon, Chief, Great Lakes Field Office, Antitrust Division, Department of Justice, 995 Celebrezze Federal Building, Cleveland, Ohio 44199.

Joseph H. Widmar,

Director of Operations.

U.S District Court for the Western District of Kentucky at Louisville

United States of America, Plaintiff, v. *Ashland Oil, Inc.; Cargill, Incorporated; Reichhold Chemicals, Inc.; and Reliance Universal, Inc.*, Defendants.

Civil Action No. C 77-0342 L (A), Judge Charles M. Allen.

Filed: July 11, 1980.

Stipulation

It is stipulated by and between the undersigned parties, by their respective attorneys, that:

1. The parties consent that a Final Judgment in the form hereto attached may be filed and entered by the Court, upon the motion of any party or upon the Court's own motion, at any time after compliance with the requirements of the Antitrust Procedures and Penalties Act (15 U.S.C. § 16), and without further notice to any party or other proceedings, provided that plaintiff has not withdrawn its consent, which it may do at any time before the entry of the proposed Final Judgment by serving notice thereof on defendant and by filing that notice with the Court.

2. In the event plaintiff withdrawns its consent or if the proposed Final Judgment is not entered pursuant to this Stipulation, this Stipulation shall be of no effect whatever and the making of this Stipulation shall be without prejudice to any party in this or any other proceeding.

Dated: July 11, 1980.

U.S. District Court for the Western District of Kentucky at Louisville

United States of America, Plaintiff, v. *Ashland Oil, Inc.; Cargill, Incorporated; Reichhold Chemicals, Inc.; and Reliance Universal, Inc.*, Defendants.

Civil Action No. C 77-0342 L (A).

Filed: July 11, 1980.

Final Judgment

Plaintiff, United States of America, having filed its complaint herein on July 22, 1977, and plantiff and defendants, by their respective attorneys, having consented to the entry of this Final Judgment without trial or adjudication of any issue of fact or law herein and without this Final Judgment constituting any evidence against or admission by any party with respect to any such issue;

Now, therefore, before the taking of any testimony and without trial or adjudication of any issue of fact or law herein and upon consent of the parties hereto, it is hereby

Ordered, adjudged and decreed, as follows:

I

This Court has jurisdiction of the subject matter of this action and of each of the parties consenting hereto. The Complaint states a claim upon which relief may be granted against each defendant under Section 1 of the Sherman Act (15 U.S.C. § 1).

II

As used in this Final Judgment, the term:

(A) "Person" means any individual, corporation, partnership, firm, association, or other business or legal entity;

(B) "Alkyd resins" means synthetic resins produced by the reaction of a poly-basic acid, a poly-hydric alcohol, and a mono-basic fatty acid or oil;

(C) "Copolymer resins" means alkyd resins modified with unsaturated monomers, such as vinyl toluene, styrene, or acrylic materials;

(D) "Urethane resins" means synthetic resins made by the reaction of isocyanates with hydroxyl-containing compounds;

(E) "Coatings resins" means alkyd resins, copolymer resins, and/or urethane resins; and

(F) "Coatings resins manufacturer" means any person engaged in the business of manufacturing coatings resins.

III

This Final Judgment applies to the defendants and to their officers, directors, agents, employees, subsidiaries, successors, and assigns, and to all other persons in active concert or participation with any of them who shall have received actual notice of this Final Judgment by personal service or otherwise, provided, however, that this Final Judgment shall not apply to transactions or activities solely between a defendant and its directors, officers, employees, parent companies, subsidiaries or any of them when acting in such capacity, nor does this Final Judgment apply to activities occurring outside the United States and not affecting the domestic or foreign commerce of the United States.

IV

Each defendant is enjoined and restrained from entering into, adhering to, participating in, maintaining, furthering, enforcing or claiming, either directly or indirectly, any rights under any contract, agreement, understanding, arrangement, plan, program, combination or conspiracy with any other coatings resins manufacturer to:

(A) fix, establish, raise, stabilize, or maintain the prices of coatings resins;

(B) allocate or divide the coatings resins business of any customer;

(C) allocate or divide coatings resins customers, territories, or markets;

(D) refrain from actively soliciting the coatings resins business of any customer or potential customer;

(E) submit any noncompetitive, collusive, or agreed-upon bids or quotations for coatings resins to any customer or potential customer.

V

Each defendant is enjoined and restrained from:

(A) Communicating to, requesting from, or exchanging with, any other defendant or any other coatings resins manufacturer any information concerning:

(1) the current or future prices, terms, or other conditions of sale for coatings resins by any coatings resins manufacturer, or any consideration or contemplation of changes therein;

(2) interest charges being or to be imposed for late payments by any customer or coatings resins;

(3) current or future drum differential charges to customers of coatings resins;

(4) current or future premium charges on any particular coatings resins;

(B) Complaining or otherwise commenting to any other coatings resins manufacturer concerning prices being or to be charged within the coatings resins industry, or those being or to be charged by that particular manufacturer.

VI

Nothing in Section V hereof shall:

(A) Prohibit the communication of prices, terms, or other conditions of sale or processing of coatings resins offered by a defendant to any other coatings resins manufacturer or offered by any other coatings resins manufacturer to a defendant in negotiating a purchase, sale, or contract for the processing of coatings resins, or other *bona fide* business transaction between that defendant and such other coatings resins manufacturer; or

(B) Be deemed to prohibit a defendant from entering into, participating, in, or maintaining with any other person an otherwise lawful joint venture agreement.

VII

Each defendant is ordered and directed to:

(A) Furnish a copy of this Final Judgment to each of its directors and to each of its officers, employees or agents who has any responsibility for the pricing or sale of coatings resins within sixty (60) days after the date of entry of this Final Judgment;

(B) Furnish a copy of this Final Judgment to each successor to those persons described in subsection (A) hereof within thirty (30) days after each such successor is employed;

(C) Obtain from each such person furnished a copy of this Final Judgment pursuant to subsections (A) and (B) hereof a signed receipt therefor, which receipt shall be retained in the defendant's files;

(D) Attach to each copy of this Final Judgment furnished pursuant to subsections (A) and (B) hereof a statement, in substantially the form set forth in Appendix A attached hereto, advising each person of his obligations and of such defendant's obligations under this Final Judgment, and of the criminal penalties which may be imposed upon him and upon such defendant for violation of this Final Judgment;

(E) Hold, within seventy-five (75) days after the date of entry of this Final Judgment, a meeting or meetings of the persons described in subsection (A) hereof, at which meeting such persons shall be instructed concerning the defendant's and their obligations under this Final Judgment. Similar meetings shall be held at least once a year for a period of five (5) years from the date of entry of this Final Judgment, which meetings shall also be attended by those persons described in subsection (B) hereof;

(F) Establish and implement a plan for monitoring compliance by the persons described in subsections (A) and (B) hereof with the terms of the Final Judgment; and

(G) File with this Court and serve upon the plaintiff within ninety (90) days after the date of entry of this Final Judgment, an affidavit as to the fact and manner of such defendant's compliance with subsections (A), (C), (D) and (E) hereof.

VIII

Each defendant shall require, as a condition of the sale or other disposition of all, or substantially all, of the assets of its coatings resins business that the acquiring party agree to be bound by the provisions of this Final Judgment. The acquiring party shall file with the Court and serve upon the

plaintiff its consent to be bound by this Final Judgment.

IX

For the purpose of determining or securing compliance with this Final Judgment and subject to any legally recognized privilege:

(A) Duly authorized representatives of the Department of Justice shall, upon written request of the Attorney General or of the Assistant Attorney General in charge of the Antitrust Division, and on reasonable notice to any defendant made to its principal office, be permitted:

(1) Access during the office hours of such defendant to inspect and copy all books, ledgers, accounts, correspondence, memoranda, and other records and documents in the possession or under the control of such defendant, who may have counsel present, relating to any matters contained in the this Final Judgment; and

(2) Subject to the reasonable convenience of such defendant and without restraint or interference from it, to interview officers, employees, and agents of such defendant, who may have counsel present, regarding any such matters.

(B) Upon the written request of the Attorney General or of the Assistant Attorney General in charge of the Antitrust Division made to the defendant's principal office, such defendant shall submit such written reports, under oath if requested, with respect to any of the matters contained in this Final Judgment as may be requested.

No information or documents obtained by the means provided in this Section IX shall be divulged by any representative of the department of justice to any person other than a duly authorized representative of the Executive Branch of the United States, except in the course of legal proceedings to which the United States is a party, or for the purpose of securing compliance with this Final Judgment, or as otherwise required by law.

(C) If at the time information or documents are furnished by a defendant to plaintiff, such defendant represents and identifies in writing the material in any such information or documents to which a claim of protection may be asserted under Rule 26(c)(7) of the Federal Rules of Civil Procedure, and said defendant marks each pertinent page of such material, "Subject to claim of protection under Rule 26(c)(7) of the Federal Rules of Civil Procedure," then 10 days notice shall be given by plaintiff to such defendant prior to divulging such material in any legal proceeding (other than a grand jury proceeding) to which that defendant is not a party.

X

Jurisdiction is retained by this Court for the purpose of enabling any of the parties to this Final Judgment to apply to this Court at any time for such further orders or directions as may be necessary or appropriate for the construction or carrying out of this Final Judgment, for the modification of any of the provisions hereof, for the enforcement of compliance herewith, and for the punishment of violations hereof.

XI

This Final Judgment shall terminate ten (10) years from the date of its entry.

XII

Entry of this Final Judgment is in the public interest.

Dated:

United States District Judge.

Appendix A

Notice

Re: *United States v. Ashland Oil, Inc.; Cargill, Inc.; Reichhold Chemicals, Inc.; and Reliance Universal, Inc.*

Civil Action No. C77-0342L(A) (W.D.Ky.).

Attached hereto is a copy of a Final Judgment entered ———, 1980 in the captioned case. We are required to provide this to you. You should read it carefully. The provisions of the Final Judgment contained in Sections IV and V apply to you. If you violate these provisions, you may subject the Company to a fine and you may also subject yourself to a fine and imprisonment.

U.S. District Court for the Western District of Kentucky at Louisville

United States of America, Plaintiff, v. *Ashland Oil, Inc.; Cargill, Incorporated; Reichhold Chemicals, Inc.; and Reliance Universal, Inc.*, Defendants.

Civil Action No. C 77-0342-L (A).

Filed: July 11, 1980.

Stipulation Concerning Final Judgment

Plaintiff, United States of America, and defendant, Ashland Oil, Inc., hereby stipulate that Section VII of the Final Judgment shall not apply to Ashland Oil, Inc., so long as Ashland Oil, Inc., does not manufacture or sell coatings resins, as defined in the Final Judgment.

Dated: July 11, 1980.

/s/ Edmund Round,

Counsel for the United States.

Ray S. Bolze,

Counsel for Ashland Oil, Inc.

United States District Judge.

U.S. District Court, for the Western District of Kentucky at Louisville

United States of America, Plaintiff, v. *Ashland Oil, Inc.; Cargill, Incorporated; Reichhold Chemicals, Inc.; and Reliance Universal, Inc.*, Defendants.

Civil No. C77-0342 l(A).

Judge Charles M. Allen.

Filed: July 11, 1980.

Competitive Impact Statement

Pursuant to Section 2 of the Antitrust Procedures and Penalties Act, 15 U.S.C. § 16(b)–(h), the United States files this Competitive Impact Statement relating to the proposed Final Judgment submitted for entry in this civil antitrust proceeding.

I

Nature and Purpose of the Proceeding

On July 22, 1977, the United States filed a civil antitrust Complaint alleging that four corporations had conspired to fix prices in violation of Section 1 of the Sherman Act, 15 U.S.C. § 1.

The Complaint alleges that, beginning in 1971 and continuing through November 1974, the defendants engaged in a combination and conspiracy to fix, raise, stabilize, and maintain the prices of coatings resins and to allocate among themselves the coatings resins business of certain of their major customers.

The Complaint seeks a judgment by the Court that the defendants engaged in an unlawful combination and conspiracy in restraint of trade in violation of the Sherman Act. It also asks that the Court perpetually enjoin and restrain the defendants from such activities in the future.

The defendants named in the Complaint are Ashland Oil, Inc. of Ashland, Kentucky; Cargill, Incorporated of Minneapolis, Minnesota; Reichhold Chemicals, Inc. of White Plains, New York; and Reliance Universal, Inc. of Louisville, Kentucky.

All the defendants in this action have previously pleaded *nolo contendere* to misdemeanor criminal charges concerning the same combination and conspiracy alleged in this action. Fines of $50,000 each were levied against Ashland Oil, Inc., Cargill, Incorporated, and Reichhold Chemicals, Inc. A fine of $40,000 was levied against Reliance Universal, Inc. This civil case had been held in abeyance until the criminal charges were resolved.

II

Description of the Practices Giving Rise to the Alleged Violation of the Antitrust Laws

For the purpose of this case, the Complaint defines "coatings resins" as alkyd, copolymer, and/or urethane resins. Coatings resins are used in the manufacture of paint and other protective and decorative coatings.

During the period covered by the Complaint, Ashland Oil, Inc., Cargill, Incorporated, and Reichhold Chemicals, Inc. manufactured and sold coatings resins throughout the United States. During the period covered by the Complaint, Reliance Universal, Inc. manufactured and sold coatings resins, other than urethane resins, throughout the United States, but principally in the area of the country east of the Mississippi River.

The Complaint alleges that the defendants engaged in an illegal combination and conspiracy beginning in 1971 and continuing thereafter through November 1974. That combination and conspiracy consisted of a continuing agreement, understanding, and concert of action among the defendants and co-conspirators to fix, raise, stabilize, and maintain the prices of coatings resins and to allocate among themselves the coatings resins business of certain of their major customers.

The Complaint alleges that the combination and conspiracy had the following effects, among others:

(A) prices for coatings resins were fixed, raised, stabilized, and maintained at artificial and noncompetitive levels;

(B) competition in the sale of coatings resins was restrained; and

(C) customers were deprived of the benefits of free and open competition in the market for coatings resins.

III

Explanation of the Proposed Final Judgment

The United States and the defendants have stipulated that the proposed Final Judgment may be entered by the Court at any time after compliance with the Antitrust Procedures and Penalties Act. The proposed Final Judgment states that it constitutes no admission by any party with respect to any issue of fact or law. Under the provisions of the Antitrust Procedures and Penalties Act, entry of the proposed Final Judgment is conditioned upon a determination by the Court that the proposed Judgment is in the public interest. Accordingly, Section XII of the proposed Final Judgment states that entry of this Judgment is in the public interest.

The proposed Final Judgment enjoins any direct or indirect renewal of the type of conspiracy alleged in the Complaint. Specifically, Section IV enjoins and restrains the defendants from entering into, adhering to, participating in, maintaining, furthering, enforcing, or claiming, either directly or indirectly, any rights under any contract, agreement, understanding, arrangement, plan, program, combination, or conspiracy with any other coatings resins manufacturer to:

(A) fix, establish, raise, stabilize, or maintain the prices of coatings resins;

(B) allocate or divide the coatings resins business of any customer;

(C) allocate or divide coatings resins customers, territories, or markets;

(D) refrain from actively soliciting the coatings resins business of any customer or potential customer;

(E) submit any noncompetitive, collusive, or agreed-upon bids or quotations for coatings resins to any customer or potential customer.

Section V further enjoins the defendants from communicating with each other or with any other coatings resins manufacturer about the prices or terms of sale of coatings resins. Specifically, the defendants are enjoined and restrained from:

(A) communicating to, requesting from, or exchanging with any other defendant or any other coatings resins manufacturer any information concerning:

(1) the current or future prices, terms, or other conditions of sale for coatings resins by any coatings resins manufacturer, or any consideration or contemplation of changes therein;

(2) interest charges being or to be imposed for late payments by any customer of coatings resins;

(3) current or future drum differential charges to customers of coatings resins;

(4) current or future premium charges on any particular coatings resins;

(B) complaining or otherwise commenting to any other coatings resins manufacturer concerning prices being or to be charged within the coatings resins industry, or those being or to be charged by that particular manufacturer.

Since manufacturers of coatings resins often sell coatings resins to one another as well as to makers of paint and other coatings, Section VI of the proposed Final Judgment permits *bona fide* buyer-seller communications between the defendants. Section VI also provides that Section V does not prohibit otherwise lawful joint venture agreements.

Section VII of the proposed Final Judgment orders the defendants to furnish a copy of the Final Judgment to each of their directors and each of their officers, employees, or agents who has any responsibility for the pricing or sale of coatings resins. Successors of those persons are also to be furnished a copy of the Judgment. Each copy of the Final Judgment so provided will have attached a statement informing the recipient that a violation of the Final Judgment could result in a fine for the company and a fine and imprisonment for the individual. Section VII also requires each defendant to hold a meeting every year for five years at which the persons listed above are instructed on their obligations and their company's obligations under the Final Judgment. The defendants are required to monitor the compliance of those persons.

Ashland Oil, Inc., is exempted from Section VII because it is no longer in the business of manufacturing or selling coatings resins. Ashland sold that business on December 11, 1978. The United States and Ashland Oil, Inc. have entered into a stipulation filed together with the proposed Final Judgment. That stipulation provides that, so long as Ashland Oil, Inc. does not manufacture or sell coatings resins, the provisions of Section VII will not apply to it. All other provisions of the proposed Final Judgment, including the injunctive provisions, will apply to Ashland Oil, Inc.

Section III of the proposed Final Judgment makes the Judgment applicable to each defendant and to the officers, directors, agents, employees, subsidiaries, successors, and assigns of each defendant, as well as all other persons in active concert or participation with any of them who have received actual notice of the Final Judgment. That Section exempts from the proposed Final Judgment the following:

(A) transactions or activities solely between a defendant and its directors, officers, employees, parent companies, or subsidiaries when acting in such capacity; and

(B) activities occurring outside the United States and not affecting the domestic or foreign commerce of the United States.

Section VIII requires that, if a defendant sells the assets of its coatings resins business, the purchaser must agree to be bound by the Final Judgment and must so inform the Court and the United States.

Section XI makes the Final Judgment effective for ten years from the date of its entry.

Standard provisions similar to those found in other antitrust Final Judgments entered by consent are contained in Section I (jurisdiction of the Court), Section IX (investigation and reporting requirements), and Section X (retention of jurisdiction by the Court).

It is anticipated that the relief provided by the proposed Final Judgment will have a salutory effect on competition in the coatings resins market. Not only have the defendants been enjoined from future collusive behavior, they are also required to provide copies of the Final Judgment to each of their directors and to each of their officers, employees, or agents who has any responsibility for the sale or pricing of coatings resins. In addition, those people must meet annually to be instructed about their responsibilities under the Judgment. It is anticipated that these provisions will reduce the possibility of future violations.

IV.—Remedies Available to Potential Private Plaintiffs

After entry of the proposed Final Judgment, any potential private plaintiff that might have been damaged by the alleged violation will retain the same right to sue for monetary damages and any other legal or equitable relief that it may have had if the Final Judgment had not been entered. The Final Judgement may not be used, however, as *prima facie* evidence in private litigation, pursuant to Section 5(a) of the Clayton Act, as amended, 15 U.S.C. § 16(a).

V.—Procedures Available for Modification of the Proposed Final Judgment

As provided by the Antitrust Procedures and Penalties Act, any person believing that the proposed Final Judgment should be modified may submit written comments within the 60-day period provided by the Act to John A. Weedon, Chief, Great Lakes Field Office, Antitrust Division, United States Department of Justice, 995 Celebrezze Federal Building, Cleveland, Ohio 44199 (telephone: 216–522–4070). These comments and the Department's responses to them will be filed with the Court and published in the **Federal Register.**

All comments will be given due consideration by the Department of Justice. The Department remains free to withdraw its consent to the proposed Final Judgment at any time prior to its entry if it should determine that some modification is necessary. Further, Section X of the proposed Judgment provides that the Court retains jurisdiction over this action for the life of the Final Judgment and that the parties may apply to the Court for such order as may be necessary or appropriate for the modification, interpretation, or enforcement of the Judgment after its entry.

VI.—Alternatives to the Proposed Final Judgment

The alternative to the proposed Final Judgment considered by the Antitrust Division was a full trial on the merits and on relief. The Division considers the proposed Judgment to be of sufficient scope and effectiveness to make a trial unnecessary, since it provides appropriate relief against the violations alleged in the Complaint.

VII.—Determinative Materials and Documents

No materials or documents were considered determinative by the United States in formulating the proposed Final Judgment. Consequently, none is being filed

V 45 / 153 AG 6 80 UMI

pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. § 16(b).

Respectfully submitted,

John A. Weedon, David F. Hils, *Attorneys Department of Justice.*

BILLING CODE 4410-01-M

Office of the Attorney General

[Order No. 904–80]

Modifications to List of Bureau of Prisons Institutions

AGENCY: Department of Justice.

ACTION: Notice.

SUMMARY: Attorney General Order No. 646–76 (41 FR 14805) classifies and lists the various Bureau of Prisons Institutions. Order No. 649–76 (41 FR 19233), Order No. 842–79 (44 FR 44629), Order No. 854–79 (44 FR 58002), and Order No. 860–79 (44 FR 64922) amended the list published by Order No. 646–76. This order further modifies the list by redesignating the Federal Correctional Institution at Seagoville, Texas, as a Federal Prison Camp; by designating new Federal Correctional Institutions at Lake Placid, New York and at Otisville, New York; and by deleting El Paso, Texas, as a Federal Detention Center.

EFFECTIVE DATE: July 25, 1980.

FOR FURTHER INFORMATION CONTACT: Ira B. Kirschbaum, Assistant General Counsel, Bureau of Prisons, U.S. Department of Justice, 320 1st Street, NW., Washington, D.C. 20534 (202–724–3062).

By virtue of the authority vested in me by sections 4003, 4081 and 4082 of Title 18, United States Code, Attorney General Order No. 646–76, as amended, is further amended as follows:

Subparagraph B of Order No. 646–76 is amended to delete Seagoville, Texas, as a Federal Correctional Institution and to add Otisville, New York, and Lake Placid, New York, as Federal Correctional Institutions.

Subparagraph C of Order No. 646–76 is amended to add Seagoville, Texas, as a Federal Prison Camp.

Subparagraph F of Order No. 646–76 is amended to delete El Paso, Texas, as a Federal Detention Center.

Dated: July 25, 1980.

Benjamin R. Civiletti,

Attorney General.

BILLING CODE 4410-01-M

Proposed Consent Decree and Action To Obtain Damages for Discharge of Pollutants by the City of Lenoir, N.C.

In accordance with Department policy, 28 CFR 50.7, 38 FR 19029, notice is hereby given that on March 17, 1980, a proposed consent decree in *United States of America* v. *City of Lenoir and State of North Carolina*, Civil Action No. St–C–79–29, was lodged with the United States District Court for the Western District of North Carolina, Statesville Division.

The consent decree imposes a civil penalty of $10,000 and requires the City to meet certain construction deadlines at the existing wastewater treatment facilities. The City is required to have its new wastewater treatment plant operational by June 1982.

The proposed consent decree may be examined at the Office of the United States Attorney for the Western District of North Carolina in Charlotte, North Carolina; at the Region IV office of the Environmental Protection Agency, Enforcement Division, 345 Courtland Street, NE., Atlanta, Georgia 30308; and at the Pollution Control Section, Land and Natural Resources Division of the Department of Justice, Room 1734, 9th and Pennsylvania Avenue, NW., Washington, D.C. 20530.

The Department of Justice will receive written comments relating to the proposed consent decree for a period of 30 days from the date of this notice, comments should be addressed to the Deputy Assistant Attorney General, Land and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and should refer to *United States of America* v. *City of Lenoir and the State of North Carolina* (W.D.N.C., Civil Action ST–C–79–29; D.J. 90–5–1–1–895).

Angus MacBeth,

Deputy Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-01-M

Office of Attorney General

[AAG/A Order No. 53–80]

Privacy Act of 1974; New System of Records

Pursuant to the provisions of the Privacy Act of 1974 (5 U.S.C. 552a), notice is hereby given that the Department of Justice proposes to establish a new system of records to be maintained by the Drug Enforcement Administration (DEA). Further, in the Proposed Rules Section of today's **Federal Register**, DEA proposes to exempt the system, to the extent the information is subject to exemptions pursuant to 5 U.S.C. 552a(j) and (k), from the provisions of 5 U.S.C. 552a(c)(3) and (4), (d), (e)(1), (2) and (3), (e)(4)(G) and (H), (e)(5) and (8), (f), (g) and (H) pursuant to 5 U.S.C. 552a(j) and (k). the purpose of these exemptions is as follows:

(1) From (c)(3) because the release of the disclosure accounting for disclosure pursuant to the routine uses published for this system would permit the subject of a criminal investigation to obtain valuable information concerning the nature of that investigation and present a serious impediment to law enforcement.

(2) From subsection (c)(4) because an exemption is being claimed for subsection (d), and this subsection will therefor not be applicable.

(3) From subsection (d) because access to records contained in this system would alert a subject to the existence of investigation and thereby provide information to the subject which might enable him to avoid detection or apprehension, and present a serious impediment to law enforcement.

(4) From subsection (e)(1) because in the course of criminal investigations, DEA often detects violation of non-drug-related laws. In the interests of effective law enforcement, it is necessary that DEA retain all information obtained in criminal investigations because it can aid in establishing patterns of criminal activity and assist other law enforcement agencies that are charged with enforcing other segments of criminal law.

(5) From subsection (e)(2) because information collected to the greatest extent possible from the subject individual of a criminal investigation would provide the subject with valuable information which might preclude detection or apprehension of the subject individual.

(6) From subsection (e)(3) because the requirement that individuals supplying information be provided a form stating the requirements of subsection (e)(3) would constitute a serious impediment to law enforcement in that it could compromise the existence of a confidential investigation, reveal the identity of confidential sources of information and endanger the life or physical safety of confidential informants.

(7) From subsections (e)(4)(G) and (H) because this system of records is exempt from individual access pursuant to subsection (j) of the Privacy Act of 1974.

(8) From subsection (e)(5) because in the collection of information for law enforcement purposes it is impossible to determine in advance what information is accurate, relevant, timely and complete. With the passage of time, seemingly irrelevant or untimely information may acquire new significance as further investigation brings new details to light and the accuracy of such information can only be determined in a court of law. The restrictions imposed by subsection (e)(5) would restrict the ability of trained investigators and intelligence analysts to exercise their judgment in reporting on investigations and impede the development of criminal intelligence necessary for effective law enforcement.

(9) From subsection (e)(8) because the individual notice requirements could present a serious impediment to law enforcement by interfering with DEA's ability to issue administrative techniques and procedures.

(10) From subsection (f) because this system has been exempted from the access provisions of subsection (d).

(11) From subsections (g) and (h) because this system is compiled for law enforcement purposes and has been exempted from the access provisions of subsections (d) and (f).

The Regional Automated Intelligence Data System (RAIDS) (JUSTICE/DEA–028) is a new system of records for which no public notice consistent with the provisions of 5 U.S.C. 552a(e)(4) has been published in the **Federal Register.**

5 U.S.C. 552a(e)(4) and (11) provide that the public be provided a 30-day period in which to comment; the Office of Management and Budget (OMB), which has oversight responsibility under the provisions of the Act, requires a 60-day period in which to review the system before it is implemented. Therefore, the public, OMB, and the Congress are invited to submit written comments on this system. Comments should be addressed to the Administrative Counsel, Justice Management Division, Department of Justice, 10th and Constitution Avenue, N.W., Room 1214, Washington, D.C. 20530. If no comments are received from either the public, OMB, or the Congress on or before October 6, 1980, the system will be implemented without further notice in the **Federal Register**, except that the final rule exempting the system will be published after 60 days. No oral hearings are contemplated.

A report of the proposed system has been provided to the Director, OMB, to the President of the Senate, and to the Speaker of the House of Representatives.

Dated: July 24, 1980.

William D. Van Stavoren,

Acting Assistant Attorney General for Administration.

Justice/DEA–028

SYSTEM NAME:

Regional Automated Intelligence Data System (RAIDS).

SYSTEM LOCATION:

Drug Enforcement Administration, 8400 NW 53rd Street, Miami, Florida 33166.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals suspected of illicit narcotic trafficking.

CATEGORIES OF RECORDS IN THE SYSTEM:

Information extracted from DEA investigative reports.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

The Comprehensive Drug Abuse Prevention and Control Act of 1970 (Pub. L. 91–513).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Information contained in this system is provided to the following categories of users as a matter of routine use for law enforcement and regulatory purposes: (a) Other federal law enforcement and regulatory agencies; (b) State and local law enforcement and regulatory agencies; (c) Foreign law enforcement agencies with whom DEA maintains liaison; (d) The Department of Defense and military departments; (e) The Department of State; (f) United States intelligence agencies concerned with drug enforcement; (g) The United Nations; (h) The International Police Organization (Interpol); and (i) To individuals and organizations in the course of investigations to elicit information.

In addition, disclosures are routinely made to the following categories for the purposes stated: (a) To federal agencies for national security clearance purposes and to federal and state regulatory agencies responsible for the licensing or certification of individuals in the fields of pharmacy and medicine; (b) To the Office of Management and Budget, upon request, in order to justify the allocation of resources; (c) To state and local prosecutors for assistance in preparing cases concerning criminal and regulatory matters; and (d) To respondents and their attorneys for purposes of discovery, formal and informal, in the course of an adjudicatory, rulemaking, or other hearing held pursuant to the Controlled Substances Act of 1970.

Release of information to the news media: Information permitted to be released to the news media and the public pursuant to 28 CFR 50.2 may be made available from systems of records maintained by the Department of Justice unless it is determined that release of the specific information in the context of a particular case would constitute an unwarranted invasion of personal privacy.

Release of information to Members of Congress: Information contained in systems of records maintained by the Department of Justice, not otherwise required to be released pursuant to 5 U.S.C. 552, may be made available to a Member of Congress or staff acting upon the Member's behalf when the Member or staff requests the information on behalf of and at the request of the individual who is the subject of the record.

Release of information to the National Archives and Records Service: A record from a system of records may be disclosed as a routine use to the National Archives and Records Service (NARS) in records management inspection conducted under the authority of 44 U.S.C. 2094 and 2906.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM.

STORAGE:

Records in the system are maintained on magnetic discs.

RETRIEVABILITY:

Information is retrieved by name of the subject and by various topical queries.

SAFEGUARDS:

The system is protected by both physical security and dissemination and access controls. The system is maintained in a secure DEA facility and protected by electronic means. Access to the computer is restricted by the assignment of unique input and query access codes to authorized DEA employees on a strict need-to-know basis.

RETENTION AND DISPOSAL:

Records in the system are currently maintained indefinitely.

SYSTEM MANAGER(S) AND ADDRESS:

Regional Director, DEA South Eastern Regional Office, 8400 N.W. 53rd Street, Miami, Florida 33166.

NOTIFICATION PROCEDURE:

Inquiries should be addressed to: Freedom of Information Unit, Drug

Enforcement Administration, 1405 I Street, NW, Washington, D.C. 20537.

RECORD ACCESS PROCEDURES:

Same as above.

CONTESTING RECORD PROCEDURES:

Same as above.

RECORD SOURCE CATEGORIES:

Records in the system consist entirely of information extracted from DEA investigative reports.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

The Attorney General has exempted this system from subsections (c) (3) and (4), (d), (e) (1), (2), and (3), (e)(4)(G) and (H), (e) (5) and (8), (f), (g) and (h) of the Privacy Act pursuant to 5 U.S.C. 552a (j) and (k). Rules have been promulgated in accordance with the requirements of 5 U.S.C. 553 (b), (c) and (e) and are being published in the Proposed Rules Section of today's Federal Register.

[FR Doc. 80-23605 Filed 8-5-80; 8:45 am]

BILLING CODE 4410-09-M

Drug Enforcement Administration

Controlled Substances; Proposed Aggregate Production Quotas for 1981; Schedules I and II

Section 306 of the Controlled Substances Act (21 U.S.C. 826) requires that the Attorney General establish aggregate production quotas for all controlled substances listed in Schedules I and II. This responsibility has been delegated to the Administrator of the Drug Enforcement Administration by § 0.100 of Title 28 of the Code of Federal Regulations.

The quotas are to provide adequate supplies of each substance for (1) the estimated medical, scientific, research, and industrial needs of the United States, (2) lawful export requirements, and (3) the establishment and maintenance of reserve stocks.

In determining the below listed proposed 1981 aggregate production quotas, the Administrator considered the following factors:

(1) Total actual 1979 and estimated 1980 and 1981 net disposal of each substance by all manufacturers.

(2) Projected trends in the national rate of net disposal of each substance.

(3) Estimates of inventories of each substance and of any substance manufactured from it, and trends in accumulation of such inventories.

(4) Projected demand as indicated by procurement quota applications which were filed pursuant to § 1303.12 of Title 21 of the Code of Federal Regulations.

Pursuant to § 1303.23(c) of Title 21 of the Code of Federal Regulations, the Administrator of the Drug Enforcement Administration will in early 1981 adjust individual manufacturing quotas allocated for the year based upon 1980 year-end inventory and actual 1980 disposition data supplied by quota applicants for each basic class of Schedule I or II controlled substance.

Based upon consideration of the above factors, the Administrator of the Drug Enforcement Administration hereby proposes that aggregate production quotas for 1981 for the following controlled substances, expressed in grams of anhydrous acid or base, be established as follows:

Basic class	Proposed 1981 quota
SCHEDULE I	
2,5-Dimethoxyamphetamine	13,500,000
SCHEDULE II	
Alphaprodine	60,000
Amobarbital	4,398,000
Amphetamine	1,253,000
Anileridine	121,000
Cocaine	1,600,000
Codeine (for sale)	51,998,000
Codeine (for conversion)	3,125,000
Desoxyephedrine (1,771,000 grams for the production of levodesoxyephedrine for use in a non-controlled, non-prescription product, and 200,000 grams for the production of methamphetamine)	1,971,000
Dihydrocodeine	1,145,000
Diphenoxylate	652,000
Ecgonine (for conversion)	1,200,000
Ethylmorphine	25,000
Fentanyl	3,000
Hydrocodone	856,000
Hydromorphone	106,500
Levorphanol	13,000
Meperidine	11,000,000
Methadone	1,190,000
Methadone Intermediate (4-cyano-2-dimethylamino-4,4-diphenylbutane)	1,700,000
Methaqualone	5,871,000
Methylphenidate	1,215,000
Mixed Alkaloids of Opium	17,000
Morphine (for sale)	878,000
Morphine (for conversion)	55,651,000
Opium (tinctures, extracts, etc. expressed in terms of USP powdered opium)	1,941,000
Oxycodone (for sale)	1,783,000
Oxycodone (for conversion)	10,000
Oxymorphone	4,000
Pentobarbital	17,000,000
Phenmetrazine	1,372,000
Phenylacetone	9,000,000
Secobarbital	6,516,000
Thebaine (for sale)	2,303,000
Thebaine (for conversion)	1,004,000

All interested persons are invited to submit their comments and objections in writing regarding this proposal. A person may object to or comment on the proposals relating to any one or more of the above mentioned substances without filing comments or objections regarding the others. Comments and objections should be submitted in quintuplicate to the Administrator, Drug Enforcement Administration, United States Department of Justice, Washington, D.C. 20537, Attention: DEA Federal Register Representative, and must be received by September 4, 1980. If a person believes that one or more issues raised by him warrant a full adversary-type hearing, he should so state and summarize the reasons for this belief.

In the event that comments or objections to this proposal raise one or more issues which the Administrator finds, in his sole discretion, warrant a full hearing, the Administrator shall order a public hearing in the **Federal Register** summarizing the issues to be heard and setting the time for the hearing (which shall not be less than 30 days after the date of the order).

Dated: July 25, 1980.

Peter B. Bensinger,

Administrator, Drug Enforcement Administration.

BILLING CODE 4410-09-M

Office of Justice Assistance, Research and Statistics

National Advisory Committee for Juvenile Justice and Delinquency Prevention; Meeting

Notice is hereby given that the National Advisory Committee for Juvenile Justice and Delinquency Prevention (the Committee) will meet August 20–23, 1980, in Portland, Oregon. The meeting will be held at The Benson Hotel. The Meeting is open to the public.

The NAC Executive Committee will meet from 8:00 p.m. to 9:00 p.m. Wednesday, August 20th. The full Committee will be called to order at 9:00 a.m. August 21st by Chair C. Joseph Anderson. After a welcome address and a report by the Executive Committee,

Mr. Ira Schwartz, Administrator of the Office of Juvenile Justice and Delinquency Prevention (OJJDP) will give a report.

At 10:30 a.m., there will be a presentation by Committee members on Rules of Order. Following this at 10:40 a.m., a panel discussion on the issue of removal of children from adult jails will be held. Participants will include Judith Johnson of the National Coalition for Jail Reform, John Rector, former OJJDP Administrator, two young people previously or currently in the jurisdiction of the juvenile court system, and members of the OJJDP staff and programs.

From 12:00 noon to 1:30 p.m., the Committee will be recessed for lunch.

The Committee's four Subcommittees will meet from 1:30 p.m. to 8:00 p.m. that evening, focusing on review and finalization of their FY 81 workplan. The Subcommittee to Advise the Administrator of OJJDP will discuss Technical Assistance, OJJDP's FY 81 Program Plan and policy on continuation of grants.

The Concentration of Federal Effort Subcommittee will discuss the coordination of Federal programs for juveniles with particular emphasis on those within the Department of Education and OJJDP.

The Subcommittee to Advise the National Institute will consider its workplan for FY 81, review the NAC's position and recent research on aversion programs, discuss NIJJDP's training and assessment centers, and, discuss the status of the reanalysis of the recent UDIS research. Plans for a special meeting of the Subcommittee for the presentation of this reanalysis will be finalized.

The Standards Subcommittee will develop their workplan for FY 81 and discuss plans for the refinement and implementation of the NAC's Standards for Juvenile Justice.

On August 22, the Committee members and interested guests will be visiting various juvenile institutions and programs from 8:00 a.m. until 1:00 p.m., at which time the full Committee reconvenes.

Issues to be discussed for the rest of the day include: implementation of the NAC Standards for Juvenile Justice; definition of juveniles as all people under the age of 18; State Planning Agency alternatives for administering juvenile justice without LEAA; the Third Annual State Advisory Group Conference; report from the task force on Technical Assistance; the Committee's position on aversion programs; and site visits to juvenile institutions and programs.

There will be Public Commentary at 5:00 p.m., and the meeting will recess at 6:00 p.m.

On Saturday, August 23, the Committee will reconvene at 9:00 a.m. for Subcommittee reports. The Committee will discuss future agenda topics, the FY 81 Workplan and their Fifth Annual Report. An Executive Committee meeting will follow the 12:30 p.m. adjournment, and be concluded at 1:30 p.m.

For further information, contact Mr. James C. Shine, Executive Assistant and Special Counsel, Office of Juvenile Justice and Delinquency Prevention, Law Enforcement Assistance Administration, Department of Justice, 633 Indiana Avenue, N.W., Washington, D.C. 20531.

Ira M. Schwartz,

Administrator, Office of Juvenile Justice and Delinquency Prevention.

LEGAL SERVICES CORPORATION

Grants and Contracts

July 31, 1980.

The Legal Services Corporation was established pursuant to the Legal Services Corporation Act of 1974, Pub. L. 93-355a, 88 Stat. 378, 42 U.S.C. 2996-2996/, as amended, Pub. L. 95-222 (December 28, 1977). Section 1007(f) provides: "At least thirty days prior to the approval of any grant application or prior to entering into a contract or prior to the initiation of any other project, the Corporation shall announce publicly . . . such grant, contract, or project. . . ."

The Legal Services Corporation hereby announces publicly that it is considering the grant application submitted by:

Anishinabe Legal Services, Inc., in Cass Lake, Minnesota, to serve Native Americans residing on or near Red Lake and White Earth Chippewa Reservations.

Interested persons are hereby invited to submit written comments or recommendations concerning the above application to the Regional Office of the Legal Services Corporation at:

Native American Desk, Legal Services Corporation, Denver Regional Office, 1726 Champa Street, Suite 500, Denver, Colorado 80202.

Clinton Lyons,

Director, Office of Field Services.

BILLING CODE 6820-35-M

NUCLEAR REGULATORY COMMISSION

Availability of Fiscal Year 1981 Funds for Financial Assistance To Enhance Technology Advancement of Nuclear Energy Safety

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Notice.

SUMMARY: The U.S. Nuclear Regulatory Commission, (NRC), Office of Nuclear Regulatory Research announces proposed availability of FY 1981 funds to support research necessary to provide a technology base to assess the safety of nuclear power operation, plant siting and waste disposal. The program includes, but is not limited to, support of basic and applied research to advance understanding of and contribute to the store of scientific knowledge applicable to the design, operation, siting, systems and subsystems performance of nuclear power and disposal of waste products resulting from nuclear power applications. Projects will be funded through grants or cooperative agreements.

V 45 / 153 3 AUG 6 80 UMI

EFFECTIVE DATE: Applications will be accepted throughout FY 1981.

ADDRESS: U.S. Nuclear Regulatory Commission, Division of Contracts, Washington, D.C. 20555.

FOR FURTHER INFORMATION CONTACT: The cognizant NRC program official for this program is Dr. John Larkins, telephone (301) 427–4344. The cognizant NRC grant official is Mr. Kellogg Morton, telephone (301) 427–4365.

SUPPLEMENTARY INFORMATION:

A. Scope and Purpose of This Announcement

Pursuant to Section 31.a and 141.b. of the Atomic Energy Act of 1954, as amended, the NRC, Office of Nuclear Regulatory Research proposes to support educational institutions, nonprofit institutions, state and local governments, or professional societies through providing funds for research necessary to provide a technology base to assess the safety of nuclear power operation, plant siting and waste disposal. The program includes, but is not limited to, support of basic and applied research to advance understanding of and contribute to the store of scientific knowledge applicable to the design, operation, siting, systems and subsystems performance of nuclear power and disposal of waste products resulting from nuclear power applications. In the selection of projects to be supported, preference is given to research which is concerned with scientific and technical information which advances the state-of-the-art. Research proposals in the following categories (but not limited to) are to be considered:

1. Nuclear Waste Research
2. Natural Hazards Research
3. Environmental Effects Research
4. Materials and Thermal Hydraulic Research

1. Nuclear Waste Research

The purposes of the research are to develop information and concepts in the applicability of the safe storage of nuclear waste. Research which undertakes to study the basic phenomena of nuclear waste material interaction with host rock in deep geologic environments will be considered. The research would include evaluation of the importance of slow processes such as solid state diffusion as compared to more rapid sorption processes. A more fundamental description of sorption processes and their role in retardation of radionuclide migration is required. A primary purpose of this effort is to stimulate the technical and research communities to apply their knowledge and skills to the development of methods for long-term predictions of the performance of nuclear waste repositories. The result will be an improved degree of confidence in the safety of nuclear waste disposal facilities. Key technical areas in resolving questions on the safe storage of nuclear waste are hydrogeology, geochemistry, evapotranspiration, infiltration, soil moisture. Area of interest also include non-invasive methods for measuring the parameters required for calculating groundwater flow, the unsaturated zone between the land surface and the water table (top of the saturated zone), predictive methods of precipitation and runoff plus temperature changes including those involving glacial advances and retreats, long-term prediction of flooding, hurricanes, tornados, earthquakes and other natural hazard occurrences, groundwater protection, random attenuation, stabilization of tailing, and other related engineering and physical sciences as they apply to increasing or verifying scientific knowledge contributing to the safety of short-term or long-term nuclear waste disposal considerations. Most of the information and concepts developed in these areas has focused on resource exploitation. A refocusing to consider extreme time periods and the confinement in deep geologic media will tap technical and scientific resources for evaluating the long-term performance of nuclear waste repositories.

The research information will be valuable to federal, state, local governments and private concerns in assessing the acceptability of waste storage sites and waste forms and containers.

2. Natural Hazards Research

The objective of this program is to understand and delineate natural hazards on a quantified basis in different regions of the country. The research will be used to advance scientific knowledge of the causes of earthquakes, tornadoes, floods, and severe weather, and to provide one of the bases for hazard prediction used by federal, state and local jurisdictions in mitigation planning, disaster assistance, and reviewing safety regulations for critical facilities (including nuclear facilities). The approach will be to monitor natural hazards activity in each region and to study empirically and theoretically the conditions which contribute to the generation of the natural hazards. Results of these activities will be integrated with previous results and with results being generated by other (non-NRC) projects to improve our ability to predict statistically the future recurrence of natural hazards by size in each region. Catalogs or reports of data will be distributed at appropriate intervals by the institutions, and reports of interpretations and conclusions will be printed and distributed by the NRC or will appear in technical journals.

3. Environmental Effects Research

The objective of this reseach is to advance the state-of-the-art in assessing environmental effects and related life sciences. The research should sharply define technical or scientific subjects related to environmental effects of facilities and activities. Present interest is focused on ecological effects or health effects which may be attributable to effluents from nuclear power stations.

The research information is expected to add and advance the state-of-the-art knowledge relating to siting, construction, operation, decommissioning of facilities and maintaining a safe working environment for workers and the public relative to radioactive materials, processes and practices.

Material and Thermal Hydraulic Research

The research is to identify and quantify the nature and rate of general material degradation. Degradation processes and mechanisms should be experimentally simulated and the results be interpreted with "first principles" of thermodynamics, interaction kinetics, and other applicable mechanics. The materials to be studies include those encompassing system and subsystem applications utilized with nuclear power generation. The state-of-the-art long prediction of material performance is largely based on phenomenological methods combined with statistical interpretation of data. This approach has been reasonably successful for the estimation of the life-time of the materials for a period of tens to a hundred years. However, much longer-term (say 1,000 years) prediction would require some fundamental understanding of material degradation and quantification of degradation rate and will lead to a better prediction of the life-time of these materials. Appropriate of various properties of the materials in the far future is essential for the protection of public health and safety.

Assistance for thermal hydraulic research related to nuclear powerplant operations will also be supported. Recipient will advance and provide more complete understanding of the thermal hydraulic phenomena related to reactor safety, such as the coolant behavior in the vessel and steam generator during off-normal transient conditions. Some important areas needing more fundamental knowledge are steam condensation and the effects of droplets, void fraction, and non-condensible gas on heat transfer rate.

The primary purpose will be to stimulate research to provide a technological base for the safety assessment to technologies used in nuclear power applications, and development of qualified professionals in the disciplines required for reactor safety evaluations and operations. The results of this program will be to increase public understanding relating to nuclear safety, to enlarge the fund of theoretical and practical knowledge and technical information, and ultimately to enhance the protection of the public health and safety.

B. Eligible Applicants

Educational institutions, nonprofit entities, state and local governments and professional societies are eligible to apply for financial assistance under this announcement.

C. Research Applications

A research application should describe (i) the objectives and scientific significance of the proposed research, (ii) the methodology proposed and its suitability, (iii) the qualifications of the investigators and the proposing organization, and (iv) the level of financial support required to perform the proposed effort.

Applications should be as brief and concise as is consistent with communication to the reviewers. Neither unduly elaborate applications nor voluminous supporting documentation is desired.

State and local governments shall submit proposals utilizing the standard forms specified in OMB Circular A–102, Attachment M. Nonprofit organizations and universities shall submit proposals utilizing the standard forms stipulated in OMB Circular A–110, Attachment M.

The format used for project applications should give a clear presentation of the proposed project and its relation to the specific objectives contained in this notice. Each application should follow the format outlined unless the NRC specifically authorize exceptions.

1. Cover Page. The cover page should be typed according to the following format (submit separate cover pages if the application is multi-institutional):

Title of Proposal—A descriptive phrase or other similar designation to assist in the identification of the project.
Location of organization submitting the application and identification of facility where work is to be performed.
Name of Principal Investigators:
Total Cost of Proposal:
Period of Proposal:
Organization or Institution and Department:
Required Signatures:
Principal Investigators:

Name _____
Date _____
Address _____
Telephone Number _____

Required Organization Approval:

Name _____
Date _____
Address _____
Telephone Number _____

Organization Financial Officer:

Name _____
Date _____
Address _____
Telephone Number _____

2. Project Description. Each application shall provide, in twenty pages or less, a complete and accurate description of the proposed project. This section should provide the basic information to be used in evaluation the proposal to determine its priority for funding.

Applicants must identify other proposed sources of financial support for a particular project.

The information provided in this section must be brief and specific. Detailed background information may be included as supporting documentation to the proposal.

The following format shall be used for the project description:

(a) Project Goals and Objectives.

The project's objectives must be clearly and unambiguously stated. The application should justify the project including the problems it intends to clarify and the developments it may stimulate.

(b) Project Outline.

The application should clearly define the tasks that are to be performed, the key events or milestones in accomplishing the task schedule, and the feasibility of achieving these events or milestones.

(c) Project Benefits.

The proposal should indicate the direct and indirect benefits that the project seeks to achieve and to whom these benefits will accrue.

(d) Project Management.

The proposal should described the physical facilities required for the conduct of the project. Further, the proposal should include brief biographical sketches of individuals responsible for planning the project.

(e) Project Costs.

Nonprofit organizations shall adhere to the cost principles set forth in OMB Circular A–122; Educational Institutions shall adhere to the cost principles set forth in OMB Circular A–21; and state and local Governments shall adhere to the cost principles set forth in Federal Management Circular 74–4.

The application must provide a detailed schedule of project costs, identifying in particular:

(1) Salaries and fringe benefits.

(2) Equipment (rental and purchased).

(3) Travel and per diem/subsistence in relation to the project.

(4) Publication costs.

(5) Other direct costs (specify)—e.g., supplies.

(6) Indirect costs (attached negotiated agreement/cost allocation plan).

(7) Total costs.

3. Supporting Documentation. The supporting documentation should contain any additional information that will strengthen the application.

D. Application Submission and Deadline

This program announcement is valid for the entire period of FY 1981 (from 10/1/80 to 9/30/81). Applications will be received during the entire period. Application submissions shall be in one signed original and six copies.

E. Funds

For fiscal year 1981, the U.S. Nuclear Regulatory Commission, Office of Nuclear Regulatory Research anticipates making about one and one-half million dollars available for funding the project(s) mentioned herein.

The NRC anticipates that approximately five to fifteen projects will be funded. Further, the NRC anticipates that its average support will be $100,000.00 to $200,000.00 per project.

F. Evaluation Process

All proposals received as a result of this announcement will be evaluated by an NRC review panel.

G. Evaluation Criteria

The award of NRC financial assistance is discretionary. Generally, projects are supported in order of merit to the extent permitted by available funds.

The principal criteria by which a research proposal is evaluated are (i) the technical adequacy of the investigators and their institutional base, (ii) the adequacy of the research design, (iii) the scientific significance of

V 45 / 153 AG 6 80 UMI

their proposal, (iv) its utility or relevance, and (v) its implications for the scientific potential of the field. Criteria i, ii, and iii are emphasized. Criterion iv is primary invoked in the evaluation of applied research proposals, while Criterion v is invoked for each proposal as appropriate. In selecting among research proposals of substantially equal merit, consideration is given to such factors as geographic distribution and balance among the projects supported.

H. Disposition of Proposals

Notification of awards will be made by the Grants Officer. Organizations whose applications are unsuccessful will be so advised by the Grants Officer.

I. Applicability of OMB Circular A-95

The research areas described herein are national research programs and are not designed to meet the needs or to address problems of a particular state, area or locality and therefore do not come under the purview of OMB Circular A-95.

J. Application Instructions and Forms

Questions concerning the preceding information, copies of application forms, and applicable regulations shall be obtained from or submitted to: Grants Officer, U.S. Nuclear Regulatory Commission, Division of Contracts, Washington, D.C. 20555.

The address for hand-carried applications is: Grants Officer, U.S. Nuclear Regulatory Commission, 7915 Eastern Avenue, Room 392, Silver Spring, Md. 20901.

Nothing in this solicitation should be construed as committing the NRC to dividing available funds among all qualified applicants.

Dated at Washington, D.C., this 28th day of July 1980.

For the Nuclear Regulatory Commission.

Edward L. Halman,

Director, Division of Contracts, Office of Administration.

[FR Doc. 80-23605 Filed 8-5-80; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-409]

Dairyland Power Co-op.; (LaCrosse Boiling Water Reactor) Request for Hearing

Order

Dairyland Power Cooperative (Dairyland) currently operates the LaCrosse Boiling Water Reactor (LACBWR) under Provisional Operating License No. DPR-45. On February 25, 1980, the Director, Nuclear Reactor Regulation (Director), issued an Order to Show Cause regarding the design and operation of a dewatering system for this facility. The Order was based on the Director's conclusion that continued operation of the plant for an extended period of time may be potentially hazardous because the LACBWR site could be subject to liquefaction if the licensee—designated safe-shutdown earthquake were to occur. The order gave the licensee an opportunity to file a written answer, and also provided that "any other person whose interest may be affected by this Order" may request a hearing. 42 U.S.C. 22399.

On March 25, 1980 Dairyland submitted the "Licensee's Answer to Show Cause" which contained a contingent request for a hearing in the event that the staff did not consider the answer sufficient cause for not undertaking the steps outlined in the Show Cause Order. The staff is evaluating the licensee's answer to the Order and has requested Dairyland to provide additional information. Requests for a hearing have been received from Mr. Frederick M. Olsen, III of LaCrosse, Wisconsin (March 18, 1980) and Ms. Anne Morse for the Coulee Region Energy Coalition (March 19, 1980).

10 CFR 2.105(e) provides, among other things, that the Commission may designate an Atomic Safety and Licensing Board to rule on requests for a hearing. Accordingly, pursuant to the Atomic Energy Act of 1954, as amended, and 10 CFR Part 2 of the Commission's regulations, these requests for hearing shall be considered and ruled on by an Atomic Safety and Licensing Board composed of Charles Bechhoefer, Esq., Chairman, Dr. George C. Anderson, and Mr. Ralph S. Decker. If the Board determines that a hearing is required, the Board is instructed to conduct an adjudicatory hearing solely on contentions within the scope of the issues identified in the February 25, 1980, Order: (1) whether the licensee should submit a detailed design proposal for a site dewatering system; and (2) whether the licensee should make operational such a dewatering system as soon as possible after NRC approval of the system, but no later than February 25, 1981, or place the LACBWR in a safe cold shutdown condition.

It is so Ordered.[1]

Dated at Washington, D.C., this 29th day of July, 1980.

For the Commission.

Samuel J. Chilk,

Secretary of the Commission.

[FR Doc. 80-23604 Filed 8-5-80; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. STN 50-482-A]

Kansas Gas & Electric Co., Kansas City Power & Light Co., and Kansas Electric Power Cooperative, Inc.; Receipt of Information for Antitrust Review of Operating License Application

The Kansas Gas and Electric Company, acting for itself, Kansas City Power and Light Company and Kansas Electric Power Cooprative, Inc., filed information for Antitrust Review of an Operating License Application, dated May 6, 1980. This information was filed pursuant to § 2.101 of the Commission's rules and regulations and is in connection with the plans of Kansas Gas and Electric Company, Kansas City Power and Light Company and Kansas Electric Power Cooprative, Inc. to operate a pressurized water reactor located on a site in Coffey County, Kansas. This reactor has been designated as the Wolf Creek Generating Station, Unit No. 1.

The portion of the application filed contains antitrust information for review pursuant to NRC Regulatory Guide 9.3 to determine whether there have been any significant changes since the completion of the antitrust review at the construction permit stage.

On completion of staff antitrust review of the above-named application, the Director of Nuclear Reactor Regulation will issue an initial finding as to whether there have been "significant changes" under section 105c(2) of the Act. A copy of this finding will be published in the **Federal Register** and will be sent to the Washington and local public document room and to those persons providing comments or information in response to this notice. If the initial finding concludes that there have not been any significant changes, request for reevaluation may be submitted for a period of 60 days after the date of the **Federal Register** notice. The results of any reevaluation that are requested will also be published in the **Federal Register** and copies sent to the Washington and local public document room.

A copy of the information for Antitrust Review for Operating License Application is available for public examination and copying for a fee at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the local public document room in the Coffey County Courthouse, Burlington, Kansas 66839.

Any person who desires additional information regarding the matter covered by this notice or who wishes to have his views considered with respect to significant changes related to antitrust matters which have occurred in the licensee's activities since the construction permit antitrust review for the above-named plant should submit such requests for information or views to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. Attention: Chief, Utility Finance Branch, Office of Nuclear Reactor Regulation, on or before September 22, 1980.

Dated at Bethesda, Md., this 10th day of July 1980.

For the Nuclear Regulatory Commission.

B. J. Youngblood,

Chief, Licensing Branch No. 1, Division of Licensing.

BILLING CODE 7590-01-M

[Docket No. 50-321]

Georgia Power Co., et al.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 77 to Facility Operating License No. DPR-57, issued to Georgia Power Company, Oglethorpe Power Corporation, Municipal Electric Authority of Georgia, and City of Dalton, Georgia, which revised Technical Specifications for operation of the Edwin I. Hatch Nuclear Plant, Unit No. 1 (the facility) located in Appling County, Georgia.

This amendment was authorized by phone on July 2, 1980. It revises the Tecnical Specifications for the High Pressure Coolant Injection (HPCI) System to permit continued operation with an inoperable HPCI for up to 14 days. The amendment also adds a Limiting Condition for Operation to cover the situation where the demonstration of operability of the HPCI cannot be performed due to low reactor steam pressure. These changes conform the Hatch 1 specifications with current licensing practices. The urgency associated with this action was (1) to permit the licensee to conduct a diagnostic and repair program as directed by the Commission's Office of Inspection and Enforcement, and (2) the current specifications for Hatch 1 were defective since they did not cover the situation of startup without a demonstration of operability of the HPCI system.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated July 2, 1980, (2) the Commission's letter to the licensee dated July 3, 1980, (3) Amendment No. 77 to License No. DPR-57 and (4) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Appling County Public Library, Parker Street, Baxley, Georgia 31513. A copy of items (2), (3) and (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 28th day of July 1980.

For the Nuclear Regulatory Commission.

Robert W. Reid,

Chief, Operating Reactors Branch No. 4. Division of Licensing.

[FR Doc. 80-23602 Filed 8-5-80; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-289]

Metropolitan Edison Co., et al.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 56 to Facility Operating License No. DPR-50, issued to Metropolitan Edison Company, Jersey Central Power and Light Company, and Pennsylvania Electric Company (the licensee) for operation of the Three Mile Island Nuclear Station, Unit No. 1 (the facility) located in Londonderry Township, Dauphin County, Pennsylvania. The amendment is effective as of its date of issuance.

The amendment revises the Technical Specifications to allow the overpressure mitigating system as modified to protect the reactor vessel against overpressure during low temperature conditions.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated March 13, 1978, as supplemented March 13, 1978, (2) Amendment No. 56 to License No. DPR-50, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Government Publications Section, State Library of Pennsylvania, Box 1601 (Education Building), Harrisburg, Pennsylvania. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 28th day of July 1980.

For the Nuclear Regulatory Commission.

BILLING CODE 7590-01-M

[Docket No. 50-285]

Omaha Public Power District; Issuance of Amendment To Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has

[1] Section 201 of the Energy Reorganization Act, 42 U.S.C. § 5841, provides that action of the Commission shall be determined by a "majority vote of the members present." Commissioner Gilinsky was not present when this Order was affirmed, but had previously voted by notation to approve this Order. Had Commissioner Gilinsky been present, he would have affirmed his prior vote. Accordingly, the formal vote of the Commission was 3-0 in favor of the Order.

V45/153 AG 6 80 UMI

issued Amendment No. 49 to Facility Operating License No. DPR-40 issued to Omaha Public Power District (the licensee), which revised the Technical Specifications for operation of the Fort Calhoun Station, Unit No. 1, located in Washington County, Nebraska. The amendment is effective as of its date of issuance.

This amendment changes the Technical Specifications to remove the requirement to cycle certain non-redundant pumps and valves and adds requirements for ensuring the availability of auxiliary feedwater.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings is required by the Act, and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with the issuance of this amendment.

For further details with respect to this action, see (1) the licensee's submittals dated July 5, 1979 and May 12, 1980, as supplemented May 14, 1980, (2) Amendment No. 49 to License No. DPR-40, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., and at the W. Dale Clark Library, 215 South 15th Street, Omaha, Nebraska. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 25th day of July, 1980.

For the Nuclear Regulatory Commission.

Robert A. Clark,

Chief, Operating Reactors Branch No. 3, Division of Licensing.

BILLING CODE 7590-01-M

[Docket No. 50-346]

The Toledo Edison Co. and The Cleveland Electric Illuminating Co.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 28 to Facility Operating License No. NPF-3, issued to The Toledo Edison Company and The Cleveland Electric Illuminating Company (the licensees), which revised the license and Technical Specifications for operation of the Davis-Besse Nuclear Power Station, Unit No. 1 (the facility) located in Ottawa County, Ohio. The amendment is effective as of its date of issuance.

This amendment revises the Technical Specification setpoint for the automatic closure of the decay heat removal system isolation valves, and implements a pessurizer heater interlock which deenergizes the heaters if reactor coolant system pressurization is attempted and both decay heat removal system isolation valves are not closed. This action satisfies the requirements of license conditions 2.C.(3)(d) and 2.C.(3)(j). In addition, the amendment adds a new condition to the license which requires, prior to operation beyond five effective full power years, the Toledo Edison Company to provide a reanalysis and proposed modifications, as necessary, to ensure continued means of protection against low temperature reactor coolant system overpressure events. Therefore, license condition 2.C.(3)(d) is replaced with the above new requirement and condition 2.C.(3)(j) is removed from the license.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with the issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated March 20, 1978, (2) Amendment No. 28 to License No. NPF-3, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., and at the Ida Rupp Public Library, 310 Madison Street, Port Clinton, Ohio. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 25th day of July 1980.

For The Nuclear Regulatory Commission.

Robert W. Reid,

Chief, Operating Reactors Branch No. 4, Division of Licensing.

BILLING CODE 7590-01-M

Advisory Committee on Reactor Safeguards; Subcommittee on Reactor Fuel; Meeting

The ACRS Subcommittee on Reactor Fuel will hold a meeting on August 21, 1980 at the Westbank Motel Coffee Shop, 475 River Parkway, Idaho Falls, ID to continue its review of the NRC Fuel Behavior Research Branch (FBRB) Programs for the annual ACRS reports to NRC and Congress. Notice of this meeting was published July 25, 1980.

In accordance with the procedures outlined in the **Federal Register** on October 1, 1979 (44 FR 56408), oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the Designated Federal Employee as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

The entire meeting will be open to public attendance.

The agenda for subject meeting shall be as follows:

Thursday, August 21, 1980, 8:30 a.m. until the conclusion of business.

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, will exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff, their consultants, and other interested persons regarding this review.

Further information about topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant Designated Federal Employee, Mr. Paul Boehnert (telephone 202/634-3267) between 8:15 a.m. and 5:00 p.m., EDT.

Dated: July 31, 1980.

Samuel J. Chilk,

Secretary of the Commission.

BILLING CODE 7590-01-M

Draft Regulatory Guide; Issuance and Availability

The Nuclear Regulatory Commission has issued for public comment a draft of a new guide planned for its Regulatory Guide Series together with a draft of the associated value/impact statement. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems of postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

The draft guide, temporarily identified by its task number, FP 818-4 (which should be mentioned in all correspondence concerning this draft guide), is entitled "Standard Format and Content of License Applications, Including Environmental Reports, for In Situ Uranium Solution Extraction" and is intended for Division 3, "Fuels and Materials Facilities." It is being developed to provide specific guidance on the format and content of an application, including an environmental report, for a commercial-scale in situ uranium extraction facility license.

This draft guide and the associated value/impact statement are being issued to involve the public in the early stages of the development of a regulatory position in this area. They have not received complete staff review and do not represent an official NRC staff position.

Public comments are being solicited on both drafts, the guide (including any implementation schedule) and the draft value/impact statement. Comments on the draft value/impact statement should be accompanied by supporting data. Comments on both drafts should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch, by September 30, 1980.

Although a time limit is given for comments on these drafts, comments and suggestions in connection with (1) items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time.

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Requests for single copies of draft guides (which may be reproduced) or for placement on an automatic distribution list for single copies for future draft copies in specific divisions should be made in writing to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Technical Information and Document Control. Telephone Requests cannot be accommodated. Regulatory guides are not copyrighted, and Commission approval is not required to reproduce them.

(5 U.S.C. 552(a))

Dated at Rockville, Maryland, this 28th day of July 1980.

For the Nuclear Regulatory Commission.

Guy A. Arlotto,

Director, Division of Engineering Standards, Office of Standards, Development.

BILLING CODE 7590-01-M

SMALL BUSINESS ADMINISTRATION

[Proposed License No. 10/10-0172]

First Oregon Capital Corp.; Application for a License as a Small Business Investment Company

Notice is hereby given of the filing of an application with the Small Business Administration pursuant to § 107.102 of the SBA Regulations (13 CFR 107.102 (1980)), by First Oregon Capital Corporation, 219 S.W. Stark Street, Portland, Oregon 97204 for a license to operate as a small business investment company (SBIC) under the provisions of the Small Business Investment Act of 1958, (the Act), as amended (15 U.S.C. 661 et seq.).

The proposed officers, directors and stockholders are:

Name and Address, Title, and Percent of Ownership

James M. Pippin, 2775 Old Orchard Road, Portland, Oregon 97201, President, General Manager, 50 percent.

Daniel R. Adams, 1905 Pallisades Terrace, Lake Oswego, Oregon 97034, Secretary-Treasurer, Director, 50 percent.

Le Roy E. Larsen, 3980 N.W. 192nd Street, Portland, Oregon 97229, Vice President, Director.

The Applicant proposes to begin operations with a capitalization of $500,000 and will be a source of both equity capital and long term loan funds for qualified small business concerns. However, it will emphasize equity investments with particular attention to growth potential.

Matters involved in SBA's consideration of the application include the general business reputation and character of the proposed owners and management, and the probability of successful operations of the new company under their management, including adequate profitability and financial soundness, in accordance with the Act and Regulations.

Notice is further given that any person may, not later than 15 days from the date of publication of this Notice, submit written comments on the proposed SBIC to the Associate Administrator for Investment, Small Business Administration, 1441 "L" Street, N.W., Washington, D.C. 20416.

A copy of this Notice will be published in a newspaper of general circulation in Portland, Oregon.

[Proposed License No. 09/09-0266]

PBC Venture Capital, Inc.; Application for a License as a Small Business Investment Company

Notice is hereby given of the filing of an application with the Small Business Administration pursuant to § 107.102 of the SBA Regulations (13 CFR 107.102 (1980)), by PBC Venture Capital, Inc., 1408 18th Street, Bakersfield, California 93301 for a license to operate as a small business investment company (SBIC) under the provisions of the Small Business Investment Act of 1958, (the Act), as amended (15 U.S.C. 661 et seq.).

The proposed officers, directors and stockholders are:

Name and Address, Title, and Percent of Ownership

Phillip E. Zachary, 635 Sycamore Avenue, Shafter, California 93263, President, General Manager and Director

Edward J. Biebrich, Jr., 605 Bobwhite Court, Bakersfield, California 93309, Vice President, Chief Financial Officer, and Director

Jo Ann C. Murphy, 408 Electra Avenue, Bakersfield, California 93309, Vice President, Secretary and Director

George C. Barstow, 1316 Lymric Way, Bakersfield, California 93309, Vice President and Director

Kenneth W. Jones, 4200 Boise, Bakersfield, California 93306, Director

Edwards C. Fant, 3000 College Avenue, Bakersfield, California 93306, Director

Charles E. Smith, 3805 Century Drive, Bakersfield, California 93306, Director

Pacific Bancorporation, 1810 Chester Avenue, Bakersfield, California 93386, 36.4 percent ownership of the SBIC

Community First Bank, 1810 Chester Avenue, Bakersfield, California 93386, 63.8 percent ownership of the SBIC

PBC Venture Capital, Inc., is a jointly-wned subsidiary of Pacific Bancorporation (PBC), a one-bank holding company, and Community First Bank (CFB), a California state-chartered commercial bank. CFB has 81 shareholders and is 97.3 percent owned by PBC. PBC has 2,016 shareholders and C. Wesley Buerkle is the only owner of 10 or more percent of PBC's outstanding stock.

The Applicant will use the services of National Investment Management, Inc. (NIM), as its investment manager. NIM's President is Richard D. Robins and it is located at 3838 Carson Street, Torrance, California 90503.

The Applicant proposes to begin operations with a capitalization of $540,000 and will be a source of equity capital and unsecured long term loan funds for qualified small business concerns.

Matters involved in SBA's consideration of the application include the general business reputation and character of the proposed owners and management, and the probability of successful operations of the new company under their management, including adequate profitability and financial soundness, in accordance with the Act and Regulations.

Notice is further given that any person may, not later than 15 days from the date of publication of this Notice, submit written comments on the proposed SBIC to the Associate Administrator for Investment, Small Business Administration, 1441 "L" Street, N.W., Washington, D.C. 20416.

A copy of this Notice will be published in a newspaper of general circulation in Bakersfield, California.

BILLING CODE 8025-01-M

[Proposed License No. 06/06-0234]

Southwestern Venture Capital of Texas, Inc.; Application for a License To Operate as a Small Business Investment Company

Notice is hereby given that an application has been filed with the Small Business Administration pursuant to § 107.102 of the Regulations governing small business investment companies (13 CFR 107.102 (1980)), under the name of Southwestern Venture Capital of Texas, Inc., 108 La Plaza Building, 113 S. River St., Seguin, Texas 78155, for a license to operate as a small business investment company (SBIC) under the provisions of the Small Business Investment Act of 1958, as amended (the Act), (15 U.S.C. 661 *et seq.*), and the Rules and Regulations promulgated thereunder.

The proposed officers, directors and ten-or-more percent shareholders of the Applicant are as follows:

James A. Bettersworth, Rt. 4, Box 473 AA, Seguin, Texas 78155; President, General Manager, Director, 2.5 percent shareholder.

Joe A. Mueller, Rt. 4, Box 433-A, Seguin, Texas 78155; Vice President, Director, 2.5 percent shareholder.

John Donegan, 1901 Mt. Vernon, Seguin, Texas 78155; Secretary, Treasury, Director.

Benton Donegan, 355 Voges Lane, Seguin, Texas 78155; Director.

J. B. McKean, Rt. 4, Box 338, Seguin, Texas 78155; Director, 7.5 percent shareholder.

Emmett Donegan, Rt. 1, Box 70, Seguin, Texas 78155; Director, 2.5 percent shareholder.

The First National Bank of Seguin, Texas; 15.0 percent shareholder.

There will be one class of stock authorized: 500,000 shares of no par common stock. Initially 100,100 shares will be issued with a resultant private captial of $1,001,000. Applicant proposes to conduct its operations principally in the State of Texas.

Matters involved in SBA's consideration of the application include the general business reputation and character of shareholders and management, and the probability of successful operation of the new company in accordance with the Act and Regulations.

Notice is further given that any person may, not later than 15 days from the date of publication of this notice, submit to SBA, in writing, comments on the proposed licensing of this company. Any such communications should be addressed to: Associate Administrator for Investment, Small Business Administration, 1441 "L" Street, N.W., Washington, D.C. 20416.

A copy of this notice shall be published by the Applicant in a newspaper of general circulation in Seguin, Texas.

DEPARTMENT OF THE TREASURY

Office of the Secretary

Advisory Committee on the International Monetary System; Notice of Continuation

Pursuant to the Federal Advisory Committee Act of October 6, 1972 (Pub. L. 92-463, 86 Stat. 770-776, 5 U.S.C. App. I, Supp. II), the Department of the Treasury announces the continuation of the following advisory committee:

Title: The Advisory Committee on the International Monetary System.

Purpose: The Committee, composed of representatives from banking, industry, labor and the academic community, as well as former government officials, discusses major issues concerning the effective functioning of the international monetary system now and in the future, and potential areas for improvement, advising the Secretary of the Treasury on these questions in the International Monetary Fund and in other forums.

Statement of Public Interest: The United States is and will continue to be engaged in discussions and negotiations on a number of key issues related to the operation and evolution of the international monetary system pursuant to the amended IMF Articles of Agreement (the amended Articles entered into force on April 1, 1978), including: development of the IMF's role in surveillance over exchange arrangements and the balance of payments adjustment process; the IMF's role in balance of payments financing during a period of unprecedented payments imbalances; the evolution of the roles of the dollar, other currencies and the Special Drawing Right in the international monetary system; and questions related to decisions on the appropriate level of IMF resources and on allocations of Special Drawing Rights. It is important that the Secretary of the Treasury continue to be able to receive the advice and recommendations of the Advisory Committee in this period as the United States develops positions on these issues. The depth and breadth of the members' experience in international monetary affairs cannot be duplicated from sources within the Treasury nor from another existing advisory committee.

Authority for this committee will expire August 21, 1982, unless the Secretary of the Treasury formally determines that continuance is in the public interest.

Dated: July 20, 1980.

C. Fred Bergsten,

Assistant Secretary (International Affairs).

BILLING CODE 3175-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Resettling Refugees: Availability of funding

AGENCY: HHS, Office of Refugee Resettlement (ORR), Office of the Secretary.

ACTION: Notice of the availability of funding.

SUMMARY: This document governs the award of grants for up to $50,000 each to assist non-profit refuge Mutual Assistance Association (MAAs) in providing services to persons legally admitted as refugees.

DATE: Grant application may be mailed, first class mail, postmarked not later than 11:59 p.m. Monday, September 8, 1980 or delivered not later than 5 p.m., Eastern Time, on the same date at the Central Office, Office of Refugee Resettlement, Room 1229 Switzer Building, 330 C Street S.W., Washington, D.C. 20201.

FOR FURTHER INFORMATION CONTACT: Lam Pham, 202-245-0061.

SUPPLEMENTARY INFORMATION:

I. Background

The Office of Refugee Resettlement (ORR) is authorized to make grants to non-profit organizations which provide services to refugees to facilitate their resettlement and help them attain self-sufficiency. Nationwide, many MAAs have evidenced strong interest in assisting this effort. This resource is both significant and historically appropriate. However, as refugees, members of the MAAs often lack the financial resources necessary to develop their full potential in service delivery, and their lack of familiarity with American fund-raising practices often inhibits their ability to develop necessary community based funding sources. To take advantage of their interest in, willingness to, and special ethnic consideration in assisting their fellow-countrymen, ORR will fund specific resettlement activities and services of a number of MAAs, up to a total of $50,000 each, on a competitive and demonstration basis during FY 1980.

II. Authorization

Funds for the activity described below will be provided under the Refuge Act of 1980. Catalogue of Federal Domestic Assistance No. 13.814.

III. Eligible Grantees

Eligible grantees are MAAs which are incorporated as non-profit organizations under the laws of their State, and which have, as a major objectives, the provision of services on behalf of refugee resettlement. Coalitions of such organizations are encouraged, especially where linkages and coordination with other resettlement organizations can be shown. Excluded from funding under the notice are private for-profit agencies or firms. A major objective is to encourage organizations not already receiving substantial government funding, through other mechanisms, and so priority will be given to such organizations.

V 45 / 153 AG 6 80 UMI

IV. Allotment of Funds

Approximately $800,000 will be made available, nationwide, for purposes of this announcement for the 12-month period following the date of award. These will be one-year grants, in the maximum amount of $50,000. It is expected that successful applicants for these funds will seek subsequent funding, if warranted in future years, through other mechanisms.

V. Scope of Activities

Grants issued pursuant to this notice are intended to enhance the administrative and technical capacities of MAAs to deliver services, and to assist them in providing services in their respective communities. Such services should be in addition to those already being provided by the applying MAAs, and should be related to specific and demonstrated unmet service needs of refugees in the community where the MAA is headquartered.

In anticipation of subsequent funding through purchase of service contracts with the States in which they are operating, activities proposed may include one or any combination of the following: outreach, assessment, manpower, (career counseling, employability planning, job orientation, job development, job placement and follow-up), English As A Second Language training, vocational training, skills recertification, day care, transportation-related services, and social adjustment including information and referral services, counseling services, health related services and home management services, translation and interpreter services, and legal service.

In addition, in recognition of the need by MAA leaders and staff for training, courses for staff, related to activities proposed in the grant are encouraged, as well as activities related to capacity-building of the individual organizations. Rental of real estate for offices or service delivery is permitted, but purchase for this purpose is not. In anticipation of the MAA's needs to strengthen organizational capabilities, MAAs may include in this proposal a period of two months for activities related to start-up.

Not permitted under this notice are direct transfer of funds to refugees, purchase of resettlement resources such as furniture or food for clients, purchase of real estate for clients, funds for transportation except in connection with other services, or the funding of ethnic entertainments festivals, religious activities, or political activities. Notwithstanding the ethic makeup of the grantee, assurance must be given that service will provided to all refugees, regardless of country or origin.

VI. Application Submission and Approval Procedures

Associations which plan to apply should immediately comply with requirement of OMB Circular A–95, which requires that they notify both state and regional clearinghouses of their intent to submit an application. Details of this request and an address of the appropriate clearinghouse may be obtained by calling, toll-free, 800–424–0212. The short period of time between publication of this notice and award of grants makes it imperative that applicants comply with this requirement immediately.

Eligible applicants may request grant applications from the Office of Refugee Resettlement, HHS, 330 C Street S.W., Washington, D.C. 20201, 202–245–0403. an original application and six copies must be received by the Director, Office of Refugee Resettlement, Room 1229 Switzer Building, 330 C Street, S.W. Washington, D.C. 20201, by 5 p.m. Eastern time on Monday September 8, 1980, or sent by first class mail, postmarked before 11:59 p.m. September 8, 1980. No other grant applications will be accepted.

Panels will be convened to evaluate and rank the proposals based on criteria outlined in Section VII of this notice. Grant awards will be issued prior to September 30, 1980.

VII. Criteria for Evaluating Applications

Project grant applications will be evaluated and rated according to the following criteria:

1. Clear identification of a serious service need of the local refugee community it wishes to serve related to attaining self-sufficiency, which is not being met by current providers.
2. Familiarity of the applicant with local community refugee resettlement process.
3. The extent to which the association is clearly identified with and is supported by the refugee community and is familiar with the specific and distinct needs of its respective community.
4. The presentation of a clear and feasible method by which the applicant proposes to meet the previously unmet need or needs.
5. The extent to which activities can be evaluated quantitatively and qualitatively.
6. The extent to which the applicant can demonstrate the ability to deliver the proposed services, including program timelines.
7. Demonstration of staff competencies. When staff training and development is a part of the proposal, the extent to which this relates to a specific task or tasks to be performed should be indicated.
8. Capability of organization to manage and account for funds.
9. The reasonableness of anticipated costs.

VIII. Application content

All applicants will use Standard Form 424, "Federal Assistance" in submitting project proposals, Grant applications must also include the following:

1. Assurance that applicant has complied with procedures of OMB Circular A–95, involving notification of a State or regional clearinghouse. (See Item VI, Paragraph 1 above.)
2. Description of the applicant organization, including its organizational mandate, funding sources principal officers, addresses, telephone number, and photo copies of the organization's certificate of non-profit status (S01–C–3 papers).
3. Description of the MAA's resettlement activities at present, and its experience in the activities proposed in the grant application.
4. Staffing plan, including position description and qualifications of project director and key staff.
5. Work plan for carrying out activities.
6. Management plan. A plan for fiscal and program management to accomplish proposed objectives. The plan should describe how the proposed organization intends to administer the project, train staff, maintain records and evaluate performance.
7. Proposed budget.

IX. Records and Reports

Grantees will be required to maintain such fiscal and operational records as are necessary for federal monitoring and auditing of the grant. Quarterly project progress reports will required, due 30 days after the last day of each quarter following the effective date of the grant.

Roger P. Winter,

Director, Office of Refugee Resettlement.

BILLING CODE 4110-12-M

Health Care Financing Administration

Exclusion of Heart Transplantation Procedures From Medicare Coverage

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Notice of HCFA ruling to discontinue medicare coverage of heart transplantation procedures.

SUMMARY: This notice announces a HCFA ruling discontinuing Medicare coverage of heart transplantation. In November, 1979, HCFA had tentatively authorized payment for heart transplantations at Stanford University Medical Center, pending development of final criteria for coverage of heart transplantations at Stanford and other institutions. However, our continuing review of the question of coverage has disclosed the existence of a number of important issues, such as patient selection and potential social and economic implications, and a lack of sufficient current information to support development of generally applicable coverage criteria. Consequently, HCFA is now excluding heart transplantations from Medicare coverage until appropriate criteria can be issued.

EFFECTIVE DATE: June 13, 1980.

FOR FURTHER INFORMATION, CONTACT: Henry J. Hehir, 301–594–8561.

SUPPLEMENTARY INFORMATION: The text of the HCFA ruling reads as follows:

Exclusion of Heart Transplantation Procedures From Medicare Coverage

HCFAR 80–1

Purpose: This ruling establishes national policy regarding Medicare coverage of heart transplantation procedures.

Citations: Sections 1862(a)(1) and 1879 of the Social Security Act (42 U.S.C. 1395y(a)(1) and 1395pp).

Pertinent History: On November 2, 1979, HCFA authorized Medicare payments for heart transplantation procedures performed for Medicare beneficiaries at Stanford University Medical Center. This was an interim decision, based on preliminary findings by the Public Health Service (PHS) regarding the safety and efficacy of heart transplants performed at that center. The PHS recommendation followed a preliminary analysis of the clinical experience of heart transplantation at Stanford for a substantial number of patients. The recommendation was limited to heart transplants performed at Stanford because only that center, among all the cardiac transplant centers in the United States, had produced sufficient data about its transplant protocols and its success rates to permit an assessment of the medical safety and efficacy of its procedures.

It was our expectation, when reimbursement was tentatively authorized, that we soon would be able to reach a final decision not only about coverage at that center, but also on generally applicable, broadly based criteria for Medicare coverage of heart transplantations at all facilities where such procedures might be performed. In the meantime, an Administrative Law Judge (ALJ) has ruled that Medicare coverage should be extended to a Medicare beneficiary respecting a heart transplantation performed at the University of Arizona Medical Center.

As we proceeded to review Medicare coverage of heart transplants, we determined that the issues are much more complex than originally contemplated and that many of them cannot be resolved now because adequate data do not exist. There are questions, for example, concerning the patient selection process, the basis for assessing safety and efficacy at medical centers other than Stanford, the long-term social and economic consequences of the procedure, broad ethical considerations, the cost effectiveness of the procedure, and the potential, if any, for substantial expansion in the availability of heart transplantation. We have concluded that there is not sufficient information to support the development of generally applicable coverage criteria.

The Medicare statute prohibits payment for any expenses incurred for items or services "which are not reasonable and necessary for the diagnosis or treatment of illness or injury or to improve the functioning of a malformed body member" (section 1862(a)(1) of the Social Security Act). In the absence of adequate data to determine whether heart transplantations meet this statutory requirement, we have determined that it is not appropriate to continue coverage of the procedures indefinitely. Therefore, we have terminated our tentative authorization to provide payment for heart transplantations.

At the same time, we have determined that the waiver of liability provisions in section 1879 of the Act (42 U.S.C. 1395pp) apply to heart transplantation procedures at Stanford and at the University of Arizona. Reimbursement of appropriate costs will continue to be provided with respect to Medicare beneficiaries who received heart transplantations, or who have been accepted as candidates for heart transplantations, at those centers on or before the effective date of this ruling.

As soon as possible, HCFA, in close cooperation with PHS National Center for Health Care Technology, will conduct a broad study of all aspects of Medicare coverage of heart transplants, including social, ethical, economic, and scientific issues. The study will also examine the impact of a coverage decision on beneficiaries, the Medicare program, and competing health care providers. The study will include patient care costs for a limited number of Medicare beneficiaries accepted for transplantation at appropriate institutions.

When the results of the study have been analyzed, we will publish a proposed decision as to Medicare coverage and give the public an opportunity to participate fully in the development of the final policy, with all pertinent facts being made available for analysis.

Ruling: Effective June 13, 1980, heart transplantations and medical treatment directly associated with heart transplantation procedures are excluded from Medicare coverage, except as provided below.

Medicare payment may be made, as authorized under section 1879 of the Social Security Act, for heart transplantations and medical treatment directly associated with heart transplantations, performed on Medicare beneficiaries at Stanford University Medical Center and at the University of Arizona Medical Center, but only with respect to heart transplantations that (1) were performed on or before June 12, 1980, or (2) are performed on transplantation candidates accepted on or before June 12, 1980.

(Sections 1102, 1862(a)(1), and 1879 of the Social Security Act; 42 U.S.C. 1302, 1395y(a)(1), and 1395pp)

(Catalog of Federal Domestic Assistance Program No. 13.773 Medicare-Hospital Insurance and No. 13.774, Medicare-Supplementary Medical Insurance)

Dated: July 31, 1980.

Howard Newman,

Administrator, Health Care Financing Administration.

Public Health Service

Office of Health Research, Statistics, and Technology; National Center for Health Care Technology; Scientific Evaluation of Medical Technology

The National Center for Health Care Technology (Center) announces that it is beginning a scientific evaluation of the clinical safety and effectiveness of electrical stimulation for treatment of facial nerve palsy. Based on this evaluation, a recommendation will be formulated to assist the Health Care Financing Administration (HCFA) in establishing Medicare coverage policy.

V. 45 / 153 AUG 6 80 UMI

Any person or group wishing to provide the Center with information relevant to this evaluation should do so in writing no later than 30 days from the day of this notice. To enable the Center's staff to give appropriate consideration to any literature references or analyses of clinical data, a written summary no longer than 10 pages should be attached to any such material submitted.

Written material should be submitted to: National Center for Health Care Technology, Room 17A–29, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857.

For further information contact: D. J. Cotter, Health Science Analyst, National Center for Health Care Technology, Room 17A–29, Parklawn Building, Rockville, Maryland 20857, (301) 443-4990.

Dated: August 1, 1980.

Wayne C. Richey, Jr.,

Acting Executive Secretary, Office of Health Research, Statistics, and Technology.

BILLING CODE 4110-85-M

National Council on Health Care Technology; Meeting

Pursuant to the Federal Advisory Act (Pub. L. 92–463) notice is hereby given that the sixth meeting of the National Council on Health Care Technology, established pursuant to the Health Research, Health Statistics, and Health Care Technology Act of 1978 (Pub. L. 95–623) which advises the Secretary and the Director of the National Center for Health Care Technology on the activities of the Center will convene on Thursday, August 14, 1980 at 9:30 a.m. and Friday, August 15, 1980 at 9:00 a.m. in Room 800 of the Hubert H. Humphrey Building, 200 Independence Avenue, S.W., Washington, D.C. 20201.

This meeting will be open to the public from 9:30 a.m. to 4:00 p.m. on August 14 and from 9:00 a.m. to 4:30 p.m. on August 15 to discuss the business of the Council and the Center. Principal consideration and discussion will be devoted to the reports of the Subcommittees on Criteria and Research Agenda, Coverage, and Grants and Contracts.

Additionally, there will be updates on Center activities including the heart transplant evaluation project, coverage issues, End Stage Renal Disease, and a report on the OTA Cost Effectiveness Study. The Council will also discuss the process for development of criteria and the process for development of critieria and standards for the use of health care technologies and finalize the Goals of the Council.

This meeting on August 14, 1980, will be closed to the public from 4:00 p.m. to adjournment in accordance with the provisions set forth in Sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code, and Section 10(d) of Pub. L. 92–463, for the review, discussion, and evaluation of individual grant applications, as indicated. These proposals and applications and the discussions could reveal confidential trade secrets or material, and personal information concerning individuals associated with the proposals and applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Further information regarding the Council may be obtained by containing Sharon Paino, Acting Executive Secretary, National Council on Health Care Technology, Room 17A–43, 5600 Fishers Lane, Rockville, Maryland 20857.

Dated: July 17, 1980.

Wayne C. Richey, Jr.,

Associate Director for Program Support, Office of Health Research, Statistics, and Technology.

[Meeting No. 1250]

TENNESSEE VALLEY AUTHORITY.

TIME AND DATE: 2 p.m., Monday, August 11, 1980.

PLACE: Conference room B–32, West Tower, 400 Commerce Avenue, Knoxville, Tennessee.

STATUS: Open.

DISCUSSION ITEM: 1. Preliminary rate review.

ITEMS FOR ACTION: (A) Project authorization:

1. No. 3522—Design and construction of auxiliary shop/storage building for Power Service Shops, Muscle Shoals, Alabama.

(B) Purchase awards:

1. Req. No. 603009—Indefinite quantity term contract for unleaded gasoline for any TVA project or warehouse.

2. Req. No. 827480—Indefinite quantity term contract for fabricated nuclear quality reinforcing steel for Browns Ferry, Sequoyah, and Watts Bar Nuclear Plants.

3. Req. No. 823216—Seismic pipe supports for Yellow Creek Nuclear Plant.

4. Req. No. 827543—Indefinite quantity term contract for reinforcing steel for Phipps Bend Nuclear Plant.

5. Req. No. 529930—Requirement contract for wet-process phosphoric acid for Division of Chemical Operations, Sheffield, Alabama.

[1] 6. Req. No. 826975—Insulation for precipitators, ductwork, and related equipment, including installation, for Cumberland Fossil Plant.

7. Amendment to contract 71C62–54114–2 with Babcock and Wilcox Company, Lynchburg, Virginia, for Nuclear Steam Supply Systems for Bellefonte Nuclear Plant.

(C) Power items:

1. Agreements covering certain distributors' participation in TVA's systemwide load research program.

2. Transmission service agreement supplementing existing agreements with Alabama Power Company.

3. New power contract with Champion International Corporation, Courtland, Alabama, and deed and bill of sale conveying certain facilities in TVA's Nance 161–kV Switching Station to the Corporation.

4. New power contract with Fort Loudoun Electric Cooperative.

5. New power contract with Holston Electric Cooperative.

6. New power contract with Appalachian Electric Cooperative.

(D) Personnel actions:

[1] 1. Change of status for Larry H. Edwards from Assistant to the Manager, Office of Engineering Design and Construction, to Deputy Manager of Planning and Budget, Office of Planning and Budget, Knoxville, Tennessee.

[1] 2. Change of status for Douglas W. Hulme from Assistant Comptroller to Chief, Accounting Policy and Procedures Staff, Office of Planning and budget, Knoxville, Tennessee.

[1] 3. Change of status for Donald W. Earl from Project Manager, Office of the General Manager, to Chief, Financial Analysis and Cost Management Staff, Office of Planning and Budget, Knoxville, Tennessee.

[1] 4. Change of status for Daryl R. Armentrout, Assistant to the Manager, Office

V 45 / 153 AUG 6 80 UMI

of Engineering Design and Construction, Knoxville, Tennessee.

[1] 5. Change of status for James B. Bussell from Chief, Management Planning Staff, Engineering Design and Construction to Assistant to the Manager, Engineering Design and Construction, Office of Engineering Design and Construction, Knoxville, Tennessee.

[1] 6. Change of status for Gene M. Wilhoite from Chief, Civil Engineering & Design Branch, to Assistant Director, Division of Transmission Planning & Engineering, Office of Power, Chattanooga, Tennessee.

7. Renewal of consulting contract with Jack E. Gilleland, Signal Mountain, Tennessee, for advice and assistance in connection with TVA's power and energy-related programs, requested by the Office of Power.

8. Renewal of consulting contract with Roy W. Carlson, Berkeley, California, for advice and assistance in the field of concrete dam construction and inspection, requested by the Office of Engineering Design and Construction.

9. Renewal of personal services contract with Hartford Steam Boiler Inspection and Insurance Company, Hartford, Connecticut, for performance of authorized inspection services at TVA nuclear power plant sites, requested by the Office of Engineering Design and Construction.

(E) Real property transactions:

[1] 1. Grant of permanent easement to the Hiwassee Utility Commission, Athens, Tennessee, for a water pipeline, affecting approximately 0.15 acre of Chicamauga Reservoir land—Tract XTCR–169WL.

2. Grant of permanent easement to the city of Lexington, Tennessee, for a water treatment plant expansion, affecting 1.9 acres of Beech Dam Reservation land—Tract XTBRBR–1WP.

3. Sale of permanent easement to AAA Communications Company, Inc., for construction, operation, and maintenance of radio and television communication systems, affecting approximately 0.05 acre of TVA's Donelson Microwave Repeater Station site—Tract XCNRS–1E.

4. Sale of permanent easement to Lonas Strevel to resolve an encroachment created by the construction of an apartment building, affecting 0.09 acre of Cherokee Reservoir land—Tract XCK–570B.

5. Filing of condemnation suits.

(F) Unclassified:

1. Proposed sale of surplus property—Miscellaneous warehouse items (electrical cable, conduit, pipe fittings, pipe, small tools, etc.) in various quantities at several TVA projects.

2. New TVA policy code relating to the management of hazardous material and waste.

3. Revised TVA policy code relating to mosquito control and repeal of TVA policy code relating to malaria.

4. Final decision of the Secretary of Labor in the dispute resulting from the 45th Annual Wage Conference between International Brotherhood of Painters and Allied Trades and TVA relative to a prevailing wage for painters.

5. Changes in designation of officers to certify vouchers.

Dated: August 4, 1980.

CONTACT PERSON FOR MORE INFORMATION: Craven Crowell, Director of Information, or a member of his staff can respond to requests for information about this meeting. Call (615) 632–3257, Knoxville, Tennessee. Information is also available at TVA's Washington Office (202) 245–0101.

Department of the Interior

Bureau of Land Management

Alaska Native Allotment Act; Requirements for Occupancy and Use of a Native Allotment

V 45 / 153 AG 6 80 UMI

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Part 2560

Alaska Native Allotment Act; Requirements for Occupancy and Use of a Native Allotment

AGENCY: Bureau of Land Management, Interior.

ACTION: Proposed rulemaking.

SUMMARY: This proposed rulemaking will provide a procedure for carrying out the policy of the Department of the Interior regarding the requirement for 5 years use and occupancy under the Alaska Native Allotment Act, as amended. This procedure clarifies requirements for eligibility for a Native allotment and allows the orderly conveyancing of those allotments to Alaska Natives.

DATE: Comments by October 6, 1980.

ADDRESS: Comments should be sent to: Director (650), Bureau of Land Management, 1800 C Street, NW., Washington, D.C. 20240. Comments will be available for public review in Room 5555 of the above address during regular business hours (7:45 a.m. to 4:15 p.m.) Monday through Friday.

FOR FURTHER INFORMATION CONTACT:
Sue Wolf, 202 343–6511;
or
Robert C. Bruce, 202 343–8735.

SUPPLEMENTARY INFORMATION: This proposed rulemaking will incorporate Secretarial Order 3040, dated May 25, 1979, in the regulations of the Department of the Interior.

By memorandum from the Assistant Secretary, Land and Water Resources, to the Director, Bureau of Land Management, dated October 18, 1973, the Department of the Interior adopted a 5-year prior time rule for Native allotments. The memorandum sets out the rule as follows: "Vacant, unappropriated and unreserved land in Alaska is available for allotment under the Native Allotment Act. With respect to reserved or withdrawn land, if a Native has *completed* the 5-year period of statutory substantial use and occupancy prior to the effective date of the withdrawal or reservation, the withdrawal may be revoked and the allotment granted." This policy resulted in the denial of many applications for Native allotments. These denials have resulted in the filing of several lawsuits challenging this restrictive interpretation of the Act of May 17, 1906 (43 U.S.C. 270–1), which was repealed by the Alaska Native Claims Settlement Act (43 U.S.C. 1601 et seq.).

In an effort to resolve the controversy, the Secretary of the Interior carefully analyzed the problem and on May 25, 1979, issued Secretarial Order 3040 which rescinded the policy position taken in the October 1973 memorandum and replaced it with a new policy. The new policy still requires that the full 5-years use and occupancy shall have been completed prior to the granting of the Native allotment, but allows the applicant either to have filed for a Native allotment or commenced use and occupancy prior to the withdrawal of the lands. This new policy will be incorporated in the Native Allotment regulations by this rulemaking.

The principal author of this rulemaking to Ms. Sue Wolf of the Alaska Program Staff, assisted by the staff of the Office of Legislation and Regulatory Management, Bureau of Land Management.

It is hereby determined that the publication of this document is not a major Federal action significantly affecting the quality of the human environment and that no detailed statement pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (43 U.S.C. 4332(2)(C) is required.

Note.—The Department of the Interior has determined that this document is not a significant regulatory action and does not require a regulatory analysis under Executive Order 12044 and 43 CFR Part 14.

Under the authority of the Act of May 17, 1906 (34 Stat. 197), as amended August 2, 1958 (43 U.S.C. 270–1—270–3), and the Alaska Native Claims Settlement Act (43 U.S.C. 1601 et seq.), it is proposed to amend § 2561.0–8, Subpart 2561, Part 2560, Subchapter B, Chapter II of Title 43 of the Code of Federal Regulations as set forth below:

§ 2561.0–8 Lands subject to allotment.

* * * * *

(e) Lands covered by applications for allotment shall have been vacant, unappropriated and unreserved at the time the applicant filed an application for a Native allotment or at the time occupancy commenced.

James W. Curlin,
Acting Assistant Secretary of the Interior.

Surface Coal Mining and Reclamation Operations Permanent Regulatory Program; Performance Bonding

V. 45 / 153

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Parts 800, 801, 805, 806, 807, and 808

Surface Coal Mining and Reclamation Operations Permanent Regulatory Program; Performance Bonding (Subchapter J)

AGENCY: Office of Surface Mining Reclamation and Enforcement, U.S. Department of the Interior.

ACTION: Final rule.

SUMMARY: The Office of Surface Mining Reclamation and Enforcement (OSM) amends portions of Subchapter J of its permanent regulatory program relating to bond and insurance requirements for surface coal mining and reclamation operations. The changes revise provisions concerning the period of liability, the form of the performance bond, performance-bond requirements for long-term facilities and disturbances, and release and forfeiture of the bond. Several of the changes are in direct response to a petition for rulemaking filed with OSM, while others were generated from comments received during the petition review process.

EFFECTIVE DATE: September 5, 1980.

ADDRESSES: Copies of these amendments may be obtained from the following OSM offices:

Headquarters, U.S. Department of the Interior, South Building, Room 153, 1951 Constitution Avenue NW., Washington, DC 20240; 202–343–4728.

Region I, Thomas and Hill Building, 1st Floor, 950 Kanawha Boulevard, East Charleston, WV 25301; 303–342–8125.

Region II, Suite 500, 530 Gay Street SW., Knoxville, TN 37902; 615–637–8060.

Region III, Room 502, Federal Building & U.S. Courthouse, 46 East Ohio Street, Indianapolis, IN 46204; 317–269–2600.

Region IV, Scarritt Building, 5th Floor, 818 Grand Avenue, Kansas City, MO 64106; 816–374–2618.

Region V, Brooks Towers, 1020 15th Street, Denver, CO 80202; 303–837–5511.

Copies of public comments received on the petition for rulemaking and proposed rules discussed below may be obtained at: Office of Surface Mining, Room 153, Interior South Building, 1951 Constitution Avenue, Washington, DC 20240, (202–343–4728).

FOR FURTHER INFORMATION CONTACT: David R. Maneval, Assistant Director, Technical Services and Research, Office of Surface Mining, U.S. Department of the Interior; 202–343–4264, or Russ Price, P.E. Division of Technical Services, Office of Surface Mining, U.S. Department of the Interior; 202–343–4022.

SUPPLEMENTARY INFORMATION: On March 13, 1979, OSM promulgated permanent program regulations as required by Section 501(b) of the Surface Mining Control and Reclamation Act of 1977 (Pub. L. 95–87) ("the Act"). Subchapter J, Parts 800–809, of the permanent program regulations pertains to bond and insurance requirements for surface coal mining and reclamation operations. Notices pertaining to Subchapter J have been published in the Federal Register as follows: 44 FR 15385–15393 (Mar. 13, 1979), with corrections published at 44 FR 15485 (Mar. 14, 1979), 44 FR 28005–28008 (May 14, 1979), 44 FR 49673–49687 (Aug. 24, 1979), 44 FR 52098 (Sept. 6, 1979), 44 FR 53507–53509 (Sept. 14, 1979), and 44 FR 66195 (Nov. 19, 1979).

Additionally, portions of the bonding rules, as well as other permanent program rules, were suspended by announcements appearing at 44 FR 67942 (Nov. 27, 1979) and 44 FR 77455 (Dec. 31, 1979). These provisions were suspended as a result of their reevaluation in the context of pending litigation (*In Re: Permanent Surface Mining Regulations Litigation*, filed May 9, 1979, D.D.C.—Civil Action 79–1144).

As a result of a petition for rulemaking filed by the Mining and Reclamation Council of America (MARC), Travelers Indemnity Company, and Green Mountain Company, ("the petitioners"), and comments received on the petition, OSM concluded that several Sections of Subchapter J needed revision. Refer to 44 FR 28005–28008 (May 14, 1979) and 44 FR 52098 (Sept. 6, 1979), respectively.

Amendments were proposed by OSM on January 24, 1980. The rules proposed January 24, 1980 (45 FR 6028–6042) and the accompanying preamble contain much of the basis and rationale for the final rules adopted herein and are hereby incorporated in this notice by reference.

In addition to the 60-day comment period ending March 24, 1980, the comment period was reopened June 27, 1980, (45 FR 43437) for 5 days to include a comment from the U.S. Department of Agriculture (USDA), Forest Service, and a discussion of an April 16, 1980, meeting held with USDA after the comment period ended. The subject of this letter was a proposed provision for early release of operator liability for reclamation, if the reclamation is conducted by a Federal, State, or independent agency as part of a research project. This request is part of an official petition process and subject to a separate rulemaking. The petition was published for comment June 18, 1980, (45 FR 41166) and a public meeting was held on July 10, 1980.

The final rules adopted today resolve issues identified in the petition submitted by MARC, issues suspended by OSM as directed by the U.S. District Court for the District of Columbia, and issues raised in comments received during the comment periods and public meetings of the petition for rulemaking and proposed amendments. Those amendments proposed January 24, 1980, (45 FR 6028) for which no substantive comments were received are being adopted today as final amendments to Subchapter J of the permanent program regulations except for Section 806.11(a), which was changed to include another type of bonding method. Other comments were received which were not pertinent to the issues opened under this rulemaking. These comments, although considered, are not addressed in this document.

The bonding rules, as amended in this notice, will serve as the Federal standard for State Permanent Regulatory Program submissions required by 30 CFR Chapter VII, Subchapter C, Part 732. However, because 22 State programs are currently being reviewed by the Secretary and others have approval, States will be given an opportunity at a later date to change their programs to reflect the amendments adopted today. If a State's program has been approved, OSM will notify the State of any changes it considers necessary and the State will have 6 months to make changes that can be made by a change in State regulations. The State will have until the end of its next legislative session to make the change if a change in State law is required.

For State programs which are pending an initial decision by the Secretary or which have been resubmitted on the basis of such an initial decision, the final decision on the programs will be based on the regulations as they existed when the State programs were submitted, subject only to changes that have been mandated by the Court. States may, at any time, propose to amend their programs to comply with these new amendments and, subject to requirements for public comment, the Secretary may approve amendments in accordance with 30 CFR 732.17. In addition, program submissions which contain provisions incorporating these new rules or provisions based on the proposed rules not adopted today may be approvable under 30 CFR 806.11(b) (formerly 30 CFR 806.11(c)), alternative bonding schemes, or under 30 CFR 731.13, the "state window" provision, if the required showings are made. The States will be advised of further changes that may be required at the time of the Secretary's decision on their programs and will be allowed 6 months or until the next legislative session to accomplish the changes.

Discussion of Comments on Proposed Rules Issued January 24, 1980 (45 FR 6028–6042)

Part 800—General Requirements for Bonding of Surface Coal Mining and Reclamation Operations Under Regulatory Programs

§ 800.5 Definitions.

OSM proposed changes in the definitions of the terms "self-bond" and "collateral bond" to coincide with changes in the self-bonding and collateral-bonding regulations that were made in response to the issues raised by the petitioners and other commenters. Many comments were received on the proposed changes. One commenter noted that in the proposed amendment of the definition of collateral bonds, negotiable bonds of the United States or municipalities were included, but negotiable State bonds were not. He pointed out that State bonds were considered a valuable asset in bonding collateral and should be included. As a matter of fact, the definition of collateral bonds in the March 13, 1979, rulemaking included negotiable State bonds as well as those of the United States and municipalities. State bonds were unjustifiably omitted from the amended definition, and OSM is adopting a definition of collateral bond which includes negotiable State bonds.

Another commenter pointed out that the definition of collateral bonds includes irrevocable letters of credit issued by a bank permitted to do business in the United States. However, he pointed out that some State laws may allow only those banks incorporated or authorized to do business in the State to issue letters of credit. This restriction could preclude a meaningful bond option in the form of letters of credit, and local banks with limited credit capacity might be unable to meet the needs of the coal mining companies. In order to remedy this situation, the commenter suggested that the regulations include a provision permitting letters of credit to be issued to OSM in behalf of the regulatory authority. OSM can find no legal basis whereby it could undertake to act as agent for a State regulatory authority in the manner suggested. Moreover, OSM believes that the States, not OSM, should determine whether or not to allow letters of credit from out-of-State banks. If a State's regulations prohibit banks that are not incorporated or authorized to do business in the State from issuing letters of credit, then the State must decide whether or not to change its laws. Therefore, the provisions for allowing any bank in the United States to issue letters of credit is retained for use with State discretion, and the recommended change has not been accepted.

Another commenter requested that the requirements for letters of credit and self-bonding be clarified so that the States have the option of authorizing these methods of bonding but not be obligated to use them. OSM believes that it is clear that letters of credit and self-bonding are options that the States may elect to use but are not required to. In Section 806.11, letters of credit and self-bonding are listed as two of five approved methods of bonding, but any one of the five types alone is sufficient, as is supported by the word "or." As proposed Section 806.11(a) states, "The regulatory authority *may* allow for (1) a surety bond, (2) a collateral bond, (3) establishment of an escrow account, (4) self-bonding, *or* (5) a combination of these bonding methods" (emphasis added). The regulatory authority is not required to utilize *either* letters of credit *or* self-bonding, but rather it may select any of the types of bonding individually, or in combination. Therefore, no additional clarification has been provided in the final rules.

A State commenter proposed that the self-bond definition be rewritten to clarify the term as follows: "*Self-bond* means the unsecured bond of the applicant accompanied by one or more agreements executed by other persons indemnifying the regulatory authority against loss by reason of the applicant's failure to fulfill its bond." OSM intends to further study the options for securing performance under self-bonding and is not now eliminating the requirement that self-bonds be secured. Therefore, this request has been deferred pending the outcome of the proposed study. The definition of the term "self-bond" is not amended at this time.

§ 800.11 Requirements to file a bond.

Cumulative bonding was proposed to allow flexible use of bonds and reduce the amount of bond coverage necessary if bond release and reinstatement on subsequent increments can be sequenced to an operator's advantage. OSM received many comments on the proposal to allow bond amounts to be calculated on a cumulative basis. One commenter stated that cumulative bonding was an important addition to other bonding alternatives. Another stated that cumulative and incremental bonding are needed, but that the bonding rules need further revision for the regulatory program to be effective, efficient, and of least cost to the public. Another noted that although cumulative bonding should prove beneficial in theory, record keeping would be "horrendous" and timing on bond release and filing of new bonds would have to be exact. One commenter was concerned about the adequacy of a bond amount calculated cumulatively to cover the full cost of reclamation. Another commenter addressed the necessity of correctly projecting the acreage to be disturbed in order to ensure a proper bond amount. A State commenter maintained that, except for the entire permit area, bond amounts should not be tied to acreage, as is done under incremental or cumulative bonding. The State believes that tying bond amounts to acreage under incremental and cumulative bonding is confusing because these regulations seem to imply that bonding obligations apply only to a particular area and do not extend to the entire permit area. The State also asked whether cumulative bonds would circumvent the bond-release criteria of Part 807 and would be released automatically to float to the next area to be disturbed.

OSM considered three options: (1) Retain the original provision of § 800.11 as published March 13, 1979, (2) adopt revised regulations for § 800.11 as proposed January 24, 1980, or (3) adopt revised regulations for § 800.11 as proposed by commenters. OSM believes that the most important factor in applying a cumulative bond is the achievement of the proposed schedule by which affected areas in various phases of reclamation and areas not yet disturbed are included or excluded in the amount of bond coverage. Of course, variation of the bond amount cannot be allowed in a manner that would ever result in the amount forfeitable falling below the actual estimated full cost of completing reclamation on all disturbed areas.

OSM agrees that keeping records, timing bond release and filing of new bonds, determining accurate bond amounts to cover the cost of reclamation, and projecting the areas to be disturbed could become problems for the regulatory authority. However, OSM believes that most of these problems are inherent under any bonding system, and are not unique to cumulative bonding.

Timing on bond release and the filing of new bonds is critical and is based on

AG 6 80 UMI

the successful completion of reclamation according to the proposed schedule. Bond release under cumulative bonding is subject to timing and other criteria of Part 807 such as notification, hearings, and inspection. OSM believes that under cumulative bonding, it is to the operator's monetary advantage to complete reclamation on schedule and to fulfill the other requirements of § 800.11(b)(2). Obtaining bond on additional acreage will be difficult and costly for the operator if reclamation on previous acreage has not proceeded on schedule. In addition, the operator could face bond forfeiture under §§ 808.13(a)(1) and (2) and 808.13(b)(3). Consequently, OSM believes that an operator choosing cumulative bonding would have sufficient vested interest to proceed with reclamation as scheduled, thus minimizing problems for the regulatory authority.

Determination of accurate bond amounts to cover the cost of reclamation and protection of areas to be disturbed are also critical and are problems inherent in other bonding systems. Operators who elect a cumulative bonding schedule must adhere to requirements of Parts 805 and 806 to ensure that the bond amount is adequate to meet the costs of reclamation. In addition, the operator must comply with § 800.11(b)(2), which provides that the operator "must identify the initial and successive incremental areas for bonding on the permit application map submitted for approval as provided in 30 CFR 780.14 and shall specify the proportion of the total bond amount required for the term of the permit which will be filed prior to commencing operations on each incremental area." Thus, the regulatory authority can use criteria in Part 805 to determine adequate bond amounts and in § 800.11(b)(2) to project areas to be disturbed.

Concern about liability under cumulative and incremental bonding is justifiable. However, § 806.12(c) and proposed § 808.12(c) clearly provide that liability under any bond (whether full, incremental, or cumulative) can extend to cover the entire permit area. Cumulative bonds are not released automatically, nor do they "float" to the next increment. The residual bond amount after release may be used on a successive increment at the discretion of the regulatory authority. Cumulative bonds, as with other types of bonds, are subject to the bond-release criteria of Part 807 and bond-forfeiture requirements of Part 808. Therefore, OSM believes that no further clarification is necessary under § 800.11 concerning bond-liability or bond-release requirements.

On the basis of the foregoing discussion, and the frequency of inspections required by the Act, OSM has selected option 2. Cumulative bonding will allow an operator to provide a single bond for a permit area including all or part of the increments at differing levels of mining activity. Unlike bonds on separate increments, the forfeitable amount of the cumulative bond may vary as areas are added or deleted. As in incremental bonding, the total bond posted must be sufficient to assure completion of the reclamation plan by the regulatory authority in the event of forfeiture.

OSM proposed amendments to § 800.13(a) and (d) regarding forms for filing performance bonds and limiting the acceptance of self-bonds in lieu of surety or collateral bonds to instances where the permittee meets the requirements of § 806.14 and any additional requirements for a State or Federal program. No comments were received on these amendments. Consequently, these amendments are adopted without change.

Part 801—Bonding Requirements for Underground Coal Mines, Coal-Processing Plants, Associated Structures, and Other Coal-Related Long-Term Facilities and Structures

A new Part 801 was proposed at the suggestion of the petitioners to distinguish between a surface mine (short duration) bonds and the long-term bonding aspects of underground mines and coal-related processing facilities. Commenters were concerned with the need for this distinction and in general agreed with the provisions.

§ 801.11 Applicability.

This Section establishes that the Part applies to portions of coal mines and coal mining operations which generally have a life in excess of 5 years and continually disturb the same surface areas, operations such as underground mines, coal-processing plants, refuse areas, and coal-loading facilities.

§ 801.11(a)(1).—A commenter referring to proposed § 801.11(a)(1) maintained that if "continuously disturb the surface" is a condition of this Part, then the subsidence-control measures to be constructed under § 801.16(a) should not be included within its scope since, when completed, construction does not continue to disturb the surface. The intent of this Part is to include bond coverage only for construction of *surface* measures to prevent subsidence (as opposed to purely underground construction, such as backstowing), and therefore § 801.11(a)(1) has been revised to include the cost of construction of the facilities enumerated under § 801.16 as calculated as part of the bond amount under § 805.11.

§ 801.11(b).—This Paragraph as proposed intended to allow those operations listed in § 801.11(a), when conducted on a larger area at a surface mine, to be bonded under the method for long-term operations as a separate increment of the surface mining permit. This does not mean that a separate permit must be issued for both the surface and long-term operations.

§ 801.13 Period of liability.

This Section provides for continuous bond coverage by requiring that bond extension or replacement be posted 120 days prior to expiration of any bond. A commenter referring to the proposed language felt that provisions should specify an "extend or pay" clause, especially for letters of credit. This would ensure continuous coverage and all parties would be aware of the conditions of bond coverage. Section 801.13 has been clarified to specify the terms of liability on long-term operations and provide for continuous coverage throughout the liability period by requiring replacement or extension of bond coverage subject to forfeiture for failure to comply. This aspect is particularly important in operations nearing the end of their useful productive life. An operator may find increased difficulty in obtaining a replacement bond in this period. This provision requires that the operator and surety, if applicable, consider the consequences of forfeiture if bond coverage through extension or replacement is not provided. Since bonds must provide continuous coverage until replaced or released, the option of developing an escrow account or guarantees provided by the "Combined surety/escrow method," § 806.17, may be more acceptable, especially toward the end of the operation.

A commenter pointed out that this Section apparently requires a *new* bond to be posted to renew a permit and recommended that provisions be added for extending the current bond for the renewal term. The option of continued coverage is acceptable to OSM and would afford the same degree of coverage while giving maximum flexibility to extended bond coverage. This provision has been incorporated in Section 801.13(b) by deleting the word "new" in the final rule and allowing extension of current coverage.

§§ 801.14 and 801.15

No comments were received on proposed Sections 801.14 and 801.15. Therefore, these Sections have been incorporated into these final rules.

§ 801.16 Subsidence and mine drainage.

This Section requires that surface measures constructed to prevent subsidence be bonded. Since the bonded surface area of an underground mine may be isolated from surface-owners' property, the inspection of these surface measures may require access to private property.

§ 801.16(a).—One commenter posed the problem of what will happen if a property owner refuses to permit the regulatory authority access to his or her property for the purpose of inspecting surface facilities proposed to be released from bond coverage. No suggested remedy was offered. The Act requires surface disturbances to be bonded, and since the surface measures provide protection to the surface owner's property, it would appear to be in the best interest of both the operator and the owner to ensure proper construction to prevent subsidence and allow bond release. If the surface owner denies access for inspection, the regulatory authority should advise the surface owner of the pending bond release and request his or her comments. If no commnets are received, the bond may be released. Care should be taken that all correspondence is by certified mail with return receipt. A specific provision has been added to § 801.16(a) to provide guidance for bond release on surface measures if an owner refuses to allow inspection by the regulatory authority. It should be emphasized that although surface measures are taken, unplanned subsidence continues to be an operator responsibility under § 817.124(b).

Several industry commenters requested the addition of an exemption from bonding of surface measures when using conventional room-and-pillar mining methods similiar to that provided in § 817.121. They felt that since this mining method is usually conducted so as to preclude subsidence, no bond should be required. OSM feels that this Section clearly requires no bond if a method to control subsidence which does not disturb the surface is used. OSM agrees with this rationale, but feels that a blanket exemption is unnecessary. Under the room-and-pillar method, no surface measures are taken whether planned subsidence occurs or not, since the method is in itself a measure to prevent subsidence. However, if room-and-pillar methods cause unplanned subsidence, and damage to surface land use occurs, the provisions of § 817.124 apply. Therefore, OSM feels that an exemption for room-and-pillar mining is not required under the applicability of this Part. This provision is not considered to conflict with § 817.121, which authorizes the room-and-pillar mining method.

One State commenter pointed out that the State plans to require monitoring of subsidence regardless of whether subsidence is expected or not, and that their bond amount would include monitoring-survey costs. OSM feels that bonding of ongoing surveys to monitor subsidence may be included as part of more stringent control measures required under State reclamation-plan requirements, but that this requirement would exceed the bonding requirements of this Part if no subsidence is planned. Thus, a provision of this nature in the State program would be considered more stringent. Sections 817.121–817.124 provide insurance coverage or financial coverage for reimbursement for any damage caused by unplanned subsidence. OSM believes that only quantifiable actions fall under bond coverage and that unknown, unestimatable actions or ongoing monitoring are beyond the scope of performace bonding. Therefore, no provision for including monitoring-survey costs in the bond amount has been added to this Part.

§801.16(b).—This Section as proposed would have required bonding of surface facilities constructed to provide treatment of mine drainage. Such facilities may remain indefinitely to treat drainage or may be removed with the termination of mining. If revegetation has progressed satisfactorily and a sedimentation pond is no longer necessary, the impoundment may be removed. A commenter requested clarification of the extention of the liability period if sedimentation ponds and impoundments are to be removed as part of the postmining land use. Section 805.13 of the proposed regulations requires an extension of the liability period of 5 or 10 years if the impoundment is removed during the original-liability period. The regulations provide two alternatives to the regulatory authority. First, it may separate the area disturbed and reclaimed for removal of the impoundment as a segment of the bonded area as provided under Section 805.13(c); second, it may call for or authorize removal of the impoundment and reclamation of the area early in the original liability period as long as the conditions of Section 807.12 are met with respect to revegetation, sediment control, and runoff. Conditions of § 807.12(e)(2) (i) and (ii) must be met with respect to performance standards for sediment control and runoff, and an adequate standard of vegetation established before a sedimentation pond may be removed. The revegetation work on the impoundment area is subject to the full applicable liability period, thereby requiring extension. However, early removal in the original liability period will minimize the extended period.

OSM belives that no specific provision is required to address this problem, that adequate flexibility exists in the provisions of Section 805.13 for extension of liability on either permit or increment, separation of bonded areas, or approval or reclamation practices to allow a regulatory authority to handle this condition on a case-by-case basis. However, additional language has been added to clarify the intent that areas from which impoundments have been removed are subject to the liability period in determining successful revegetation.

§ 801.17 Bond forfeiture

This Section sets forth the conditions for bond forfeiture. No specific comments were received; therefore, this Section has been adopted as proposed.

Part 805—Amount and Duration of Performance Bond

§ 805.13 Period of liability

§ 805.13(a)—This Section requires an operator to be responsible for revegetation of the permitted area. No amendment was proposed to § 805.13(a), but a comment was received. The USDA Forest Service pointed out that the provisions of Part 805 did not allow a research activity to accept responsibility for reclamation and relieve the operator from the bonding obligation. Research activities sometimes use abandoned mines or portions of active mines to evaluate new plant species or to conduct reclamation research. The Forest Service also proposed that an operator's liability under performance bond in § 805.13(a) be released if the responsibility for revegetation has been assumed by Federal or State agencies or entities for reclamation, research activities, or demonstration of reclamation technology, provided that the responsible agency or entity will provide for normal reclamation. The same proposal is included as part of a formal petition to amend rules issued June 18, 1980 (45 FR 4116) considered for public comment and discussion under proposed rulemaking. Therefore, OSM

V 45 / 153
AG 6 80
UMI

has elected not to make any changes herein.

§ 805.13(b)(1).—This Paragraph was proposed in order to adapt the revegetative liability provisions of § 816.116(b) to those of bonding liability as required by Section 509 of the Act. In February 1980, the U.S. District Court for the District of Columbia ruled that initiation of the liability period, as defined in § 816.116, was inconsistent with Section 515(b)(20) of the Act. Therefore, the proposed change will not be made. The bond liability period will commence after the last year after augmented seeding, fertilization, irrigation, or other work consistent with Section 515(b)(20) of the Act. Also, this Section extends the liability period if augmented practices are applied.

§ 805.13(b)(2).—This Paragraph appeared in the proposed rules in response to petitioners who felt that certain "good husbandry" practices should be allowed as an incentive for an operator to continue reclamation efforts on an area. The provision requires a regulatory authority to approve and document acceptable practices as part of the initial or amended permit which if exceeded will constitute augmentation.

§ 805.13(b)(3).—Comments were received discussing whether or not to allow selective husbandry practices without extending the period of bond liability. Most commenters felt that this provision provides essential clarification of factors which might extend the liability period. Others felt this provision was required to allow good conservation practices without punishment. A few commenters felt that any seeding, fertilization, or irrigation is contrary to the Act and should not be allowed. It is important to note that the distinction between augmented and normal conservation practices must be identified and that OSM requires that practices be documented and supported as normal for similar land uses in the geographic area in order to be considered. OSM proposed that § 805.13(b)(3) be amended because it believes that permanent reclamation success may occasionally require selective husbandry practices exclusive of augmented seeding, fertilization, or irrigation. Therefore, such practices may be allowed if the permittee can demonstrate that discontinuance of such measures after the period of liability expires will not reduce the probability of continuous permanent revegetation success. Corrective action such as pest and vermin control, pruning, and repair of any rills and gullies, and any reseeding and/or transplanting specifically necessitated because of these actions, should not require reinitiation of the extended liability period if such practices are completed within the first part of the applicable liability period.

§ 805.13(c).—This proposed Section provided that a portion of a bonded area requiring extension of the liability period might be separated from the original area and bonded separately, if approved by the regulatory authority. It was added at the suggestion of the petitioners to allow a portion of a bonded area to be extended instead of extending bond liability and delaying bond release on the entire area. Commenters generally supported the provisions of § 805.13(c), but felt the terms and conditions needed some clarification. One commenter indicated that the word "contiguous" in § 805.13(c)(2) is confusing and asked whether the term meant that such an area must be a single, distinguishable parcel rather than several scattered parcels. The same commenter also believed that the regulatory authority should be given the discretion of allowing severence of more than one extended-liability parcel.

OSM interprets "contiguous" to mean being in actual contact. Acceptance of the severance of a segment from the whole also calls for it to be isolated and distinguishable. When combined OSM believes these provisions sufficiently define the new area to be bonded. Liability may be extended on several parcels that have been determined to be insignificant, as a whole, to the entire bonded area if they are limited to distinguishable, isolated segments of the bonded area and are not scattered or intermittent occurrences throughout the entire bonded area.

§ 805.13(e).—This Paragraph was proposed to insert a provision to exempt a bonded area from general revegetation requirements if intensive agricultural land use is approved. Plaintiffs in a suit in the District Court for the District of Columbia (*In Re: Permanent Surface Mining Regulation Litigation* filed May 9, 1979 D.D.C.-Civil Action 79–1144) contended that this reference to an exception to the revegetation standards of Part 816 provided too much latitude in waiving specific revegetation standards. The Department agreed and informed the Court that this Paragraph would be amended to exempt the general revegetation standards only if an intensive agricultural land use was approved. No comments were received. Therefore, this Paragraph has been adopted as proposed.

§ 805.13(f).—Proposed Paragraph (f) was added at the request of commenters to the petition who suggested that the implementation of the postmining land use is not a requirement of the bond.

A comment was received objecting to the proposal that excludes bonding the implementation of an approved postmining land use. OSM has referred to Section 515(b)(2) of the Act and has determined that the operator is responsible only for restoring the land to a condition capable of supporting the proposed postmining land use; that is, those reclamation actions specified in the reclamation plan. Although the objector has a good point, the statute does not support that interpretation, and the Section is adopted as proposed.

§ 805.13(g).—Paragraph (g) as proposed would have provided additional clarification of the provisions of Paragraph (c) with respect to segmenting a bonded increment. No specific comments were received, and this Paragraph is adopted as proposed.

§ 805.14 Adjustment of amount.

Changes in § 805.14 (a) and (b) were proposed at the request of the petitioners to include notification of surety as well as permittee in bond adjustments. OSM proposed notification of all persons involved in bond coverage, as well as the surety and permittee, the other persons to be anyone with a property interest in bond collateral.

§ 805.14(a).—One commenter suggested that the phrase "or other persons involved in bond coverage" should be replaced with "permittee, surety, or any person with property interest in collateral offered as bond coverage." OSM concurs that this change would eliminate any misconception such as the commenter apparently experienced. The commenter rationalized that any member of the public may feel he or she has a right to request a bond reduction or to receive notice of proposed bond adjustment, because the entire public is indirectly involved in bond coverage due to public-hearing requirements for bond release, and that this provision could require extensive notification duties and delay bond readjustments. OSM feels that the commenter misread the regulation, but has agreed to amend the rule in order to avoid any further confusion. This change in § 805.14(a) has also been inserted in § 805.14(b).

Part 806—Form, Conditions, and Terms of Performance Bonds and Liability Insurance

§ 806.11 Form of the performance bond.

§ 806.11(a).—Paragraph (a) as proposed listed alternative bonding methods which a regulatory authority could adopt for bond coverage. No comments were received on this Paragraph. However, in adopting the final rule an additional method, combined surety/escrow bonding, has been added. The specific requirements of this alternative are explained under Section 806.17 herein.

§ 806.11(b) [originally § 806.11(c)].—Self-bonding was proposed as a separate Section 806.14 at the request of commenters on the petition who stated that, given the complexity and length of this Paragraph as originally promulgated, the provisions might be more easily addressed if self-bonding were separated.

OSM proposed to delete existing § 806.11(b) and issue it as a new § 806.14 and to redesignate § 806.11(c) as § 806.11(b). Comments and recommendations were requested on bonding alternatives that would better implement Section 509(c) of the Act for approving bonding alternatives. OSM received no substantive comments on the proposed redesignation. Therefore, OSM has redesignated § 806.11(c) as § 806.11(b) with no change in the text. No comments were received suggesting new or innovative alternatives to present bonding methods.

§ 806.12 Terms and conditions of the bond.

§ 806.12(e).—This section of the permanent regulations promulgated March 13, 1979, contains terms and conditions of surety bonds. These provtsions require the term of the surety bond to last for the life of the mine, noncancellation provisions, and limits on the amount a surety can post. Although § 806.12(e) was not opened for comment or proposed for amendment, a comment concerning the term of the bond was received and testimony heard that cited the restrictions of this section as detrimental to surety involvement in bonding of surface coal mine reclamation operations. A new § 806.17, "Combined surely/escrow bonding," has been added authorizing a provision for variation of surety liability when coupled with an escrow-bond replacement.

§§ 806.12(e)(6)(iii) and 806.12(g)(7)(iii).—These paragraphs as proposed would provide a compliance period of up to 90 days in which an operator could replace bond coverage if it is lost through bank or surety incapacity. Only favorable comments were received, and these sections are added as proposed.

§ 806.12(g)(2).—Paragraph (g)(2) as proposed provided that letters of credit be irrevocable, but permitted withdrawal if approved by the regulatory authority as part of the permit and if replaced with other suitable collateral. Commenters felt that clarification of the proposed rule regarding the terms and conditions of the rules governing the use of letters of credit was necessary. This was true both for letters of credit for surface mines and of renewal of bonds under Part 801. Commenters proposed alternative language that incorporates an "extend or forfeit" provision. OSM has considered the comments on this issue and has adopted the provisions by the commenter under section 806.12(g) to clarify the continued use of letters of credit as follows:

(1) Letters of credit are irrevocable during their terms and not indefinitely irrevocable or without termination date.

(2) Letters of credit used under Part 801, which are subject to forfeiture and collection by the regulatory authority if a suitable alternative or extension of the letter of credit is not provided 30 days prior to withdrawal, have been specified in the rule to provide specific requirement for continuous bond coverage.

§ 806.12(h).—This new section contains rules governing acceptance of real and personal property as collateral. The provisions of § 806.12(h) were proposed as suggested by commenters who cited the value of real and personal property as bond collateral and objected to the current restriction of this valuable asset to self-bonding. Therefore, this provision was proposed as a separate paragraph in Section 806.12. It was expected that this provision could create a problem for some States, and that the type and magnitude of the problem might vary from State to State. Comments by States, in particular, were requested regarding problems which might be anticipated in liquidating real or personal property and whether such liquidation could be handled within their administrative operations. Only one State indicated that liquidation would impose an excessive administrative burden under its practices. Consequently, OSM believes those States that have no difficulty with this provision or that experience problems which do not create excessive burdens should be allowed to accept real and personal property as collateral subject to the restrictions on value, quality and acceptable collateral in the Federal rules.

Section 806.12(h) proposed January 24, 1980, has been redesignated in the final rules as follows:

Proposed	*Has been adopted as*
806.12(h)(2)(iii)(c)	806.12(h)(3)
806.12(h)(2)(iv)	806.12(h)(4)
806.12(h)(2)(iv)(A)	806.12(h)(4)(i)
806.12(h)(2)(iv)(B)	806.12(h)(4)(ii)
806.12(h)(2)(iv)(C)	806.12(h)(4)(iii)
806.12(h)(2)(iv)(D)	806.12(h)(4)(iv)
806.12(h)(2)(iv)(E)	806.12(h)(4)(v)

§ 806.12(h)(1).—This section as proposed limited real and personal property used for collateral value to property located in the State where the mining is conducted. This provision was restrictive so that a State would have the legal authority to attach and liquidate land in that State in the event of forfeiture. A commenter recommended amendment of proposed § 806.12(h)(1) to allow the perfected first-lien security interest in personal property to include personal property not necessarily located in the State in which mining will be conducted. OSM has determined that the regulatory authority should have flexibility to determine whether to accept first-lien security interest in personal property not located in the State in which mining will be conducted. Section 806.12(h)(1) has been changed to allow the regulatory authority this flexibility. Regulatory authorities are cautioned to consider very carefully the degree of security involved in accepting property outside the State for collateral bonding purposes and, in particular, their ability to locate and gain possession of property and the difficulty they would experience in liquidating the properties in the event of forfeiture of bond.

§ 806.12(h)(2)(ii).—This section proposed that evaluation of property at fair market value be determined by appraisers appointed by the regulatory authority. One commenter suggested that companies be allowed to select independent appraisers certified in the State in which the property is located. Appraisers appointed by the regulatory authority would be appropriate, the commenter suggested, only in those instances in which the authority felt it was necessary to challenge the appraisal of a company-selected appraiser. Other commenters recommended one appraisal from the permittee and one by the regulatory authority, with the average value binding. OSM in considering these recommendations has accepted them in part. The wording of § 806.12(h)(2)(ii) has been changed to allow appraisals by any certified appraiser. The revised provision requires submission by the permittee of two independent appraisals by appraisers certified in the State where the property is located. Provisions also allow the regulatory authority the flexibility of having certified appraisers help in determining final, acceptable fair market value of property if the submitted appraisals are

V 45 / 153 AUG 6 80 UMI

questioned. The regulatory authority is ultimately responsible for making the final determination of property value.

§ 806.12(h)(2)(iii)(A).—This section proposed that attorneys evaluating a leasehold asset be competent and not company affiliated, as determined by the regulatory authority. This provision provides for an impartial evaluation of bond value. One commenter suggested that the regulatory authority has no jurisdiction over approving the competency of attorneys, who are professionals regulated by the courts. OSM agrees and has removed the requirement that the attorney be satisfactory to the regulatory authority, which implied a review of the qualifications of the lawyer by the regulatory authority.

§ 806.12(h)(2)(iii)(B).—This section stated that an abstracting office must be satisfactory to the regulatory authority. A commenter suggested that under § 806.12(h)(2)(iii)(B) the regulatory authority has no jurisdiction over approving the credentials of abstract offices who are authorized to transact business within the State, that they are regulated by another State agency. OSM agrees and has removed the requirement that an abstract office be satisfactory to the regulatory authority, and only requires that an abstracting office provide title certification.

§ 806.12(h)(3).—This section provides that real property which is offered as security for bonds may be accepted only after the reclamation standards of phase II are completed on such lands. One commenter suggested that § 806.12(h)(3) (which was proposed as § 806.12(h)(2)(iii)(C)) be changed to allow land which is part of the permit area to be used as security under collateral bonding if not to be mined initially. It is stated that for many operators, particularly small- to medium-size companies, the most valuable, unencumbered asset available for bond collateral is the coal land to be mined. OSM agrees that coal land not yet mined or disturbed and land that has been mined, and on which reclamation standards of phases II and III are complete, have asset value for real-property purposes of collateral bonding. This is evident from the intent to include real property as collateral at its value after reclamation. However, OSM has stipulated that real property, if used for collateral, shall not be mined under any permit, since the continuous value may not be assured throughout the term of the bond. Additionally, land already mined within the permit area cannot be used as security for collateral bonding until after the land has been reclaimed to phase II standards. Section 806.12(h)(2)(iii)(C) has been redesignated as § 806.12(h)(3) and reflects this position and has been incorporated into the rules as proposed.

§ 806.12(h)(4)(iv) [formerly § 806.12(h)(2)(iv)(D)].—This Section restricted securities under personal property to negotiable securities of the U.S. Government, municipal bonds, and general State revenue bonds.

Commenters on this Section requested that other marketable securities may provide adequate value for bonding purposes, subject to regulatory-authority acceptance. One commenter suggested that "investment-grade" marketable securities be accepted as collateral under this Section. OSM has considered broadening the acceptance of collateral to this type of security in securing the obligation of the permittee under bond. OSM has decided that this suggestion is a good one and has determined that the marketable securities of the major publicly or privately held corporations and companies are valuable assets, the value of which at any given time may be readily determined. The use of securities as collateral does not extend to common or perferred stock, investments subject to a margin call, or any interest in commodities and securities which are not rated by a nationally recognized securities rating service. OSM has changed the wording of this proposed Section by adding a phase which leaves it up to the regulatory authority (1) to decide whether or not the to accept securities proposed for collateral bonding purposes which are not negotiable bonds of the U.S. Government or general revenue bonds of the State and (2) the determine the soundness and value of such securities and the margin (ratio of bond value to market value) which might be acceptable for bonding purposes, and has redesignated this Paragraph as 806.12(h)(4)(iv) for clarity. The only restrictions on the use of marketable securities under collateral bonding are the specific provision for the securities to be those of highest rating assigned by a nationally recognized securities rating service and that the business entity represented in the security not be directly affiliated with the mining operation. This change is also reflected in the amended definitions of collateral bonds under Section 800.5.

§ 806.12(h)(4)(v) [formerly Section 806.12(h)(2)(iv)(E)].—This Section required that certificates of deposit be federally insured and that the depository be acceptable to the regulatory authority. One commenter argued that limiting securities, other than U.S. Government securities used for collateral bonding, to only federally insured (FDIC/FSLIC) accounts is impractical, because a bond in the amount of tens of millions of dollars would require securities purchased from hundreds or thousands of different financial institutions. OSM disagrees, since as of early 1980, amounts of up to $100,000 are insured by the FDIC/FSLIC. In addition, State-chartered financial institutions have accounts insured for various amounts. Because the provision is available to all operators, OSM has decided to retain this provision, even if some operators, large ones in particular, encounter slight inconvenience. The value of the insurance—reducing the risk to the regulatory authority—outweighs the inconvenience of this requirement. Therefore, no change has been made. However, the Section has been redesignated as § 806.12(h)(4)(v) from § 806.12(h)(2)(iv)(E) as proposed.

§ 806.12(i).—A new § 806.12(i) has been added to clarify the bond value which may be accepted in the use of real and personal property, especially marketable accounts and securities as collateral. This provision is required to establish a basis for determining the acceptable bond value of the collateral. If the total market value were accepted as bond value, the regulatory authority might have inadequate funds available for reclamation under conditions of forfeiture, because of the costs incurred through liquidation, legal expenses, withdrawal penalty, or through fluctuation of the market value due to depreciation, devaluation, or lack of market. This rationale is similar to that used by lending institutions in accepting credit risks in issuing secured loans. The regulatory authority must determine acceptable margins of liquidation value to market value to ensure continued financial assurance throughout the bond period. Additionally, the regulatory authority must evaluate the liquidation plan as part of the analysis of the collateral value to establish the fees involved in converting the collateral into cash. It is assumed that this rationale will apply to all collateral including letters of credit, certificates of deposit, real and personal property, and marketable securities authorized under the final rules. The margin percentages would vary for differing collateral, with those most convertible to cash the highest. This Section is added in conjunction with the acceptance of collateral for purposes of broadening the scope of performance assurance available to coal mine operators.

§ 806.13 Escrow bonding.

OSM proposed escrow bonding as an alternative means of generating bond collateral to cover extended liability in lieu of surety involvement, or paralleling a surety's involvement by compensating for additional increments under cumulative bonding, while having a constant surety bond. Escrow bonding is a form of collateral bonding, developed over a period of time through funds deposited with the regulatory authority or into an account payable only to the regulatory authority, on a coal-production, acreage-affected, or other similar basis. The provision was considered to allow flexibility in accepting bonding alternatives allowed by the Act which States may adopt at their discretion.

OSM believes that escrow bonding is a viable option and included this provision in the proposed rules, as stated in the preamble (45 FR 6028). OSM received two comments concerning escrow bonding. One industry commenter state that escrow bonding would not be a viable option for coal operators because it would tie up limited capital assets. While recognizing that some operators will not find the escrow-bond method viable for their operations, OSM believes that the benefits to other operators are sufficient to justify authorizing such an arrangement.

Escrow bonding is expected to supplement other bonding methods by replacing or adding bond coverage at a rate increasing with mining operations. The concept of escrow bonding as a supplement to other methods would provide the operator with (1) a method to develop a bond alternative which could be used to cover the liability period, (2) a method to develop a collateral bond in a short period to cover long-term facilities over the life of the operations and the subsequent liability period without imposing long-term involvement of surety companies, and (3) a method to compensate for bond increases due to inflation without renegotiating with the surety on all bond adjustments. An example of an escrow situation would occur is an operator posted a surety bond on the initial increment to be mined. By depositing an amount into an escrow account on the basis of production, the operator could establish collateral for the next increment. The original surety bond could remain constant throughout the life of the mine subject to other conditions of § 806.12(e). When mining operations end and the entire permit area is in varying phases of reclamation, the escrow account could be sufficient to cover the amount of bond required for the extended period of liability. This could eliminate a surety's role during the extended-liability period by releasing the surety's liability through provisions of § 807.11. This limited involvement of a surety would probably make it easier for an operator to obtain surety bonding. After reaching the end of the liability period, and approval by the regulatory authority, the balance of the escrow account would be released to the operator as with other collateral bonds.

The other comment, from a surety association, requested clarification of which bond would pay first under joint surety and escrow bond coverage if a bond were forfeited. It was also suggested that escrow funds be used initially to perform reclamation since the principal (operator) is primarily liable. With regard to the question as to which bond should pay first under joint surety and escrow bond coverage, OSM believes the parties involved should specify the order, as part of the bonding arrangement, in a binding agreement signed by the operator and surety. This determination should be made between the surety and the operator and be included in the surety contract, a copy of which is filed with the regulatory authority. The only criterion required by the regulatory authority is that the combination bond be sufficient to cover the full cost of reclamation. If the forfeited bond is in excess of the completed cost of reclamation, the residual money would be returned by the regulatory authority to the appropriate party.

On the basis of the foregoing discussion, OSM has elected to adopt the language proposed under § 806.13, without change.

§ 806.14 Self-bonding [originally § 806.11(b)].

Self-bonding was issued as part of the permanent regulatory program promulgating the statutory provisions of Section 509(c) of the Act which allow a permittee to self-bond under specific conditions. These conditions include a record of continuous operation and a satisfactory financial history. Conditions of bonding in general require sufficient indemnity or collateral for the regulatory authority to complete the reclamation operation if necessary under conditions of forfeiture. In the case of self-bonding, the regulatory authority must be satisfied the the bond under forfeiture has a sufficiently high cash value or that attachable assets may be liquidated for use in contracting for reclamation. Self-bonding has been the subject of much criticism since it was originally proposed.

Comments on self-bonding rules varied, but the most substantive stated that the provisions as proposed lacked the financial assurances necessary to complete reclamation. Commenters felt that an unsecured bond was in violation of the Secretary's own § 806.11(b). OSM received 50 comments on the proposed self-bonding regulations from 10 individuals and organizations. The general issues raised did not necessarily address the specific Sections which were opened, but changes were recommended for many of the provisions for self-bonding.

Some early commenters on the self-bonding regulations issued March 13, 1979, felt that the restrictions imposed in the regulations were unnecessarily severe, and that only the largest operators could consider this method. The surety industry feels if large operators are allowed to self-bond, they would no longer be among the surety industry's most desirable bonding clients.

The self-bonding rules published March 13, 1979, contained conditions which were intended to provide the degree of security necessary to meet the standard of ensuring that adequate funds would be available under forfeiture. The provisions require: (1) net worth to bond amount ratio of 6; (2) the operator to grant a security interest in collateral in favor of the regulatory authority; (3) submission of financial statements, including financial ratios; and (4) a signed agreement personally indemnifying the permittee, officers of corporations, or others signing the agreement. OSM received comments from many commenters including those writing surety bonds, environmentalists, regulators, and coal operators. The commenters felt that the provision for restricting the use of real and personal property to only self-bonding was discriminatory against small- and medium-sized operators, who would be unlikely to be able to meet the other qualifying provisions of self-bonding but who nevertheless have tangible assets in the form of real and personal property. To prevent such discrimination, OSM proposed to remove the real- and personal-property requirement from self-bonding and allow all operators/permittees to consider use of these assets as collateral bond.

Other commenters felt that the net-worth to bond-amount restriction was overly restrictive, by requiring standards of 6 times the bond amount to qualify for self-bonding. Therefore, OSM proposed to delete this provision. Another aspect cited in the comments as

V 45 / 153
AG 6 80
UMI

restricting the use of self-bonding was the requirement for a 10-year history of continuous operation and financial history. OSM considered this issue for change, but failed to find adequate support from the documents reviewed. (See preamble 45 FR 6028.)

A number of commenters were concerned about the requirement for a spouse's signature on the indemnity agreement, since an individual could not force a spouse to sign. OSM proposed to clarify this requirement by requiring a spouse to sign only if involved in the business.

In addition to the comments on the specific provisions of self-bonding, commenters cited the length and complexity of the rules as confusing and in need of rearrangement. Therefore, OSM proposed this Section on self-bonding as a separate § 806.14 to provided for this clarification, especially since the issue is included in a separate paragraph of the Act.

Among the most relevant comments received were those which stated that without the use of real and personal property as collateral the regulatory authority had no guarantee that funds would be available, especially under bankruptcy circumstances. Others felt that the use of an indemnity agreement alone would place financial and legal obligations on personal assets beyond the financial ability of the endorsees, and would not necessarily provide sufficient assets under forfeiture. It was pointed out that these persons would be signing as individuals who would be liable for financial assurance of the performance standards.

Other commenters questioned the need for highly detailed financial statements when securities and credit-rating services continually conduct financial analysis and continually analyze market indices. Others pointed out that while detailed provisions of self-bonding require financial data and interest in property, minimum standards for acceptance of ratios and for financial solvency were not specifically addressed.

Some commenters felt that self-bonding should be allowed for qualifying companies, so that the surety bonding market would be available for those who do not qualify. Sureties, on the other hand, stated that operators who could not self-bond under the OSM rules might not be considered for surety bonds, depending on self-bonding criteria of the regulatory authority.

A State regulatory authority pointed out that self-bonding without the requirement for collateral support does not comply with the provisions of the Act or § 806.11(b) of the rules, which require adequate funds be available at all times for reclamation and that there be substantial economic incentives for compliance. An operator in financial distress would (1) not have adequate funds to forfeit by which to complete reclamation and (2) have no economic benefit to be gained by completing the reclamation.

Other commenters cited including a need to develop a rationale for reviewing self-bonding, and a method for screening the potential self-bonding applicant. Also, they felt that a permittee should be able to understand the basis for qualifying for self-bonding before deciding whether to apply.

Therefore, on the basis of the general lack of support of the self-bonding rules as proposed and the need to further evaluate the provisions, OSM has chosen to leave in place the rules as they were published on March 13, 1979 (44 FR 15387). OSM believes that self-bonding as adopted in the permanent program rules provide highly secure financial assurance that reclamation will be completed, because the indemnity agreement provides a financial interest in marketable assets if forfeiture occurs. OSM also believes that the addition of real and personal property as part of collateral bonds and the provision for escrow accounts and combined surety/escrow bonds provide additional methods of self-bonding which are available to all operators.

OSM considered three options in rejecting the proposed amendment to the rules proposed January 24, 1980: (1) To further revise the proposed rules to comply with the commenters' requests, which woud probably require further public comment, (2) to delete self-bonding entirely, or (3) to reinstate the rules issued March 13, 1979, under the new Section 806.14 and further investigate and propose changes and modifications to correct identified deficiencies.

In considering these options, OSM felt that deleting the self-bonding rules entirely would delete a statutory requirement which, although criticized as being overly stringent, nevertheless is considered to provide the adequate degree of assurance the Act intends. Revising the proposed rules to provide adequate cash under forfeiture and to provide economic incentive requires reinstating of the security interest in real and personal property and qualification standards not in the proposed rule. This would further delay the issuance of this rulemaking by requiring further comment and analysis. Therefore, options 1 and 2 were rejected, and option 3 has been selected with the provision that OSM acknowledges the difficulties observed in the original self-bonding provisions and accepts all comments received during this rulemaking for consideration in evaluating further amendments to self-bonding.

OSM intends to conduct a study of alternatives to the original language and identification of implementing qualification guidelines. The proposed study will encompass methods to evaluate companies who should be eligible for self-bonding, methodology for review of financial credentials, guidelines to establish qualifying financial ratios, the nature and effect of operating histories, collateral requirements, corporate and individual liability, risk-analysis techniques, and other specific elements of the detailed provisions in § 806.14 not opened during this rulemaking. OSM will present the results of the study for public comment in a future rulemaking. Until revised, the provisions issued herein shall be used in any self-bonding program for surface coal mining operations.

OSM finds, based on the comments and discussion above, that self-bonding as proposed in the January 24, 1980 (45 FR 6028) rules, does not provide adequate financial assurance to the regulatory authority, and has decided to retain the rules governing self-bonding as they were promulgated March 13, 1979. A regulatory authority finding that amendments are necessary to self-bonding, and that demonstrates adequate financial assurances, can be submitted as a formal request for OSM consideration as a "State Window" under provisions of 30 CFR 731.13 and in accordance with alternative bonding systems under 30 CFR 806.11(b) of this notice.

As was proposed January 24, 1980, however, original § 806.11(b) is redesignated as § 806.14, § 806.11(b)(1) becomes § 806.14(a), and so forth throughout.

§ 806.17 Combined surety/escrow bonding.

Section 806.17 is added to the regulations as an extension of the use of escrow bonds in conjunction with surety coverage. This method resulted from comments from surety and industry to allow a short-term solution to surety liability. One industry commenter expressed concern over the restrictions imposed on the surety companies in writing bond coverage. These restrictions included the long-term nature of the bond and the noncancellation requirements. In a meeting with the Surety Association of America at the Department of the Interior on March 6, 1980, the surety representative expressed the following reasons for the surety industry's reluctance to issue bonds: (1) long-term commitment, (2) lack of control of bond amount due to adjustment for unforeseen reclamation costs, and (3) delay of bond release due to citizen involvement in the bond-release process.

The commenter cites, for example, the requirement that the regulatory authority not accept a surety bond unless it is noncancellable by the surety for any reason. The commenter sees this as an attempt by OSM to impose its own standards of insurable risks upon the surety industry and to force a merger of the obligations of the surety and the operator not for the life of a bonding contract negotiated at arm's length by the surety and the operator, but for the life of the mine plus up to 10 additional years. It is contended that this forced merger is excessive and unfair and that unless a mechanism is created to balance the projected cost of surety bonding with the projected revenues from providing such an instrument, surety companies will elect not to offer surety bonding.

In answer to these concerns of the surety industry, the commenter suggested a possible solution that would allow short-term bonding of a duration of 1 to 2 years. At the end of the initial period, the operator could replace the surety bond either by renewal or by posting another alternative bond acceptable to the regulatory authority.

OSM has reviewed this proposal and has determined that the provisions for long-term surety bonds must remain unchanged, because the Act requires bond coverage to extend until reclamation has been completed. Therefore, unless a specific alternative coverage is introduced to release a surety liability, the bond must extend for an indefinite term. However, the comment recommending that a provision be developed to allow short-term surety bonds led to the consideration of surety terms which, when combined with other demonstrated financial assurance such as an escrow account, would allow the surety company to avoid long-term commitment, could allow a constant surety bond amount by varying escrow deposit rates to cope with adjustments, and subject the escrow balance rather than the surety bond to public comment. This relief from the burden pointed out by the surety industry is similar to that of substitution of bonds in § 805.15. This alternative would provide the conditions requested by the commenters, but it would obligate an operator to establish an escrow account to ensure adequate substitution upon surety-bond termination. The method as issued provides for a surety bond to be issued for a fixed term and fixed amount, with a guaranteed escrow replacement upon surety bond expiration. The surety bond may be reduced periodically or remain constant, but the total bond amount must equal or exceed the estimated reclamation costs. Conditions of forfeiture for the combined surety/escrow bond method would include failure to maintain the escrow in accordance with the established deposit schedule. The regulatory authority and surety would receive quarterly escrow statements.

Since this bonding method combines surety and escrow methods, but alters the terms of the surety bond from those in § 806.12(e), this alternative has been issued under § 806.17, "Combined surety/escrow bonding," for adoption in State and Federal regulatory programs as deemed appropriate. OSM believes that this method will facilitate surety-industry involvement in the bonding of coal mine reclamation by eliminating some of the more objectionable restrictions.

Part 807—Procedures, Criteria, and Schedule for Release of Performance Bond

§ 807.12 Criteria and schedule for release of performance bond.

§ 807.12(a).—As proposed, this Section would have allowed the regulatory authority discretion to release a portion or all of the performance bond upon completion of reclamation by providing that it "may" release, portions rather than that it "shall" release. Commenters requested that the wording of § 807.12(a) be changed to require the regulatory authority to release specific bond amounts as each phase of reclamation is completed. The proposed language is consistent with Section 519(c) of the Act which states "may," indicating an intention that the regulatory authority have the discretion to release. Thus, to adopt the commenters' suggestion and make release mandatory would be in conflict with the Act. Consequently, OSM feels that no change is required in this Section.

§ 807.12(b).—This Paragraph sets forth the maximum amounts of bond which may be released by the regulatory authority as reclamation phases are achieved. The provisions as published March 13, 1979, allow 60 percent, 25 percent, and 15 percent release for phases I, II, and III, respectively. Industry comments have presented proposals for varying the percentage release and redefinition of the reclamation phases. Several commenters responded to the Department's request in the notice of proposed rules to present alternative bond-release percentages under this Section. Review of the proposals shows the following breakdowns of bond-release percentages:

Percentage of bond released

Phase	Existing rules 30 CFR 807.12	Proposal 1	Proposal 2	Proposal 3
I Backfilling and grading, drainage control, and topsoil replacement	60	[1] 60	60	60
Topsoil replacement and seeding		15		
II Successful vegetation	25	20	30	35
III Termination of liability	15	5	10	5

[1] Does not include topsoil replacement.

Permanent rule § 807.12 interprets bond-release phase I as including the following stages:

(a) Backfilling and regrading: Return of overburden material to achieve rough contour as set forth in the reclamation plan.

(b) Topsoil replacement: Return of the soil horizons which are capable of supporting vegetation, and fine grading of this stratum to finished contours.

(c) Drainage control: Construction of diversion ditches, swales, erosion-control structures, sediment control, and other aspects of fine grading required before initial planting.

In considering a separation of the initial reclamation phase into (1), backfilling, grading, and drainage control, and (2) topsoil replacement and seeding, the following proposals were made by commenters.

Proposal 1 would allow 60 percent of the bond to be released upon completion of backfilling and grading, 15 percent upon completion of topsoil replacement and initial planting, and 20 percent upon achievement of vegetative success, with 5 percent retained during the liability period.

The industry commenters took the position that replacing topsoil and seeding an area should be considered as another phase, separate from backfilling, grading, and drainage control, because backfilling and grading can be performed continuously, whereas topsoiling and seeding are seasonal. They argue that under current rules, bond release on a backfilled and graded area must wait until topsoil replacement and drainage control have been achieved before any release is possible. Section 519(c)(1) of the Act clearly requires that an operator complete backfilling, regrading, and drainage

V 4 5 / 1 5 3
A G 6 8 0
UMI

control before 60 percent of the bond can be released. At the time of completion of backfilling operations alone, only a portion of the 60 percent could be released. Some States, in proposing additional phases of bond release, have specified 40 percent for backfilling and 20 percent for topsoil replacement. This interpretation coincides with the OSM interpretation of the Act. Therefore, OSM considers a 75-percent release of bond upon completion of backfilling, grading, and topsoil replacement, as specified in proposal 1, to be excessive.

Proposal 1 calls for retention of 5 percent of the bond for the extended-liability period as sufficient to repair any problems existing during the 5- or 10-year waiting period.

OSM believes that 5 percent of the total bond might be adequate for repairing isolated occurrences of vegetation failure if the funds were available on an average per-acre basis, but Section 509 of the Act requires sufficient funds for a third party to reestablish revegetation in the event of a failure and does not specify whether reparable or total vegetative failure has occurred. The cost of seedbed preparation, seeding, fertilization, and any augmented practices to ensure vegetative success must be considered in developing the cost of reestablishing revegetation. Therefore, an amount of not less than the original cost to an operator of establishing the vegetation must be used as a basis for the amount retained. This vegetative portion of the bond must be sufficient to cover the contingency of vegetative failure after initial vegetation, as well as covering the initial cost to vegetate if the operator forfeits the bond before conducting initial vegetation.

Proposals 2 and 3 are similar to proposal 1 in that they propose variations in the phase I and phase II percentages. Proposal 2 would allow 30-percent release after successful vegetation, and proposal 3 would allow 35 percent. In addition, the amount to be retained during the liability period would be reduced to 10 percent and 5 percent, respectively.

These proposals request additional bond release at achievement of successful vegetation, which reduces the amount retained during the liability period.

Cost factors for contracting, the scale of operation, and area adjustments must be included in the percentage to be retained. Additionally OSM recognizes that proposals 2 and 3 request that the amount of performance bond to be held during the remainder of the liability period be reduced to 10 or 5 percent, respectively, of the total reclamation cost. It is not apparent whether the 5- and 10-percent values proposed take into account the addition of topsoil, seedbed preparation, or other corrective action which might be required. Therefore, the present figure in the OSM regulations of 15 percent of the total estimated cost of reclamation appears to be justified, in light of the possibility that a State would be contracting for the reclamation including revegetation, administration, contracting expenses, contingency actions, and uncertainty as to the degree of corrective action necessary. To date, commenters have requested reduction of the amount retained from 15 percent to 10 percent or less, but no substantive data has been provided with which to evaluate the conclusion that a reduction is necessary. Therefore, proposals 1, 2, and 3 have been rejected, and no change in the percentages currently specified in Section 807.12 will be made in this rulemaking. Experience may prove the necessity for revising these percentages in the future, but, in the initial implementation of the regulatory program, OSM believes these amounts are realistic.

§ 807.12(b)(2).—As proposed, this Section included a requirement governing the amount of bond to be retained to cover revegetation and construction of drainage-control structures on an increment or the entire permit area. A commenter pointed out that the requirement to include reconstruction of any drainage structure on the entire permit area may apply only if the bond covers the entire permit. The intent is to cover all drainage structures cumulatively under each separate increment. Failure to make this intent clear is an oversight, since the bond amount is calculated on an incremental basis and should include drainage structures only on the increment. Although the bond amount is computed to cover a specific increment, under conditions of forfeiture a bond on an increment may extend to the entire permit area. Therefore, language has been added to the final rule to reflect the cost of reconstructing drainage structures on the area covered by the bond.

§ 807.12(c).—This Section as proposed eliminated the bond-release formula which tied final percentage released with achievement of phase III reclamation on the entire permit area. A commenter pointed out that there might be confusion as to the difference between release of bond and release of surety. The confusion occurs since liability periods, bond releases, and other milestones are applied to bond coverage. The surety liability covers the life of the mine, but no specific Section addresses when the surety liability terminates. The commenter recommended that a surety be released by an official written notice from the regulatory authority.

OSM feels that this provision would be consistent with the notification of surety in other Sections of Subchapter J. Section 805.13 requires that bond liability extend until reclamation operations have been completed and that the bond be released through provisions of Part 807. OSM feels that no amendment to the regulation is necessary since the suggested provision for notification can be found in § 807.11(f) (2) and (3), where a regulatory authority is required to notify a permittee and other interested parties in writing of its decision to release or not to release all or a part of the performance bond. It is intended that the final bond-release notice and final release of the operator from the permit requirements also release surety liability.

Another commenter felt that this Section provides for an increment to be totally released from bond coverage after phase III reclamation has been achieved, even if the remaining increments of the permit area are in varying phases of mining reclamation or liability. A commenter pointed out that § 807.12(c) appeared to release bond liability on an increment by releasing that increment from the permit area. The preamble for § 807.12 (44 FR 15121) incorrectly referred to release of an increment as part of the permit area after phase III reclamation was completed. However, OSM believes that the land area of a permit must remain intact unless amended through the permitting process. OSM intends this Section to allow total release of bond coverage on an increment before completion of the liability period on the remaining bonded permit area. However, bond liability on any increment within the permit area extends to the entire permit area under conditions of forfeiture. Therefore, no increment can be totally released from the permit area until bond on the last increment is released, unless the permit is amended by the regulatory authority. The final rule reflects the intent of § 808.12(c) in requiring any incremental bond to extend to the entire permit area and requires that no increment be totally released from bond liability for the entire permit area until conditions of phase III reclamation have been met on the entire permit area.

Part 808—Performance Bond Forfeiture Criteria and Procedures

§§ 808.11(c), 808.12(d), and 808.13.—OSM proposed additional paragraphs under conditions of forfeiture under §§ 808.11(c), 808.12(d), and various Paragraphs of 808.13. No comments were received on these issues, and therefore the proposed rules are being adopted as final.

§ 808.12(c).—This Section requires that the liability of each bond on any portion of the permit area extend to the entire permit area under conditions of forfeiture, if reclamation funds exceeding those specified for a particular increment are required. The permanent program adopted on March 13, 1979, added this provision at the request of commenters but restricted coverage indirectly only to protection of the hydrologic balance. However, the specific reference to "hydrologic balance" was challenged. Plaintiffs in a suit in the District Court for the District of Columbia challenging some of the permanent program rules (*In Re:* Permanent Surface Mining Regulations Litigation, filed May 9, 1979, D.D.C.-Civil Action 79–1144) contended this restriction was unauthorized by the Act. The Department agreed and informed the Court that this provision will be amended to eliminate the restriction to hydrolgic balance. Therefore, the proposed rule reflected the concept that any bond must extend to any condition on the entire permit area.

One comment concerning proposed Part 808 requested deletion of the last sentence in § 808.12(c), which reads, "Liability under any bond covering any increment of the permit area may extend to the entire permit area." The commenter contended that the concept of incremental bonding is that portions of a bond are tied to specific portions of the permit area and therefore that there is no reason why, even though a complete reclamation plan may apply to the entire permit area, each incremental surety cannot suffice to cover each increment's reclamation independently. In the explanation of incremental bonding in the March 13, 1979, rules, the preamble discussion of § 807.13 (44 FR 15121) stated that the important concept is that while the filing and release of bond liability may be incremental, any bond applicable to a permit extends to all acreage within the permit area. This is stated explicitly in Section 509 of the Act, which requires liability on any bond including separate increments to be conditional upon performance of all the reclamation. Therefore, the last sentence cannot be deleted.

Statements of Significance and Environmental Impact

The Department of the Interior has determined that this document is not a significant rule and does not require a regulatory analysis under Executive Order 12044 and 43 CFR Part 14. The Department of the Interior has determined that amendment of the rules within the scope of this document will not significantly affect the qualify of the human environment. Accordingly, this action is not subject to the environmental impact statement requirements of the National Environmental Policy Act.

Dated: July 31, 1980.

Charles P. Eddy,

Acting Assistant Secretary, Energy and Minerals.

SUBCHAPTER J—BOND AND INSURANCE REQUIREMENTS FOR SURFACE COAL MINING AND RECLAMATION OPERATIONS

PART 800—GENERAL REQUIREMENTS FOR BONDING OF SURFACE COAL MINING AND RECLAMATION OPERATIONS UNDER REGULATORY PROGRAMS

A. Section 800.5 is amended as follows:

1. The definition of collateral bond is revised to read in its entirety as set forth below.

§ 800.5 Definitions.

* * * * *

Collateral bond means an indemnity agreement in sum certain deposited with the regulatory authority or executed by the permittee and supported by one or more of the following—

(1) The deposit of cash in one or more federally insured accounts, payable only to the regulatory authority upon demand;

(2) Negotiable bonds of the United States, a State, or a municipality, endorsed to the order of, and in the possession of, the regulatory authority;

(3) Negotiable certificates of deposit, payable only to the regulatory authority and in its possession;

(4) An irrevocable letter of credit of any bank organized or authorized to transact business in the United States, payable only upon presentation by the regulatory authority;

(5) A perfected, first-lien security interest in real or personal property, in favor of the regulatory authority;

(6) Investment-grade rated securities, having the highest rating issued by a nationally recognized securities rating service, endorsed to the order of, and in the possession of, the regulatory authority, excluding all issues of the type traded on a commodity exchange such as contracts for future delivery of goods.

* * * * *

B. Section 800.11(b)(1) is amended as follows:

1. Paragraph (ii) is redesignated as Paragraph (iii).

2. New Paragraph (ii) is added to read in its entirety as set forth below.

§ 800.11 Requirement to file a bond.

* * * * *

(b)(1) * * *

(ii) A cumulative bond schedule listing the areas covered by the bond and the sequence for release of acreage as it progresses through varying reclamation phases and for the addition of other acreage as it is affected. The amount of bond required to obtain a permit shall include the full reclamation cost of the initial area being affected; or

* * * * *

C. Section 800.13 is amended as follows:

1. Paragraph (a) is revised to read in its entirety as set forth below.

2. Paragraph (d) is revised to read in its entirety as set forth below.

§ 800.13 Regulatory authority responsibilities.

(a) The regulatory authority shall prescribe and furnish forms for filing performance bonds.

* * * * *

(d) The regulatory authority may not accept a self-bond in lieu of a surety or collateral bond, unless the permittee meets the requirements of 30 CFR 806.14 and any additional requirements in the State or Federal program.

* * * * *

A new part 801, proposed January 24, 1980, is added in its entirety to read as set forth below.

PART 801—BONDING REQUIREMENTS FOR UNDERGROUND COAL MINES, COAL-PROCESSING PLANTS, ASSOCIATED STRUCTURES, AND OTHER COAL-RELATED LONG-TERM FACILITIES AND STRUCTURES

Sec.

801.1 Scope.
801.2 Objective.
801.4 Responsibilities.
801.11 Applicability.
801.12 Amount of bond required.
801.13 Period of liability.
801.14 Form of bond.
801.15 Applicability of other sections.
801.16 Subsidence and mine drainage.
801.17 Bond forfeiture.

Authority: Sections 102, 201, 501, 503, 504, 507, 508, 509, 510, 515, 516, 519, and 701 of Pub. L. 95–87; 91 Stat. 448, 449, 467, 468, 470,

V 45 / 153 AG 6 80 UMI

471, 477, 479, 480, 486, 495, 498, 501, and 516, (30 U.S.C. 1202, 1211, 1251, 1253, 1254, 1257, 1258, 1259, 1260, 1265, 1266, 1267, and 1269).

§ 801.1 Scope.

This Part establishes bonding procedures applicable to long-term facilities, such as underground mines, coal-processing plants, refuse areas, and other long-term facilities and structures associated with surface and underground coal mining. Such permits may have several renewal terms, or may have a single permit term in excess of 5 years, so long as the surface area affected during the life of the facility remains basically unchanged.

§ 801.2 Objective

The objective of this Part is to set forth special bonding rules for long-term operations to account for differences between short-term and long-term operations and between surface and underground mines.

§ 801.4 Responsibilities.

The regulatory authority shall ensure that bond coverage is provided for long-term surface facilities and surface areas of underground mines subject to the requirements of this Chapter. Specific reclamation techniques required for underground mines and long-term facilities, such as the removal of deposits of coal fines, sealing of shafts and portals, and removal of structures, shall be considered in determining the amount of bond to complete the reclamation and as determined in the associated cost estimates.

§ 801.11 Applicability.

(a) Operations subject to provisions of this Part are—

(1) Portions of underground coal mines which will continuously disturb the surface for a period in excess of 5 years and surface construction activities included under subsidence-control measures and mine-drainage treatment in 30 CFR 801.16;

(2) Coal-processing plants to be operated for more than 5 years from the date a permit is first issued under the regulatory program;

(3) Coal-refuse areas to be operated for more than 5 years;

(4) Coal-loading facilities to be operated for more than 5 years from the date a permit is first issued for it under the regulatory program; and

(5) Long-term coal-related facilities to be permitted for operation longer than 5 years in accordance with 30 CFR 785.21.

(b) Operations listed in Paragraph (a) of this Section, conducted within a permit area for a mine which includes areas or facilities not subject to this Part, may be bonded as a separate increment of the surface mine permit area. If bonded separately, provisions of this Part shall apply to that increment. If bonded as part of the permit area which includes areas or facilities not subject to this Part, bond liability shall continue in accordance with 30 CFR 805.13.

§ 801.12 Amount of bond required.

(a) The regulatory authority shall determine the bond amount necessary to complete reclamation of the area in accordance with 30 CFR 805.11.

(b) The area considered in the reclamation plan shall include the entire area disturbed.

(c) The amount of bond necessary to obtain a permit is the entire performance bond required during the term of the permit.

§ 801.13 Period of liability.

(a) The period of liability for every bond covering a long-term operation shall commence with issuance of a permit and extend until all reclamation, restoration, and abatement work under provisions of the permit have been completed, and the bond released in accordance with Part 807 or replaced in accordance with Paragraph (b) of this Section.

(b) To achieve the liability requirements for long-term operations, continuous bond coverage shall be provided. Bond coverage shall commence with issuance of a permit, cover the initial term of the bond, and be conditioned to extend, replace, or pay the full amount of the bond 120 days prior to the expiration of any bond term, which in no case shall be less than 5 years. Failure to extend or replace bond coverage not less than 120 days prior to expiration shall subject the bond to conditions of forfeiture under Part 808.

§ 801.14 Form of bond.

Performance bonding may be authorized by the regulatory authority in accordance with the methods listed in 30 CFR 806.11. An escrow account may be established on the basis of a coal-production rate, periodic-deposit schedule, or other similar schedule, so that replacement of surety bond with collateral bond in whole or in part may be authorized in accordance with 30 CFR 806.13. Upon development of full bond coverage under an escrow account, any surety bond or indemnity agreement may be released. All bonding methods shall comply with the provisions and conditions set forth in this Part.

§ 801.15 Applicability of other Sections.

Except to the extent that provisions of other Parts of Subchapter J conflict with this Part, all other portions of Subchapter J shall apply to bonding requirements for underground coal mining operations and long-term coal-related facilities subject to this Part.

§ 801.16 Subsidence and mine drainage.

(a) 30 CFR 784.20 and 817.121 through 817.126 shall apply to the protection of surface-owner property rights against potential damage caused by unplanned subsidence. All measures undertaken to conform with 30 CFR 784.20(b) in the prevention of damage to surface facilities through planned subsidence shall be subject to performance bond coverage, and the estimated cost of such measures shall be included under 30 CFR 805.11. In addition, the bond liability shall extend to performance of the construction, site preparation, and relocations approved by the regulatory authority under 30 CFR 784.20(a). Release of bond coverage for construction of control measures to prevent subsidence shall be authorized only after final inspection, acceptance, and approval by the regulatory authority, and shall not be subject to the liability period of 30 CFR 805.13 or the bond-release criteria of 30 CFR 807.12. Procedures for seeking bond release for construction of surface measures shall be conducted in accordance with 30 CFR 807.11. Inspections of the construction of surface control measures shall be coordinated with the surface owner, if possible. If a surface owner refuses to allow an inspection, a separate request to waive inspection shall be sent to the surface owner, by certified mail with return receipt requested. If the regulatory authority receives no response within 30 days of delivery of the notice, or if within such period a response is received which waives the inspection or denies reasonable access for inspection, the regulatory authority may assume that the inspection has been waived and the applicable portion of the bond may be released without inspection having occurred.

(b) Performance-bond liability shall include construction of planned impoundments, conveying systems, and treatment facilities for mine drainage in accordance with the standards of 30 CFR 816.42, 816.48, 816.50, 817.42, 817.48, and 817.50. Bond release for such facilities shall be authorized only after final inspection, acceptance, and approval by the regulatory authority and is not subject to the period of liability of 30 CFR 805.13 or the bond-release criteria of 30 CFR 807.12. Procedures for seeking bond release shall be conducted in accordance with 30 CFR 807.11. Bond liability with respect to mine drainage shall extend to the construction and ultimate removal of facilities described in the permit application or reclamation plan as associated with the treatment of mine drainage. Bond coverage for any subsequent revegetation on that area previously used as an impoundment shall be subject to liability and releases of 30 CFR 805.13, 807.11, and 807.12. The estimated bond amount computed under 30 CFR 805.11 need not include continuous treatment, monitoring, or potential unpredictable expenses as a result of mine drainage.

§ 801.17 Bond forfeiture.

The regulatory authority shall forfeit a bond pursuant to this Part if—

(a) The operator has not filed a performance bond or other security as required under this Part, 120 days prior to bond expiration; or

(b) The regulatory authority determines that a permittee is subject to forfeiture under the criteria of 30 CFR 808.13(a).

PART 805—AMOUNT AND DURATION OF PERFORMANCE BOND

A. Section 805.13 is amended as follows:

1. Paragraphs (b)(1) through (b)(3) are revised to read in their entirety as set forth below.

2. Paragraph (c) is redesignated as Paragraph (d).

3. Paragraph (c) is added to read in its entirety as set forth below.

4. Paragraph (d) is redesignated as Paragraph (e) and is amended to read in its entirety as set forth below.

5. A new Paragraph (f) is added to read in its entirety as set forth below.

6. A new Paragraph (g) is added to read in its entirety as set forth below.

§ 805.13 Period of liability.

* * * * *

(b)(1) In addition to the period necessary to achieve compliance with all requirements of the Act, this Chapter, the regulatory program, and the permit, the period of liability under performance bond shall continue for a minimum period in accordance with Paragraph (b)(2) of this Section, beginning after the last year of augmented seeding, fertilization, irrigation, or other work.

(2) The minimum period of liability shall continue for not less that 5 years in areas with more than 26.0 inches average annual precipitation, and for not less than 10 years in areas with 26.0 inches or less average annual precipitation. The period of liability shall begin again whenever augmented seeding, fertilization, irrigation, or other work is required or conducted on the site prior to bond release, except as noted in Paragraph (b)(3) of this Section.

(3) The regulatory authority may approve selective husbandry practices, excluding augmented seeding, fertilization, or irrigation, without extending the period of bond liability, if the permittee can demonstrate that discontinuance of such measures after the liability period expires will not reduce the probability of permanent revegetation success. Approved practices may include pest and vermin control, pruning, and repair of any rills and gullies and any reseeding and/or transplanting specifically necessitated by such actions, but shall be normal conservation practices within the region for unmined lands having land uses similar to the approved postmining land use of the area covered by the bond.

(c) A portion of a bonded area requiring extended liability because of augmentation may be separated from the original area and bonded separately upon approval by the regulatory authority. Before determining that extended liability should apply to only a portion of the original bonded area, the regulatory authority shall determine that such portion—

(1) Is not significant in extent in relation to the entire area under the bond; and

(2) Is limited to isolated, distinguishable, and contiguous portions of the bonded area and does not comprise scattered or intermittent occurrences throughout the bonded area.

(d) * * *

(e) If the regulatory authority issues a written finding approving a long-term intensive agricultural land use, the operation shall be exempt from the requirements of 30 CFR 816.111(a) or 817.111(a). Such a finding shall not constitute a grant of an exception of the bond-liability periods of this Section.

(f) The bond liability of the permittee shall include only those actions which the operator is obliged to take under the permit, including completion of the reclamation plan in such a manner that the land will be capable of supporting a postmining land use approved under 30 CFR 816.133(c) or 817.133(c). Actions of third parties which are beyond the control and influence of the operator and for which the operator is not responsible under the permit need not be covered by the bond.

(g) If an area is separated under Paragraph (c) of this Section, that portion shall be bonded separately and the applicable period of liability, in accordance with 30 CFR 805.13(b), shall commence anew. The period of liability for the remaining area shall continue in effect without extension. The amount of bond on the original bonded area may be adjusted in accordance with 30 CFR 805.14.

B. Section 805.14 is amended as follows:

1. Paragraph (a) is revised to read in its entirety as set forth below.

2. Paragraph (b) is revised to read in its entirety as set forth below.

§ 805.14 Adjustment of amount.

(a) The amount of the performance bond liability applicable to a permit shall be adjusted by the regulatory authority as the acreage in the permit area is revised, methods of mining operation change, standards of reclamation change, or when the cost of future reclamation, restoration, or abatement work changes. The regulatory authority shall notify persons involved in bond coverage of any proposed bond adjustments and provide those persons an opportunity for an informal conference on the adjustment. For purposes of this Section, a person involved in bond coverage shall include the permittee, the surety, and any other person with a property interest in collateral posted under this Subchapter who has in writing to the regulatory authority requested such notification at the time the collateral is posted or the interest is acquired, whichever occurs later. The regulatory authority shall review each outstanding performance bond at the time permit reviews are conducted under 30 CFR 788.11, and shall reevaluate those perfomance bonds in accordance with the standards in 30 CFR 805.11.

(b) A permittee, surety, or any person with property interest in collateral offered as bond coverage may request reduction of the required performance bond amount upon submission of evidence to the regulatory authority proving that the permittee's method of operation or other circumstances will reduce the maximum estimated cost to the regulatory authority if it has to complete the reclamation and therefore warrants a reduction of the bond amount. The request shall be considered as a request for partial bond release in accordance with the procedures of 30 CFR Part 807 of this Chapter.

PART 806—FORM, CONDITIONS, AND TERMS OF PERFORMANCE BONDS AND LIABILITY INSURANCE

A. Section 806.11 is amended as follows:

1. Paragraph (a) is revised to read in its entirety as set forth below.

2. Paragraph (b) is redesignated as § 806.14 without text change.

3. Paragraph 806.11(c) is redesignated as § 806.11(b).

V 4 5 / 1 5 3 A G 6 8 0 UMI

§ 806.11 Form of the performance bond.

(a) The form of the performance bond shall be prescribed by the regulatory authority in accordance with the provisions of 30 CFR Parts 805 and 806. The regulatory authority may allow—

(1) A surety bond,

(2) A collateral bond,

(3) An escrow account,

(4) Self-bonding,

(5) Combined surety/escrow bonding, or

(6) A combination of any of these bonding methods.

* * * * *

B. Section 806.12 is amended as follows:

1. Paragraph (e)(6)(iii) is revised to read in its entirety as set forth below.

2. Paragraph (g)(2) is revised to read in its entirety as set forth below.

3. Paragraph (g)(7)(iii) is revised to read in its entirety as set forth below.

5. Paragraph (h) is added to read in its entirety as set forth below.

6. A new paragraph (i) is added to read in its entirety as set forth below.

§ 806.12 Terms and conditions of the bond.

* * * * *

(e) * * *

(6) * * *

(iii) Upon the incapacity of a surety by reason of bankruptcy, insolvency, or suspension or revocation of its license, the permittee shall be deemed to be without bond coverage in violation of 30 CFR 800.11(b). The regulatory authority shall issue a notice of violation against any operator who is without bond coverage. The notice shall specify a reasonable period to replace bond coverage, not to exceed 90 days. During this period the regulatory authority shall conduct weekly inspections to ensure continuing compliance with other permit requirements, the regulatory program, and the Act. Such notice of violation, if abated within the period allowed, shall not be counted as a notice of violation for purposes of determining a "pattern of willful violation" under 30 CFR 843.13 and need not be reported as a past violation in permit applications under 30 CFR 778.14 or 782.14. If such a notice of violation is not abated in accordance with the schedule, a cessation order shall be issued.

* * * * *

(g) Letters of credit shall be subject to the following conditions:

* * * * *

(2) Letters of credit shall be irrevocable during their terms. The regulatory authority may approve the use of letters of credit as security in accordance with a schedule approved with the permit. Any bank issuing a letter of credit for the purposes of this paragraph shall notify the regulatory authority in writing at least 90 days prior to the maturity date of such letter of credit or the expiration of the letter of credit agreement. Letters of credit utilized as security in areas requiring continuous bond coverage shall be forfeited and collected by the regulatory authority if not replaced by other suitable evidence of financial responsibility at least 30 days before the expiration date of the letter of credit agreement.

* * * * *

(7) * * *

(iii) Upon the incapacity of a bank by reason of bankruptcy, insolvency, or suspension or revocation of its charter or license, the permittee shall be deemed to be without bond coverage in violation of 30 CFR 800.11(b). The regulatory authority shall issue a notice of violation against any operator who is without bond coverage. The notice shall specify a reasonable period to replace bond coverage, not to exceed 90 days. During this period the regulatory authority shall conduct weekly inspections to ensure continuing compliance with other permit requirements, the regulatory program, and the Act. Such notice of violation, if abated within the period allowed, shall not be counted as a notice of violation for purposes of determining a "pattern of willful violation" under 30 CFR 843.13 and need not be reported as a past violation in permit applications under 30 CFR 778.14 or 782.14. If such a notice of violation is not abated in accordance with the schedule, a cessation order shall be issued.

* * * * *

(h) Real and personal property posted as a collateral bond shall meet the following criteria:

(1) The applicant shall grant the regulatory authority a mortgage or perfected first-lien security interest in real or personal property.

(2) The instrument creating such mortgage or security interest shall vest such interest in the regulatory authority so as to secure the right and power in the regulatory authority to immediately attach said property concurrent with the issuance of a notice of forfeiture under 30 CFR Part 808 and to sell or otherwise dispose of the property by a public or private transaction, and to establish the regulatory authority as the sole secured creditor with respect to such property, so as to assure the regulatory authority of a preferred claim over all other creditors in case of bankruptcy. For classes of property with respect to which a preferred claim cannot be maintained against subsequent bona fide purchasers for value under the Uniform Commercial Code, the instrument shall require possession of the property by the regulatory authority. The property subject to the security interest shall not be subject to any conflicting or prior security interest. The instrument creating the interest in real property shall be recorded as authorized for fee interests. The instrument creating the security interest in personal property shall be recorded in accordance with, and otherwise conform to, the requirements of the Uniform Commercial Code for perfecting a security interest in the State. In order for the regulatory authority to evaluate the adequacy of the property offered to satisfy this requirement, the applicant shall submit a schedule of the real or personal property which shall be pledged to secure the obligations under the indemnity agreement. The schedule shall include—

(i) A description of the property;

(ii) The fair market value as determined by at least two independent appraisals conducted by appraisers certified in the State in which the property is located. The reasonable expense of the appraisals shall be borne by the permittee, and final acceptance of the value of property for bonding purposes shall be subject to regulatory-authority determination and shall be based on findings by appointed appraisers when deemed necessary;

(iii) Proof of the mortgagor's possession of, and title to, the unencumbered real property within the State which is offered to secure the obligations under the bond. Such proof shall include—

(A) If the interest arises under a Federal or State lease, a status report prepared by a non-affiliated attorney competent to evaluate the asset, and an affidavit from the owner in fee establishing that the leasehold can be transferred to the regulatory authority upon forfeiture; and

(B) If the title is in fee, a title certificate or similar evidence of title and encumbrances prepared by an abstract office authorized to transact business within the State.

(3) The property may include land which is part of the permit area only after reclamation standards of phase II are met on such land. The bonding value of land within a permit area may not exceed 85 percent of the appraised value if reclaimed to standards of phase III reclamation, based on the value of surrounding land less the value for any coal in place and the current uses of the land. Land pledged as security shall not be mined under any permit.

(4) Proof that the person granting the security interest holds possession of, and title to, personal property within the State which is offered to secure the obligation of the permittee under the bond. Evidence of such ownership shall be submitted in a form satisfactory to the regulatory authority. The regulatory authority may accept a perfected first-lien security interest in negotiable bonds of the U.S. Government, general revenue bonds of the State, municipal bonds, or rated marketable securities, excluding commodity issues, of non-affiliated companies registered under the Federal Securities Act, which are rated at the highest rating offered by a nationally recognized securities rating service. The ratio of bond value to market value of each security or bond shall be determined by the regulatory authority on the basis of its marketability and a financial analysis. The personal property offered shall not include—

(i) Property in which a security interest is held by any other person;

(ii) Goods which the operator sells in the ordinary course of his or her business;

(iii) Fixtures;

(iv) Securities which do not meet the standards of Paragraph 806.12(h)(4); or

(v) Certificates of deposit which are not federally insured or are issued by a depository that is unacceptable to the regulatory authority.

(i) The estimated bond value of all collateral posted as bond assurance under 30 CFR 806.12(f), (g), and (h) shall be subject to a margin—bond value to market value ratio—determined by the regulatory authority. This margin shall reflect legal and liquidation fees, as well as value depreciation, marketability, and fluctuations which might affect the net cash available to the regulatory authority in performing reclamation. The bond value of collateral may be evaluated at any time, but shall be evaluated as part of permit renewal. In no case shall the bond value exceed the market value.

C. Section 806.13 is amended as follows:

1. Section 806.13 is redesignated as § 806.15.

2. Section 806.13 is added to read in its entirety as set forth below.

§ 806.13 Escrow bonding.

(a) The regulatory authority may authorize the operator to supplement a bonding program through the establishment of an escrow account deposited in one or more federally insured accounts payable on demand only to the regulatory authority or deposited with the regulatory authority directly. Contributions to the account may be based on acres affected or tons of coal produced or any other rate approved by the regulatory authority. In all cases, the total bond including the escrow amount, as determined by the regulatory authority in the bonding schedule, shall not be less that the amount required under 30 CFR Part 805 including any adjustments, less amounts released in accordance with 30 CFR Part 807.

(b) Escrow funds deposited in federally insured accounts shall not exceed the maximum insured amount under applicable Federal insurance programs such as by FDIC or FSLIC.

(c) Interest paid on an escrow account shall be retained in the escrow account and applied to the bond value of the escrow account unless the regulatory authority has approved that the interest be paid to the operator. In order to qualify for interest payment, the operator shall request such action in writing during the permit-application process under 30 CFR 800.11.

(d) Certificates of deposit may be substituted for escrow accounts upon approval of the regulatory authority. Provisions of 30 CFR 806.12(f) shall apply to certificates of deposit as a collateral bond.

D. Section 806.14 is amended as follows:

1. Section 806.14 is redesignated as § 806.16.

2. Section 806.14, "Self-bonding," is redesignated from § 806.11(b) to read in its entirety as set forth below.

§ 806.14 Self-bonding

(a) The regulatory authority may accept a self-bond from the applicant under the following conditions:

(1) The applicant shall designate the name and address of a suitable agent to receive service of process in the State where the surface coal mining operation is located.

(2) The applicant, or the applicant's parent organization in the event the applicant is a subsidiary corporation, has a net worth, certified by a certified public accountant, of no less than six times the total amount of self-bond obligations on all permits issued to the applicant in the United States for surface coal mining and reclamation operations.

(3) The applicant grants the regulatory authority a mortgage or security interest in real or personal property located in the State which shall have a fair market value equal to or greater than the obligation created under the indemnity agreement.

(4) The instrument creating such mortgage or security interest shall vest such interest in the regulatory authority so as to secure the right and power in the regulatory authority to immediately attach said property concurrent with the issuance of a notice of forefeiture under Part 808, and to sell or otherwise dispose of the property by a public or private transaction, and to establish the regulatory authority as the sole secured creditor with respect to such property, so as to assure the regulatory authority of a preferred claim over all other creditors in case of bankruptcy. For classes of property with respect to which a preferred claim cannot be maintained against subsequent bona fide purchasers for value under the Uniform Commercial Code, the instrument shall require possession of the property by the regulatory authority. The property subject to the security interest shall not be subject to any conflicting or prior security interest. The instrument creating the interest in real property shall be recorded as authorized for fee interests. The instrument creating the security interest in personal property shall be recorded in accordance with, and otherwise conform to, the requirements of the Uniform Commercial Code for perfecting a security interest in the State. In order for the regulatory authority to evaluate the adequacy of the property offered to satisfy this requirement, the applicant shall submit a schedule of the real or personal property which will be pledged to secure the obligations under the indemnity agreement. The schedule shall include—

(i) A description of the property;

(ii) The value of the property. The property shall be valued at fair market value as determined by an appraisal conducted by appraisers appointed by the regulatory authority. The appraisal shall be expeditiously made, and a copy thereof furnished to the regulatory authority and the permittee. The reasonable expense of the appraisal shall be borne by the permittee; and

(iii) Proof of the mortgagor's possession of, and title to, the unencumbered real property within the State which is offered to secure the obligations under the bond. Such proof shall include—

(A) If the interest arises under a Federal or State lease, a status report prepared by an attorney, satisfactory to the regulatory authority as disinterested and competent to so evaluate the asset, and an affidavit from the owner in fee establishing that the leasehold could be transferred to the regulatory authority upon forfeiture;

V 45 / 153 3 AG 6 80 UMI

(B) If title is in fee, a title certificate or similar evidence of title and encumbrances prepared by an abstract office authorized to transact business within the State and satisfactory to the regulatory authority; and

(C) The property shall not include any lands in the process of being mined, reclaimed, or the subject of this application. The operator may offer any lands the bonds for which have been released. In addition, any land used as security shall not be mined while it is security.

(iv) Proof that the person granting the security interest holds possession of, and title to, personal property within the State which is offered to secure the obligation of the permittee under the bond. Evidence of such ownership shall be submitted in a form satisfactory to the regulatory authority. The personal property offered shall not include—

(A) Property in which a security interest is held by any person;

(B) Goods which the operator sells in the ordinary course of his or business;

(C) Fixtures;

(D) Securities which are not negotiable bonds of the U.S. Government or general revenue bonds of the State;

(E) Certificates of deposit which are not federally insured or are issued by a depository that is unacceptable to the regulatory authority.

(5) The applicant, or the applicant's parent organization in the event the applicant is a subsidiary corporation, shall have demonstrated to the satisfaction of the regulatory authority a history of financial solvency and continuous operation as a business entity for 10 years prior to filing the application. For purposes of this Paragraph, such demonstration shall include a financial statement in sufficient detail to allow the regulatory authority to determine whether it is reasonable to predict from the ownership patterns and financial history of the applicant that it will be financially capable of completing all reclamation requirements throughout the life of the surface coal mining and reclamation operation. Such statement shall include, at the minimum—

(i) Identification of operator by—

(A) For corporations, name, address, telephone number, State of incorporation, principal place of business, principal office in the State where the operation is located, the name, title, and authority of persons signing the application, and a statement of authority to do business in the State where the operation is located; and

(B) For all other forms of business enterprises, name, address, and telephone number and statement of how the enterprise is organized, law of the State under which it is formed, place of business, relationship and authority of the person signing the application, and principal office in the State where the operation is located;

(ii) Estimated amount of bond likely to be required after approval of the permit which will be determined in accordance with 30 CFR Part 805, and the estimated maximum liability likely to be required during the life of the mine;

(iii) History of other bonds procured by the operator for mining operations in any State, including—

(A) Names of sureties, if any, for outstanding bonds;

(B) Amounts of outstanding bonds;

(C) Name of any surety which denied any bond; and

(D) Unsatisfied claims against any bond;

(iv) Brief chronological history of business operations conducted within the last 10 years, including information showing—

(A) Continuous operation for the 10-year period, and

(B) The jurisdiction within which each operation has been conducted;

(v) A financial statement, including—

(A) Audited financial statements prepared and certified by a disinterested independent certified public accountant. All statements shall be prepared following generally accepted principles of accounting and shall include—

(*1*) A common-size comparative balance sheet which shows assets, liabilities, and owner's equity for the preceding 10-year period. The regulatory authority shall have the discretion to increase this length of time to any period which is necessary to show financial solvency and continuous operation. The common-size comparative balance sheet shall be detailed with regard to owner's equity, especially retained earnings, so as to set forth a series of retained-earnings statements showing the changes that have occurred in retained earnings during the required period of time;

(*2*) A common-size comparative income statement which shows all revenues and expenses for the preceding 10-year period or for such longer time as is required for the common-size comparative balance sheet; and

(*3*) A statement of the operator's working capital and an analysis of assets and liabilities which shall include the following calculation for each year covered by the common-size comparative balance sheet and income statement—

(*i*) A schedule showing the percentage of each classification of current assets to total current assets;

(*ii*) The current ratio;

(*iii*) The acid-test ratio;

(*iv*) The liquidity ratio;

(*v*) The asset ratio; and

(*vi*) The return on investment;

(*4*) In addition to the above, all ratios must be calculated with the bond amount added to the operator's current or total liabilities; and

(*5*) A ratio of the operator's capital assets subject to a mortgage or security interest to those liabilities to which the assets are subject. If the offer of real property or collateral for the bond will alter this ratio, this shall be illustrated;

(B) A satisfactory basis to compare all ratios submitted pursuant to (A) above.

(C) The regulatory authority shall have the right to challenge, prohibit, or prescribe the inclusion of any specific item or the value thereof within any of the above statements or ratios. If the value is challenged, the regulatory authority shall appoint an appraiser or appraisers to value the item. Any such appraisal shall be expeditiously made, and a copy thereof furnished to the regulatory authority and the permittee. The reasonable expense of the appraisers shall be borne by the operator. The findings of the appraisal shall be final and binding.

(D) A final determination by an independent certified public accountant regarding the operator's ability to satisfactorily meet all obligations and costs under the proposed reclamation plan for the life of the mine; and

(E) If the regulatory authority deems necessary, evidence of financial responsibility through letters of credit or a rating of securities issued to the applicant by a recognized national securities rating company;

(vi) A statement listing any liens filed on the assets of the permittee or applicant in any jurisdiction in the United States, actions pending or judgments rendered within the last 10 years against the permittee or applicant but not satisfied, and petitions or actions in bankruptcy including actions for reorganization. Each such lien, action petition, or judgment shall be identified by the named parties, the jurisdiction in which the matter was filed, and the case, file, and final disposition or current status of any action still pending; and

(vii) A statement listing any notices issued by the Securities and Exchange Commission or proceedings initiated by any party alleging a failure to comply with any public disclosure or reporting requirement under the securities laws of the United States. Such statement shall include a summary of each such allegation, including the date, the requirement alleged to be violated, the party making the allegation, and the disposition or current status thereof.

(6)(i) The indemnity agreement has been executed by the applicant, and said agreement has also been executed by—

(A) If a corporation, two corporate officers who are authorized to sign the agreement by a resolution of the board of directors, a copy of which shall be provided;

(B) To the extent that the history or assets of a parent organization are relied upon to make the showings of this Part, the parent organization and every parent organization of which it is a subsidiary, whether first-tier, second-tier, or further removed, in the form of (A) above;

(C) If the applicant is a partnership, all of its general partners and their parent organization or principal investors; and

(D) If the applicant is a married individual, the applicant's spouse;

(ii) The name of each person who signs the indemnity agreement shall be typed or printed beneath the signature. Any person who occupies more than one of the specified positions shall indicate each capacity in which he or she signs the indemnity agreement;

(iii) The indemnity agreement shall be a binding obligation, jointly and severally, on all who execute it;

(iv) For purposes of this Paragraph, *principal investor* or *parent organization* means anyone with a 10-percent or more beneficial ownership interest, directly or indirectly, in the applicant.

(*7*) If at any time the conditions upon which the self-bond was approved no longer prevail, the regulatory authority shall require the posting of a surety or collateral bond before mining operations may continue.

G. A new § 806.17, "Combined surety/escrow bonding," is added to read in its entirety as set forth below.

§ 806.17 Combined surety/escrow bonding.

(a) The regulatory authority may accept a combined surety/escrow bonding schedule provided that—

(1) A surety bond payable to the regulatory authority is posted in the amount determined under 30 CFR 805.11 for reclamation of each successive increment, and

(2) An interest-bearing escrow account payable to the regulatory authority with a predetermined deposit amount and frequency is established.

(b) Conditions of the combined surety/escrow bonding method shall be as follows:

(1) *Surety bond.*

(i) The term of the surety bond shall be not less than 2 years.

(ii) The amount of the surety bond shall always be sufficient to cover the difference between the escrow balance and the total reclamation cost.

(iii) The surety bond may be reduced in amount, but the liability remaining shall depend on the escrow-deposit rate which shall be subject to provisions of 30 CFR 805.14 and 806.15.

(iv) The surety bond shall be noncancellable by the surety during the bond term.

(v) Surety-bond coverage may be released by the regulatory authority without applying the bond-release criteria of 30 CFR Part 807 at any time during the bond term, provided provisions of Paragraph (b)(2)(vi) of this Section are met or are in accordance with the provisions of bond replacement under 30 CFR 806.15.

(vi) The surety bond is subject to the conditions of bond forfeiture of 30 CFR Part 808, including noncompliance with the escrow-account provisions of Paragraph (b)(2).

(2) *Escrow account.*

(i) The terms and conditions of the escrow account shall be developed jointly by the operator, surety, and regulatory authority. For the purposes of this Section, the development of the escrow account shall be based on a production basis in an amount not less than that required to make the escrow account equal to or greater than the bond requirement within the term of the surety bond as agreed on jointly by the operator, the surety, and the regulatory authority. Deposits to the escrow account by the operator shall be made monthly and so reported to the regulatory authority. Failure to make deposits on schedule shall be just cause for action by the regulatory authority.

(ii) A certified escrow-account balance statement shall be provided quarterly to the surety and the regulatory authority.

(iii) Provisions of the escrow account shall be in accordance with 30 CFR 806.13.

(iv) The deposit amount shall be adjusted to provide for changing reclamation costs in accordance with 30 CFR 805.14. However, when the escrow account equals or exceeds the total bonding amount, the monthly payment of the operator shall continue, at the option of the regulatory authority, in an amount necessary to provide for any foreseeable adjustments.

(v) The escrow account shall be subject to the bond-forfeiture conditions of 30 CFR Part 808.

(vi) The escrow-account balance shall equal the initial bond amount, plus any adjustments required by Paragraph (b)(2)(i), 120 days prior to surety-bond termination, unless the total bond amount required has been previously reduced through the bond-release procedures of 30 CFR Part 807.

(vii) Release of liability under the escrow account shall be subject to the provisions of 30 CFR Part 807.

(c) Provisions of 30 CFR Part 807 may be applied to both surety- and escrow-bond coverage during the bond term.

(d) The surety/escrow combination may be repeated successively or amended during the term by replacing the escrow account with a surety bond, and reestablishing the escrow terms and deposit rate, subject to regulatory-authority approval.

PART 807—PROCEDURES, CRITERIA, AND SCHEDULE FOR RELEASE OF PERFORMANCE BOND

A. Section 807.12 is amended as follows:

1. Paragraph (a) is revised to read in its entirety as set forth below.

2. Paragraph (b) is revised to read in its entirety as set forth below.

3. Paragraph (c) is revised to read in its entirety as set forth below.

4. Paragraph (d) is revised to read in its entirety as set forth below.

5. Paragraph (e)(3) is revised to read in its entirety as set forth below.

§ 807.12 Criteria and schedule for release of performance bond.

(a) The regulatory authority may release portions of the liability under performance bonds applicable to the permit area following the completion of reclamation phases as defined in Paragraph (e) of this Section.

(b) The maximum liability of performance bonds applicable to an increment or permit area which may be released shall be calculated on the following basis:

(1) Release of an amount not to exceed 60 percent of the total bond amount on the increment or permit area upon completion of phase I reclamation.

(2) Release of an additional amount not to exceed 25 percent of the total original bond amount on the permit area or an increment upon completion of phase II reclamation, but in all cases the amount remaining shall be sufficient to reestablish vegetation and reconstruct any drainage structures.

(3) Release of the remaining portion of the total performance bond on the increment or permit area after standards

V 45 / 153 3 AG 6 80 UMI

of phase III reclamation have been attained and final inspection and procedures of 30 CFR 807.11 have been satisfied.

(c) The regulatory authority may choose to release all bond coverage for an increment if the phase III reclamation of the increment is complete. The portion of the permit area being released from bond coverage shall be capable for supporting the proposed postmining land use independent of the successful completion of the reclamation of portions of the permit area still under bond or not yet initially disturbed. No increment shall be totally released from the permit area until conditions of phase III reclamation for the last increment of the permit area have been met.

(d) The regulatory authority shall require performance-bond liability, applicable to the permit area of an increment, in the amount necessary to—

(1) Allow someone other than the operator to complete the approved reclamation plan, achieving compliance with the Act, this Chapter, the regulatory program, and the permit;

(2) Allow someone other than the operator to abate any significant environmental harm to air, water, or land resources, or danger to public health and safety prior to release of the land under the terms of the permit;

(3) Achieve the capability of supporting any alternative postmining land-use plan proposed in the permit, consistent with 30 CFR 816.116, 816.133, 817.116, and 817.133 of this Chapter, including such measures as may be necessary in the event the permittee fails to undertake development within the 2 years required by 30 CFR 806.116(b)(3)(ii) or 817.116(b)(3)(ii) of this Chapter; and

(4) Fulfill the minimum bond amount of $10,000 as required by 30 CFR 805.12.

(e) * * *

(3) Phase III reclamation shall be deemed to have been completed when—

(i) The permittee has successfully completed all surface coal mining and reclamation operations in accordance with the approved reclamation plan so that the land is capable of supporting any postmining land use approved pursuant to 30 CFR 816.133 or 817.133;

(ii) The permittee has achieved compliance with the requirements of the Act, this Chapter, the regulatory program, and the permit; and

(iii) The applicable liability period under § 515(b)(20) of the Act and 30 CFR 805.13(b) of this Subchapter has expired.

PART 808—PERFORMANCE BOND FORFEITURE CRITERIA AND PROCEDURES

A. Section 808.11 is amended as follows:

1. Paragraph (c) is added to read in its entirety as set forth below.

§ 808.11 General.

* * * * *

(c) The regulatory authority may allow the surety to complete the reclamation plan if the surety can demonstrate the ability to complete the reclamation plan, including achievement of the capability to support the alternative postmining land use approved by the regulatory authority. No bond shall be released, except for partial releases authorized under 30 CFR 807.11, until successful completion of all reclamation under the terms of the permit, including applicable liability periods of 30 CFR Part 807.

B. Section 808.12 is amended as follows:

1. Paragraph (c) is revised to read in its entirety as set forth below.

2. Paragraph (d) is added to read in its entirety as set forth below.

§ 808.12 Procedures.

* * * * *

(c) The regulatory authority may forfeit any or all bonds deposited for an entire permit area or any increment thereof in order to satisfy 30 CFR 808.11–808.14. Liability under any bond covering any increment of the permit area shall extend to the entire permit area.

(d) The regulatory authority shall utilize funds collected from bond forfeiture to complete the reclamation plan on the permit area on which bond coverage applies, and to cover associated administrative expenses.

C. Paragraph 808.13(a) is amended as follows:

1. Paragraphs (a)(1) through (3) are added to read in their entirety as set forth below.

§ 808.13 Criteria for forfeiture.

(a) * * *

(1) The permittee has violated any of the terms or conditions of the bond and has failed to take corrective action;

(2) The permittee has failed to conduct the surface mining and reclamation operations in accordance with the Act, the conditions of this Chapter, the regulatory program and the permit within the time required, and the regulatory authority has determined that it is necessary, in order to fulfill the requirements of the permit and the reclamation plan, to have someone other than the operator correct or complete reclamation;

(3) The permit for the area under the bond has been revoked, unless the operator or surety assumes liability for completion of the reclamation work and is, in the opinion of the regulatory authority, diligently and satisfactorily performing such work; or

(Secs. 102, 201(c), 501(b), 503, 504, 507, 508, 509, 510, 515, 516 and 519, Pub. L. 95–87, 91 Stat. 448, 449, 468, 470, 471, 477, 478, 479, 480, 486, 495, and 501 (30 U.S.C. 1201, 1202, 1211, 1251, 1253, 1254, 1257, 1258, 1259, 1260, 1265, 1266, and 1269))

Department of Commerce

Office of the Secretary

Preliminary Finding of Need To Accredit Laboratories That Provide Electromagnetic Calibration Services

V 45 / 153 AG 6 80 UMI

DEPARTMENT OF COMMERCE

Office of the Secretary

National Voluntary Laboratory Accreditation Program; Preliminary Finding of Need of Accredit Laboratories That Provide Electromagnetic Calibration Services

AGENCY: Assistant Secretary of Commerce for Productivity, Technology, and Innovation.

ACTION: Request for comments on the preliminary finding of need to accredit laboratories that provide electromagnetic calibration services.

SUMMARY: Under the procedures of the National Voluntary Laboratory Accreditation Program (NVLAP) (15 CFR Parts 7a, 7b, and 7c), this notice announces the Department of Commerce's preliminary finding of need to accredit testing laboratories that provide electromagnetic calibration services. The set of standards and test methods initially proposed for inclusion in this laboratory accreditation program (LAP) would be limited to a specific set or group of electromagnetic measurements based upon the formal request for this LAP from Weinschel Engineering. This notice sets out the basis for the preliminary finding of need, including how accreditation of laboratories that provide electromagnetic calibration services would benefit the public interest and why there is a national need to accredit such laboratories. Comments are invited.

DATES: Written comments are due on or before October 6, 1980. A request for an informal hearing may be made before August 21, 1980.

FOR FURTHER INFORMATION CONTACT: Dr. Howard I. Forman, Deputy Assistant Secretary for Product Standards Policy, Room 3876, U.S. Department of Commerce, Washington, D.C. 20230 (202) 377–3221.

SUPPLEMENTARY INFORMATION:

Background

The procedures for the operation of the National Voluntary Laboratory Accreditation Program (NVLAP) were announced in the **Federal Register** on February 26, 1976 (41 FR 8163–8168, 15 CFR Part 7 which has been recently redesignated 15 CFR Part 7a). That notice, amended by publication in the **Federal Register** on March 9, 1979 (44 FR 12982–12990 designated 15 CFR Part 7b), on April 25, 1979 (44 FR 24274–24282 designated 15 CFR Part 7c), and on April 21, 1980 (45 FR 26993–26994), described the program as providing a national voluntary system to examine, upon request, the professional and technical competence of private and public testing laboratories that serve regulatory and non-regulatory product evaluation and certification needs. The program will accredit those laboratories that meet the qualifications established under these procedures

Section 7a.4(b) of the NVLAP procedures sets out the requirements to be met by those persons who seek to have the Department of Commerce (DoC) find that there is a need to accredit testing laboratories which provide services relating to a specific product. By letter of February 23, 1977, Bruno O. Weinschel of Weinschel Engineering, Gaithersburg, Maryland, requested DoC to find that there is a need to accredit testing laboratories which provide electromagnetic calibration services for instruments and measurement standards which operate at microwave frequencies. Weinschel Engineering manufactures and sells radio frequency attenuators and attenuation measuring systems, sweep frequency signal generators, microwave power measuring equipment, and power and attenuation standards.

The processing of this request was postponed initially due to a lack of resources. Subsequently, careful consideration was given to the development of a laboratory accreditation program (LAP) under Federal agency (Part 7b) NVLAP procedures and accommodating the request within a possible Federal agency request for a LAP encompassing these calibration services. The National Bureau of Standards (NBS) provides such calibration services. The Part 7b procedures upon which this alternative approach was considered were promulgated on March 9, 1979. In a September 6, 1979 memorandum, John W. Locke, Coordinator of NVLAP, requested guidance from James R. Wright, Deputy Director of the National Engineering Laboratory, on whether NBS might desire to initiate a LAP on calibration services. In a December 18, 1979 memorandum to Mr. Locke, Dr. Wright advised that NBS recommended the use of the General (Part 7a) NVLAP procedures so that the need for the proposed LAP could be established through public debate among interested parties. In that same memorandum, shortcomings in the request were identified which needed to be modified before proceeding with the preparation of a **Federal Register** notice of a preliminary finding of need. In a letter of January 2, 1980, Howard I. Forman, Deputy Assistant Secretary for Product Standards Policy, asked Dr. Weinschel to supply some additional information responding to Dr. Wright's comments. After further informal discussion between representatives of Weinschel Engineering and the NVLAP staff, Dr. Weinschel submitted a letter on May 14, 1980 to clarify and support his original request. For the purposes of analysis, this letter and the original request letter of February 23, 1977 represent the formal request submitted to comply with section 7a.4(b) of the NVLAP procedures.

This request has been analyzed and evaluated, resulting in a preliminary finding of need to establish a LAP for electromagnetic calibration services as set forth at the conclusion of this notice.

Request for Comments

Interested persons desiring to comment on the preliminary finding of need are invited to submit their comments on or before September 6, 1980, to the Assistant Secretary for Productivity, Technology and Innovation, U.S. Department of Commerce, Room 3864, Washington, D.C. 20230.

Any person desiring to express his or her views in an informal public hearing relative to this preliminary finding of need must do so by communicating that desire in writing on or before August 21, 1980, to the Assistant Secretary for Productivity, Technology, and Innovation. Upon receipt of such a request, informal public hearings will be held to give all interested persons an opportunity to orally present data, views, or arguments in addition to the opportunity to make written submissions. If deemed appropriate, hearings may be held at two locations, one of which will be east of the Mississippi River and the other west thereof. Notice of any hearings will be published in the **Federal Register** at least 20 days in advance thereof. A transcript will be made of any oral presentations.

Comments are invited particularly to determine whether there is a need to establish a LAP for "electromagnetic calibration services." The specific standards and test methods identified by the requestor would be included in the LAP. As a result of comments in response to this preliminary finding of need, additional standards and test methods directly related to electromagnetic calibration services could be included.

Procedure Following Receipt of Comments

Upon receipt of all written and oral comments and testimony, a thorough evaluation of the comments and testimony will be undertaken. Upon completion of that evaluation, a notice will be published in the **Federal Register** announcing a final finding of need to accredit testing laboratories which provide "electromagnetic calibration services," or announcing withdrawal of the preliminary finding of need. The notice will set out the basis for a final finding of need or for the withdrawal of the preliminary finding of need.

If a final finding of need is published, the NVLAP procedures call for the establishment of a National Laboratory Accreditation Criteria Committee for calibration services or use of an existing committee. Since there is no existing criteria committee with expertise in this area, a new committee would have to be formed. In accordance with the Federal Advisory Committee Act (Pub. L. 92–463), a charter setting forth the objectives and scope of the committee's activity, a description of the duties for which the committee is responsible, and an estimated number and frequency of committee meetings would be prepared. The NVLAP procedures require that a separate notice be published in the **Federal Register** announcing DoC's intention to form such a committee simultaneously with the publication of any final finding of need. Furthermore, the separate notice would outline the size and basis for selection of the committee members. Comments on the objectives and scope of the Committee and on the size and basis for selection of the members of the committee are also invited at this time.

Documents in Public Record

The documents mentioned or otherwise referenced in this notice are part of the public record and are available for inspection and copying in DoC's Central Reference and Records Inspection Facility (CRRIF), Room 5317, Main Commerce Building, 14th Street between E Street and Constitution Avenue, NW., Washington, D.C. 20230.

All written and oral comments and testimony in response to this notice will be made part of the public record and will be available for inspection and copying at CRRIF.

Issued: August 1, 1980.

Howard I. Forman,

Acting Assistant Secretary for Productivity, Technology and Innovation.

Preliminary Finding of Need

The request of Weinschel Engineering that DoC find that there is a need to accredit testing laboratories which provide electromagnetic calibration services has been carefully considered. The analysis of the request is contained in the report entitled "NVLAP Summary and Analysis Report, Electromagnetic Calibration Services."

Identification of the Product (Section 7a.4(b)(1))

The requestor identified the product (as defined in section 7a.3(a)) as electromagnetic calibration services for instruments and measurements standards which operate at microwave frequencies. The request is limited to calibration services for microwave power and attenuation measurements. The instruments for the power measurements include bolometric power meters, bolometric detectors, bolometric units, bolometric mounts and bolometric-coupler units. The instruments for the attenuation measurements include fixed and variable attenuators.

NVLAP procedures allow standards and test methods to be added to a LAP once a LAP is established if the standards and test methods fall within the boundaries established by the definition of the product for the LAP. The specific standards and test methods identified by the requestor would be included in the LAP. At some future date, or even as a result of comment in response to this preliminary finding of need, additional standards and test methods directly related to electromagnetic calibration services could be included.

Text of Applicable Standards and Test Methods (Section 7a.4(b) (2) and (3))

The requestor identified the applicable standards and test methods as those given in the Institute for Electrical and Electronic Engineers (IEEE) documents IEEE–STD–470–1972, "IEEE Standard Application Guide for Bolometric Power Meters" and "IEEE–STD–474–1973", "IEEE Standard Specifications and Test Methods for Fixed and Variable Attenuators, DC to 40 GHz." As noted in the identification of the product, the electromagnetic calibration services would be limited to microwave power and attenuation measurements. The requestor suggests specific ranges and uncertainties for these measurements. If this LAP is established, laboratories will be accredited for a specific range of measurements with a specified uncertainty within the capability of the equipment possessed by each laboratory. Of course, the range and uncertainty for which DoC will grant accreditation cannot exceed the capability of NBS. It is essential that an accredited laboratory's reference standards be traceable to the appropriate national standards of measurement. In this context traceability means that each instrument used for calibration purposes has itself been calibrated against an instrument of higher quality to the level at which the higher quality instrument is the accepted national standard. The limits of range and uncertainty which would be available for each measurement area offered in the LAP would be established by the DoC based upon advice from the advisory committee to be organized if a final finding of need is determined. The requestor's suggestions, pertinent comments from the public, NBS expertise, as well as the expertise of the committee members themselves would provide the input for determining ranges and uncertainties.

Basis of Need (Section 7a.4(b)(4))

The requestor includes in his request information addressing each of the five items set out in section 7a.5 of the NVLAP procedures. This information is incorporated into the discussion under the section of this notice entitled, *"Basis for Preliminary Finding of Need for Accrediting Laboratories That Provide Electromagnetic Calibration Services (Section 7a.5)."*

Number of Laboratories and Users (Sections 7a.4(b)(4) (i) and (ii))

The requestor provided a list of 69 industry and 15 government laboratories which perform calibration services at radio and microwave frequencies and claimed that these laboratories have a potential need for accreditation or would be users of accredited laboratories. These laboratories are listed in the 1975 edition of the "Directory of Standards Laboratories" prepared by the National Conference of Standards Laboratories (NCSL). The 1979 edition of the NCSL directory lists about 160 industry and 25 government laboratories capable of performing calibration services at radio and microwave frequencies.

The requestor asserted that the number of users which would desire the services of accredited laboratories is difficult to determine, but potentially includes all electronic equipment manufacturers and users. No listing of

users of those laboratories which provide calibration on a fee basis was available to the requestor. However, the requestor indicated that NBS, as of 1977, calibrated about 325 reference standards or instruments per year for electromagnetic quantities. More recent data indicates that NBS calibrates about 300–400 reference standards per year.

In view of the above information, it is concluded that the submitted request meets the requirements of section 7a.4 of the NVLAP procedures.

Basis of Preliminary Finding of Need for Accrediting Laboratories That Provide Electromagnetic Calibration Services (Section 7a.5)

The basis for this preliminary finding of need, keyed to the information items listed in section 7a.5 of the NVLAP procedures, is as follows:

(1) *Whether the establishment of general or specific criteria and other conditions for accrediting testing laboratories that provide electromagnetic calibration services would benefit the public interest (section 7a.5(a)).* Criteria and other requirements for accrediting laboratories would benefit the public interest by—

(a) Providing a measure of assurance for tests of conformance with accepted standards;

(b) assuring a common basis for quantitative measures of conformance with these standards;

(c) providing a mechanism for assurance that measurements and calibrations made by the private sector are equivalent to those made by government laboratories; and

(d) addressing regulatory concern for the accuracy of test results in certain consumer product and environmental areas.

(2) *Whether there is a national need to accredit testing laboratories for electromagnetic calibration services beyond that served by any existing laboratory accreditation programs in the public and private sector (section 7a.5(b)).* Although NBS has provided calibration services for over 70 years, the tremendous growth of the industry particularly in the electrical and electronics area has forced NBS progressively to restrict its services to non-routine measurements, then to measurement standards only, and then to measurement laboratory reference standards only. These restrictions have required establishment of additional calibration levels which increase the uncertainties and the number of calibration laboratories, thereby reducing the efficiency of resource utilization. Facilities are no longer readily available to obtain measurements of electromagnetic devices (other than reference standards traceable to a common national standard) without maintaining a calibration facility equivalent to that of a national laboratory. The Department of Defense (DoD) has established such facilities, but they are not available to non-Defense contractors. The need for an alternative to having calibration services provided by NBS exists in instances where the cost, time, or uncertainty of NBS services is too great, where the service is not available from NBS, when the number of calibrations to be made exceeds the resource capabilities of NBS, or when the shipping of sensitive instruments to NBS is impractical because of possible damage to such instruments. The need for accreditation is dependent upon the scope of calibration services available from NBS. NBS does not disagree with the requestor's assertion regarding the scope of the calibration services it offers in the microwave spectrum.

Calibration is the cornerstone on which all other measurements rest. Without properly executed calibrations, quality test data cannot be produced. The validity and reliability of the calibration chain (i.e., traceability to national standards) must be affirmed. Thus, the need for a formal means of developing and recognizing competent laboratories that provide certain types of calibration services seems indicated. The National Association of Testing Authorities (NATA) of Australia considers the accreditation of a full range of calibration services to be a major factor in improving the quality of testing provided by Australia's laboratories. In announcing the establishment of the British Calibration Service, the British government published the following:

> "The state of measurement science and practice in a country is one of the surest signs of its technical efficiency. Modern industrial technology depends on accurate measurement. The country requires both a comprehensive system of national standards of measurement, tied to the recognized international standards, and also facilities for checking, or calibrating measuring instruments and other test gear against such standards so that their accuracy can be authenticated."

Based on the experience of these and other countries' systems, a system of accrediting laboratories to perform calibration services in this country appears desirable. International recognition of our nation's laboratories may depend upon the validity and reliability of our calibration chain.

NBS does offer measurement assurance programs (MAPs), but these programs do not include evaluation of a laboratory against specified criteria. MAPs relate only to an assessment of results obtained by the laboratories when measuring reference materials and are generally restricted to primary international standard (SI) units. In effect, a MAP is similar to the proficiency testing requirements of a LAP which represent only one of three elements used to evaluate the competence of a laboratory. Further, participation in a MAP does not provide formal recognition.

(3) *Whether for electromagnetic calibration services, there is in existence a standard important to commerce, consumer well-being, or public health and safety (Section 7a.5(c)).* Many standards requiring electromagnetic calibration services are important to commerce, consumer well-being, and the public health and safety. The requestor identified standards developed by several organizations, including the Federal Communications Commission (FCC), and the Occupational Safety and Health Administration (OSHA), and provided a brief statement indicating the benefit of each set of standards established by these organizations. Specific parts of the FCC Rules and Regulations were cited which indicate the importance placed upon power and attenuation measurements particularly on radio frequency devices to assure compliance with FCC standards. Also, the requestor identified the specific subsection of OSHA regulations entitled "Nonionizing Radiation," which defines radio frequency and microwave radiation levels that should not be exceeded. Both the FCC and OSHA regulations indicate that the IEEE standards are acceptable for use in power and attenuation measurements. Thus, assuring the quality of measurements in these areas is deemed important to commerce, consumer well-being, and the public health and safety.

(4) *Whether there is in existence a valid testing methodology (Section 7a.5(d)).* The IEEE standards identified by the requestor provide test methods (i.e., calibration procedures) for use in calibrating electromagnetic power and attenuation measuring instruments. If any requests are received to add other standards and test methods to this LAP and if a final finding of need is established, they will be carefully reviewed for possible addition to the LAP.

(5) *Whether it is feasible and practical to accredit testing laboratories that provide electromagnetic calibration services (Section 7a.5(e)).* DoC is not aware of any characteristic of the IEEE standards or of laboratories in which such calibrations would typically be performed as would make an electromagnetic calibration services LAP less feasible and practical than the other LAPs now in the program. The requestor claimed that the MAPs offered by NBS provide a mechanism which makes it feasible and practical to accredit testing laboratories for calibration services. Such MAPs are comparable to proficiency testing programs in that they help laboratories check their traceability to primary standards. If available, a MAP can and probably would be employed in this proposed LAP as an accreditation requirement. Based on this NBS experience, it is deemed feasible and practical to accredit testing laboratories that provide electromagnetic calibration services.

Preliminary Finding of Need

The request to find that there is a need to accredit testing laboratories that provide electromagnetic calibration services has been carefully examined and analyzed. Based on that examination and analysis, which are described above, it is preliminarily found that a need exists to accredit testing laboratories that provide electromagnetic calibration services. It is proposed that if a final finding of need is determined this LAP would initially include the two IEEE standards identified by the requestor as IEEE–STD–470–1972, "IEEE Standard Application Guide for Bolometric Power Meters" and IEEE–STD–474–1973, "IEEE Standard Specifications and Test Methods for Fixed and Variable Attenuators, DC to 40 GHz." Other standards and test methods would be added in the future, as requested, if they meet the requirements of the NVLAP procedures.

Part V

Department of Agriculture

Federal Grain Inspection Service

Grain Inspection; Assignment of Geographic Areas; Indiana

DEPARTMENT OF AGRICULTURE

Federal Grain Inspection Service

Assignment of Geographic Area to the Frankfort Grain Inspection, Inc., Frankfort, Ind.

AGENCY: Federal Grain Inspection Service.

ACTION: Notice.

SUMMARY: This notice announces assignment of geographic area to the Frankfort Grain Inspection, Inc., Frankfort, Indiana, for the performance of official grain inspection functions under the authority of the United States Grain Standards Act, as amended.

EFFECTIVE DATE: September 5, 1980.

FOR FURTHER INFORMATION CONTACT:
J. T. Abshier, Director, Compliance Division, Federal Grain Inspection Service, United States Department of Agriculture, Washington, D.C. 20250, (202) 447–8262. Actions of this kind were anticipated under the provisions of Section 7 of the United States Grain Standards Act as amended (7 U.S.C. 79) and are specifically considered in the Final Impact Statement prepared for this notice. Thus, the Final Impact Statement describing the options considered in developing this notice and the impact of implementing each option is available on request from the Issuance and Coordination Staff, United States Department of Agriculture, Federal Grain Inspection Service, Washington, D.C. 20250.

SUPPLEMENTARY INFORMATION: This final action has been reviewed under USDA procedures established in Secretary's Memorandum 1955 to implement Executive Order 12044, and has been classified as "not significant."

The Frankfort Grain Inspection, Inc. (the "Agency"), RR 2, Frankfort, Indiana 46041, was designated as an official agency under the United States Grain Standards Act, as amended (7 U.S.C. 71 *et seq.*) (the "Act"), for the performance of official grain inspection functions on August 25, 1978. The designation also included an assignment of geographic area, on an interim basis, within which this Agency would operate. Geographic areas are assigned to each official agency pursuant to Section 7(f)(2) of the Act.

The Act provides that not more than one official agency shall be operating at one time within an assigned geographic area.

The proposed geographic area assigned on an interim basis to the Agency was announced in the January 12, 1979, issue of the **Federal Register** (44 FR 2655). No comments were received. Accordingly, after due consideration of all information available to the United States Department of Agriculture, the geographic area shall remain as originally proposed.

The geographic area assigned to the Agency is:

Bounded: on the North by the northern Fulton County line;

Bounded: on the East by the eastern Fulton County line south to State Route 19; State Route 19 south to State Route 114; State Route 114 southeast to the eastern Fulton and Miami County lines; the northern Grant County line east to State Route 221; State Route 221 south to State Route 18; State Route 18 east to the Grant County line; the eastern Grant County line; the southern Grant County line; the eastern Tipton County line; the eastern Hamilton County line south to State Route 32;

Bounded: on the South by State Route 32 west to the Boone County line; the eastern and southern Boone County lines; the southern Montgomery County line;

Bounded: on the West by the western and northern Montgomery County lines; the western Clinton County line; the western Carroll County line north to State Route 25; State Route 25 northeast to Cass County; the western Cass County line; the western Fulton County line.

Exceptions to this geographic area are the following locations situated inside the Agency's area which have been and will continue to be serviced by:

Titus Grain Inspection, Inc.: Buckeye Feed and Supply Company, Leiters Ford, Indiana, in Fulton County; Cargill, Inc., Linden, Indiana, in Montgomery County; and the Andersons, Delphi, Indiana, in Carroll County. These locations have been restated to more accurately describe the location by listing the elevator site serviced rather than by general reference to the city, town, or area in which situated.

A specified service point for the purpose of this notice is a city, town, or other location specified by an agency for the conduct of official inspections and where the agency or one or more of its licensed inspectors is located. In addition to the specified service points within the assigned geographic area, the Agency will provide official inspection services not requiring a licensed inspector to all other areas within its geographic area.

Interested persons may obtain a map of the assigned geographic area and a list of specified service points by contacting the Agency or the Delegation and Designation Branch, Compliance Division, Federal Grain Inspection Service, United States Department of Agriculture, Washington, D.C. 20250, (202) 447–8262.

(Sec. 8, Pub. L. 94–582, 90 Stat. 2870 (7 U.S.C. 79))

Done in Washington, D.C. on: August 1, 1980.

Neil E. Porter,
Acting Director, Compliance Division.

BILLING CODE 3410–02–M

Assignment of Geographic Area to the Winchester Grain Inspection, Winchester, Ind.

AGENCY: Federal Grain Inspection Service.

ACTION: Notice.

SUMMARY: This notice announces assignment of geographic area to the Winchester Grain Inspection, Winchester, Indiana, for the performance of official grain inspection functions under the authority of the United States Grain Standards Act, as amended.

EFFECTIVE DATE: September 5, 1980.

FOR FURTHER INFORMATION CONTACT:
J. T. Abshier, Director, Compliance Division, Federal Grain Inspection Service, United States Department of Agriculture, Washington, D.C. 20250, (202) 447–8262. Actions of this kind were anticipated under the provisions of Section 7 of the United States Grain Standards Act as amended (7 U.S.C. 79) and are specifically considered in the Final Impact Statement prepared for this notice. Thus, the Final Impact Statement describing the options considered in developing this notice and the impact of implementing each option is available on request from the Issuance and Coordination Staff, United States Department of Agriculture, Federal Grain Inspection Service, Washington, D.C. 20250.

SUPPLEMENTARY INFORMATION: This final action has been reviewed under USDA procedures established in Secretary's Memorandum 1955 to implement Executive Order 12044, and has been classified as "not significant."

The Winchester Grain Inspection (the "Agency"), 220 North East Street, Winchester, Indiana 47394, was designated as an official agency under the United States Grain Standards Act, as amended (7 U.S.C. 71 *et seq.*) (the "Act"), for the performance of official grain inspection functions on August 31, 1978. The designation also included an assignment of geographic area, on an interim basis, within which this Agency would operate. Geographic areas are assigned to each official agency pursuant to Section 7(f)(2) of the Act.

The Act provides that not more than one official agency shall be operating at one time within an assigned geographic area.

The proposed geographic area assigned on an interim basis to the Agency was announced in the January 12, 1979, issue of the **Federal Register** (44 FR 2652). One comment was received. Information was received from the Agency and Indianapolis Grain Inspection & Weighing Service, Inc., Indianapolis, Indiana, regarding grain inspection services in Rush County north of State Route 244 in Indiana. After review of this matter with all parties involved, it was mutually agreed that the Agency was better able to provide more timely service in that specified section of this County and to add that section of this County to the geographic area of the Agency.

After due consideration of all relevant matters and information available to the United States Department of Agriculture, the geographic area assigned to this agency shall be the area within the following counties: Blackford, Delaware, Fayette, Jay, Henry, Madison (east of State Route 13 and north of State Route 132), Randolph, Rush (north of State Route 244), Union, and Wayne, all in Indiana. In Ohio, the area shall include Darke County.

The above has been restated to utilize entire counties and sections of counties, instead of county lines, for clarification purposes and does not alter the geographic area as originally proposed in any way except for the addition of that specified section of Rush County.

A specified service point for the purpose of this notice is a city, town, or other location specified by an agency for the conduct of official inspections and where the agency or one or more of its licensed inspectors is located. In addition to the specified service points within the assigned geographic area, the Agency will provide official inspection services not requiring a licensed inspector to all other areas within its geographic area.

Interested persons may obtain a map of the assigned geographic area and a list of specified service points by contacting the Agency or the Delegation and Designation Branch, Compliance Division, Federal Grain Inspection Service, United States Department of Agriculture, Washington, D.C. 20250, (202) 447–8262.

(Sec. 8, Pub. L. 94–582, 90 Stat. 2870 (7 U.S.C. 79))

Done in Washington, D.C. on: August 1, 1980.

Neil E. Porter,
Acting Director, Compliance Division.

BILLING CODE 3410–02–M

Assignment of Geographic Area to the Titus Grain Inspection Inc., West Lafayette, Ind.

AGENCY: Federal Grain Inspection Service.

ACTION: Notice.

SUMMARY: This notice announces assignment of geographic area to the Titus Grain Inspection, Inc., West Lafayette, Indiana, for the performance of official grain inspection functions under the authority of the United States Grain Standards Act, as amended.

EFFECTIVE DATE: September 5, 1980.

FOR FURTHER INFORMATION CONTACT:
J. T. Abshier, Director, Compliance Division, Federal Grain Inspection Service, United States Department of Agriculture, Washington, D.C. 20250, (202) 447–8262. Actions of this kind were anticipated under the provisions of Section 7 of the United States Grain Standards Act as amended (7 U.S.C. 79) and are specifically considered in the Final Impact Statement prepared for this notice. Thus, the Final Impact Statement describing the options considered in developing this notice and the impact of implementing each option is available on request from the Issuance and Coordination Staff, United States Department of Agriculture, Federal Grain Inspection Service, Washington, D.C. 20250.

SUPPLEMENTARY INFORMATION: This final action has been reviewed under USDA procedures established in Secretary's Memorandum 1955 to implement Executive Order 12044, and has been classified as "not significant."

The Titus Grain Inspection, 111 East Eight Hundred North, West Lafayette, Indiana 47906, was designated as an official agency under the United States Grain Standards Act, as amended (7 U.S.C. 71 *et seq.*) (the "Act"), for the performance of official grain inspection functions on August 31, 1978. The designation also included an assignment of geographic area, on an interim basis, within which this Agency would operate. Geographic areas are assigned to each official agency pursuant to Section 7(f)(2) of the Act.

Also, the Titus Grain Inspection has been incorporated, effective February 6, 1979, and the Agency's name is now Titus Grain Inspection, Inc. (the "Agency"). The change in name does not involve a change in management or ownership.

The Act provides that not more than one official agency shall be operating at one time within an assigned geographic area.

The proposed geographic area assigned on an interim basis to the Agency was announce

[FR Doc. 80– Filed 8–5–80; 8:45 am]

BILLING CODE d in the January 12, 1979, issue of the FEDERAL REGISTER (44 FR 2650). One comment was received. Information was received that the York Richland Grain Elevator, Inc., Earl Park, Indiana, a location outside the Agency's proposed contiguous geographic area, which is presently serviced and was in the past by the Agency, was omitted from the proposed geographic area. This location was proposed to be in the geographic area of the Champaign-Danville Grain Inspection Departments, Inc., Danville, Illinois. After review of this matter with all affected parties, it was mutually agreed that the York Richland Grain Elevator, Inc., shall be added to the Agency's geographic area.

After due consideration of all information available to the United States Department of Agriculture, the geographic area assigned to this Agency is as follows:

Bounded: on the North by the northern Pulaski County line;

Bounded: on the East by the eastern and southern Pulaski County lines; the eastern White County line; the eastern Carroll County line south to State Route 25; State Route 25 southwest to Tippecanoe County; the eastern Tippecanoe County line;

Bounded: on the South by the southern Tippecanoe County line; the eastern Fountain County line; the southern Fountain County line west to U.S. Route 41;

Bounded: on the West by U.S. Route 41 north to the northern Benton County line; the northern Benton County line east to State Route 55; State Route 55 north to U.S. Route 24; U.S. Route 24 east to the western White County line; the western White and Pulaski County lines.

The above has been restated for clarification purposes and does not alter the geographic area as originally proposed in anyway.

In addition, the following locations which are outside of the foregoing contiguous geographic area and which have been and will continue to be serviced by the Agency and shall be considered as part of the Agency's geographic area:

Boswell Grain Company, Boswell, Indiana, in Benton County; The Andersons, Delphi, Indiana, in Carroll County; Dunn Grain, Dunn, Indiana, in Benton County; York Richland Grain Elevator, Inc., Earl Park, Indiana, in Benton County; Buckeye Feed and Supply Company, Leiters Ford, Indiana, in Fulton County; Cargill, Inc., Linden, Indiana, in Montgomery County; and

V 45 / 153
AG 6 80
UMI

Raub Grain Company, Raub, Indiana, in Benton County.

Exceptions to this geographic area are the following locations situated inside the Agency's area which have been and will continue to be serviced by Schneider Inspection Service: Central Soya, and Farmers Grain, Winamac, Indiana, in Pulaski County.

These locations have been restated to more accurately describe the locations by listing the elevator site serviced rather than by general reference to the city, town, or area in which situated.

A specified service point for the purpose of this notice is a city, town, or other location specified by an agency for the conduct of official inspections and where the agency or one or more of its licensed inspectors is located. In addition to the specified service points within the assigned geographic area, the Agency will provide official inspection services not requiring a licensed inspector to all other areas within its geographic area.

Interested persons may obtain a map of the assigned geographic area and a list of specified service points by contacting the Agency or the Delegation and Designation Branch, Compliance Division, Federal Grain Inspection Service, United States Department of Agriculture, Washington, D.C. 20250, (202) 447–8262.

(Sec. 8, Pub. L. 94–582, 90 Stat. 2870 (7 U.S.C. 79))

Done in Washington, D.C. on: August 1, 1980.

Neil E. Porter,

Acting Director, Compliance Division.

BILLING CODE 3410–02–M

Assignment of Geographic Area to the William F. Christen Grain Inspection, Decatur, Ind.

AGENCY: Federal Grain Inspection Service.

ACTION: Notice.

SUMMARY: This notice announces assignment of geographic area to the William F. Christen Grain Inspection, Decatur, Indiana, for the performance of official grain inspection functions under the authority of the United States Grain Standards Act, as amended.

EFFECTIVE DATE: September 5, 1980.

FOR FURTHER INFORMATION CONTACT: J. T. Abshier, Director, Compliance Division, Federal Grain Inspection Service, United States Department of Agriculture, Washington, D.C. 20250, (202) 447–8262. Actions of this kind were anticipated under the provisions of Section 7 of the United States Grain Standards Act as amended (7 U.S.C. 79) and are specifically considered in the Final Impact Statement prepared for this notice. Thus, the Final Impact Statement describing the options considered in developing this notice and the impact of implementing each option is available on request from the Issuance and Coordination Staff, United States Department of Agriculture, Federal Grain Inspection Service, Washington, D.C. 20250.

SUPPLEMENTARY INFORMATION: This final action has been reviewed under USDA procedures established in Secretary's Memorandum 1955 to implement Executive Order 12044, and has been classified as "not significant."

William F. Christen Grain Inspection (the "Agency"), 108 W. Monroe Street, P.O. Box 87, Decatur, Indiana 46733, was designated as an official agency under the United States Grain Standards Act, as amended (7 U.S.C. 71 *et seq.*) (the "Act"), for the performance of official grain inspection functions on October 20, 1978. The designation also included an assignment of geographic area, on an interim basis, within which this Agency would operate. Geographic areas are assigned to each official agency pursuant to Section 7(f)(2) of the Act.

The Act provides that not more than one official agency shall be operating at one time within an assigned geographic area.

The proposed geographic area assigned on an interim basis to the Agency was announced in the January 12, 1979, issue of the **Federal Register** (44 FR 2651). No comments were received. Accordingly, after due consideration of all information available to the United States Department of Agriculture, the geographic area shall remain as originally proposed.

The geographic area assigned to the Agency is:

Bounded: on the North by the northern Lagrange and Steuben County lines;

Bounded: on the East by the eastern Steuben, Dekalb, Allen, and Adams County lines;

Bounded: on the South by the southern Adams and Wells County lines; the eastern Grant County line sought to State Route 18, State Route 18 west to State Route 221; State Route 221 north to Huntington County; the southern Huntington County and Wabash County lines; and

Bounded: on the West by the western Wabash County line north to Disko, Indiana; State Route 114 northwest to Akron, Indiana; State Route 19 north to Kosciusko County; the western and northern Kosciusko County lines; the western Noble and Lagrange County lines.

A specified service point for the purpose of this notice is a city, town, or other location specified by an agency for the conduct of official inspections and where the agency or one or more of its licensed inspectors is located. In addition to the specified service points within the assigned geographic area, the Agency will provide official inspection services not requiring a licensed inspector to all other areas within its geographic area.

Interested persons may obtain a map of the assigned geographic area and a list of specified service points by contacting the Agency or the Delegation and Designation Branch, Compliance Division, Federal Grain Inspection Service, United States Department of Agriculture, Washington, D.C. 20250, (202) 447–8262.

(Sec. 8, Pub. L. 94–582, 90 Stat. 2870 (7 U.S.C. 79))

Done in Washington, D.C. on August 1, 1980.

BILLING CODE 3410–02–M

Assignment of Geographic Area to the Schneider Inspection Service, Inc., Lowell, Ind.

AGENCY: Federal Grain Inspection Service.

ACTION: Notice.

SUMMARY: This notice announces assignment of geographic area to the Schneider Inspection Service, Inc., Lowell, Indiana, for the performance of official grain inspection functions under the authority of the United States Grain Standards Act, as amended.

EFFECTIVE DATE: September 30, 1980.

FOR FURTHER INFORMATION CONTACT: J. T. Abshier, Director, Compliance Division, Federal Grain Inspection Service, United States Department of Agriculture, Washington, D.C. 20250, (202) 447–8262. Actions of this kind were anticipated under the provisions of Section 7 of the United States Grain Standards Act as amended (7 U.S.C. 79) and are specifically considered in the Final Impact Statement prepared for this notice. Thus, the Final Impact Statement describing the options considered in developing this notice and the impact of implementing each option is available on request from the Issuance and Coordination Staff, United States Department of Agriculture, Federal Grain Inspection Service, Washington, D.C. 20250.

SUPPLEMENTARY INFORMATION: This final action has been reviewed under USDA procedures established in Secretary's Memorandum 1955 to implement Executive Order 12044, and has been classified as "not significant."

Schneider Inspection Service, Inc. (the "Agency"), 15406 White Oak, Lowell, Indiana 46356, was designated as an official agency under the United States Grain Standards Act, as amended (7 U.S.C. 71 *et seq.*) (the "Act"), for the performance of official grain inspection functions on October 25, 1978. The designation also included an assignment of geographic area, on an interim basis, within which this Agency would operate. Geographic areas are assigned to each official agency pursuant to Section 7(f)(2) of the Act.

The Act provides that not more than one official agency shall be operating at one time within an assigned geographic area.

The proposed geographic area assigned on an interim basis to the Agency was announced in the January 12, 1979, issue of the **Federal Register** (44 FR 2649). No comments were received. Accordingly, after due consideration of all information available to the United States Department of Agriculture, the geographic area assigned to this Agency is as follows:

Bounded: on the North by the northern Will County line from Interstate 57 east to the Illinois-Indiana State line; the Illinois-Indiana State line north to Interstate 94; Interstate 94 east-northeast to the northern Laporte County line; the northern St. Joseph and Elkhart County lines;

Bounded: on the East by the eastern and southern Elkhart County lines; the eastern Marshall county line;

Bounded: on the South by the southern Marshall and Starke County lines; the eastern Jasper County line south-southeast to U.S. Route 24; U.S. Route 24 west to Indiana State Route 55; Indiana State Route 55 south to the Newton County line; the southern Newton County line west to U.S. Route 41; U.S. Route 41 north to U.S. Route 24; U.S. Route 24 west across the Indiana-Illinois State line to Illinois State Route 1; and

Bounded: on the West by Illinois State Route 1 north to Kankakee County; the southern Kankakee County line west to U.S. Route 52; U.S. Route 52 north to Interstate 57; Interstate 57 north to the northern Will county line.

The above has been restated to utilize county lines where possible for clarification purposes and does not alter the geographic area as originally proposed in any way.

In addition, the following locations, which are outside of the foregoing contiguous geographic area and are to be serviced by the Agency, shall be considered as part of the Agency's geographic area: Central Soya and Farmers Grain, Winamac, Indiana, in Pulaski County; and Tidewater Grain Company, Fort Iroquois Supply and Service, and Summer Elevator, Sheldon, Illinois, in Iroquois County.

An exception to this geographic area is the following location situated inside the Agency's area which has been and will continue to be serviced by:

Champaign-Danville Grain Inspection Departments, Inc.:

Gillespie Grain Company, Pittwood, Illinois, in Iroquois County.

These locations have been restated to more accurately describe the locations by listing the elevator site serviced rather than by general reference to the city, town, or area in which situated.

A specified service point for the purpose of this notice is a city, town, or other location specified by an agency for the conduct of official inspections and where the agency or one or more of its licensed inspectors is located. In addition to the specified service points within the assigned geographic area, the Agency will provide official inspection services not requiring a licensed inspector to all other areas within its geographic area.

Interested persons may obtain a map of the assigned geographic area and a list of specified service points by contacting the Agency or the Delegation and Designation Branch, Compliance Division, Federal Grain Inspection Service, United States Department of Agriculture, Washington, D.C. 20250, (202) 447–8262.

(Sec. 8, Pub. L. 94–582, 90 Stat. 2870 (7 U.S.C. 79))

Done in Washington, D.C. on August 1, 1980.

Neil E. Porter,

Acting Director, Compliance Division.

BILLING CODE 3410–02–M

Assignment of Geographic Area to the Indianapolis Grain Inspection and Weighing Service, Inc., Indianapolis, Ind.

AGENCY: Federal Grain Inspection Service.

ACTION: Notice.

SUMMARY: This notice announces assignment of geographic area to the Indianapolis Grain Inspection and Weighing Service, Inc., Indianapolis, Indiana, for the performance of official grain inspection functions under the authority of the United States Grain Standards Act, as amended.

EFFECTIVE DATE: September 5, 1980.

FOR FURTHER INFORMATION CONTACT: J. T. Abshier, Director, Compliance Division, Federal Grain Inspection Service, United States Department of Agriculture, Washington, D.C. 20250, (202) 447–8262. Actions of this kind were anticipated under the provisions of Section 7 of the United States Grain Standards Act as amended (7 U.S.C. 79) and are specifically considered in the Final Impact Statement prepared for this notice. Thus, the Final Impact Statement describing the options considered in developing this notice and the impact of implementing each option is available on request from the Issuance and Coordination Staff, United States Department of Agriculture, Federal Grain Inspection Service, Washington, D.C. 20250.

SUPPLEMENTARY INFORMATION: This final action has been reviewed under USDA procedures established in Secretary's Memorandum 1955 to implement Executive Order 12044, and has been classified as "not significant."

Indianapolis Grain Inspection & Weighing Service, Inc. (the "Agency"), 727 Board of Trade Building, 143 North Meridian Street, Indianapolis, Indiana 46204, was designated as an official agency under the United States Grain Standards Act, as amended (7 U.S.C. 71 *et seq.)* (the "Act"), for the performance of official grain inspection functions on November 20, 1978. The designation also included an assignment of geographic area, on an interim basis, within which this Agency would operate. Geographic areas are assigned to each official agency pursuant to Section 7(f)(2) of the Act.

The Act provides that not more than one official agency shall be operating at one time within an assigned geographic area.

The proposed geographic area assigned on an interim basis to the Agency was announced in the January 12, 1979, issue of the **Federal Register** (44 FR 2649). One comment was received. Information was received from the Agency and Winchester Grain Inspection, Winchester, Indiana, regarding grain inspection services in Rush County north of State Route 244 in Indiana. After review of this matter with the agencies, it was mutually agreed that Winchester Grain Inspection was better able to provide more timely service in that specified section of this County and to delete this section of this County from the geographic area of the Agency.

V 45 / 153 AG 6 80 UMI

After due consideration of all relevant matters and information available to the United States Department of Agriculture, the geographic area assigned to this Agency shall be the area within the following counties:

Bartholomew, Brown, Hamilton (south of State Route 32), Hancock, Hendricks, Johnson, Madison (west of State Route 13 and south of State Route 132), Marion, Monroe, Morgan, and Shelby, all in Indiana.

The above has been restated to utilize entire counties and sections of counties, instead of county lines, for clarification purposes and does not alter the geographic area as originally proposed in any way, except for the deletion of that specified section of Rush County.

A specified service point for the purpose of this notice is a city, town, or other location specified by an agency for the conduct of official inspections and where the agency or one or more of its licensed inspectors is located. In addition to the specified service points within the assigned geographic area, the Agency will provide official inspection services not requiring a licensed inspector to all other areas within its geographic area.

Interested persons may obtain a map of the assigned geographic area and a list of specified service points by contacting the Agency or the Delegation and Designation Branch, Compliance Division, Federal Grain Inspection Service, United States Department of Agriculture, Washington, D.C. 20250, (202) 447-8262.

(Sec. 8, Pub. L. 94-582, 90 Stat. 2870 (7 U.S.C. 79))

Done in Washington, D.C. on: August 1, 1980.

Neil E. Porter,

Acting Director, Compliance Division.

Federal Grain Inspection Service

Warehouseman's Sample-Lot Inspection Certificate; Proposed Revision

V 45 / 153 AG 6 80 UMI

DEPARTMENT OF AGRICULTURE

Federal Grain Inspection Service

7 CFR Part 800

Proposed Revisions to the Warehouseman's Sample-Lot Inspection Certificate

AGENCY: Federal Grain Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: The Federal Grain Inspection Service (FGIS) proposes to revise the Warehouseman's Sample-Lot Inspection Certificate by adding two qualifying statements. The addition of the qualifying statements will clarify the certificates as to the nature of the inspection service rendered and their status under the United State Grain Standards Act, as amended.

DATE: Comments must be received on or before October 6, 1980.

ADDRESS: Comments should be submitted in writing, in duplicate to: Director, Issuance and Coordination Staff, Federal Grain Inspection Service, U.S. Department of Agriculture, 1400 Independence Avenue, S.W., Room 1127-Auditors Building, Washington, D.C. 20250, telephone (202) 447–3910.

FOR FURTHER INFORMATION CONTACT: John W. Marshall, Director, Inspection Division, telephone (202) 447–8497.

The Draft Impact Analysis describing the options considered in developing this proposed rule and the impact of implementing each option is available on request from: Director, Issuance and Coordination Staff, telephone (202) 447–3910.

SUPPLEMENTARY INFORMATION: This proposed action has been reviewed under USDA procedures established in Secretary's Memorandum 1955 to implement Executive Order 12044, and has been classified "not significant."

Pursuant to the authority in section 16(a) of the United States Grain Standards Act, as amended (7 U.S.C. 87e), hereinafter cited as the Act, notice is hereby given that the Administrator of the Federal Grain Inspection Service proposes to amend § 800.161(b)(23) (7 CFR 800.161(b)(23)) of the regulations under the Act to include two statements further qualifying the Warehouseman's Sample-Lot Inspection Certificate.

Section 800.161(d)(1) of the regulations under the Act requires, in part, that FGIS use a color code on certificates to differentiate the kinds of inspection services. The color code identifies an official sample-lot inspection by use of a white certificate, a warehouseman's sample-lot inspection by use of a yellow certificate, and a submitted sample inspection by use of a pink certificate.

A report prepared by the Comptroller General of the United States, General Accounting Office (GAO), states, in part, that the certificates issued under the warehouseman's sample-lot inspection program do not adequately inform users of the source of the sample used to determine the results of the inspection. Based on this report, it was determined that certificate color alone is not sufficient to alert the grain industry of the limitations in rendering such a service. FGIS proposes to add two qualifying statements on the warehouseman's certificate to clarify its status and more clearly differentiate the warehouseman's certificate from other official inspection certificates.

If this proposed change to § 800.161(b)(23) of the regulations under the Act is adopted, the change will become effective 1 month after the final rule is published in the **Federal Register.** Persons issuing warehouseman's certificates will be permitted to use their current supply for a period of 6 months after the effective date.

Consideration will be given to submitted comments and to all other information available to the U.S. Department of Agriculture prior to a final determination with respect to this proposal.

All comments submitted pursuant to this proposal will be made available for public inspection at the Issuance and Coordination Staff, FGIS, during regular business hours.

It is proposed that paragraph(b)(23) of § 800.161 of the regulations under the Act be revised to read as follows:

§ 800.161 Official certificate requirements.

* * * * *

(b) * * *

(23) Warehouseman's sample-lot inspection. For a certificate for a warehouseman's sample-lot inspection service, the name of the licensed employee, the number of the contract entered into by the licensed employee, and the statements: (i) in bold print, "The results of this inspection were based on a sample obtained and submitted by an elevator employee licensed under a contract with the Service. This certificate does not meet the inspection requirements of section 5 of the Act." and (ii) in ghost or shadow type diagonally across the face of the certificate, the word "QUALIFIED."

Department of Agriculture

Commodity Credit Corporation

CCC Intermediate Credit Export Sales Program for Foreign Market Development Facilities

V 45 / 153 AG 6 80 UMI

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

7 CFR Part 1492

[GSM-301]

CCC Intermediate Credit Export Sales Program for Foreign Market Development Facilities

AGENCY: Commodity Credit Corporation, Department of Agriculture.

ACTION: Notice of proposed rulemaking.

SUMMARY: In accordance with Section 4(b) of the Food for Peace Act of 1966, as added by the Agricultural Trade Act of 1978 ("Act"), the Commodity Credit Corporation is proposing an Intermediate Credit Export Sales Program for Foreign Market Development Facilities (GSM-301) which will authorize CCC to enter into project agreements with U.S. or foreign private entities, or with foreign governments, under which CCC may finance the sale and export of U.S. agricultural commodities for periods in excess of three years but not more than ten years. The project agreement will provide that local currency generated from the import and sale of U.S. agricultural commodities in the importing country be used by the program participant in the importing country to establish facilities to improve the handling, marketing, processing, storage, or distribution of imported commodities. Pursuant to a related commodity agreement, CCC will purchase the exporter's account receivable by paying the exporter the export value of the agricultural commodity. GSM-301 is intended both to expand U.S. exports in order to create a more favorable balance of payments and to enhance farm income for United States producers by expanding future import opportunities in foreign countries for U.S. agricultural commodities.

DATE: In order to assure consideration, comments must be received by September 5, 1980.

ADDRESS: Mail or deliver comments to the General Sales Manager, Foreign Agricultural Service, Department of Agriculture, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT: W. R. Randoph, Agricultural Marketing Specialist, Planning and Evaluation Division, Foreign Market Development, Foreign Agricultural Service, Washington, D.C. 20250. Telephone (202) 447-6937. The Draft Impact Analysis describing the options considered in developing this proposed rule and the impact of implementing each option is available on request from W. R. Randolph.

SUPPLEMENTARY INFORMATION: This proposed action has been reviewed under USDA procedures established in Secretary's Memorandum 1955 to implement Executive Order 12044 and has been classified "significant." Kelly Harrison, General Sales Manager, Foreign Agricultural Service, has determined that an emergency situation exists which warrants less than a 60-day comment period on this proposed action because a timely adoption of the program is crucial to ensure implementation of the program during Fiscal Year 1980. In Fiscal year 1980, $50 million is available in the CCC program budget to fund the proposed program. Potential projects have been identified and proposed to the General Sales Manager which could be started before the end of the fiscal year to effectively utilize the available funds. Because of the time necessary to complete the process of implementing the proposed program and approve the projects before the end of the fiscal year, a comment period of less than the 60-days is necessary. The purpose of extending financing under GSM-301 is to develop or expand the importing country as a foreign market, on a long-term basis, for the commercial sale and export of U.S. agricultural commodities without displacing normal U.S. commercial sales, or to otherwise improve the capability of the importing country to purchase and use, on a long-term basis, U.S. agricultural commodities.

The decision to utilize this GSM-301 program was arrived at after thorough consideration of the following three alternatives: First, no action be taken to implement the intermediate credit program for the establishment of foreign market development facilities authorized in the Act; second, reinstate the former Private Trade Entity Program (PTE) authorized by Title I of the Agricultural Trade Development and Assistance Act of 1954, as amended; and third, develop and implement an intermediate credit program to finance sales of agricultural commodities on credit terms of more than three years but not more than ten years for the establishment of facilities to improve marketing, processing, storage, or distribution of imported agricultural commodities in the importing country as authorized by the Act.

The first alternative considered by CCC contemplates reliance on private financing and other credit facilities now available to establish market development facilities in foreign importing countries. These include facilities and programs administered by agencies or institutions such as the Export-Import Bank, the Overseas Private Investment Corporation, the World Bank, and private financing institutions. The countries which this proposed rule will benefit are not presently eligible for U.S. Agency for International Development or Pub. L. 480 Programs and may not be eligible to receive loan capital for market development projects from other financial institutions. In many instances, private financing is not available from traditional domestic or foreign sources to fund such projects.

The World Bank and other lending institutions have increased their funding of commodity and marketing projects but the total volume of resources made available for such activities remains low relative to expected needs. This situation appears to be attributed to two factors: (1) higher priority given to projects to encourage domestic production and export development of the host country and (2) lending procedures of international institutions which limit the number of approvable projects. It appears to CCC that the aforementioned priorities and lending procedures preclude the World Bank and other lending institutions from funding suitable market development projects which would increase the importation of agricultural commodities and expansion of commercial markets in the importing country. The conclusion, therefore, is that funding for the kinds of projects contemplated in the Agricultural Trade Act of 1978 is not readily available from international lending institutions.

Furthermore, the loan criteria of some of these lending institutions would exclude many market development projects which could be undertaken to improve market opportunities for U.S. agricultural exports. For example, the Export-Import Bank of the United States provides financing of U.S. exports of capital goods and services and is limited to the financing of local costs of projects. Also, the U.S. goods shipped by ocean freight must be transported by U.S. flag vessels unless a waiver is obtained from the U.S. Maritime Administration. This requirement would increase the cost of construction materials and equipment to construct facilities. To qualify for OPIC financing, the projects must have U.S. investors owning a meaningful share of the investment. Generally this is considered to be at least 25 percent of the voting shares. Even in such cases, only 40-45 percent of the total project cost is eligible for financing. In addition, wholly government-owned projects are not eligible for OPIC financing. The first alternative, therefore, is not acceptable to CCC.

The second alternative considered by CCC was to reinstitute the former Private Trade Entity Program (PTE) pursuant to Title I of the Agricultural Trade Development and Assistance Act of 1954, as amended. The PTE program in effect during the 1964–72 period authorized the Secretary of Agriculture to enter into agreements with foreign or U.S. private trade entities to finance export sales of U.S. agricultural commodities, thereby assisting economic and market development in developing countries. Foreign governments were not eligible to participate under the PTE Program. Agreements provided for the development of projects which resulted in the establishment of facilities designed to improve the storage or marketing of agricultural commodities or which otherwise stimulated and expanded private enterprise in friendly developing countries.

If the PTE program was revived and operated in the same manner as before, program regulations would need to be re-issued. There is a legislative requirement that the private trade entity would be eligible for financing only if a country's usual marketing requirements were adhered to. This requirement proved difficult to administer during the time the program was in effect and, because of this requirement, many proposals could not be approved since the private trade entity could not give CCC assurance that the importing country would comply with the usual marketing requirements. There is another legislative requirement that the commodity to be financed must be in "surplus" at the time of export. Finally, it is assumed that the proposed PTE projects would be subject to extensive interdepartmental review as they were in the past. In conclusion, CCC feels that the restrictive legislative requirements resulted in a program which was difficult to administer, burdened both by excessive delays in the approval of projects because of interdepartmental reviews and reluctance on the part of private trade entities to participate because of the imposition of usual marketing requirements over which they had no control, and the uncertainty that commodities programmed in the project agreements would be in "surplus" at the time export of the commodity was planned to occur. Accordingly, CCC has rejected the second alternative.

The third alternative considered by CCC and published herein as a proposed rule is to develop an intermediate credit program to finance sales of U.S. agricultural commodities on credit terms of more than three years but not more than ten years for the establishment of facilities to improve marketing, processing, storage, or distribution of imported agricultural commodities. Essentially, the facilities would be established through the use of local currency generated from the import and sale of the U.S. agricultural commodities in the importing country.

The ability of many countries in the world to import U.S. food and other farm commodities, particularly developing countries, is limited by the lack of adequate marketing facilities in such countries. In a recent USDA survey, 23 countries specified needed projects which they would undertake themselves, or undertake in a joint venture with private U.S. agribusiness firms, if acceptable financing terms were available. Projects of interest to such countries include the construction of adequate port facilities, bulk grain unloading, handling and distribution facilities, feed and flour mills, slaughter and freezer plants, cold storage units, soybean processing plants, vegetable oil refineries, livestock and poultry processing facilities, plus expansion and modernization of existing facilities.

Under the proposed program, and as required by the Act, no export sales may be financed unless the sale develops or expands, on a long-term basis, the importing country as a foreign market for the commercial sale of U.S. agricultural commodities without displacing normal U.S. commercial sales, or otherwise improves the capability of the importing country to purchase and use U.S. agricultural commodities on a long-term basis. Moreover, intermediate credit financing may not be used to encourage credit competition, or for the purpose of foreign aid or debt rescheduling. Foreign governments, as well as private trade, would be eligible to participate under the program.

Commodities financed under the proposed program would be those which are determined to be in sufficient supply. Engineering and marketing feasibility studies would be required for each proposed market development project except when such studies are determined to be unnecessary. Periodic compliance reviews would determine whether the project is being carried out in accordance with the project plans. The participant would be required to maintain an adequate system of bookkeeping records to account for the receipt and use of the local currency received from the import and sale of the commodity. The participant will furnish CCC periodic reports on the use of the local currency and reports on the progress made toward completion of the project.

Under the proposed program, the prticipant would not be required to purchase U.S. capital goods and services to carry out the project and no limitation would apply to the amount of local costs which could be paid for with funds made available through the import and sale of the U.S. agricultural commodity. Furthermore, no requirement would be made of the participant to make future purchases of U.S. agricultural commodities. The U.S. would compete with other exporting countries for the opportunity to export to the foreign country in which the facility was established.

The applicant for a project agreement would be required to establish adequate financial assurance in favor of CCC to protect CCC from failure to repay the financing as well as failure to complete the planned project or to perform other obligations under the agreement. Proposed project agreements would be subject to review only by the National Advisory Council on International Monetary and Financial Policies.

The public is invited to submit written comments regarding the proposed rule. Each person submitting comments regarding the proposed rule shall include his or her name and address and give reasons for any suggested changes in the proposed rule. Copies of all written communications received and an approved Draft Impact Analysis will be available for examination by interested persons in Room 4079, South Agriculture Building, 14th Street and Independence Avenue, S.W., Washington, D.C. 20250, during regular business hours.

Proposed Rule

Accordingly, it is proposed to amend Subchapter C of Chapter XIV of Title 7 of the Code of Federal Regulations by adding a new part 1492, CCC Intermediate Credit Export Sales Program for Foreign Market Development Facilities (GSM-301) and a new subpart A thereunder as follows:

PART 1492—CCC INTERMEDIATE CREDIT EXPORT SALES PROGRAM FOR FOREIGN MARKET DEVELOPMENT FACILITIES

Subpart A—Financing Export Sales of Agricultural Commodities Under CCC Intermediate Credit Export Sales Program (GSM-301)

Authority: Sec. 4(b), 80 Stat. 1537, as added by Sec. 101, 92 Stat. 1685 (7 U.S.C. 1707a); Sec. 5(f), 62 Stat. 1070, as amended.

General

§ 1492.1 General statement.

(a) Section 4(b) of the Food for Peace Act of 1966, as added by the Agricultural Trade Act of 1978, authorizes the Commodity Credit Corporation (CCC) to finance export sales of United States agricultural commodities out of CCC and private stocks on credit terms in excess of three years but not more than ten years.

(b) Intermediate credit financing made available by CCC on the export sale of United States agricultural commodities may be used to establish facilities in the importing country to improve handling, marketing, processing, storage, or distribution of imported agricultural commodities through the use of local currency generated from the import and sale of the U.S. agricultural commodities to finance the development of such facilities.

(c) No export sale may be financed unless the General Sales Manager determines that the sale will: (1) develop or expand the importing nation as a foreign market, on a long-term basis, for the commercial sale and export of U.S. agricultural commodities without displacing normal U.S. commercial sales; or (2) otherwise improve the capability of the importing country to purchase and use, on a long-term basis, U.S. agricultural commodities.

(d) Intermediate credit financing may not be used for projects for which financing is available under other U.S. programs, such as programs administered by the Overseas Private Investment Corporation and the Export-Import Bank. However, financing provided by such institutions may be supplemented to the extent the General Sales Manager determines that such supplementation is necessary to accomplish the objectives of this program.

(e) Intermediate credit financing may not be used to encourage credit competition or for the purpose of foreign aid or debt rescheduling.

(f) The terms of credit for export sales financed shall include the following conditions:

(1) Repayment of financing shall be made in U.S. dollars and shall bear interest for the period of the financing. The interest rate shall be specified in the project agreement and shall apply to export sales made during a designated period of time. Interest rates will be determined by CCC using generally the same criteria as used in determining interest rates charged under CCC's short-term Export Credit Sales Program.

(2) The participant shall be required to make an initial payment of at least 15 percent of the export value of the agricultural commodity at the time of export of the commodity.

(3) When deemed appropriate to protect the interests of CCC, the participant shall also be required to make a further investment in the project. Such investment may include initial working capital, the payment of feasibility and engineering studies, organizational expenses, land cost, construction cost, machinery and equipment cost, etc., with the participant's own resources.

(g) CCC shall, when deemed appropriate, obtain commitments from participants that the products produced in facilities covered by the project agreement will not be exported from the importing country if such products compete with the same or similar product being exported from the United States.

(h) Subject to the terms and conditions as set forth in GSM–301, CCC will purchase, after export of the commodity, the exporter's account receivable arising from an export sale of U.S. agricultural commodities.

(i) The provisions of Pub. L. 83–864 (Cargo Preference Act) shall not apply to exports of U.S. agricultural commodities financed under GSM–301.

(j) Participation under GSM–301 will not be conditioned upon the participant's use of U.S. goods and services to establish the facilities except that only U.S. agricultural commodities will be financed under the program.

(k) The GSM–301 program will be administered by the General Sales Manager, Foreign Agricultural Service, U.S. Department of Agriculture.

§ 1492.2 Definition of terms.

As used in this GSM–301, the project agreement, USDA announcements, and the forms and documents related thereto, the following terms shall have the meanings assigned to them in this section:

(a) "Account receivable" means the contractual obligation of the participant to the exporter for the export value of the U.S. agricultural commodity exported by the exporter to the participant. The account receivable establishing the contractual obligation between the exporter and the participant shall be evidenced by documents in form and substance satisfactory to CCC.

(b) "General Sales Manager" means the General Sales Manager, Foreign Agricultural Service, USDA, or the General Sales Manager's designee.

(c) "Assurer" means the institution which assures, on behalf of the participant, repayment in U.S. dollars of the amount financed by CCC with interest in accordance with provisions of the project agreement between CCC and the participant. An "assurer" may be a U.S. bank or financial institution; a foreign private bank or financial institution; or a central bank, government financial agency, or a foreign government.

(d) "Carrying charges" means storage, insurance, and interest charges involved in the cost of handling and storing the agricultural commodity before export and such other incidental costs as may be approved by the General Sales Manager.

(e) "CCC" means the Commodity Credit Corporation, U.S. Department of Agriculture.

(f) "Commodity agreement" means the written agreement entered into between CCC and an exporter under which the exporter agrees to export an eligible U.S. agricultural commodity in accordance with the exporter's export sales contract with the participant and the provisions of GSM–301 in consideration of CCC's agreement to purchase the exporter's account receivable after export of the commodity and upon submission of the required documents specified in § 1492.29.

(g) "Commodity purchase authorization" means a USDA announcement published by the U.S. Department of Agriculture pursuant to GSM–301 in which the General Sales Manager authorizes the participant to purchase commodities from exporters in accordance with the commodity purchase authorization and project agreement.

(h) "Date of export" means the onboard date of an ocean bill of lading, or the date of an airway bill, or if export is by rail or truck, the date of entry shown on an authenticated landing certificate or similar document issued by an official of the government of the importing country.

(i) "Date of sale" means the earliest date the exporter has knowledge that a contractual obligation exists with the participant under which a firm dollar-and-cent price has been established or a mechanism to establish the price has been agreed upon.

(j) "Eligible commodity" means any agricultural commodity or product thereof, including eligible cotton, produced in the United States and designated by the General Sales Manager as eligible for financing under GSM–301. Commodities which have been purchased from CCC are also eligible for export under GSM–301. Commodities exported pursuant to any CCC barter contract, Public Law 480 agreement, Agency for International Development agreement, direct loan by the Export-Import Bank, or any other concessional-type transactions are not eligible for financing under GSM–301.

(k) "Eligible cotton" means upland and extra-long staple cotton grown in the United States that is eligible for financing hereunder but excludes reginned or repacked cotton, as defined in regulations of the U.S. Department of Agriculture under the U.S. Cotton Standards Act (7 CFR 28.40), by-products of cotton such as cotton mill waste, motes, and linters, and any cotton that contains any by-products of cotton. CCC's determination as to the eligibility of cotton shall be final.

(l) "Eligible exporter" or "exporter" means a person who is (1) engaged in the business of buying or selling commodities for export and for this purpose maintains a bona fide business office in the United States, its territories or possessions, and has someone on whom service of judicial process may be had within the United States, (2) financially responsible, and (3) not suspended or debarred from contracting or participating in any program administered by CCC on the date of issuance of the commodity agreement.

(m) "Eligible importing country" means the country (i) which is named in the porject agreement between CCC and the participant and in the commodity agreement between CCC and the exporter, and (ii) which meets the licensing requirements of the U.S. Department of Commerce.

(n) "Export" means the export of the agricultural commodity as required by the export sale contract between the participant and exporter to transfer to the participant full or conditional title to the commodity. Export from the United States shall be f.a.s. or f.o.b. export carrier at U.S. ports, airports, and border points of exit or, if transshipped through Canada, at ports on the Great Lakes and the St. Lawrence River.

(o) "Export value" means the net amount of the exporter's sale price for the commodity delivered to the participant under a commodity agreement, basis f.a.s. or f.o.b. export carrier at U.S. ports, airports or border points of exit, or, if transshipped through Canada, at ports on the Great Lakes or on th St. Lawrence River. The export value shall not include ocean freight for a c & f sale, or ocean freight and marine and war risk insurance for a c.i.f. sale, but may include carrying charges as provided for in the export sales contract. The net amount of the exporter's sales price means the exporter's contract price for the commodity, on the basis stated above, less any payments made to the exporter and less any discounts, credits, or allowances by the exporter.

(p) "Financing period" means the number of years and months over which payment is to be made which shall be in excess of three years but not more than ten years. Such period shall start on the date of export of the commodity and shall expire on the expiration of the financial assurance established by the participant or the specified period over which repayments are to be made, whichever occurs first.

(q) "GSM–301" menas the regulations contained in this Subpart A and USDA announcements thereto, setting forth the terms and conditions governing the CCC Intermediate Credit Export Sales Program for Foreign Market Development Facilities.

(r) "Project agreement" means the written agreement entered into between CCC and a participant for the financing of U.S. agricultural commodities on credit pursuant to the purpose described in § 1492.1 (b).

(s) "Participant" means a foreign government, a U.S. or foreign individual, group of individuals, partnership, corporation, association, cooperative or other entity which (1) enters into a project agreement with CCC, (2) purchase U.S. agricultural commodities from an exporter to be exported from the U.S. to the importing country named in the commodity agreement, and (3) executes the documents evidencing the account receivable which is assigned to CCC.

(t) "Supply year" or "fiscal year" means the twelve-month period beginning October 1 and ending the following September 30.

(u) "United States" means the 50 States, the District of Columbia, and Puerto Rico.

Project Agreements

§ 1492.3 General.

To qualify for a project agreement, an applicant must submit: (a) an application for a project agreement; (b) a project plan and cost information; (c) a feasibility study and engineering report except when the General Sales Manager determines that such a study or report is not necessary; (d) certain legal documents; and (e) an assurance of payment. After a project agreement is signed by the General Sales Manager and the participant, the General Sales Manager will issue an authorization for the participant to purchase U.S. agricultural commodities. The commodities are then purchased and imported into the eligible country and sold by the participant, or the commodity may be processed into products and the products sold, and the proceeds from the sale of the commodity or product deposited in a financial institution. The funds are then available to the participant to carry out the construction of the market development project approved in the agreement. The participant will be required to make reports on the use of project funds and progress toward completion of the project. Activities under a project agreement will be reviewed by CCC to determine compliance with the project agreement.

V 45 / 153 AG 6 80 UMI

§ 1492.4 Eligible projects and participants.

(a) Local currency generated from the import and sale of the commodity, or product thereof, shall be used by the participant for the establishment of facilities in the importing country to improve handling, marketing, processing, storage, or distribution of imported agricultural commodities which will improve market opportunities for the export sale of U.S. agricultural commodities.

(b) Projects which may be approved include, but are not limited to, feed and flour mills; bulk unloading, handling and storage facilities at ports and inland points; oilseed crushing and vegetable oil refining facilities; livestock receiving facilities; livestock feeding lots; processing plants; model bakeries; poultry facilities; and tallow refining facilities.

(c) The General Sales Manager may enter into project agreements with foreign governments, U.S. or foreign individuals, group of individuals, partnerships, corporations, associations, cooperatives, and other entities.

(d) If the project agreement is entered into with a foreign government, the foreign government may carry out the establishment of facilities directly or the foreign government may, if approved in the project agreement, enter into an agreement with a private business entity under which the private business entity would carry out the establishment of the facility. The private business entity and the plan of the private business entity to carry out the establishment of the facility must be approved by the General Sales Manager.

(e) If a non-government entity is to be the participant, it must furnish the General Sales Manager with a written statement from the foreign government of the country in which the project is to be carried out showing the foreign government's approval of the proposed project.

(f) The General Sales Manager will request the Agricultural Counselor or Attache assigned to the country in which the project is to be carried out and other interested U.S. agencies to furnish their recommendations concerning the proposed project.

§ 1492.5 Submission of application for a project agreement.

(a) An applicant for a project agreement shall submit a written application to the General Sales Manager. The application shall include, but is not limited to the following:

(1) Name of the applicant and address, type or organization (company, corporation, cooperative, government or other entity), nature of its business and operations and, if a corporation, a copy of its articles of incorporation and by-laws.

(2) Name and address of any firm or individual with which the applicant has a business affiliation, i.e. ownership interest.

(3) A summary of the applicant's experience in dealing with agricultural commodities.

(4) If the applicant is a private organization and the Government of the importing country is to participate in the project, the nature and extent of Government participation in the ownership, financing, or operation of the project. If the Government of the importing country will not be participating in the project, the extent to which the applicant has discussed the proposal with officials of the Government.

(5) Information on each of the applicant's principal officers and managerial personnel as follows: (i) full name, (ii) position, (iii) place and date of birth (day, month, and year), (iv) present citizenship, (v) business and private addresses, and (vi) summary of business experience.

(6) The name of the importing country.

(7) The kind and quantity of agricultural commodity proposed for financing.

(8) The period of time during which the commodities would be exported.

(9) A statement of the applicant's plans for selling the commodity to end users within the importing country or, if the applicant is the intended processor or user, the applicant's plans for processing or using the commodity.

(10) The repayment period considered necessary by the applicant to carry out the project.

(11) Name and address of the financial institution which shall provide the required assurance of U.S. dollar payment to CCC as provided in § 1492.10.

(12) The most recent statment of financial position and profit and loss statement of the applicant.

(13) Projected cash-flow statements covering the repayment period.

(14) The extent to which the applicant has discussed the proposal with the U.S. Agricultural Counselor or Attache or with representatives of the American Embassy and other U.S. agencies.

(15) Brief statement explaining any requests made by the applicant to other U.S. lending organizations, such as the Overseas Private Investment Corporations or the Export-Import Bank of the U.S., to obtain financing for the proposed project and the results of such requests.

(16) Project plans and information as provided in § 1492.6.

(17) Other information or documents as may be requested by the General Sales Manager.

(b) An application may be approved as submitted, approved with modification, or rejected by the General Sales Manager.

§ 1492.6 Project plan and information.

(a) The applicant shall furnish the following information to the General Sales Manager:

(1) *Project plans.* A complete description of the project; plan for carrying out the project; time schedule for carrying out the project, including the approximate starting and completion dates; purpose and need of the project in the importing country; expected effect the project will have on future imports of agricultural commodities into the importing country; and any other information which would demonstrate the soundness of the project plan.

(2) *Project cost estimates.* An estimate of the total cost to carry out the project with a breakdown of the total costs among major categories involved in the project, such as technical services (architectural and engineering), land, construction services, materials, machinery and equipment, financing costs, administrative and overhead costs. An allocation of each such category of costs to project funds and to resources to be provided by the participant. Unless otherwise agreed to in writing by the General Sales Manager, financing cost (other than interest to be paid by the participant for the financing provided by CCC under the project agreement) and related guarantee fees and administrative and overhead charges incurred by the participant cannot be allocated to project funds.

(3) *Project fund estimate.* An estimate of the project funds needed to carry out the project and a certification by the participant which provides substantially as follows: "I certify that the project cost estimates allocated to be paid with project funds represents a reasonable estimate of the financing needed to carry out the project."

(4) *Participant resources.* An estimate of the value of resources (working capital, land, buildings, machinery and equipment, etc.) to be provided by the participant. Include as a resource, that portion of the estimated export value of the commodity to be exported from the U.S. which the applicant will pay with the applicant's own resources. If the applicant is required by the General Sales Manager to make a further investment in the project, a detailed description of the nature and the value of the resource which will represent such investment. When requested by the General Sales Manager, the applicant must furnish a detailed independent appraisal of the value of the resources.

(5) *Tentative schedule of disbursements.* A tentative time schedule for project fund disbursements which shows the estimated disbursement for each major cost category for each semi-annual period of the financing period.

(b) The applicant must furnish a feasibility study to demonstrate the soundness of the proposed project except when the General Sales Manager determines that such a study is not necessary.

(c) (1) The applicant shall employ the services of a competent engineering firm for the planning and development of the project and for supervision of the execution of the project except when the General Sales Manager determines that such services are not necessary.

(2) If the services of an engineering firm are required, the applicant's arrangement with the engineering firm shall provide that the engineering firm furnish a certification with respect to the project plans and cost estimates as follows: "We hereby certify that we have reviewed the accompanying information on the project plans which we understand (name of applicant) is required to submit to the Commodity Credit Corporation. We further certify that this information is in accordance with the project plans and the specifications prepared by us, or with our advice and consultation, and that the cost estimates are reasonable and proper." The certification shall show the name and address of the engineering firm and shall be signed by an authorized representative of the firm.

(d) The General Sales Manager shall have the right to request the applicant to furnish copies of the detailed architectural and engineering plans and specifications and detailed cost estimates.

(e) The applicant shall furnish such other information, certifications, or documents as requested by the General Sales Manager.

(f) After the project plans have been approved by the General Sales Manager, the project and the plan for carrying out the project may be modified only by mutual agreement of the General Sales Manager and the participant in writing.

§ 1492.7 Legal opinions and documents.

Unless otherwise agreed to by the General Sales Manager in writing, the applicant shall furnish to the General Sales Manager in form and substance satisfactory to the General Sales Manager, the following.

(a) An opinion prepared by the applicant's counsel showing that under the laws of the importing country:

(1) The applicant has the power and authority to enter into the project agreement and perform its obligations under the project agreement;

(2) The project agreement, as signed by the participant, or on behalf of the participant, is valid and legally binding upon the participant;

(3) Repayments of principal and interest due CCC will be made in U.S. dollars;

(4) The project agreement may be enforced by legal proceedings against the participant upon failure of the participant to meet its obligations under the project agreement;

(5) Judgments rendered in favor of CCC may be collected in U.S. dollars.

(6) Such other legal opinions including, but not limited to, an opinion with respect to the validity of the assurance of payment, certifications and documents furnished to CCC.

The opinions shall refer to all pertinent documents, decrees, laws, regulations, and legal precedents which serve as a basis for the conclusions stated therein, and shall set forth the procedures which CCC would have to follow in any legal proceedings against the participant and in collecting judgments awarded to CCC pursuant to such proceedings.

(b) A designation by name and title of the person or persons authorized to represent the participant in accordance with § 1492.35 and the authenticated specimen signature of each person.

(c) A foreign exchange authorization showing the signature, title, and organization of the issuing official of the foreign government which authorizes U.S. dollar funds for the repayment of principal and interest in accordance with the project agreement and a certificate of authentication of the authorization executed by an officer of the American Embassy in the importing country.

(d) An assurance of payment acceptable to CCC covering the principal and interest.

(e) Evidence satisfactory to the General Sales Manager that the participant has made arrangements for the services of an engineering firm acceptable to the General Sales Manager, except when the General Sales Manager determines that the services of an engineering firm are not necessary.

(f) The name and address of the financial institution in which project funds are to be deposited.

§ 1492.8 Subsequent legal opinions and documents.

Subsequent to the issuance of the first purchase authorization but prior to the issuance of each additional purchase authorization or any amendment which increases the maximum amount of a purchase authorization, the participant shall, when requested by the General Sales Manager, furnish:

(a) Additional assurance of payment if, as determined by the General Sales Manager, existing assurances are not sufficient.

(b) Additional foreign exchange authorization and related documents specified in § 1492.7(c), if, as determined by the General Sales Manager, existing authorizations and related documents are not sufficient.

(c) Such other additional legal opinions and documents as may be requested by the General Sales Manager.

§ 1492.9 Investment by the participant.

(a) The participant is required to make an initial payment at the time of export of the commodity of at least 15 percent of the export value of the commodity. The percentage amount and manner of making such payment will be specified in the project agreement and in the commodity purchase authorization issued by the General Sales Manager pursuant to § 1492.13.

(b) When deemed appropriate by the General Sales Manager to protect the interests of CCC, the participant shall also be required to further invest in the project. Such investment may include initial working capital, administrative and overhead cost, the cost of feasibility and engineering studies, organizational expenses, land, construction, machinery and equipment, etc. When requested by the General Sales Manager, the participant must furnish a detailed independent appraisal of the value of the investment to be made by the participant.

§ 1492.10 Assurance of payment to CCC.

(a) Repayment of amounts due CCC for commodities financed under a project agreement must be secured by an assurance of payment issued by an assurer acceptable to CCC. The assurance of payment must provide adequate protection to CCC from failure of the participant to make scheduled repayments, from failure of the participant to complete the planned project, or to perform other obligations under the project agreement. An application for a project agreement will not be approved if the proposed assurer is not acceptable to the General Sales Manager because of its ability to

V 45 / 153 AG 6 80 UMI

provide reasonable and adequate assurance of full repayment to CCC.

(b) The assurance of payment shall be in the form of a letter of credit or other assurance of payment acceptable to the General Sales Manager.

(c) The assurance of payment shall obligate the assurer to pay CCC on demand in U.S. dollars the amount of the outstanding balance of the principal in default plus interest in the event of non-compliance with the project agreement.

(d) An acceptable assurance of payment covering the estimated export value of the commodity to be purchased and financed by CCC must be received by the General Sales Manager prior to the issuance of a commodity purchase authorization.

§ 1492.11 Credit terms and other financing provisions.

(a) The financing of commodities to the participant shall be through the purchase by CCC of an exporter's account receivable arising from an export sale after the commodity has been exported.

(b) Repayment shall be made to CCC by the participant in approximately equal semi-annual amounts with the first repayment being due on the date specified in the project agreement with subsequent repayments to be made semi-annually thereafter. Any semi-annual repayment, or repayment of the total amount of principal outstanding, may be made at any time prior to the due date thereof.

(c) The financing period approved for a particular project agreement will be based on factors such as the type of project, planning and completion time of the project and the project's ability to generate funds to liquidate the financing extended. The financing period determined appropriate shall be stated in the project agreement.

(d) At the end of each calendar year, CCC will furnish to the participant a repayment schedule of the principal applicable to commodities exported in the prior twelve month period. The principal shall consist of the U.S. dollar amount disbursed for the account of the participant by CCC for the commodities exported in each calendar year less any adjustments. The principal with interest thereon shall be repaid to CCC semi-annually in accordance with the terms of the project agreement.

(e) The project agreement shall stipulate the interest rate to be paid to CCC. The interest rate shall be fixed at the time the project agreement is signed by the General Sales Manager and the participant and shall apply to export sales made during a designated period of time. After the expiration of such period, CCC shall determine the interest rate which will apply to subsequent export sales. The project agreement will be amended to reflect such rate and the period of time the rate will be in effect for export sales.

(f) Interest on the unpaid balance of the principal shall begin on the date of export of the commodity. Accrued interest shall be paid in U.S. dollars on the date on which payment of principal is scheduled to be paid. Interest shall accrue on any installments determined by CCC to be in arrears.

(g) Repayments made by the participant shall be applied first to accrued interest due and then to principal. Principal and interest shall be paid without deduction for any taxation, including fees and impositions, now or at any time hereafter imposed under the laws of the importing country or any other country.

(h) All obligations of the participant to make repayments to CCC under the project agreement shall be stated in U.S. dollars and shall be discharged by payments in U.S. dollars.

(i) CCC shall have the right to sell or otherwise dispose of the amounts due CCC from the participant. CCC will give notice to the participant prior to any such sale or other disposition.

(j) The participant shall have the right to make prepayments of accrued interest and scheduled principal installments, in part or in full, without penalty.

(k) Information as to financing terms and interest rates may be obtained from the General Sales Manager.

§ 1492.12 Eligible importing countries.

Commodities financed under GSM–301 must be imported into the country in which the local currency generated from the sale of such commodities is to be utilized for the establishment of market development facilities.

§ 1492.13 Commodity purchase authorizations.

(a) After a project agreement is signed, the participant may request the General Sales Manager to issue commodity purchase authorizations for the commodity to be purchased under the terms of the project agreement.

(b) Commodity purchase authorizations will specify: the purchase authorization number; the kind of commodity to be purchased; contracting period; the period during which the commodity must be exported; the approximate quantity and maximum U.S. dollar value of the commodity to be purchased; the importing country; the name of the participant or its agent, to whom bids must be submitted by the exporter; the percentage amount of the U.S. dollar value of the commodity exported which will be financed by CCC; the percentage amount of the U.S. dollar value of the commodity exported which will be paid for by the participant with the participant's own resources; and other information deemed necessary by the General Sales Manager.

§ 1492.14 Export periods.

The commodity to be financed shall be exported during the export period specified in the project agreement and purchase authorization unless the General Sales Manager agrees in writing to an extension of such export period. If a project agreement provides for the purchase of commodities during more than one supply year, the issuance of purchase authorizations for each supply year shall be subject to the General Sales Manager's determinations as to: availability of funds; the availability of the kind of commodity specified in the project agreement; and evidence that satisfactory progress has been made by the participant in carrying out the project.

§ 1492.15 Export value of the commodity to be financed.

CCC will finance only that portion of the export value of the commodity exported by the exporter to the participant pursuant to the provisions of the export sale and the purchase authorization for which the exporter has complied with the applicable provisions of GSM–301.

§ 1492.16 Determination of project funds.

Project funds shall consist of the local currency proceeds received by the participant from the sale of the imported commodity or the sale of products produced from the imported commodity which shall, unless otherwise agreed in writing by the General Sales Manager and the participant, be determined as follows:

(a) *Imported commodities sold without processing.* When the commodity imported by the participant is sold without processing, the amount of the project funds shall be the total sale proceeds which the participant receives from such sales; *Provided*, that, in determining the amount of the project funds, the participant may deduct from the total sale proceeds, the local currency equivalent of the following costs if paid by or for the account of the participant and if such costs are included in fixing the sales price of the imported commodity: (1) ocean freight and marine insurance; (2) fees and other related charges of banks for commercial letters of credit used to effect payment to exporters of the commodity and suppliers of related ocean freight and marine insurance; and (3) such other costs incident to the procurement, importation, handling, and sale of the commodity as may be approved by the General Sales Manager in writing; *Provided Further*, that, the participant shall not deduct from the total proceeds any local currency to offset the amount of the initial payment made by the participant with the participant's own funds.

(b) *Imported commodities processed before being sold.* When the imported commodities are used in the production of a processed commodity (hereinafter called "the product"), the amount of project funds shall be computed by (1) determining the percentage of the value of the imported commodity used in the processing of the product to the total cost of the product and (2) multiplying such percentage by the total sale proceeds received, or to be received, from the sale of the product; *Provided*, that, in determining the value of the imported commodity to be included in the cost of the product, the participant may, if paid by or for the account of the participant, deduct the local currency equivalent of the following costs: (i) ocean freight and marine insurance; (ii) fees and other related charges of banks for commercial letters of credit used to effect payment to exporters of the imported commodity and suppliers of related ocean freight and marine insurance; and (iii) other such costs incident to the procurement, importation, and handling of the commodity and sale of the product as may be approved by the General Sales Manager in writing; *Provided Further*, that, the participant shall not deduct from the total sale proceeds any local currency to offset the amount of the initial payment made by the participant with the participant's own resources. For example: The participant is a flour miller who imports wheat for production of flour. Proceeds from the sale of the flour milled from wheat imported under a project agreement are to be used to expand the milling capacity and for modernization of the existing facility. Proceeds from the sale of the flour which would be considered as project funds would be calculated in the following manner:

	Metric ton
Value of the imported wheat at mill location [1]	$250.00
Processing costs	$50.00
Total cost of producing flour	$300.00
Value of imported wheat to total cost of flour (percentage)	83.3%
Revenue received from the sale of flour	$325.00
Project funds ($325 × 83.3%)	$270.73

[1] After deduction of allowable expenses.

The participant's method of recording sales and production costs, including the value of the imported commodity and allocation of the participant's processing costs to the product produced from the imported commodity and the computation of project funds must be approved by the General Sales Manager in writing.

(c) *Sale proceeds which are less than export value.* If the net sale proceeds determined under this section are less than the U.S. dollar equivalent of the export value of the commodity, the participant shall be required to establish additional equity in the project with the participant's own resources equivalent in value to the difference between the U.S. dollar equivalent of the net sale proceeds and the export value of the commodity. The method of establishing the additional equity must be approved by the General Sales Manager in writing.

(d) *Sale proceeds which are more than export value.* If the net sale proceeds determined under this section are more than the U.S. dollar equivalent of the export value of the commodity, the entire amount of the net sale proceeds shall be used by the participant for carrying out the approved project.

(e) *Other proceeds which are considered project funds.* Where reference is made in this section to the amount which the participant receives on the sale of the imported commodity or the product processed from imported commodity, it means all considerations of any kind, including commissions and interest, which the participant is entitled to receive on such sale.

(f) *Disallowance of deductions.* The General Sales Manager shall be entitled to disallow any of the deductions or exclusions claimed by the participant and to require the participant to use the total amount of such disallowances for approved project purposes.

(g) *Market value of commodity.* Notwithstanding any other provision of GSM–301 or the project agreement, the General Sales Manager may consider the prevailing market value of the commodity in the importing country, less allowable deductions as determined by the General Sales Manager, as the amount of the project funds for the imported commodity.

§ 1492.17 Deposit of project funds.

The participant shall deposit the local currency proceeds from the sale of the commodity or the products thereof in a financial institution acceptable to the General Sales Manager immediately following the receipt of such process. Interest earned on such deposits shall be retained in the account.

§ 1492.18 Use of project funds.

Local currencies accruing from the sale of the commodity, or the products thereof, including interest earned on such local currencies, shall only be used for carrying out the approved project.

§ 1492.19 Signing of project agreements.

The project agreement shall be signed by the participant. The General Sales Manager shall sign the project agreement on behalf of CCC.

§ 1492.20 Customs entry.

(a) The participant shall furnish evidence of customs entry into the importing country of the commodities purchased under a project agreement. The evidence shall consist of a copy of a customs entry certificate issued by a duly authorized official of the importing country showing (1) the kind and quantity of the commodity, (2) carrier identification, (3) purchase authorization numbers, (4) the exporter's name, and (5) exporter's sales invoice number.

(b) The customs entry certificate shall be furnished to the General Sales Manager no later than sixty (60) days after the date of export of the commodity from the United States.

§ 1492.21 Books, records, reports, and compliance policies.

(a) The participant shall maintain books and records covering all transactions relating to the project agreement. Such books and records, including pertinent documents, correspondence, memoranda and other records of the participant shall be subject to examination by the General Sales Manager or the General Sales Manager's authorized representative during normal business hours for a period of three years after the entire amount due CCC under the project agreement has been repaid.

(b) The participant shall furnish to the General Sales Manager such books, reports and information as may be required by the project agreement. Such reports shall include, but shall not be limited to, progress reports on the

V 45 / 153 AG 6 80 UMI

implementation of the project, reports covering the receipt and expenditure of project funds and financial reports.

(c) Activities under a project agreement shall be subject to such other review or investigation as the General Sales Manager deems necessary to assure compliance with the provisions of the project agreement.

(d) The participant shall cooperate with and give reasonable assistance to the General Sales Manager or the General Sales Manager's authorized representative in such review or investigation as well as the examination referred to in paragraph (a) of this section.

§ 1492.22 Warranties by the participant.

The participant represents, warrants, and undertakes as follows:

(a) The participant is a duly organized and existing legal entity under the laws applicable to it, has full authority to carry on its present business and to enter into the project agreement, and has furnished the General Sales Manager with a true copy of the documents by which it was organized.

(b) The participant has no business affiliations, i.e. ownership interest, with any firm or individual other than those disclosed in the application for a project agreement.

(c) The participant has disclosed to the General Sales Manager in writing all agreements which are material to the project agreement.

(d) The participant knows of no conditions which will interfere with, or threaten to interfere with, the participant's ability to discharge its obligations under the project agreement, and agrees to promptly inform and consult with the General Sales Manager with respect to any conditions which may arise which would have such effect.

(e) The participant shall not transfer or assign the project agreement or any of its rights thereunder, nor sell, transfer or assign its rights to any facility or any other real or personal property financed in whole or in part with project funds without the approval of the General Sales Manager.

(f) The participant shall obtain the written approval of the General Sales Manager before entering into any joint venture or any other arrangement with another entity that involves the commodities imported or to be imported under this agreement or which involves the project financed with project funds.

(g) The participant warrants that no person or selling agency has been employed or retained to solicit or secure the project agreement on an agreement or understanding for a commission, percentage, brokerage, or contingent fee, except bona fide employees or bona fide established commercial or selling agencies maintained by the participant for the purpose of securing business. For breach or violation of this warranty, the General Sales Manager shall have the right, without limitation on any other rights it may have, to cancel the project agreement without liability to CCC.

(h) If the participant is required under § 1492.9 to invest in the project, the participant warrants that none of the resources invested are subject to any encumbrances other than those which are disclosed in the financial information referred to in § 1492.5(a)(12) or otherwise disclosed in writing to the General Sales Manager.

§ 1492.23 Events of default.

The occurrence of any of the following events may, at the election of the General Sales Manager, be deemed to be a default in the performance of the participant under the project agreement:

(a) Failure of the participant to make prompt and full repayment of principal or interest when due, or of any other payment required under the project agreement.

(b) A breach on the part of the participant of any obligation or warranty under the project agreement unless the General Sales Manager permits the participant to cure the breach within a specified time and the participant cures it to the satisfaction of CCC within that time.

(c) A false representation made by or on behalf of the participant in obtaining the project agreement, in the project agreement, or in the performance of the project agreement.

(d) A determination by a court of competent jurisdiction or an admission by the participant that the participant is insolvent, bankrupt, or otherwise unable to pay its debts as they become due.

§ 1492.24 Remedies of CCC in the event of default.

(a) *Termination of disbursements.* Upon the occurrence of any default set forth in § 1492.23, or upon the failure of the participant to perform any other obligation specified in the project agreement which permits the taking of the actions set forth in this § 1492.24, the General Sales Manager shall have the right to take any or all of the following actions:

(1) Decline to issue commodity purchase authorizations to the participant;

(2) Cancel outstanding commodity purchase authorizations;

(3) Decline to enter into a commodity agreement with an exporter; and

(4) Suspend or cancel outstanding commodity agreements entered into with exporters under which CCC agreed to purchase the exporter's accounts receivable.

(b) *Change in political, economic, or monetary situation.* In the event of any material change in the political, economic, or monetary situation in the importing country which the General Sales Manager determines will have an adverse effect on the ability of the participant to fulfill its obligations under the project agreement, the General Sales Manager shall have the right to take any or all of the actions set forth in paragraph (a) of this section.

(c) *Acceleration of payment of principal.* Upon the occurrence of any default set forth in § 1492.23, the General Sales Manager shall have the right to declare all or any part of the principal and interest thereon to be immediately due and payable.

(d) *Remedy in case of contingent fee.* For breach or violation of the warranty against contingent fees which is set forth in § 1492.22(g), the General Sales Manager shall be entitled to cancel the project agreement or, at the General Sales Manger's discretion, to require the participant to pay to CCC in U.S. dollars the full amount such commission, percentage, brokerage, or contingent fee or to deduct commission, percentage, brokerage, or contingent fee from payments of prinicpal made to CCC by the participant.

(e) *Refunds to CCC.* If the General Sales Manager determines that any disbursement of project funds is not supported by valid documentation as required by GSM–301 or the project agreement, or was at the time of disbursement in violation of the project agreement or the laws governing CCC, the participant shall pay to CCC on demand the amount of such disbursement together with the interest thereon at the interest rate specified in the project agreement from the date of such disbursement to the date payment is received by CCC. Upon receipt of such refund, CCC will deduct the amount of the refund, exclusive of interest, from the total principal outstanding and due CCC.

(f) *Force majeure.*

(1) The provisions of this paragraph § 1492.24(g) shall apply in lieu of any other provisions of GSM–301 or the project agreement with respect to default, delay, or failure to perform in carrying out the project if the participant maintains, and the General Sales Manager determines in writing, that such default, delay, or failure to perform on the part of the participant is due to force majeure (including, but not limited to, war, insurrection, riots, fires, strikes, floods, acts of God, acts of governments and agencies thereof which the participant had no reason to anticipate) and such default, delay, or failure to perform could not have been prevented by the exercise of reasonable diligence on the part of the participant.

(2) The General Sales Manager shall have the right to take any or all actions set forth in § 1492.24(a) pending a final determination as to whether the project may be carried out. If the cause of the default, delay, or failure to perform cannot be overcome by the participant, the General Sales Manager shall be entitled to take any or all actions set forth in § 1492.24(a) and to declare all or any part of the outstanding principal due CCC to be immediately due and payable to CCC.

(g) *Other remedies.* The use by the General Sales Manager of any remedy provided for in this § 1492.24 shall not prevent the General Sales Manager from using any other remedy provided for in the project agreement or otherwise available at law or equity, including any sanction or penalty under criminal or civil fraud statutes.

Commodity Agreements

§ 1492.25 General.

(a) Sections 1492.25 to 1492.43 contain the provisions under which an exporter who makes an export sale to a participant and who has entered into a commodity agreement with CCC may, after export of the commodity, receive payment from CCC for the export value of the commodity through the purchase by CCC of the exporter's account receivable for that portion of the export value of the commodity for which CCC will provide financing. CCC will issue commodity purchase authorizations pursuant to § 1492.13 which will authorize the participant or the participant's authorized agent to purchase eligible commodities from exporters.

(b) After export of the commodity, the exporter must furnish the applicable documents and certifications required by § 1492.31 to the address specified in § 1492.43(b)(2). If the documents and certifications are in order and acceptable to CCC, CCC will purchase only that portion of the exporter's account receivable for which the exporter has complied with the applicable provisions of this regulation will make prompt payment to the exporter.

(c) The General Sales Manager reserves the right at any time and for any reason or cause whatsoever to supplement, modify, or revoke any commodity purchase authorization, including termination of commodity agreements made pursuant to such purchase authorization.

§ 1492.26 Submission of application for a commodity agreement.

(a) An exporter shall submit a written application (e.g. letter, telex, or TWX) to enter into a commodity agreement to the office specified in § 1492.43(b). If the application is made by telephone, it must be confirmed in writing. An application shall include the full business name and address of the exporter and the following information:

(1) Name and address of the participant and, if export is to be made to an agent of the participant, the name and address of such agent.

(2) The name of the importing country.

(3) Date of sale.

(4) Exporter's sale number.

(5) Delivery period.

(6) Kind and description of commodity.

(7) Quantity and sale contract tolerance, if applicable.

(8) The unit price and total export value of the commodity.

(9) The name and address of the intervening purchaser, if the commodity is to be sold through an intervening purchaser, and a statement that the sale of the commodity is or will be conditioned on its resale by the intervening purchaser to the participant and that the commodity will be shipped directly to the participant or to the participant's agent in the destination country.

(10) CCC purchase authorization number.

(11) Any additional information as determined by the General Sales Manager.

(b) Upon receiving an application complying with the applicable provisions of GSM–301, the General Sales Manager shall determine whether the application shall be approved. If approved, the General Sales Manager shall cause a commodity agreement to be issued to the exporter.

(c) An application may be approved as submitted, approved with modification, or rejected by the General Sales Manager.

§ 1492.27 Commodity agreements.

(a) The commodity agreement between the exporter and CCC shall consist of the exporter's application, the General Sales Manager's written acceptance of the application and the applicable terms and conditions of GSM–301, including any amendments or supplemental announcements here under which are in effect at the time the commodity agreement is issued to the exporter.

(b) The commodity agreement shall provide that CCC will purchase the exporter's account receivable after export of the commodity to the participant and upon submission to CCC of the applicable documents and certifications required by § 1492.31.

(c) The commodity agreement may contain such terms and conditions, not inconsistent with GSM–301, as the General Sales Manager deems necessary in the interest of CCC.

(d) An exporter shall promptly notify the General Sales Manager when he is unable to fulfill his obligations under a commodity agreement.

§ 1492.28 Amendments to commodity agreements.

The commodity agreement may be amended provided such amendment is in conformity with GSM–301 at the time of the amendment and the amendment is determined by the General Sales Manager to be in the interest of CCC.

§ 1492.29 Export periods.

The commodity shall be exported during the export period specified in the commodity agreement and purchase authorization unless the General Sales Manager agrees to an extension of such export period.

§ 1492.30 Partial payment by the participant.

Purchase authorizations issued pursuant to § 1492.13 shall specify that the project participant make at the time of export an initial payment of at least 15 percent of the export value of the commodity. The arrangement for payment of the amount of the export value not financed by CCC is a matter for agreement between the exporter and the participant.

§ 1492.31 Documents required after export.

(a) CCC will purchase an exporter's account receivable only if the documents specified in paragrahs (b) and (c) of this section are received by the Treasurer, CCC, within forty-five (45) days, or any extension thereof granted by the Treasurer, CCC, after the date of export of the commodity.

(b) The exporter shall submit a "Combined Application for Disbursement, Assignment of Account Receivable and Certification (GSM–301)" which shall include:

(1) A written application for disbursement showing: (i) the commodity agreement number; (ii) total export value of the commodity exported. and (iii) the value of the commodity for which payment is requested from CCC.

V 45 / 153 AG 6 80 UMI

(2) An assignment of the account receivable, acceptable to CCC, arising from the export sale.

(3) A certification by the exporter which provides: (i) that the exporter has entered into an export sales contract with the participant to sell the commodity exported; (ii) the date of the sale; (iii) the kind, grade, quality, quantity, agreed upon price for the commodity and delivery terms of the sale; (iv) that the exporter has in the exporter's files documents evidencing the export sale contract and the obligation of the participant to the exporter for that portion of the value of the export sale for which CCC will purchase the exporter's account receivable, and that the exporter will retain and furnish such documents to CCC on demand until 3 years after the final date of export of the commodity under the export sale; (v) that the kind, grade, quality, and quantity of the commodity called for in the export sales contract and reported to CCC in the application for a commodity agreement has been exported to the participant; and (vi) that the exporter knows of no defenses to the account receivable to be assigned to CCC.

(4) A copy of the sales invoice to the participant or, if the commodity has been sold through an intervening purchaser, a copy of the intervening purchaser's sales invoice to the participant.

(c) The exporter shall furnish with the application or disbursement, the following evidence of export, as applicable:

(1) If the commodity is exported by ocean carrier, one non-negotiable copy of either (i) an onboard ocean bill of lading or (ii) an ocean bill of lading with an onboard endorsement, dated and signed or initialed on behalf of the carrier. The bill of lading must be certified by the exporter as being a true copy and must show the kind and quantity of commodity, the date and place of loading the commodity, the name of the ocean carrier, the importing country, and the name and address of both the exporter and the participant, or if the export was made to an agent of the participant, the name and address of the agent.

(2) If the commodity is exported by aircraft, one non-negotiable copy of an airway bill, dated and signed or initialed on behalf of the carrier. The airway bill must be certified by the exporter as being a true copy and must show the kind and quantity of commodity, date and place of loading the commodity, the name of the airline, the destination country and the name and address of both the exporter and the participant, or if export was made to an agent of the participant, the name and address of the agent.

(3) If the commodity is exported by rail or truck, one copy of the bill of lading certified by the exporter as being a true copy, an authenticiated landing certificate or similar document issued by an official of the government of the importing country showing the kind and quantity of commodity, the place and date of entry into the importing country, rail or truck identification, and the name and address of both the exporter and the participant, or if export was made to an agent of the participant, the name and address of the agent.

(4) If the consignee shown in the document provided for in paragraph (c) of this section is other than the participant named in the commodity agreement, the exporter shall furnish such additional information as the Treasurer, CCC, may request to show that export was made in accordance with the instructions of, or the export sale contract with the participant.

(5) For commodities transshipped through Canada via the Great Lakes or the St. Lawrence River, the exporter shall certify that the commodity transshipped was produced in the United States.

(6) A statement from a U.S. bank showing that the documents required under the letter of credit established by the participant in favor of the exporter for that portion of the export value of the commodity for which the participant will pay with the participants own resources have been received by the U.S. bank and such documents are in order. If a letter of credit was not established by the participant in favor of the exporter, such other evidence acceptable to the Treasurer, CCC, showing that the participant, or the participant's agent, has accepted the commodity exported.

(7) If the exporter is unable to supply documentary evidence of export as specified in this section, the exporter may submit such other documentary evidence as may be acceptable to the Treasurer, CCC.

(d) On receipt of the documents described in paragraphs (b) and (c) of this section, the Treasurer, CCC, will promptly pay to the exporter, the amount of the account receivable for which CCC will finance.

(e) If an acceptable application for disbursement and the supporting documents described in paragraphs (b) and (c) of this section have not been received by the Treasurer, CCC, within 45 days from the date of delivery, or any extension thereof, the commodity agreement shall be null and void.

§ 1492.32 Assignments.

The exporter shall not assign any claim or rights or any amounts payable under the commodity agreement, in whole or in part, without written approval of the Controller, CCC.

§ 1492.33 Covenant against contingent fees.

The exporter warrants that no person or selling agency has been employed or retained to solicit or secure the commodity agreement on an agreement or understanding of a commission, percentage, brokerage, or contingent fee, except bona fide employees or bona fide established commercial or selling agencies maintained by the exporter for the purpose of securing business. For breach or violation of this warranty, the General Sales Manager shall have the right, without limitation on any other rights the General Sales Manager may have, to cancel the commodity agreement without liability to CCC.

§ 1492.34 Exporter's records and accounts.

The General Sales Manager, or the General Sales Manager's authorized representative, shall have access to and the right to examine any directly pertinent books, documents, papers and records of the exporter involving transactions related to the financed export credit sale until expiration of three years from the date the last export was made under the commodity agreement.

Miscellaneous Provisions

§ 1492.35 Use of representatives.

The participant may designate one or more representatives or agents who may be given authority to request purchase authorizations under the project agreement on behalf of the participant and to execute any and all documents required to be furnished to the General Sales Manager by the participant.

§ 1492.36 Successors to rights of CCC.

If, by operation of any law of the United States or by virtue of assignment, any agency of the Government of the United States succeeds to the rights and obligations of CCC under a project agreement, such agency shall be deemed to be CCC for purposes of the project agreement.

§ 1492.37 Applicable law.

The project agreement shall be deemed to be a contract made under the laws of the United States and shall be governed by and construed in accordance with such laws.

§ 1492.38 Notice.

Any notice, request, or communication made by the General Sales Manager, CCC, or by the participant pursuant to the project agreement or by the exporter pursuant to the commodity agreement shall be in writing and shall be deemed to have been duly made to the other party when received by such other party by hand or my mail, telegram, cable, radiogram, or other method.

§ 1492.39 Officials not to benefit.

No member of or Delegate to Congress, or Resident Commissioner, shall be admitted to any share or part of the project agreement with the participant or to the commodity agreement with the exporter or to any benefit that may arise therefrom, but this provision shall not be construed to extend to the project agreement or to the commodity agreement if made with a corporation for its general benefit.

§ 1492.40 Purchasing agents employed by the participant.

Prior to entering into any agreement for the services of a United States person or firm as its agent to handle procurement of the commodities to be financed under the project agreement, the participant shall submit the name of the proposed purchasing agent and the agent agreement to the General Sales Manager for approval. The participant shall also obtain the approval of the General Sales manager of any amendments to such agent agreement. The General Sales Manager will notify the participant in writing of its approval or disapproval of the proposed purchasing agent and of the proposed agent agreement or amendment thereto. A copy of the executed agent agreement and any amendment shall be furnished to the General Sales Manager.

§ 1492.41 Waiver.

Any failure or delay by CCC to exercise any of its rights, in whole or in part, under a project agreement or under a commodity agreement shall not constitute a waiver of any of such rights.

§ 1492.42 English language.

All documents, opinions, and certificates required to be furnished by the participant under a project agreement shall be furnished without cost to the General Sales Manager or to CCC, and, if not in the English language shall be accompanied by certified English translations.

§ 1492.43 Communications.

(a) *Project agreements.* (1) Unless otherwise provided, all written applications, requests, notifications, or communications by the participant pertaining to the project agreement shall be addressed to the General Sales Manager, Foreign Agricultural Service, U.S. Department of Agriculture, Washington, D.C. 20250.

(2) Information to be furnished in an application for a project agreement, financing terms and interest rates currently in effect may be obtained from the General Sales Manager at the address provided in subparagraph (1) above.

(3) The participant shall make payment of the principal and interest and all other payments required to be made to CCC, as agreed to by CCC and the participant, to the Treasurer, Commodity Credit Corporation, U.S. Department of Agriculture, Washington, D.C. 20250, unless otherwise instructed by CCC in writing.

(b) *Commodity agreements.* (1) Unless otherwise provided, all applications, both telephone and written, notifications, or communications by the exporter pertaining to the commodity agreement shall be addressed to the General Sales Manager, Foreign Agricultural Service, U.S. Department of Agriculture, Washington, D.C. 20250.

(2) The exporter shall forward documents for financing to the U.S. Department of Agriculture, Commodity Credit Corporation, P.O. Box 2415, Washington, D.C. 20013.

Signed at Washington, D.C., August 4, 1980.

Kelly Harrison,

Vice President, Commodity Credit Corporation and General Sales Manager, Foreign Agricultural Service.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY	USDA/ASCS		DOT/SECRETARY	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/FAA	USDA/FNS		DOT/FAA	USDA/FNS
DOT/FHWA	USDA/FSQS		DOT/FHWA	USDA/FSQS
DOT/FRA	USDA/REA		DOT/FRA	USDA/REA
DOT/NHTSA	MSPB/OPM		DOT/NHTSA	MSPB/OPM
DOT/RSPA	LABOR		DOT/RSPA	LABOR
DOT/SLSDC	HHS/FDA		DOT/SLSDC	HHS/FDA
DOT/UMTA			DOT/UMTA	
CSA			CSA	

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408

REMINDERS

The "reminders" below identify documents that appeared in issues of the **Federal Register** 15 days or more ago. Inclusion or exclusion from this list has no legal significance.

Rules Going Into Effect Today

FEDERAL EMERGENCY MANAGEMENT AGENCY

45862 7–7–80 / Disaster assistance project administration provisions

TREASURY DEPARTMENT

Customs Service—

45579 7–7–80 / Metric conversion of quantities of merchandise which may be included in an individual's personal exemption

Deadlines for Comments On Proposed Rules for the Week of August 10 through August 16, 1980

AGRICULTURE DEPARTMENT

Agricultural Marketing Service—

S. 2508 Pub. L. 96–319 To provide for the disposition of the Gila River Pima-Maricopa Indian Community judgment funds awarded in dockets 236–A, 236–B, and 236–E before the Indian Claims Commission and the United States Court of Claims, and for other purposes. (Aug. 1, 1980; 94 Stat. 972) Price $1

S. 2492 Pub. L. 96–320 Ocean Thermal Energy Conversion Act of 1980. (Aug. 3, 1980; 94 Stat. 974) Price $1.75

Documents Relating to Federal Grant Programs

This is a list of documents relating to Federal grant programs which were published in the **Federal Register** during the previous week.

RULES GOING INTO EFFECT

51484 8–1–80 / EPA—State and local assistance: grants for underground water source protection programs; effective 8–1–80

51209 8–1–80 / HHS/PHS—Grants for graduate programs in health administration; effective 8–1–80

51201 8–1–80 / HHS/PHS—Grants for residency training in general internal medicine or general pediatrics; effective 8–1–80

51205 8–1–80 / HHS/PHS—Grants to schools of medicine, osteopathy, dentistry, public health, veterinary medicine, optometry, pharmacy, and podiatry for support of their educational programs; effective 8–1–80

51516 8–1–80 / HUD/CPD—Community development block grants for Indian tribes and Alaskan natives, Housing Assistance Plan (HAP); effective 9–12–80

DEADLINES FOR COMMENTS ON PROPOSED RULES

50296 7–28–80 / CSA—Grantees, funding; community action agencies; program management system; republication; comments by 8–27–80

51243 8–1–80 / ED—Basic educational opportunity grant program; Family Contribution Schedules; comments by 9–30–80

51241 8–1–80 / HHS/PHS—Grants for various health manpower projects; comments by 9–30–80

APPLICATIONS DEADLINES

49967 7–28–80 / Commerce—NTIA/Satellite Teleconference on increasing participation of minorities and women in public telecommunications, grant proposal applications by 8–15–80

50622 7–30–80 / ED—Bilingual education and minority language affairs; applications to serve as field readers to evaluate grant applications for FY 1981 funding cycle by 10–31–80

50623 7–30–80 / ED—Mina Shaughnessy Scholars Program to improve postsecondary education; applications for awards by 10–17–80

51286 8–1–80 / HHS/CDC—Project grants—Health programs for refugees, emergency notice of availability of FY 1980 funds; notification of intent to apply by 8–15–80

MEETINGS

51318 8–1–80 / NFAH—Design Arts (Design Exploration/ Research), Washington, D.C. (closed), 8–18 and 8–19–80

50687 7–30–80 / NSF—Policy Research and Analysis and Science Resources Studies Advisory Committee, Subcommittee on Output Indicators, Washington, D.C. (open), 8–19–80

OTHER ITEMS OF INTEREST

51490 8–1–80 / EPA—Women's business enterprise policy for the construction grants program; Final program requirements memorandum; effective 10–1–80

50524 7–29–80 / HHS/NIH—Recombinant DNA Research; actions under guidelines

49960 7–28–80 / HHS/PHS—Community Health Centers; Provisional Nature of Amounts of Initial Operation and Staffing, Conversion, and Financial Distress grants under Community Mental Health Centers Act; correction to proposed rule

51227 8–1–80 / HUD/Secretary—Community development block grants; Innovative grants program; transmittal of interim rule to Congress

51227 8–1–80 / HUD/Secretary—Community development block grants and urban development action grants; transmittal of interim rule to Congress

51303 8–1–80 / Labor/ETA—Intent to reallocate funds under Title II–D of the Comprehensive Employment and Training Act; comments by 9–2–80

V. 45 / 153 AUG 6 80 UMI

8-7-80
Vol. 45 No. 154
Pages 52355-52768

federal register

Thursday
August 7, 1980

Highlights

52356 **Campaign Funds** FEC announces 8–7–80 as effective date for ruling regarding contributions to and expenditures by delegates to national party nominating conventions

52750 **Motor Vehicles** FTC proposes rule concerning practices and information disclosure on used car sales; comments by 10–7–80 (Part IV of this issue)

52542 **Mass Transportation** DOT/FRA proposes guidelines for Federal financing of Amtrak; comments by 9–22–80

52373 **Income Tax** Treasury/IRS provides final regulations relating to investment in U.S. property by controlled foreign corporations

52399 **Income Tax** Treasury/IRS proposes regulations relating to deductibility of expenses in connection with business use, or rental to others of dwelling units

52371 **Public Housing** HUD/FHC implements certain changes pertaining to continued operation of public housing projects after completion of debt service for the project; effective 9–15–80; comments by 10–6–80

52762 **Housing** HUD/CPD publishes interim rule authorizing use of certain funds; effective 9–15–80; comments by 10–6–80 (Part V of this issue)

CONTINUED INSIDE

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The Federal Register provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The Federal Register will be furnished by mail to subscribers, free of postage, for $75.00 per year, or $45.00 for six months, payable in advance. The charge for individual copies is $1.00 for each issue, or $1.00 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the Federal Register.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Highlights

52442 **Petroleum** DOE/ERA issues notice of entitlement program of crude oil cost data for November 1978 through May 1980

52441 **Petroleum** DOE intends to prepare environmental impact statement on potential use of salt domes to store crude oil

52359 **Natural Gas** DOE/FERC exempts certain small industrial boiler fuel facilities from incremental pricing

52538 **Oil Pollution** DOT/CG solicits information pertinent to study of large tank barges, comments by 10–1–80

52408 **Oil and Gas Exploration** Interior/GS plans to provide for the submission of a plan of operations for leases in the Western Gulf of Mexico; comments by 9–8–80

52411 **Water Pollution Control** EPA announces availability of, and invites comments on, effluent limitation guidelines for certain subcategories of canned and preserved seafood processing point source category; comments by 9–8–80

52676 **Air Pollution Control** EPA prints requirements for preparation, adoption, and submittal of implementation plans; effective 8–7–80 (Part III of this issue)

52410 **Surface Mining** Interior/SMO extends comment period until 8–18–80 on proposed rule to define "surface coal mining operations" and "coal processing plants"

52365 **Highways and Roads** DOT/FHWA issues requirements for certifying State enforcement on size and weight laws on Federal-aid highway systems; effective 10–1–80

52386 **Freight** DOT/CG revises tables which list flammable and combustible bulk cargoes; effective 9–10–80

52397 **Improving Government Regulations** Justice/DEA issues semiannual agenda

52547 **Sunshine Act Meetings**

Rules and Regulations

Federal Register
Vol. 45, No. 154
Thursday, August 7, 1980

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

7 CFR Part 2

Delegations of Authority by the Secretary of Agriculture and General Officers of the Department; Revision of Delegations of Authority

AGENCY: Department of Agriculture.

ACTION: Final rule.

SUMMARY: This document revises the delegations of authority from the Secretary to reflect the Assignment of responsibility for Departmental energy programs to the Assistant Secretary for Rural Development and to the Director of Economics, Policy Analysis and Budget.

EFFECTIVE DATE: August 7, 1980.

FOR FURTHER INFORMATION CONTACT: C. R. Hanna, Jr., Director, Management Staff, U.S. Department of Agriculture, Washington, D.C. 20250, (202) 447–6111.

SUPPLEMENTARY INFORMATION: Department-wide responsibility for coordination, evaluation, and policy development on energy issues has heretofore been located in the Office of the Secretary. Two actions are now being taken to strengthen these functions on a day-to-day basis. First, authority to provide operational support to Departmental efforts to encourage the production of alternate fuels is being transferred to the Assistant Secretary for Rural Development. Second, authority for Department policy development and coordination and allocation of scarce fuel resources is being transferred to the Director of Economics, Policy Analysis, and Budget.

This rule relates to internal agency management. Therefore, pursuant to 5 U.S.C. 553, it is found upon good cause that notice and other public procedures with respect thereto are impractical and contrary to the public interest, and good cause is found for making this rule effective less than 30 days after publication in the **Federal Register.** Further, since this rule relates to internal agency management, it is exempt from the provisions of Executive Order 12044, Improving Government Regulations, and, thus, does not require the preparation of a regulatory impact analysis.

Accordingly, 7 CFR Part 2 is amended as follows:

Subpart C—Delegations of Authority to the Deputy Secretary, the Under Secretary for International Affairs and Commodity Programs, Assistant Secretaries and the Director of Economics, Policy Analysis and Budget

1. Section 2.23 is amended by adding a new paragraph (g) to read as follows:

§ 2.23 Delegations of Authority to the Assistant Secretary for Rural Development.

* * * * *

(g) *Related to Energy.*

(1) Provide Department-wide operational support and coordination for loan and grant programs to foster and encourage the production of fuels from agricultural and forestry products or by-products

(2) Participate as a Department representative at conferences, meetings and other contacts including liaison with the Department of Energy and other government agencies and departments with respect to implementation of established Department energy policy.

(3) Serve as Co-Chairperson of the Energy Coordinating Committee of the Department.

2. Section 2.27 is amended by adding a new paragraph (h) to read as follows:

§ 2.27 Delegations of Authority to the Director of Economics, Policy Analysis and Budget.

* * * * *

(h) *Related to energy.* (1) Advise the Secretary and other policy-level officials of the Department on energy policies and programs.

(2) Participate as the Department representative at hearings, conferences, meetings and other contacts with respect to policy matters related to energy, including liaison with the Department of Energy and other governmental agencies and departments.

(3) Serve as Co-Chairperson of the Energy Coordinating Committee of the Department.

(4) Provide Department-wide leadership in developing the agricultural and rural components of the National Energy Policy Plan.

(5) Develop and evaluate Departmental energy policies and strategies, including those regarding the allocation of scarce resources.

(6) Review and evaluate Departmental energy and energy-related programs and progress.

(7) Work with the Assistant Secretary for Governmental and Public Affairs to maintain Congressional and public contacts in energy matters, including development of legislative proposals, preparation of reports on legislation pending in Congress, appearances before Congressional Committees and related activities.

(8) Incorporate into existing budgetary systems and procedures the capabilities necessary to carry out functions and responsibilities for USDA energy planning, policies, and strategies, including the management of funds transferred to USDA from the Department of Energy pursuant to interagency agreements.

Subpart D—Delegations of Authority to Other General Officers and Agency Heads

3. Section 2.37 is hereby revoked and reserved as follows:

§ 2.37 [Revoked and reserved]

Subpart I—Delegations of Authority by the Assistant Secretary for Rural Development

4. Section 2.70 is amended by adding a new paragraph (a)(29) to read as follows:

§ 2.70 Administrator, Farmers Home Administration.

(a) *Delegations.* * * *

(29) Provide Department-wide operational support and coordination for loan and grant programs to foster and encourage the production of fuels from agricultural and forestry products or by-products.

Subpart K—Delegations of Authority by the Director of Economics, Policy Analysis and Budget

5. Section 2.84 is amended by revising that part of paragraph (a) which precedes § 2.84(a)(1) and adding new paragraphs (a)(13) thru (a)(18) to read as follows:

§ 2.84 Director, Office of Budget, Planning and Evaluation.

(a) *Delegations.* Pursuant to § 2.27 (a) and (h), the following delegations of authority are made by the Director of Economics, Policy Analysis and Budget to the Director, Office of Budget, Planning and Evaluation:

* * * * *

(13) Provide Department-wide leadership in developing the agricultural and rural components of the National Energy Policy Plan.

(14) Develop and evaluate Departmental energy policies and strategies, including those regarding the allocation of scarce resources.

(15) Review and evaluate Departmental energy and energy-related programs and progress.

(16) Represent the Director of Economics, Policy Analysis and Budget at conferences, meetings, and other contacts where energy matters are discussed, including liaison with the Department of Energy and other governmental departments and agencies.

(17) Work with the Assistant Secretary for Governmental and Public Affairs to maintain Congressional and Public contacts in energy matters, including development of legislative proposals, preparation of reports on legislation pending in Congress, appearances before Congressional Committees and related activities.

(18) Incorporate into existing budgetary systems and procedures the capabilities necessary to carry out functions and responsibilities for USDA energy planning, policies, and strategies, including the management of funds transferred to USDA from the Department of Energy pursuant to interagency agreements.

(5 U.S.C. 301 and Reorganization Plan No. 2 of 1953)

Dated: August 1, 1980.

For Subparts C and D:

Bob Bergland,

Secretary of Agriculture.

Dated: August 1, 1980.

For Subpart I:

Alex P. Mercure,

Assistant Secretary for Rural Development.

Dated: August 1, 1980.

For Subpart K:

Howard W. Hjort,

Director of Economics, Policy Analysis and Budget.

BILLING CODE 3410-01-M

Agricultural Marketing Service

7 CFR Part 908

[Valencia Orange Regulation 658]

Valencia Oranges Grown in Arizona and Designated Part of California; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of fresh California-Arizona Valencia oranges that may be shipped to market during the period August 8–August 14, 1980. Such action is needed to provide for orderly marketing of fresh Valencia oranges for this period due to the marketing situation confronting the orange industry.

EFFECTIVE DATE: August 8, 1980.

FOR FURTHER INFORMATION CONTACT: Malvin E. McGaha, 202–447–5975.

SUPPLEMENTARY INFORMATION:

Findings.

This regulation is issued under the marketing agreement, as amended, and Order No. 908, as amended (7 CFR Part 908), regulating the handling of Valencia oranges grown in Arizona and designated part of California. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The action is based upon the recommendations and information submitted by the Valencia Orange Administrative Committee and upon other available information. It is hereby found that the action will tend to effectuate the declared policy of the act.

This action is consistent with the marketing policy for 1979–80 which was designated significant under the procedures of Executive Order 12044. The marketing policy was recommended by the committee following discussion at a public meeting on January 22, 1980. A final impact analysis on the marketing policy is available from Malvin E. McGaha, Chief, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone 202–447–5975.

The committee met again publicly on August 5, 1980 at Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended a quantity of Valencia oranges deemed advisable to be handled during the specified week. The committee reports the demand for Valencia oranges has decreased.

It is further found that there is insufficient time between the date when information became available upon which this regulation is based and when the action must be taken to warrant a 60-day comment period as recommended in E.O. 12044, and that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the **Federal Register** (5 U.S.C. 553). It is necessary to effectuate the declared purposes of the act to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

Section 908.958 is added as follows:

§ 908.958 Valencia Orange Regulation 658.

Order. (a) The quantities of Valencia oranges grown in Arizona and California which may be handled during the period August 8, 1980 through August 14, 1980, are established as follows:

(1) District 1: 329,000 cartons;
(2) District 2: 371,000 cartons;
(3) District 3: Open Movement.

(b) As used in this section, "handled," "District 1," "District 2," "District 3," and "carton" mean the same as defined in the marketing order.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: August 6, 1980.

Charles R. Brader,

Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc. 80-24027 Filed 8-6-80; 11:42 am]

BILLING CODE 3410-02-M

FEDERAL ELECTION COMMISSION

11 CFR Parts 100 and 110

[Notice 1980-26]

Contributions to and Expenditures by Delegates to National Nominating Conventions; Effective Date

AGENCY: Federal Election Commission.

ACTION: Final rule: announcement of effective date.

SUMMARY: On May 23, 1980, (45 FR 34865) The Commission published the text of regulations to govern the application of the Federal Election Campaign Act of 1971, as amended (2 U.S.C. 431, *et seq.*), to contributions to and expenditures by delegates to national party nominating conventions. The Commission announces that these regulations are effective as of August 7, 1980.

EFFECTIVE DATE: August 7, 1980.

FOR FURTHER INFORMATION CONTACT: Ms. Patricia Ann Fiori, Assistant General Counsel, 1325 K Street, N.W., Washington, D.C. 20463, (202) 523–4143.

SUPPLEMENTARY INFORMATION: 2 U.S.C. 438(d) requires that any rule or regulation proposed by the Commission to implement Chapter 14 of Title 2, United States Code be transmitted to the Speaker of the House and the President of the Senate prior to final promulgation. If neither House of Congress disapproves the regulation within 30 legislative days after its transmittal, the Commission may finally prescribe the regulation in question. The regulations being made effective by this notice were transmitted to Congress on May 14, 1980. Thirty legislative days expired in the Senate as of June 28, 1980, and in the House as of July 21, 1980.

Announcement of Effective Date

11 CFR 100.5(e)(5), 110.5(d) and 110.14, as published at 45 FR 34867–34868, are effective as of August 7, 1980.

Dated: August 4, 1980.

Max L. Friedersdorf,

Chairman, Federal Election Commission.

[FR Doc. 80-23839 Filed 8-6-80; 8:45 am]

BILLING CODE 6715-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 80-NW-38-AD. Amdt. 39-3871]

Airworthiness Directives; Boeing Model 727 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This Amendment revises Airworthiness Directive (AD) 78–24–05 which requires inspection for interference between the escape slide girt bar and the mid-cabin galley door. The requirement for repeat inspections is eliminated if a high lift gate modification is incorporated on the mid-cabin galley door.

DATE: Effective date August 18, 1980.

ADDRESSES: The service bulletins specified in this directive may be obtained upon request to Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington, 98124. These documents may be examined at FAA Northwest Region, 9010 East Marginal Way South, Seattle, Washington, 98108.

FOR FURTHER INFORMATION CONTACT: Mr. Roger S. Young Airframe Section, ANW–212, Engineering and Manfacturing Branch, FAA Northwest Region, 9010 East Marginal Way South, Seattle, Washington 98108, telephone (206) 767–2516.

SUPPLEMENTARY INFORMATION: Amendment 39–3355 (43 FR 56017) AD 78–24–05, requires inspection for interference between the escape slide girt bar and the mid-cabin galley door. The manufacturer has developed a modification to the door gate which will provide for more clearance between the girt bar and galley door and thus prevent interference.

Since this regulation is relieving in nature and imposes no additional burden, it is found that notice and public procedure hereon are unnecessary, and the amendment may be made effective in less than 30 days.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended by amending Airworthiness Directive 78–24–05, (Amdt. 39–3355, 43 FR 56017) as follows:

By amending Paragraph C to read:

"C. Repeat the inspections, described in paragraph A, at intervals not to exceed 1,500 flight hours time-in-service or one (1) year from the last inspection, whichever comes first, unless the galley door is modified as described in Boeing Service Bulletin 727–25–A247, Revision 2, paragraph III, part II, or later FAA approved revisions, or in a manner approved by the Chief, Engineering and Manufacturing Branch, FAA Northwest Region. This modification is terminating action for this AD."

The manufacturer's specifications and procedures identified and described in this directive are incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1).

All persons affected by this directive who have not already received these documents from the manufacturer, may obtain copies upon request to Boeing Commercial Airplane Comany, P.O. Box 3707, Seattle, Washington 98124. These documents may also be examined at FAA Northwest Region, 9010 East Marginal Way South, Seattle, Washington, 98108.

This amendment becomes effective August 18, 1980.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89))

Note.—The FAA has determined that this document involves a regulation which is not considered to be significant under the provision of Executive Order 12044, as implemented by Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979).

Issued in Seattle, Washington, on July 29, 1980.

The incorporation by reference provisions in the document were approved by the Director of the Federal Register on June 19, 1967.

E. O'Connor,

Acting Director, Northwest Region.

[FR Doc. 80-23800 Filed 8-6-80; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 80-NW-22-AD, Amdt. 39-3867]

Airworthiness Directives: Boeing Model 747 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: FAA Airworthiness Directive (AD) 79–17–02 (Amdt. 39–3526; 44 FR 46782), requires repetitive inspection of 7079–T6 aluminum lower cargo door sill truss and latch support fittings on Boeing Model 747 airplanes, and also requires that those fittings be replaced with 7075–T73 fittings by April 1, 1982. This amendment decreases the repetitive inspection interval for the affected fittings, but eliminates the requirement that they be replaced.

DATES: Effective date September 13, 1980.

FOR FURTHER INFORMATION, CONTACT: Mr. William M. Perrella, Airframe Section, ANW–212, Engineering and Manufacturing Branch, FAA Northwest Region, 9010 East Marginal Way South, Seattle, Washington 98108, telephone (206) 767–2516.

SUPPLEMENTAL INFORMATION:

History

Following several reported instances of cracks in the lower cargo door sill truss and latch support fittings on Boeing Model 747 airplanes, AD 79–17–02 was issued, requiring inspection and eventual replacement of affected fittings. The inspections conducted pursuant to AD 79–17–02 have shown significant variations between operators in the incidence of stress corrosion cracks. To date, there have been no instances where cracks have resulted in fitting failures.

V 4 5 / 1 5 4 A G 7 8 0 UMI

Public Participation

A petition was received from the Air Transport Association of America, on behalf of numerous operators, for an amendment to AD 79-17-02 which would delete the requirement for replacement of the 7079-T6 fittings. The FAA determined to issue a Notice of Proposed Rule Making (NPRM), proposing to delete the mandatory replacement requirement. Due to the unpredictable nature of the stress corrosion as demonstrated by the varying inspection reports from different operators, and in view of the proposal to allow indefinite use of the 7079-T6 fittings, the FAA incorporated into the proposal a decrease in the repetitive inspection interval for the fittings which are not replaced, from 2,000 flight hours to 1,200 flight hours. An NPRM was published in the **Federal Register** (45 FR 27770) on April 24, 1980. All interested parties have been given an opportunity to participate in the making of this amendment, and due consideration has been given to all matters presented. Nine comments were received.

Discussion of Comment

One commenter responded in favor of the proposed amendment. All of the others agreed with the proposed deletion of the mandatory replacement requirement, but suggested varying reinspection intervals, including: 1,350 hours; 250 days; and 4,000 hours or 12 months.

The first two inspections conducted pursuant to AD 79-17-02 show a significant variation among operators in the incidence of stress corrosion cracks. This is to be expected due to different operational environments. Based on the results of these inspections, the FAA does not believe that a 2,000 hour interval is adequate for all cases, but that a 1,200 hour interval will assure an acceptable level of safety. However, amended paragraph (D) is incorporated into the AD which will permit alternate inspections depending on an operators individual circumstances, including type and quality of inspection, operating environment, corrosion treatment program, and service experience.

This amendment allows operators to make one more inspection at the 2,000 flight hour interval originally specified in AD 79-17-02, measured from the last inspection conducted prior to the effective date of this AD, before complying with the 1,200 flight hour repetitive inspection interval required by this amendment.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 3913) is amended by amending Airworthiness Directive number 79-17-02 (Amdt. 39-3526, 44 FR 26782), as follows:

Boeing: Applies to model 747 airplanes.

1. Amend paragraph C to read:

"C. Repeat the inspection in accordance with paragraph A at intervals not to exceed 1,200 flight hours, until all affected fittings are replaced with 7075-T73 fittings. Apply BMS-3-23 or equivalent to the internal lower sill areas after each inspection. Operators may make one more inspection at an interval not exceeding 2,000 flight hours (as required by AD 79-17-02, Amendment 39-3526, 44 FR 46782), measured from the last inspection conducted prior to the effective date of this Amendment, before complying with the 1,200 hour repetitive inspection."

2. Amend paragraph D to read:

"D. Upon request of an operator, an FAA Maintenance Inspector, subject to the prior approval by the Chief, Engineering and Manufacturing Branch, FAA Northwest Region, may adjust the repetitive inspection intervals specified in this AD if the request contains substantiating data to justify such adjustment."

This amendment becomes effective September 13, 1980.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89)

Note.—The FAA has determined that this document involves a regulation which is not considered to be significant under the provision of Executive Order 12044, as implemented by Department of Transportation Regulatory Policies and Procedures (44 FR 1134; February 26, 1979).

Issued in Seattle, Washington, on July 25, 1980.

David E. Jones,

Acting Director, Northwest Region.

[FR Doc. 80-23638 Filed 8-6-80; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 97

[Docket No. 20573; Amdt. No. 1170]

Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: An effective date for each SIAP is specified in the amendatory provisions.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination—1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, D.C. 20591; 2. The FAA Regional Office of the region in which the affected airport is located; or 3. The Flight Inspection Field Office which originated the SIAP.

For Purchase—Individual SIAP copies may be obtained from: 1. FAA Public Information Center (APA-430), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, D.C. 20591; or 2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription—Copies of all SIAPs, mailed once every 2 weeks, may be ordered from Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. The annual subscription price is $135.00.

FOR FURTHER INFORMATION CONTACT: Lewis O. Ola, Flight Procedures and Airspace Branch (AFO-730), Aircraft Programs Division, Office of Flight Operations, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone (202) 426-8277.

SUPPLEMENTARY INFORMATION: This amendment to Part 97 of the Federal Aviation Regulations (14 CFR Part 97) prescribes new, amended, suspended, or revoked Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR Part 51, and §97.20 of the Federal Aviation Regulations (FARs). The applicable FAA Forms are identified as FAA Forms 8260-3, 8260-4 and 8260-5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form document is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

This amendment to Part 97 is effective on the date of publication and contains separate SIAPs which have compliance dates stated as effective dates based on related changes in the National Airspace System or the application of new or revised criteria. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPs). In developing these SIAPs, the TERPs criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs is unnecessary, impracticable, or contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 97 of the Federal Aviation Regulations (14 CFR Part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective at 0901 G.m.t. on the dates specified, as follows:

1. By amending § 97.23 VOR-VOR/DME SIAPs identified as follows:

** * * Effective September 18, 1980.*

Columbus, TX—Columbus, VOR-A, Amdt. 2, cancelled

** * * Effective September 4, 1980.*

Durhamville, NY—Kamp, VOR Rwy 28, Original

Note.— The FAA published an amendment in docket No. 20480, amdt. No. 1167 to part 97 of the Federal Aviation Regulations (vol. 45 FR No. 127 Page 43699; dated June 30, 1980) under section 97.23 effective August 7, 1980, which is hereby amended as follows: Marshfield, MA—Marshfield, VOR-A, amdt. 3 is rescinded. Marshfield, MA—Marshfield, VOR-A, amdt. 2 remains in effect.

2. By amending § 97.25 SDF-LOC-LDA SIAPs identified as follows:

** * * Effective July 17, 1980.*

Hawthorne, CA—Hawthorne Muni, LOC Rwy 25, Amdt. 5

3. By amending § 97.27 NDB/ADF SIAPs identified as follows:

** * * Effective September 18, 1980.*

Clarendon, TX—Clarendon Muni, NDB Rwy 1, Original
Houston, TX—David Wayne Hooks Memorial, NDB Rwy 35L, Original
New Braunfels, TX—New Braunfels Muni, NDB Rwy 22, Original
Pleasanton, TX—Pleasanton Muni, NDB-A, Amdt. 4

** * * Effective September 4, 1980.*

St. Paul Island, AK—St. Paul Island, NDB-3 Rwy 36, Original

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 282

[Docket No. RM79-46; Order No. 96]

Section 206 (d) Exemption for Small Industrial Boiler Fuel Facilities From the Incremental Pricing Provisions of the Natural Gas Policy Act of 1978

Issued July 29, 1980.

AGENCY: Federal Energy Regulatory Commission.

ACTION: Final rule, subject to congressional review.

SUMMARY: Under authority of section 206(d) of the Natural Gas Policy Act of 1978, the Federal Energy Regulatory Commission issues a final rule, exempting certain small industrial boiler fuel facilities from incremental pricing. The exemption applies to facilities whose average per day use of natural gas as boiler fuel does not exceed 300 Mcf, but which do not qualify for an existing small user exemption under section 206(a)(2) of the Act. This rule is

V 45 / 154 AG 7 80 UMI

designed to place new small facilities in the same position as existing small facilities with respect to the incremental pricing program.

EFFECTIVE DATE: September 5, 1980, or such later date as represents the first day following 30 days of continuous session of the Congress, if not disapproved by either House.

FOR FURTHER INFORMATION CONTACT: Alice Fernandez, Office of Pipeline and Producer Regulation, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426 (202) 357–9095 or Carol M. Lane, Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426 (202) 357–8114.

Before Commissioners: Georgiana Sheldon, Acting Chairman; Matthew Holden, Jr., and George R. Hall.

I. Background

Issued July 29, 1980.

The Federal Energy Regulatory Commission (Commission) amends its regulations under the Natural Gas Policy Act of 1978 (18 CFR Subchapter I, Part 282, Subpart B) to provide an exemption from incremental pricing for certain small industrial boiler fuel facilities not previously exempt.

Title II of the Natural Gas Policy Act of 1978 (NGPA), 15 U.S.C. 3301 *et seq.*, requires the Commission to prescribe and make effective a program of incremental pricing of natural gas used as industrial boiler fuel. Section 206(a) of the NGPA, however, grants an exemption from incremental pricing surcharges for natural gas used as boiler fuel by "small" industrial boiler fuel facilities which were "in existence on the date of enactment" (November 9, 1978). Regulations governing this exemption were promulgated in final form in Commission Order No. 85, which was issued on May 8, 1980.[1] Among other things, these regulations provide that a facility may qualify for such an exemption if (1) it was in existence on November 9, 1978, and (2) its average daily use of natural gas as a boiler fuel during the month of peak use in 1977 did not exceed 300 Mcf.

However, no exemption was provided in Title II of the NGPA, for "new" small boiler fuel facilities; *i.e.*, for facilities which were *not* in existence on November 9, 1978. Similarly, there is no provision in the statute for an exemption for "newly" small facilities; *i.e.*, for facilities which have reduced their boiler fuel usage to below the 300 Mcf per day threshold since 1977. Both the statute and the legislative history are silent as to the reason for the lack of such exemptions.

Congress did, however, provide in section 206(d) of the NGPA that the Commission may promulgate rules exempting from incremental pricing any appropriate category of facilities for which there is no specific statutory exemption. Pursuant to this discretionary authority, the Commission has determined that it would be both equitable and consistent with implementation of the incremental pricing program to provide an exemption for small boiler fuel facilities not exempted under Order No. 85. To this end, the Commission has issued two Notices of Proposed Rulemaking and conducted two sets of public hearings.

Initial proposals to exempt "new" small facilities were made in this docket in a Notice of Proposed Rulemaking issued on September 28, 1979.[2] On March 6, 1980, a further Notice of Proposed Rulemaking, was issued.[3] In the March 6th Notice the Commission requested additional comments to supplement the record developed on the September proposal. In addition, the scope of the proposed exemption was expanded to include all small industrial boiler fuel facilities not eligible for the statutory exemption under section 206(a) of the NGPA.

The comments filed in response to the Notices, and the Commission's analysis of those comments, are summarized below.

II. Summary of Public Comments

Thirty-one companies, industry groups or State regulatory commissions filed written comments in response to the March 6th proposal. In addition, representatives of fourteen organizations testified at public hearings held in Washington, D.C. on March 28, 1980, and in Los Angeles, California on March 31 and April 1, 1980. The commenters unanimously supported the concept of an exemption for all small industrial boiler facilities, but many disagreed with the Commission's proposals for implementation of such an exemption.

A. Suggested Exemption of First 300 Mcf per day of Usage for All Industrial Boiler Fuel Facilities

A number of commenters proposed that the Commission replace the rules proposed in this docket with an across-the-board exemption of the first 300 Mcf per day of natural gas consumed by all industrial boiler fuel facilities, existing or new, large or small. It was asserted that this approach would be administratively attractive, would prevent load loss [4], and would eliminate inequities which could occur where, for example, a facility consuming 310 Mcf per day (and thus subject to incremental pricing) is in economic competition with a facility consuming 290 Mcf per day (and thus exempt from incremental pricing).

The Commission agrees that this approach would be easy to administer and might eliminate certain potential inequities in the program. However, the Commission believes that it would not be consistent with the overall Congressional approach to incremental pricing as established in Title II. Congress intended industrial boiler fuel facilities to be incrementally priced on their entire natural gas consumption. A specific statutory exemption was provided for small existing users, and the Commission is extending this exemption to other small users. However, there is no indication of a Congressional intent to exempt a portion of gas consumption for *all* industrial boiler fuel facilities. Indeed, such an exemption would remove a large proportion of natural gas used as industrial boiler fuel from the incremental pricing program and thus undercut Congressional intent. In addition, the 300 Mcf per day figure proposed by Congress for existing small boiler fuel facilities was predicated upon a *full* exemption from incremental pricing. The use of this figure for a partial exemption scheme for boiler fuel users would not necessarily be appropriate. Accordingly, this proposal has not been adopted in the final rule.

B. The 12-Month Rule

The rule proposed in the March 6th Notice, and herein adopted as a final rule, provides an exemption from incremental pricing for facilities whose average per day use of natural gas as a boiler fuel does not exceed 300 Mcf, but which do not qualify for an existing small user exemption under section 206(a)(2) of the NGPA. The rule provides that such facilities may qualify for a small user exemption based upon a 12-month record of boiler fuel usage at a level not exceeding an average of 300 Mcf per day in any month.

[1] Docket No. RM80–24, 45 FR 31980 (May 15, 1980).

[2] 44 FR 57783 (October 5, 1979).

[3] 45 FR 15556 (March 11, 1980).

[4] The commenters asserted that load loss might occur where a facility's normal gas consumption slightly exceeded 300 Mcf per day. The facility might switch to oil for part of the month to keep average consumption at a figure below 300 Mcf per day and thereby obtain a small user exemption. This, in turn, could subject high priority gas users to a larger portion of fixed charges.

Under this 12-month rule, two types of facilities will be able to qualify for an exemption:

(1) A facility which was not in existence on November 9, 1978, but which can establish, on the basis of its most recent 12-month record, that its average per day use of natural gas as boiler fuel does not exceed 300 Mcf; and

(2) A facility which was in existence on November 9, 1978, and whose average per day use of natural gas as boiler fuel exceeded 300 Mcf during the 1977 base period, but which has subsequently decreased its gas consumption to the point at which it can establish, on the basis of its most recent 12-month record, an average per day use of 300 Mcf or less.

The choice of 300 Mcf per day as the threshold for determining small facilities under this rule is consistent with the Commission's implementation of a 300 Mcf per day threshold in the permanent rule defining "existing" small facilities.[6] Also consistent with the rule for existing facilities are: (1) the method set forth in this rule for determining a facility's average per day use of a natural gas as boiler fuel (*see* § 282.203(b)(2)(ii)); and (2) the requirement that suppliers file a statement, under oath, with the Commission stating that for all exemptions granted on the basis of company records under this rule, the supplier has determined that the facility meets the definition of a "small industrial boiler fuel facility" set forth in § 282.203(b)(2)(i).

This rule provides that an exemption may be based on the supplier's company records or, if unable to be determined on that basis, may be based on the filing of an affidavit by the user. An exemption will continue to be effective so long as consumption does not exceed the 300 Mcf threshold for any month. If the threshold is exceeded, the exemption is lost until such time as the facility qualifies under § 282.203(b)(2)(i)(A), or under any available exemption in accordance with § 282.203(a).

Although the great majority of commenters supported the 12-month rule as proposed, one commenter suggested that the 12-month period be shortened to 6 months. This suggestion has not been adopted in the final rule, because the Commission believes that a 12-month period, which emcompasses the entire seasonal pattern of boiler fuel usage, will provide a more accurate record of a facility's average natural gas consumption.

[6] *See* n.1, *supra.*

C. New Facilities Do Not Fall Within the 12-Month Rule

The March 6th Notice proposed that facilities which do not have a 12-month gas consumption record be permitted to qualify for an exemption on the basis of boiler capacity. The proposed method to determine boiler capacity was to total the nameplate ratings of all of the facility's boilers which have gas burning capacity, and then to multiply that number by 16. This approach assumed that gas-fired boilers would be operated at rated capacity for an average of 16 hours per day.

A large majority of commentors opposed this proposal. They pointed out that it is not unusual for a facility to have at least one stand-by boiler which would have to be counted even though not ordinarily being used. In addition, they argued that there is a wide variation in the number of hours each facility's boilers are operated. A 16-hour per day average is arbitrary and, frequently, would not reflect actual operating conditions. The alternative proposed by many commenters was an exemption based on the filing of an affidavit reflecting actual use of natural gas as boiler fuel.

After consideration of the comments, the Commission has determined that it would be both reasonalbe and equitable to adopt an affidavit approach in lieu of the nameplate rating approach. Accordingly, the final regulations provide for exemptions based upon the filing of an affidavit by the end user. Two types of situations will be involved: (1) if the facility has possessed the physical components necessary to receive and use natural gas as boiler fuel for less than 12 months, the user must affirm, under oath, that from the initial month of such possession to the present, the facility's average per day use of natural gas as boiler fuel has not exceeded 300 Mcf, and that the facility's future daily use is not expected to exceed 300 Mcf, or; (2) if the facility does not yet possess the necessary components, the user must affirm, under oath, that the facility's estimated usage does not exceed the 300 Mcf threshold. In the first situation, the estimates need be made only for the number of months in the future which are necessary to make up a 12-month period, including the number of months since initial installation of the components. In the second situation, the estimates must be made for the first 12 months after the components are installed. In either situation, the exemption shall continue so long as the facility does not exceed an average of 300 Mcf per day in any month. Once an exemption affidavit is filed, it will not be necessary to refile on the basis of 12 months of actual usage. However, if the 300 Mcf figure is exceeded in any month, the Commission and the natural gas supplier must be immediately notified of the changed circumstances in accordance with § 282.205, and the facility loses its exemption until it qualifies under § 282.203(b)(2)(i)(A), or under any available exemption in accordance with § 282.203(a).

D. Potential Incentive for Increased Oil Consumption

In the March 6th Notice, the Commission specifically requested comments on whether the proposed exemption for small industrial users would act as an incentive for users to limit their use of natural gas as boiler fuel to an average of 300 Mcf per day simply to gain an exemption from incremental pricing surcharges. This, in turn, might serve as an incentive for the consumption of other boiler fuels, such as oil, or might lead to proliferation of small plants.

A number of commenters noted that they shared the Commission's concern about this potential problem. However, aside from the previously discussed proposal that the first 300 Mcf of usage be exempted for all industrial boiler fuel facilities, only two commenters suggested methods of preventing users from burning oil for part of their fuel requirements in order to retain a small user exemption. The first suggestion was that the exemption be based on the natural gas equivalent of the users's total fossil fuel use in any month. The Commission agrees that this approach has merit, but has rejected the suggestion because it would be too difficult to implement from an administrative standpoint. The second suggestion was that the 12-month rule be eliminated and exemptions granted solely on the basis of nameplate ratings. The Commission has not adopted this suggestion, because, as discussed above, it is persuaded that the nameplate approach is inappropriate.

A number of commenters indicated that the small user exemption would not in fact provide an incentive for usage of alternative fuels. Among the reasons given for this conclusion were: (1) use of fuels other than gas might subject some users to penalties under take-or-pay obligations in their contracts; (2) a user who needed more than 300 Mcf of gas per day but engaged in temporary fuel switching to hold gas consumption below that level would be establishing a record of gas demand which the supplier would use in projecting allocation of available supplies, and thus would be

V 4 5 / 1 5 4 AG 7 80 UMI

placing itself in a position of dependency on an alternative fuel source; (3) the delivered price of alternative boiler fuels generally exceeds the price of incrementally priced gas; and (4) in some industries temporary fuel switching is simply not feasible. In addition, one commenter noted that the small industrial user rule could have a beneficial effect in that it might encourage those users slightly over the 300 Mcf threshold to undertake conservation measures which would reduce consumption to a point at which the facility would fall below the threshold and receive an exemption.

The Commission remains concerned about the rule's potential as an incentive for marginal use of alternative fuels. Nevertheless, it concludes that increased alternative fuel consumption will not be so significant a factor under this rule so as to offset its equitable benefits in other respects.

E. Adjustments

A number of commenters expressed concern about facilities which might exceed the 300 Mcf threshold for only one month due to an operational abberation. It was asserted that such facilities should not be subjected to incremental pricing for the next 12 months before regaining their small user exemption.

The Commission recognizes that there may occasionally arise unrepresentative circumstances which cause a small facility to exceed the 300 Mcf threshold in a given month. A user faced with this situation may seek both interim and final relief from the Commission under section 502(c) of the NGPA, implemented in § 1.41 of the Commission's regulations. If a waiver of a Commission rule is necessary in order to prevent special hardship, inequity, or an unfair distribution of burdens to the applicant, an ajustment may be granted. Adjustments under the Act are considered on a case-by-case basis.

F. Retroactivity

Several commenters proposed that the Commission make the small user rule issued in this docket retroactive in application to January 1, 1980, the date of implementation of the incremental pricing program. The Commission declines to adopt this proposal, because it would be administratively impractical to attempt to make this rule apply retroactively.

G. Obtaining an Exemption

As set forth in §§ 282.204 (c) and (d), an exemption under this rule may be based on the supplier's company records or, where appropriate, on the filing of an exemption affidavit by the end user. Under § 282.204(d)(2)(i)C), natural gas suppliers are required to mail or otherwise supply exemption affidavits to their end users which are not otherwise exempt from incremental pricing and which the supplier determines may be eligible for an exemption under § 282.203(b).

An exemption will take effect as of the dates set forth in § 282.204(c)(3)(ii), for exemptions based on company records, or § 282.204(d)(7), for exemptions based on affidavits. An exemption on either basis will continue until such time as the facility exceeds the 300 Mcf per day threshold in any month. If the threshold is exceeded, the Commission and the natural gas supplier must be notified of the changed circumstances in accordance with § 282.205, and the facility then becomes subject to incremental pricing. If the facility subsequently experiences twelve consecutive months of usage at 300 Mcf or below, another exemption on the basis of company records or on the basis of an exemption affidavit may be obtained, and the facility may regain its exemption.

One commenter suggested that monthly review of data to determine continuing eligibility was unnecessary and that annual review should instead be conducted, prior to the supplier's annual purchased gas adjustment review. The Commission disagrees. It believes that it is important that small user exemptions be based upon the most current data available. The monthly review is not burdensome to small users when weighed against the benefits of continuing exemption from incremental pricing surcharges.

The exemption affidavit requires that all records, documents or data which form the basis of any response on the affidavit be retained. In order to conform to this requirement, § 282.204(d)(8) has been revised to provide that such records must be retained regardless of the type of exemption claimed. The section also makes clear that it is not necessary to keep records for a period greater than three years from the date the affidavit is filed.

Section 282.204(d) has been revised to delete the listing of the contents of the exemption affidavit.

H. Change of Circumstances

The duty to report usage in excess of the 300 Mcf threshold is on the user, not the supplier. *See* § 282.205. Several commenters suggested that this duty should fall on the supplier, who, it was asserted, is in the best position to monitor usage. The Commission does not adopt this suggestion. The incremental pricing exemption program is basically an oath program which relies on sworn statements by industrial boiler fuel users that they qualify for a particular exemption. The Commission does not wish to place the natural gas supplier in the position of a program monitor for each individual facility. If a small user elects to take advantage of an incremental pricing exemption, that user has the obligation to monitor boiler fuel gas usage and to report consumption in excess of the exemption threshold. As the Commission has noted in other incremental pricing orders, both civil and criminal penalties may be levied under section 504 of the NGPA for noncompliance with regulations promulgated under the Act.

I. Technical Changes in Regulations

Minor technical, conforming or clarifying changes have been made to §§ 282.201, 282.202(g), 282.204(c)(2)(iii), 282.204(d)(2)(B), 282.204(d)(4), 282.204(f)(2) and (3), 282.205 and 282.207(c)(2)(i).

IV. Effective Date

Section 206(d)(2) of the NGPA requires that any rule which grants an exemption under section 206(d) be submitted to each House of Congress for review prior to taking effect. Unless either House adopts a resolution of disapproval within 30 calendar days of continuous session (determined in accordance with section 507(b) of the NGPA), these regulations will take effect on the day after expiration of the 30-day review period. Accordingly, this rule will be effective on the day following the expiration of the 30-day period for Congressional review.

(Natural Gas Policy Act of 1978, Pub. L. No. 95-621, 92 Stat. 3350, 15 U.S.C. 3301-3434)

In consideration of the foregoing, if neither House of Congress passes a Resolution of Disapproval of the regulations transmitted to them in this rulemaking within 30 days of Congressional review (as determined in accordance with section 507(b) of the NGPA), Part 282 of Subchapter I, Chapter 1, Title 18, Code of Federal Regulations, is amended as set forth below, effective on the day following the expiration of the 30-day Congressional review period.

By the Commission.

Kenneth F. Plumb,

Secretary.

1. Section 282.201 is revised to read as follows:

§ 282.201 General rule.

The provisions of this subpart govern the exemption (and the termination of the exemption) of natural gas from incremental pricing under this part. Pursuant to section 206 of the NGPA, natural gas specified in § 282.203 shall be exempt from incremental pricing. The procedures for determining exemptions are set forth in § 282.204. Adjustments under authority of 502(c) of the NGPA as may be necessary to prevent special hardship, inequity, or unfair distribution of burdens may be obtained as provided in § 1.41.

2. Section 282.202 is amended in paragraph (g) to read as follows:

§ 282.202 Definitions.

For purposes of this subpart:

* * * * *

(g) "Average per day use of natural gas as a boiler fuel during the month or peak use during calendar year 1977" means the average daily use of natural gas as a boiler fuel, calculated by dividing the total boiler fuel use of natural gas in the month of peak use during calendar year 1977 by the total of: (1) the number of days in that month on which service was available at 100 percent of normal delivery level; and (2) the sum of the number of days in that month on which service was available at less than 100 percent of normal delivery level (which sum is computed by multiplying the number of days at each delivery level less than 100 percent of normal times the percentage of normal delivery level experienced on those days, and adding the products).

* * * * *

3. Section 282.203 is revised to read as follows:

§ 282.203 Exempt end-uses.

Exemptions in this subpart from the incremental pricing provisions of this part shall apply only to industrial facilities which use natural gas as boiler fuel.

(a) *Statutory exemptions.* In accordance with the provisions of sections 206(a), (b), and (c) of the NGPA, natural gas used for the following purposes shall be exempt from incremental pricing under this part:

(1) All gas used for boiler fuel by an industrial boiler fuel facility:

(i) Which was in existence on November 9, 1978; and

(ii) Whose average per day use of natural gas as a boiler fuel during the month of peak use during calendar year 1977 did not exceed 300 Mcf;

(2) All gas used for an agricultural use;

(3) All gas used in a school, hospital, or similar institution;

(4) All gas used for the generation of electricity by an electric utility; and

(5) All gas used in a qualifying cogeneration facility.

(b) *Exemption for small industrial boiler fuel facilities under section 206(d).* (1) *General Rule.* Natural gas used for boiler fuel in a small industrial boiler fuel facility, as defined in paragraph (b)(2)(i) of this section, which is not eligible for an exemption under paragraph (a)(1) of this section shall be exempt from incremental pricing under this part.

(2) *Definitions.* For purposes of this paragraph, the following definitions apply.

(i) "Small industrial boiler fuel facility" means an industrial boiler fuel facility which:

(A)(*1*) Possessed, for the twelve preceding consecutive months, the installed lines, piping, regulators, meters and any other similar components necessary for that facility to have received and used natural gas as a boiler fuel, and

(*2*) Did not experience an average per day use of natural gas as a boiler fuel, calculated in accordance with paragraph (b)(2)(ii) of this section, exceeding 300 Mcf during any month of the preceding twelve consecutive months; or

(B) Did not, in all of the twelve preceding consecutive months, possess the installed lines, piping, regulators, meters and any other similar components necessary for that facility to have received and used natural gas as a boiler fuel, but which either:

(*1*)(*i*) Did possess such components during some of the preceding twelve consecutive months, and

(*ii*) Did not experience an average per day use of natural gas as boiler fuel during such months, calculated in accordance with paragraph (b)(2)(ii) of this section, exceeding 300 Mcf during any of those months, and

(*iii*) Is not expected, based on estimates by a person qualified to make such estimates, to experience an average per day use of natural gas as boiler fuel, calculated in accordance with paragraph (b)(2)(ii) of this section, exceeding 300 Mcf for any of the number of future months necessary to make up the necessary twelve month consecutive period; or

(*2*)(*i*) Did not possess such components during any of the preceding twelve consecutive months, and

(*ii*) Is not expected, based on estimates by a person qualified to make such estimates, to experience an average per day use of natural gas as boiler fuel, calculated in accordance with paragraph (b)(2)(ii) of this section, exceeding 300 Mcf for any of the first twelve consecutive months during which the facility possessed such components.

(ii) "Average per day use of natural gas as a boiler fuel", with respect to an industrial boiler fuel facility, means the facility's average daily use of natural gas as a boiler fuel, calculated by dividing the facility's total boiler fuel use of natural gas in a particular month by the total of:

(A) the number of days in that month on which service was available to the facility at 100 percent of the normal delivery level; and

(B) the sum of the number of days in that month on which service was available to the facility at less than 100 percent of the normal delivery level (which sum is computed by multiplying the number of days at each delivery level less than the normal level times the percentage of the normal delivery level experienced on those days, and adding the products).

4. Section 282.204 is amended by revising paragraphs (a), (c)[2](iii)(A) and (B), (d)(1), (d)(2)(i)(B), (d)(3), (d)(4), (d)(5), (d)(6)(i) and (ii), (d)(8), (f)(2) and (3), and by adding paragraphs (c)(3), (d)(2)(i)(C), and (d)(2)(ii)(C) as follows:

§ 282.204 Obtaining an exemption.

(a) *General.* This section establishes procedures by which natural gas which qualifies for an exemption under § 282.203 is to be exempted from incremental pricing.

* * * * *

(c) *Exemption on the basis of company records.*

* * * * *

(2) *Exemption after September 30, 1980.*

* * * * *

(iii) * * *

(A) The exempted facility was in existence on November 9, 1978; and

(B) The exempted facility's average per day use of natural gas as a boiler fuel during the month of peak use during calendar year 1977 did not exceed 300 Mcf.

(3) *Facilities exempt under § 282.203(b).* (i) On or before [30 days following expiration of the 30-day Congressional review period], each natural gas supplier shall determine from an examination of its records which industrial boiler fuel facilities are not eligible for an exemption under § 282.203(a)(1) but meet the definition of a "small industrial boiler fuel facility" set forth in § 282.203(b)(2)(i)(A).

(ii) The natural gas supplier shall treat an industrial boiler fuel facility for which an affirmative determination is made under paragraph (c)(3)(i) of this

section as exempt from incremental pricing under this part without further action by the owner or operator of the facility. Such exemption shall be effective as of the beginning of the first full month following the date the supplier determines under paragraph (c)(3)(i) of this section that the facility is exempt from incremental pricing.

(iii) On or before November 1, 1980, each natural gas supplier shall file with the Commission a statement, under oath, that for all exemptions from incremental pricing granted under paragraph (c)(3) of this paragraph, the facility met the definition of a "small industrial boiler fuel facility" set forth in § 282.203(b)(2)(i)(A).

(d) *Exemption on the basis of affidavit.* (1) *Commission to provide exemption affidavits.* The Commission will provide exemption affidavits as described in paragraph (d)(3) of this section to natural gas suppliers and to any other interested person upon request. Requests should be directed to the Division of Public Information, Federal Energy Regulatory Commission, Room 1000, 825 North Capitol Street, N.E., Washington, D.C. 20426.

(2) *Availability from natural gas suppliers.* (i) *Initial Service.* (A) * * *

(B) Not later than August 15, 1980, each natural gas supplier shall mail or otherwise supply an exemption affidavit, as described in paragraph (d)(3) of this section, to the owner or operator of each industrial boiler fuel facility on such supplier's system which the supplier does not determine to be exempt pursuant to paragraph (c) of this section, or which is not otherwise exempt under this part, and which the supplier determines may be eligible for an exemption under § 282.203(a).

(C) Not later than [30 days following expiration of the 30-day Congressional review period], each natural gas supplier shall mail or otherwise supply an exemption affidavit to the owner or operator of each industrial boiler fuel facility on such supplier's system which the supplier does not determine to be exempt pursuant to paragraph (c) of this section, or which is not otherwise exempt under this part, and which the supplier determines may be eligible for an exemption under § 282.203(b).

(ii) *Response date.*

* * * * *

(C) Natural gas suppliers which supply exemption affidavits under paragraph (d)(1)(i)(C) of this section shall request that executed affidavits be filed on or before [60 days following expiration of the 30-day Congressional review period], in accordance with paragraph (d)(4) of this section.

* * * * *

(3) *Contents of exemption affidavit.* (i) The exemption affidavit shall provide the owner or operator of an industrial boiler fuel facility with the opportunity to respond to a series of questions so that the owner or operator may establish, if appropriate, the basis for one or more of the exemptions set forth in this part.

(ii) The exemption affidavit shall indicate the record retention obligation which may be incurred by the customer under paragraph (d)(8) of this section.

(4) *Filing of exemption affidavits.* In order to obtain an exemption, under this paragraph, from incremental pricing, an owner or operator of an industrial boiler fuel facility shall file an executed exemption affidavit, signed and dated by a responsible official associated with the facility, under oath, with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C., 20428, and send a copy of the executed affidavit to the natural gas supplier serving the industrial boiler fuel facility.

(5) *Effect of filing an exemption affidavit.* (i) If the owner or operator of an industrial boiler fuel facility files an affidavit in accordance with paragraph (d)(4) of this section, claiming that all of the natural gas used in the facility is exempt from incremental pricing surcharges, then natural gas used in the facility shall be exempt from incremental pricing under this part.

(ii) If the owner or operator of an industrial boiler fuel facility files an affidavit in accordance with paragraph (d)(4) of this section, claiming that a portion of the natural gas used in the facility is not subject to incremental pricing, then natural gas used in the facility shall be exempt from incremental pricing surcharges as follows:

(A) For the period January 1, 1980, through October 31, 1981, to the extent determined in accordance with § 282.207; and

(B) On and after November 1, 1981, to the extent determined in accordance with the applicable provision of paragraph (d)(6) of this section.

(6) *Determination of extent of partial exemption on and after November 1, 1981.* (i) If the owner or operator of an industrial boiler fuel facility files an affidavit in accordance with paragraph (d)(4) of this section, claiming that a portion of the natural gas used in the facility is exempt under § 282.203(a)(2), then:

* * * * *

(B) * * *

(ii) If the owner or operator of an industrial boiler fuel facility files an affidavit in accordance with paragraph (d)(4) of this section, claiming that a portion of the natural gas used in the facility is exempt under § 282.203(a) (3), (4), or (5), or is not subject to incremental pricing for the reason that the gas is not consumed as a boiler fuel, then:

* * * * * *

(8) *Record retention.* If the owner or operator of an industrial boiler fuel facility obtains an exemption by filing an affidavit in accordance with paragraph (d)(4) of this section, the owner or operator shall, for a period of at least three years from the date of filing the exemption affidavit, retain all records, documents or data which formed the basis of the responses on the affidavit.

* * * * * *

(f) *Protests.*

* * * * * *

(2) The procedures set forth in § 1.10 shall govern the filing of such a protest, except that any person filing such a protest shall serve a copy of the protest on the affiant of the exemption affidavit or on the natural gas supplier who determined the exemption on the basis of supplier records, as appropriate.

(3) The affiant or the natural gas supplier, as appropriate, may file an answer to any protest. Such answer must be filed within 30 days of the service date of a protest. The affiant or the natural gas supplier, as appropriate, shall serve a copy of the answer on the party filing the protest.

5. Section 282.205 is revised to read as follow:

§ 282.205 Change of circumstances.

(a) *General rule.* If an industrial boiler fuel facility whose natural gas has been exempt under this subpart from incremental pricing under this part experiences a change of circumstances described in paragraph (b) of this section, the owner or operator of the facility shall promptly, in writing, under oath, notify the Commission and the natural gas supplier serving the facility. The natural gas which was exempt, and with respect to which circumstances have changed in accordance with this section, shall be subject to incremental pricing in accordance with and to the extent required by the provisions of this part.

(b) *Circumstances.* For purposes of paragraph (a) of this section, a change of circumstances which subjects natural gas, previously exempt under this subpart, to the incremental pricing

provisions of this part includes the following:

(1) If the natural gas was exempted on the basis of its use in accordance with § 282.203(a), a change in the use of the gas such that it is no longer used for the purpose on the basis of which it was exempted under § 282.203(a);

(2) If the natural gas was exempted on the basis of actual or estimated average per day use of natural gas as a boiler fuel in accordance with § 282.203(b), a change in the amount of gas used for boiler fuel such that the average per day use of natural gas as a boiler fuel in the facility exceeds 300 Mcf in any calendar month; and

(3) Any other change such that the basis for the exemption has changed or no longer exists.

(c) *Filing of Notification.* The notification filed pursuant to paragraph (a) shall be marked, "Changed of Exemption Status Under Incremental Pricing Program" and shall be filed with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426.

(d) *Effective date.* A notification filed pursuant to paragraph (a) shall be effective as of the beginning of the first full month of service after the notification is filed with the Commission and is received by the natural gas supplier serving the facility.

§ 282.207 [Amended]

6. Section 282.207 is amended in paragraph (c)(2)(i) by replacing "§ 282.203(b)" by "§ 282.203(a)(2)".

National Highway Traffic Safety Administration

19 CFR Part 571

[Docket No. 80-02; Notice 2]

Federal Motor Vehicle Safety Standards; New Pneumatic Tires, Passenger Cars

In FR Doc. 80-22418, appearing at page 49938, in the issue of Monday, July 28, 1980, please make the following corrections to Appendix A in § 571.109:

1. In the first table on page 49939, designated as Table I-JJ, in the line beginning "P235/70R14", in the seventh column, the number "620" should be changed to read "820".

2. In the same table, the last line, which begins "P255/70R15", in the fifth column, the number "990" should be changed to read "900."

BILLING CODE 1505-01-M

Federal Highway Administration

23 CFR Part 657 and 658

Certification of Size and Weight Enforcement

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Final rule.

SUMMARY: The Federal Highway Administration (FHWA) issues requirements for certifying that each State is enforcing all State size and weight laws on the Federal-aid highway systems, including the Interstate System in accordance with 23 U.S.C. 127, as required by 23 U.S.C. 141 and section 123 of the Surface Transportation Assistance Act of 1978. An initial submission and annual revision of a plan for enforcement and an annual certification of compliance are required. Failure to meet the requirements of this regulation may result in a reduction of apportioned Federal-aid highway funds.

DATES: This regulation is effective on October 1, 1980. The initial submission of a plan is due on November 1, 1980. Annual updates are required thereafter, preferably on or before July 1 of each year. The State must have an approved plan by October 1 of each year thereafter. The first certification under this regulation is due by December 31, 1981.

FOR FURTHER INFORMATION CONTACT: Mr. William Bauch, 202/426-1993, Office of Traffic Operations, or Mr. David C. Oliver, 202/426-0825, Office of the Chief Counsel, Federal Highway Administration, 400 Seventh Street, SW., Washington, D.C. 20590. Office hours are from 7:45 a.m. to 4:15 p.m. ET, Monday through Friday.

SUPPLEMENTARY INFORMATION: Pursuant to the requirements of 23 U.S.C. 141, each of the States has submitted certifications of enforcement of vehicle size and weight laws prior to January 1 in each of the years from 1976 to 1979. The accumulation of data extracted from these certifications is considerable, but insufficient *per se* to determine the adequacy of State enforcement efforts.

As a result of the insufficiency of the prior certification requirements and the enactment of section 123 of the Surface Transportation Assistance Act of 1978, the FHWA issued a Notice of Proposed Rulemaking on March 14, 1979 (44 FR 15638, FHWA Docket No. 77-21, Notice 2). The notice set forth requirements providing for the development of an enforcement plan by each State. Elements of the plan were discussed in some detail. The plan, after review and approval by the FHWA, would become the benchmark against which the quantitative results of each year's certification could be compared in order to evaluate a State's success in accomplishing its enforcement goals.

The development of this procedure was based upon the difficulty encountered in assessing State enforcement on a quantitative basis alone. Individual variances in geography, volume of traffic, budget, and philosophy of enforcement cannot be accounted for on the basis of numbers, whether numbers of vehicles weighed, registered, or cited. However, the quantitative assessment is sufficient to indicate questionable areas in a State's enforcement efforts, and past evaluations have relied upon the numbers to initiate a dialogue in States where programs appeared inadequate in reducing violations. In the past two years, conferences have been held with the representatives of more than 18 States to develop a complete assessment of State efforts. Program improvements have resulted in every State for which a conference was held.

Beginning with the quantitative references provided by prior certifications, the material addressed at each conference included enforcement philosophy, budgetary and personnel considerations, policies and practices with respect to penalizing violators, the issuance of special permits, and plans for implementing improvements in all of the above areas. The dialogue begun with these States has helped us engender perspective on each State's individual conditions, needs, and success in enforcement.

This experience has led to the development of a certification process which involves a two-stage procedure consisting of an enforcement plan and certification. The intent of this procedure is to reduce the red tape involved in the certification process to a minimum, while at the same time establishing a thorough process of review and understanding of enforcement on a nationwide basis.

At the same time, the notice discussed the development by the FHWA of guidelines which would enable the States to integrate objective components in their enforcement plans, to equalize the assessment of the certification. Consideration has been given to establishing minimum numbers for vehicles weighed, ratios of violations to vehicles weighed and target numbers based upon a combination of integral

V 45 / 154 AG 7 80 UMI

factors, including vehicles registered, vehicles weighed, and vehicle miles traveled. Each of the above has been found inadequate, confusing and susceptible to misinterpretation. The appendix to this regulation provides plan guidelines, which, however, do not provide minimum requirements.

Comments on these guidelines are solicited and can be submitted to the Docket No. 77–21, which is being continued for this purpose. The guidelines are not mandatory but have been designed for use as a frame of reference in developing enforcement plans.

Discussion of Comments

Twenty-one comments were received in the docket in response to the Notice of Proposed Rulemaking. The majority of comments received (14) were from State organizations, including State highway or transportation agencies, enforcement agencies and motor vehicle departments. Several of the comments reflected dissatisfaction with the proposed regulation on the general philosophical basis that it constituted an intrusion into traditional State prerogatives. There was also concern that the development of an enforcement plan would constitute an unnecessary administrative exercise contrary to the FHWA's policy of reducing red tape.

These State responses focused on three major areas of concern: that reporting requirements under the regulation be reasonable and not require large numbers of personnel hours to accumulate data which would take enforcement personnel away from their primary mission; that guidelines be provided for States' use in plan development; and that minimum criteria be established, such as an annual target number of vehicles to be weighed by each State.

Comments were also received from three associations which indicated general approval of the intent of the proposed rule. The American Association of State Highway and Transportation Officials (AASHTO) was concerned with the level of detail required in the development of the plan. This comment was repeated often by State organizations. The final regulation has been modified to accommodate specific suggestions and to alleviate the concern over the level of detail. Specific comments on this point will be included below.

The American Trucking Associations (ATA), while concurring generally in the proposed rule, expressed concern that portable scales be accurate, particularly where they are the primary tool in a State's enforcement efforts. The FHWA is aware of difficulties arising out of portable scale use and is continuing to evaluate the experience of the States in their usage. No specific requirements are set forth in the final regulation, but information will be disseminated to the States as it becomes available to the FHWA on the equipment available and its correct usage. The ATA also raised a valid point concerning the potential for undue delay which can result from multiple weighings in relatively short distances; this matter is under further review. The FHWA regional offices have already been requested to assist the States in coordinating enforcement efforts, including scale placement, to reduce delay to a minimum.

Other comments included one from an independent trucker in opposition to the proposed rule; one from a railroad pertaining to weighing practices in a particular State; and one comment from a Florida State legislator, who expressed concern over the failure of the regulation to establish uniform criteria, since those States with recognized strong enforcement efforts are affected economically by those which have little or no enforcement. The FHWA agrees with this latter concern; however, the specific comment indicates that a statement of the underlying basis of the regulation is needed. Those States with strong enforcement efforts will benefit from the implementation of this regulation, as it is the underlying intent of the FHWA to guide all States into improved, effective weight enforcement programs. While quantification alone is insufficient as a benchmark of program effectiveness, there are no intrinsic difficulties in identifying weak programs. It is obvious that States which have low numbers of vehicles weighed, little equipment, minimum personnel, and weak penalties can be generally said to have ineffective enforcement programs. However, it is the FHWA's belief that it is not conversely possible to establish an effective program simply on the basis of the number of vehicles weighed. By requiring each State to analyze its needs and to manage its resources, in time all States will have effective enforcement programs.

For example, the guidelines which accompany this regulation support the regulation's presumption that 23 U.S.C. 127, which limits the weight of vehicles using the Interstate System, provides the States with a set of parameters for the design of structures and pavements. Similarly, it is the belief of the FHWA that the law of each State applicable to other Federal-aid systems provides a basis for structure and pavement design as well as for classifying vehicles for licensing purposes.

It is the belief that truck use of the Nation's highways should be limited to those vehicles with legislatively authorized gross vehicle and axle weights which underlies this regulation, and it is the explicit intent of the regulation to activate this belief by ensuring effective enforcement. It is a further fundamental presumption of this regulation that effective enforcement is predicated upon a high-volume weighing capability, utilizing a system of monitoring/weighing to maximize the potential for apprehension of weight violators. Permanent platform scales are the most effective means of achieving this goal, however, weighing-in-motion systems, semi-portable scales used in a strike-team concept and other techniques can also achieve the goal. Nevertheless, a State which chooses to adopt an enforcement plan without including provisions for high-volume weighing must demonstrate conclusively that such a plan will be as effective as one which includes the use of high-volume weighing.

The specific comments received in the docket have been accommodated and, with the principles set forth above as the underlying premise of the regulation, a discussion of the individual regulation sections follows.

The Final Rule

The response to the Notice of Proposed Rulemaking together with evaluation of the most recent certifications confirm the initial determination of the FHWA that little objective data are available in a format useful for the development of minimum criteria at this time. As a result no substantive changes have been made in the introductory sections of the regulation (657.1–657.7).

However, several changes have been made in § 657.9, which addresses the formulation of a plan for enforcement. Several comments were received on the requirement that the plan address facilities and resources. The major comment was that it was difficult to estimate the hours of personnel assignments in advance. There were also repeated comments indicating that the proposed rules appeared to remove the FHWA from any objective assessment of State efforts based on minimum acceptable numbers.

The requirement that equipment be sufficient to cover the Federal-aid systems has been modified to require that each State utilize a combination of two or more types of listed scales in its enforcement plan. This requirement is based on the significant technological advances which have been made since 1975, the first date of the certification requirement. At that time there were two basic types of equipment in use, the fixed platform scale and the portable wheel-weigher scale. In the interim, two additional scale types have come into use, the semi-portable scale and the weighing-in-motion (WIM) unit. Each of the 4 types of weighing equipment has unique capabilities with respect to the locations and facilities necessary for operation and in terms of the numbers of vehicles which can be weighed. The WIM and platform scales have a high capacity, while semi-portable scales are of a lesser capacity and wheel-weigher portable scales can be used on a selective basis at best.

A combination of the various types of equipment will enable every State to devise an effective program fitting its geographical and fiscal needs. It is particularly important that in those States relying on high-volume weighing equipment, programs should include plans for the deployment of portable weighing equipment on routes which bypass the fixed weighing locations.

This modification requiring the use of a mix of equipment derives from the FHWA analysis of types of weighing operations from which three generalized operations have been developed. In the *port-of-entry* or *perimeter weighing system*, operations are characterized by permanent facilities near State borders on major highways where inbound trucks must stop to be weighed and checked for motor vehicle law requirements (registration, fuel tax, reciprocity, etc.). Such operations are generally categorized by high numbers of vehicles weighed.

Many States have developed operations relying exclusively on *portable scales*, including a more recent addition of *semi-portable ramp-type scales*. This operation is categorized by selective enforcement, as personnel generally select only the obviously heavily laden vehicles for weighing. However, capacity is low and reporting for such systems is characterized by low numbers of vehicles weighed with relatively high numbers of citations.

Finally, several States have begun to develop systems using *combinations of high-volume equipment and portable or semi-portable equipment*. Such operations are distinguished from perimeter systems in that the fixed or high-volume scale placements are strategically located throughout the State rather than at or near State boundaries. Operations characterized by this system report high numbers of vehicles weighed.

This modification addresses the lack of measurable criteria by establishing a firm requirement for each State to equalize enforcement efforts as plans are developed.

A further modification deletes the requirement to identify staff assigned to the program by work hours. A general statement of the number of uniformed and administrative personnel assigned exclusively to size and weight enforcement will be sufficient.

Likewise, modifications have been made to the requirements for identifying practices and procedures in the plan. The comments received on the level of specificity and detail warrant some explanation of the intent of this section. The proposed plan of operation should be sufficiently detailed to indicate that the major Federal-aid systems will be covered on a regular basis daily and weekly. If operations are based on a 5-day work week, a 7-day round-the-clock week or some other system, this should be indicated in general terms. There is no need to provide shift charts on an individual or troop basis. It is the FHWA concern that the major systems be identified and that each State provide comprehensive geographical coverage with enforcement efforts underway throughout the day, night and week periods. Also, seasonal curtailments of efforts should be identified.

The policy and practices with respect to both special permits and violators are particularly important to the plan. It was apparent to the FHWA, in conducting the survey required by section 123 of the Surface Transportation Assistance Act of 1978, that little coordination among agencies is present, that policies and practices often depart from legal requirements, and that management personnel are often unaware of actual practices. It is the expectation of the FHWA that this requirement will induce each State to undertake a management review of practices and to make changes necessary to the efficient administration of a quality enforcement effort.

The requirements for policy and practices with respect to mobile homes and other oversized vehicles, and levels of weighing and measuring by highway class and by time of day and week have been deleted. The requirement for levels of weighing and measuring by highway class is red tape which involves statistical crystalball calculations of uncertain validity and significance. Also, it has been determined that the requirement for policies with respect to mobile homes and other oversized vehicles is unnecessary, because it does not significantly relate to the enforcement of weight laws.

In response to comments received from the States by the FHWA, on the difficulty of coordinating a State plan with State budgetary cycles and on the requirement for a semi-annual review of the State's operations, modifications have been made in the requirement for the evaluation of operations. The final regulation requires an initial submission of a plan on or before November 1, 1980, following which a State will be notified of the plan's acceptance or rejection. Updates shall be made on an annual basis with some flexibility for timing based on State legislative or budgetary cycles. The State must have an improved plan by October 1 of each year. Further, the requirement for FHWA review and evaluation of operations has been reduced to an annual requirement.

Modifications have also been made in § 657.15 with respect to the certification content, by eliminating the requirements for reporting data where those data do not have a significant value to the evaluation process.

Significant changes were made to the requirements for the submittal of changes in law; vehicles weighed; vehicles measured; reporting citations; reporting permits; and in the procedure for the reduction of funds. These changes are described below.

Submittal of changes in the law. Each State shall be required to submit a copy of any State law or regulation pertaining to vehicle sizes and weights adopted since the State's last certification, together with an analysis of changes made.

The analysis should include an assessment by the State's Attorney General where necessary. This requirement has been included to reduce the confusion which can result from a finding that a State law is inconsistent with 23 U.S.C. 127, particularly where several significant changes are made at one time. The analysis of changes made will enable the FHWA to identify and review amendments in a more efficient manner. This requirement will also enable highway management officials to develop more efficient mechanisms for communicating with State legislatures on such bills. Our experience indicates that laws which conflict with 23 U.S.C. 127 are often passed without the knowledge of highway management officials.

Vehicles weighed. In previous certification years the gross number of vehicles weighed was required to provide a level of comparison with a previous year's activity. But the gross number, which is derived from cumulative totals of vehicles weighted on high-volume as well as low-volume

V 45 / 154 AG 7 80 UMI

equipment, is meaningless in terms of developing criteria for performance. To develop such criteria, the numbers of vehicles weighed must be broken down by fixed scales, semi-portable scales, portable, and WIM units. Where vehicles are weighed on WIM equipment, only those vehicles weighed as part of an enforcement exercise are to be reported.

Vehicles measured. The confusion surrounding the measurement of vehicles for length has made this figure meaningless. As it is not a significant element in terms of evaluating the certification, the requirement for reporting a bulk number of vehicles measured for length is being deleted. This change does not mean that vehicle measurements need not be made in the future, as Federal law with respect to width, and State height and length laws, are still applicable, though they are not significant in evaluating enforcement programs.

Reporting Citations. The certification shall include citations for gross and axle weights and also now must include, by specific reference, violations of the bridge formula, which is the central element in ensuring compliance with 23 U.S.C. 127. In raising the permissible weight limit to 80,000 pounds in 1975, the Congress specifically made the number and spacing of axles a condition of the permissible truck weight on the Interstate, to prevent overstressing highway bridges. One State, Florida, which does maintain bridge formula enforcement efforts, contends that few other States may be enforcing the bridge formula. Data available to the FHWA through planning studies indicate that a high percentage of weight violations may be bridge formula violations. It is essential that the bridge formula be enforced and it is not possible to evaluate State efforts in this respect without a specific reporting of activity.

Reporting Permits. Only those numbers of permits issued for overweight and overweight-oversize combination loads shall be reported, with specific reference to whether the load was divisible or indivisible. The only breakdown necessary on trip types are the numbers issued on an annual basis and those issued on a trip basis, whether for 1 day, 3 days, 1 week, or 1 month. Specific breakdowns for each of the trip categories are not necessary. This will simplify recordkeeping and reporting requirements.

Reduction of Funds. Several comments indicated misunderstanding of the possibility for informal resolution in situations involving a certification which has been questioned. Such informal resolution is not only possible but encouraged. The regulation reflects the availability of an informal conference and procedures for making an explanation and offer of settlement which would resolve certification questions at the level of the Federal Highway Administrator. The regulation also clarifies the right of the States to secure formal administrative procedures to resolve such matters.

The regulation does not provide mandatory minimum or target numbers, but does require the application of relatively uniform management approaches to enforcement. It is the intent of the FHWA to bring about uniformity of effectiveness in encouraging management initiatives. In utilizing the guidelines, each State should be able to develop an acceptable plan which will provide satisfactory quantifications in the certification report. Changes will be recommended in the future to incorporate needed modifications as indicated by an expanded data base and experience with plan evaluations.

Note.—The Federal Highway Administration has determined that this document contains a significant regulation according to the criteria established by the Department of Transportation pursuant to Executive Order 12044. A regulatory evaluation is available for inspection in the public docket and may be obtained by contacting Mr. William Bauch at the address specified above.

This regulation is effective on October 1, 1980. The first submission under this regulation is due on November 1, 1980.

Issued on: August 4, 1980.

John S. Hassell, Jr.,

Federal Highway Administrator.

PART 658—NATIONAL MAXIMUM SPEED LIMIT; MAXIMUM VEHICLE SIZE AND WEIGHT

In consideration of the foregoing, Chapter I of Title 23, Code of Federal Regulations, is amended as follows:

§ 658.9 [Reserved]

1. Vacate and reserve from the table of sections in Part 658 the heading "§ 658.9 Certification of size and weight enforcement," and the corresponding section within the part.

2. Add a new Part 657 to read as set forth below:

PART 657—CERTIFICATION OF SIZE AND WEIGHT ENFORCEMENT

Sec.

657.1 Purpose.
657.3 Definition.
657.5 Policy.
657.7 Objective.
657.9 Formulation of a plan of enforcement.
657.11 Evaluation of operations.
657.13 Certification requirement.
657.15 Certification content.
657.17 Certification submittal.
657.19 Effect of failure to certify or to enforce State laws adequately.
657.21 Procedure for reduction of funds.
Appendix—Guidelines to be used in developing enforcement plans and certification evaluation.

Authority: Sec. 123, Surface Transportation Assistance Act of 1978, Pub. L. 95-599, 92 Stat. 2689; 23 U.S.C. 127, 141, and 315; 49 CFR 1.48(b).

§ 657.1 Purpose.

To prescribe requirements for administering a program of vehicle size and weight enforcement on Federal-aid (FA) highways, including the required annual certification by the State.

§ 657.3 Definition.

"Enforcing" or "enforcement" means all actions by the State to obtain compliance with size and weight requirements by all vehicles operating on the FA Interstate, primary, urban, and secondary systems.

§ 657.5 Policy.

Federal Highway Administration (FHWA) policy is that each State enforce vehicle size and weight laws to assure that violations are discouraged and that vehicles traversing the highway system do not exceed the limits specified by law. These size and weight limits are based upon design specifications and safety considerations, and enforcement shall be developed and maintained both to prevent premature deterioration of the highway pavement and structures and to provide a safe driving environment.

§ 657.7 Objective.

The objective of this regulation is the development and operation by each State of an enforcement process which identifies vehicles of excessive size and weight and provides a systematic approach to eliminate violations and thus improve conditions.

§ 657.9 Formulation of a plan for enforcement.

(a) Each State shall develop a plan for the maintenance of an effective enforcement process. The plan shall describe the procedures, resources, and facilities which the State intends to devote to the enforcement of its vehicle size and weight laws. Each State plan must be accepted by the FHWA and will then serve as a basis by which the annual certification of enforcement will be judged for adequacy.

(b) The plan shall discuss the following subjects:

(1) *Facilities and resources.* (i) No program shall be approved which does not utilize a combination of at least two of the following listed devices to deter evasion of size and weight measurement in sufficient quantity to cover the FA system: fixed platform scales; portable wheel weigher scales; semiportable or ramp scales; WIM equipment.

(ii) Staff assigned to the program, identified by specific agency. Where more than one State agency has weight enforcement responsibility, the lead agency should be indicated.

(2) *Practices and procedures.* (i) Proposed plan of operation, including geographical coverage and hours of operation in general terms.

(ii) Policy and practices with respect to overweight violators, including off-loading requirements for divisible loads. In those States in which off-loading is mandatory by law, an administrative variance from the legal requirement shall be fully explained. In those States in which off-loading is permissive administrative guidelines shall be included.

(iii) Policy and practices with respect to penalties, including those for repeated violations. Administrative directives, booklets or other written criteria shall be made part of the plan submission.

(iv) Policy and practices with respect to special permits for overweight. Administrative directives, booklets or other written criteria shall be made part of the plan submission.

(3) *Updating.* Modification and/or additions to the plan based on experience and new developments in the enforcement program. It is recognized that the plan is not static and that changes may be required to meet changing needs.

§ 657.11 Evaluation of operations.

(a) The State shall submit its initial plan to the FHWA Division Administrator on or before November 1, 1980. Following consultation with the FHWA Regional Administrator, the State will be notified of its acceptance or rejection. The plan shall be updated annually thereafter, preferably on or before July 1, but an alternate date acceptable to both the FHWA and the State, may be chosen if a State's legislative or budgetary cycle is not consonant with July 1. In any event, a State must have an approved plan in effect by October 1 of each year. Failure of a State to submit or update a plan will be deemed to be a failure to certify in accordance with § 657.13.

(b) The FHWA division office shall review the State's operation under the accepted plan on a continuing basis and shall prepare an evaluation report annually. The State will be advised of the results of the evaluation, and of any needed changes either in the plan itself or in its implementation. Copies of the evaluation report and subsequent modifications resulting from the evaluation shall be forwarded through the region to the Washington Headquarters.

§ 657.13 Certification requirement.

Each State shall certify to the Federal Highway Administrator before January 1 of each year that it is enforcing all State laws respecting maximum vehicle size and weight permitted on the FA primary, secondary, and urban systems, including the Interstate System, in accordance with 23 U.S.C. 127. The certification shall be supported by information on activities and results achieved during the preceding 12-month period ending on September 30.

§ 657.15 Certification content.

The certification shall consist of the following elements and each element shall be addressed even though the response is negative:

(a) A statement by the Governor of the State, or an official designated by the Governor, that the size and weight laws and regulations in the State governing use of the Interstate System conform to 23 U.S.C. 127.

(b) A statement by the Governor of the State, or an official designated by the Governor, that all State size and weight limits are being enforced on the FA Interstate, primary, urban, and secondary systems. Urban areas not subject to State jurisdiction shall be identified and the statement shall address total FA mileage involved and an analysis of enforcement efforts in such areas.

(c) The certifying statement required by paragraphs (a) and (b) of this section shall be worded as follows: I (name of certifying official), (position title), of the State of , do hereby certify that all State laws and regulations are being enforced on the FA primary, urban, and secondary systems and the Interstate System in accordance with 23 U.S.C. 127.

(d) A copy of any State law or regulation pertaining to vehicle sizes and weights adopted since the State's last certification and an analysis of the changes made. Those laws and regulations pertaining to special permits and penalties shall be specifically identified and analyzed in accordance with section 123 of the Surface Transportation Assistance Act of 1978 (Pub. L. 95-599).

(e) A report of State size and weight enforcement efforts during the period covered by the certification which addresses the following:

(1) Actual operations as compared with those forecast by the plan submitted earlier, with particular attention to changes in or deviations from the operations proposed.

(2) Impacts of the process as actually applied, in terms of changes in the number of oversize and/or overweight vehicles.

(3) Measures of activity.

(i) Vehicles weighed. Separate totals shall be reported for the annual number of vehicles weighed on fixed scales, on semi-portable scales, on portable scales, and on WIM when used for enforcement.

(ii) Penalties reported shall include citations issued, civil assessments, and incidences of load shifting or off-loading of excess weight categorized as follows: violations of axle and/or gross vehicle weights, or violations resulting from application of the bridge formula.

(iii) Permits. The number of permits issued for *overweight* loads shall be reported. The reported numbers shall specify permits for divisible and nondivisible loads and whether issued on a trip or annual basis. Permits issued for excess height, length, or width need not be reported except where issued for the overwidth movement of a divisible load.

§ 657.17 Certification submittal.

(a) The Governor, or an official designated by the Governor, shall each year submit one copy of the certification to the FHWA Division Administrator prior to January 1.

(b) The division office shall forward the original certification to the Office of the Chief Counsel and one copy to the Associate Administrator for Engineering and Traffic Operations. Copies of appropriate evaluations and/or comments shall accompany any transmittal.

§ 657.19 Effect of failure to certify or to enforce State laws adequately.

Beginning January 1, 1981, if a State fails to certify as required by this regulation or if the Secretary determines that a State is not adequately enforcing all State laws respecting maximum vehicle sizes and weights on FA highways notwithstanding the State's certification, the FA highway funds apportioned to the State for the next fiscal year shall be reduced by an amount equal to 10 percent of the amount which would otherwise be apportioned to the State under 23 U.S.C. 104, and/or by the amount required pursuant to 23 U.S.C. 127.

V 45 / 154
AG 7 80
UMI

§ 657.21 Procedure for reduction of funds.

(a) If it appears to the Federal Highway Administrator that a State has not submitted a certification conforming to the requirements of this regulation, or that the State is not adequately enforcing State laws respecting maximum vehicle size and weight, including laws applicable to vehicles using the Interstate System with weights or widths in excess of those provided under 23 U.S.C. 127, the Federal Highway Administrator shall make in writing a proposed determination of nonconformity, and shall notify the Governor of the State of the proposed determination by certified mail. The notice shall state the reasons for the proposed determination and inform the State that it may, within 30 days from the date of the notice, request a hearing to show cause why it should not be found in nonconformity. If the State informs the Administrator before the end of this 30-day period that it wishes to attempt to resolve the matter informally, the Administrator may extend the time for requesting a hearing. In the event of a request for informal resolution, the State and the Administrator (or designee) shall promptly schedule a meeting to resolve the matter.

(b) In all instances where the State proceeds on the basis of informal resolution, a transcript of the conference will be made and furnished to the State by the FHWA.

(1) The State may offer any information which it considers helpful to a resolution of the matter, and the scope of review at the conference will include, but not be limited to, legislative actions, including those proposed to remedy deficiencies, budgetary considerations, judicial actions, and proposals for specific actions which will be implemented to bring the State into compliance.

(2) The information produced at the conference may constitute an explanation and offer of settlement and the Administrator will make a determination on the basis of the certification, record of the conference, and other information submitted by the State. The Administrator's final decision together with a copy of the transcript of the conference will be furnished to the State.

(3) If the Administrator does not accept an offer of settlement made pursuant to paragraph (b)(2) of this section, the State retains the right to request a hearing on the record pursuant to paragraph (d) of this section, except in the case of a violation of section 127.

(c) If the State does not request a hearing in a timely fashion as provided in paragraph (a) of this section, the Federal Highway Administrator shall forward the proposed determination of nonconformity to the Secretary. Upon approval of the proposed determination by the Secretary, the fund reduction specified by § 657.19 shall be effected.

(d) If the State requests a hearing, the Secretary shall expeditiously convene a hearing on the record, which shall be conducted according to the provisions of the Administrative Procedure Act, 5 U.S.C. 555 *et seq.* Based on the record of the proceeding, the Secretary shall determine whether the State is in nonconformity with this regulation. If the Secretary determines that the State is in nonconformity, the fund reduction specified by section 567.19 shall be effected.

(e) The Secretary may reserve 10 percent of a State's apportionment of funds under 23 U.S.C. 104 pending a final administrative determination under this regulation to prevent the apportionment to the State of funds which would be affected by a determination of nonconformity.

(f) Funds withheld pursuant to a final administrative determination under this regulation shall be reapportioned to all other eligible States one year from the date of this determination, unless before this time the Secretary determines, on the basis of information submitted by the State and the FHWA, that the State has come into conformity with this regulation. If the Secretary determines that the State has come into conformity, the withheld funds shall be released to the State.

(g) The reapportionment of funds under paragraph (e) of this section shall be stayed during the pendency of any judicial review of the Secretary's final administrative determination of nonconformity.

Appendix.—Guidelines To Be Used in Developing Enforcement Plans and Certification Evaluation

A. Facilities and Equipment

1. Permanent Scales
   a. Number
   b. Location (a map appropriately coded is suggested)
   c. Public-private (if any)
2. Weigh-in-motion (WIM)
   a. Number
   b. Location (notation on above map is suggested)
3. Semi-portable scales
   a. Type and number
   b. If used in sets, the number comprising a set
4. Portable Scales
   a. Type and number
   b. If used in sets, the number comprising a set

B. Resources

1. Agencies involved (i.e., highway agency, State police, motor vehicle department, etc.)
2. Personnel—numbers from respective agencies assigned to weight enforcement
3. Funding
   a. Facilities
   b. Personnel

C. Practices

1. Proposed schedule of operation of fixed scale locations in general terms
2. Proposed schedule of deployment of portable scale equipment in general terms
3. Proposed schedule of deployment of semi-portable equipment in general terms
4. Strategy for prevention of bypassing of fixed weighing facility location
5. Proposed action for implementation of off-loading, if applicable

D. Goals

1. Short term—the year beginning October 1 following submission of a vehicle size and weight enforcement plan
2. Medium term—2–4 years after submission of the enforcement plan
3. Long term—5 years beyond the submission of the enforcement plan
4. Provision for annual review and update of vehicle size and weight enforcement plan

E. Evaluation

The evaluation of an existing plan, in comparison to goals for strengthening the enforcement program, is a difficult task, especially since there is very limited experience nationwide.

The FHWA plans to approach this objective through a continued cooperative effort with State and other enforcement agencies by gathering useful information and experience on elements of enforcement practices that produce positive results.

It is not considered practicable at this time to establish objective minimums, such as the number of vehicles to be weighed by each State, as a requirement for satisfactory compliance. However, the States will want to know as many specifics as possible about what measuring tools will be used to evaluate their annual certifications for adequacy.

The above discussion goes to the heart of the question concerning numerical criteria. The assumption that a certain number of weighings will provide a maximum or even satisfactory deterrent is not supportable. The enforcement of vehicle size and weight laws requires that vehicles be weighed but it does not logically follow that the more vehicles weighed, the more effective the enforcement program, especially if the vehicles are weighed at a limited number of fixed locations. A "numbers game" does not necessarily provide a deterrent to deliberate overloading. Consistent, vigorous enforcement activities, the certainty of apprehension and of penalty, the adequacy of the penalty, even the publicity given these factors, may be greater deterrents than the number of weighings alone.

In recognizing that all States are unique in character, there are some similarities between certain States and useful perspectives may be obtained by relating their program elements. Some comparative factors are:

1. Truck registration (excluding pickups and panels)
2. Population
3. Average Daily Traffic (ADT) for trucks on FA highways
4. To total mileage of Federal-aid highways
5. Geographic location of the State
6. Annual truck miles traveled in State
7. Number of truck terminals (over 6 doors)
8. Vehicle miles of intrastate truck traffic

Quantities relating to the above items can become factors that in the aggregate are descriptive of a State's characteristics and can identify States that are similar from a trucking operation viewpoint. This is especially applicable for States within the same area.

After States with similar truck traffic operations have been identified in a regional area, another important variable must be considered: the type of weighing equipment that has been or is proposed for predominant use in the States. When data become available on the number of trucks weighed by each type of scale (fixed, portable, semi-portable, etc.) some indicators will be developed to relate one State's effort to those of other States. The measures of activity that are a part of each certification submitted will provide a basis for the development of more precise numerical criteria by which an enforcement plan and its activities can be judged for adequacy.

Previous certifications have provided information from which the following gross scale capabilities have been derived.

Potential Weighing Capacities

1. Permanent scales 60 veh/hr.
2. Weigh-in-motion scales 100 veh/hr.
3. Semi-portable scales 25 veh/hr.
4. Portable scales 3 veh/hr.

To meet the mandates of Federal and other laws regarding truck size and weight enforcement, the FHWA desires to become a resource for all States in achieving a successful exchange of useful information. Some States are more advanced in their enforcement activities. Some have special experience with portable, semi-portable, fixed, or weighing-in-motion devices. Others have operated permanent scales in combination with concentrated safety inspection programs. The FHWA is interested in information on individual State experiences in these specialized areas as part of initial plan submissions. If such information has recently been furnished to the Washington Headquarters, an appropriate cross reference should be included on the submission.

It is the policy of the FHWA to avoid red tape, and information volunteered by the States will be of assistance in meeting many needs. The ultimate goal in developing information through the evaluation process is to assemble criteria for a model enforcement program.

BILLING CODE 4910-22-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Assistant Secretary for Housing-Federal Housing Commissioner

24 CFR Part 869

[Docket No. R-80-829]

Low-Income Public Housing—PHA-Owned Projects—Continued Operation as Low-Income Housing After Completion of Debt Service

AGENCY: Department of Housing and Urban Development (HUD).

ACTION: Interim rule and request for comments.

SUMMARY: This Interim Rule implements certain amendments to § 9 of the United States Housing Act of 1937, pertaining to continued operation of a public housing project as low-income housing after the completion of debt service for the project. These statutory changes wer made by section 211 of the Housing and Community Development Amendments of 1979.

EFFECTIVE DATE: September 15, 1980.

COMMENT DUE DATE: October 6, 1980.

ADDRESS: Send comments to the Rules Docket Clerk, Office of General Counsel, Room 5218, Department of Housing and Urban Development, 451 Seventh Street, S.W., Washington, D.C. 20410. Each comment should include the commentor's name and address, and must refer to the docket number indicated in the heading of this document. Copies of all written comments received will be available for copying and inspection in the Office of the Rules Docket Clerk at the above address. The rule may be changed in the light of comments received.

FOR FURTHER INFORMATION CONTACT: Wayne Hunter, Office of Public Housing, Department of Housing and Urban Development, 451 Seventh Street, S.W., Washington, D.C. 20410, telephone number (202) 755-6460 (this is not a toll-free number).

SUPPLEMENTARY INFORMATION: This rule, which implements recent amendments to the United States Housing Act of 1937, (Act) made by § 211 of the Housing and Community Development Amendments of 1979, provides a basis for maintaining the low-income nature of a public housing project after the completion of all debt service on the project under § 5 of the Act. Specifically, the Act states that a PHA may not dispose of a public housing project without HUD approval for 10 years after all operating subsidy payments for that project have ceased. Under this rule, the maintenance of the low-income nature of a project allows for continued eligibility for payment of operating subsidy with respect to the project. This rule is applicable only to public housing projects owned by public housing agencies (PHAs).

For most of the PHA-owned public housing projects whose Annual Contributions Contract (ACC) terms would otherwise expire within the next few years, as a result of the completion of debt service, the ACC terms have been, or are expected to be, extended in connection with modernization, pursuant to 24 CFR 868. For those projects which may not be included under modernization programs before the expiration of their existing ACC terms, this rule provides for extension of the term of those ACC provisions which relate to project operation. ACC provisions related to development and debt service would not remain in effect for the project during such an extension.

For use in determining the exact time of ACC expiration for a particular project, § 869.103(a) sets forth a definition of "ACC Expiration Date." Provision is made in § 869.104 for the payment of operating subsidy with respect to a project during continued operation as low-income public housing, until and after the completion of debt service, pursuant to an ACC amendment under § 869.105 or § 869.108, extending the term of the ACC provisions related to project operation.

Under § 869.105, this rule requires that, as a condition for the first HUD approval for payment of operating subsidy under a particular ACC for a PHA fiscal year beginning after the effective date of this rule, the PHA and HUD must enter into an ACC amendment stipulating that each project which is subject to the ACC shall continue to be operated as low-income public housing, on accordance with the ACC provisions related to project operation, for a period of 10 years after the last PHA fiscal year for which operating subsidy is paid with respect to the project.

An ACC amendment under § 869.105 will result in an automatic extension for any project under an ACC whenever, and to the extent that, less than 10 years of the project's ACC term would otherwise remain after the end of the last PHA fiscal year for which operating subsidy is paid with respect to the project. After the initial ACC extension is effected under § 869.105, successive annual payments of operating subsidy with respect to the project will automatically result in successive annual extensions of the project's ACC

term. Complete expiration for a project will occur only if no operating subsidy is paid with respect to the project for the last 10 years of the project's ACC term. Even if a PHA chooses to accept no further operating subsidy for a project, the Act requires that it still seek HUD approval for disposition of the project for a period of 10 years following the last operating subsidy payment.

Where there is a Consolidated ACC covering two or more projects, the PHA's decision not to receive operating subsidy for any of the projects will result in a reduction of the total amount of operating subsidy payable under the ACC, as explained in § 869.105(b). Before deciding not to receive operating subsidy for a particular project under § 869.105, the PHA should evaluate the impact of such a decision on the other projects under the ACC.

Where the project has not received operating subsidy for the last 10 years of its ACC term and thus is not subject to an ACC extension under § 869.105, the PHA may still desire such an extension as a basis for maintaining the project's eligibility for operating subsidy beyond the anticipated date of ACC expiration. For this situation, § 869.106 provides that, upon request by the PHA, HUD may approve a one to ten year extension of the term of the ACC provisions related to project operation.

Notwithstanding these provisions, HUD may approve the disposition of a project before the scheduled expiration of the term of the ACC for the project (i.e., at any time prior to the completion of debt service or during an extended term under this Part). This possibility is acknowledged in § 869.107, which makes it clear that this Part is not intended to restrict or preclude demolition or disposition of a project pursuant to HUD approval in accordance with 24 CFR 870.

This rule is being issued as an Interim Rule because it is urgent that the statutory changes mandated by § 211 of the Housing and Community Development Amendments of 1979 be implemented immediately. Unless the Annual Contributions Contracts governing certain Low-Income Public Housing projects are extended before their scheduled expiration dates, the affected projects will become ineligible for operating subsidy after ACC expiration, and some local Public Housing Agencies may be unable in that case to maintain the decent, safe and sanitary housing they now provide to the low-income residents of the projects that would be affected. The first of the ACC expirations which are affected by these statutory changes is scheduled for October 1980 and additional expirations are scheduled to occur in 1981. It is very important for this rule to be in place well before any expirations occur, so that local PHAs may have planning time to consider the options this rule offers.

A Finding of Inapplicability respecting the National Environmental Policy Act of 1969 had been made in accordance with HUD procedures. A copy of this Finding of Inapplicability is available for public inspection in the Office of the Rules Docket Clerk at the above address.

This rule is listed as item number H-60-79 in the Department's semi-annual agenda of significant rules, published pursuant to Executive Order 12044.

Accordingly, Chapter VIII of Title 24 of the Code of Federal Regulations is amended to add a new Part 869, as follows:

PART 869—PHA-OWNED PROJECTS—CONTINUED OPERATION AS LOW-INCOME HOUSING AFTER COMPLETION OF DEBT SERVICE

Sec.

869.101 Purpose.
869.102 Applicability.
869.103 Definitions.
869.104 Continuing eligibility for operating subsidy.
869.105 Extension of ACC upon payment of operating subsidy.
869.106 ACC extension in absence of current operating subsidy.
869.107 HUD approval of demolition or disposition before ACC expiration.

Authority: United States Housing Act of 1937, (42 U.S.C. 1437 et seq.); Section 7(d), Department of HUD Act (42 U.S.C. 3535(d)).

§ 869.101 Purpose.

This Part provides a basis for maintaining the low-income nature of a public housing project after the completion of debt service on the project, specifying methods for extending the effective period of those provisions of the Annual Contributions Contract (ACC) which relate to project operation. Such an extension provides a contractual basis for the continued operation of the project under the Low-Income Public Housing Program, including continued eligibility for Operating Subsidy.

§ 869.102 Applicability.

This Part applies to any low-income public housing project which, on or after the effective date of this Part, is owned by a Public Housing Agency (PHA) and is subject to an ACC under § 5 of the United States Housing Act (Act), including any Turnkey III or Mutual Help housing which is owned by the PHA. This Part does not apply to the Section 8 and Section 23 Housing Assistance Payments Programs, the Section 10(c) and Section 23 Leased Housing Programs, or Lanham Act projects which remain under Administration Contracts.

§ 869.103 Definitions.

(a) "ACC Expiration Date" means the last day of the term during which a particular public housing project is subject to all or any of the provisions of the ACC. The ACC term for a particular project expires at the latest of:

(1) The end of the "Debt Service Completion Date," which is the last day of a one-year period beginning with, and inclusive of, the last debt service Annual Contribution Date for the project, as determined under the ACC (e.g., if the last debt service Annual Contribution Date is June 15, 1983, the one-year period continues through the end of the day on June 14, 1984, which is the Debt Service Completion Date); or

(2) The end of the date of full repayment of any indebtedness of the PHA to the Federal government in connection with the project; or

(3) The end of the last date of an extension of the term of the ACC provisions related to project operation, as effected under § 869.105 or § 869.106.

(b) "Operating Subsidy" means additional annual contributions for operations under section 9 of the Act.

§ 869.104 Continuing eligibility for operating subsidy.

Until and after the Debt Service Completion Date for any project, HUD shall pay Operating Subsidy with respect to such project only in accordance with an ACC amendment providing for extension of the term of the ACC provisions related to project operation, pursuant to § 869.105 or § 869.106. The ACC amendment shall be in the form prescribed by HUD and shall specify the particular provisions of the ACC which relate to continued project operation and, therefore, remain in effect for the extended ACC term. These provisions shall include a requirement that the PHA execute and file for public record an appropriate document evidencing the PHA's covenant not to convey, encumber or make any other disposition of the project before the end of the project's ACC Expiration Date, without HUD approval.

§ 869.105 Extension of ACC upon payment of operating subsidy.

(a) *ACC Amendment.* As a condition for the first HUD approval for payment of Operating Subsidy with respect to the projects under a particular ACC for a PHA fiscal year beginning after the effective date of this Part, the PHA and HUD shall enter into an amendment to the ACC for all projects under the ACC. This ACC amendment shall provide that the ACC provisions related to project operation shall continue in effect with respect to each project under the ACC for a period of 10 years after the end of the last PHA fiscal year for which Operating Subsidy is paid with respect to the project.

(b) *Consolidated ACC.* Where a single ACC covers more than one project (Consolidated ACC), each annual Operating Subsidy payable under that ACC is a lump-sum amount, which is not divided into discrete amounts for the individual projects which are subject to the Consolidated ACC (see 24 CFR 890). Accordingly, if a PHA, before submitting a request for Operating Subsidy pursuant to paragraph (a) of this section, determines that any project(s) under the Consolidated ACC will not require Operating Subsidy and should not be subject to the provisions of paragraph (a), the PHA shall accompany its request with a resolution certifying that no Operating Subsidy shall be utilized with respect to such project(s) after the effective date of this rule and that all financial records and accounts shall be kept separately for such project(s). In such case, the removal of the project(s) from the request for Operating Subsidy shall be reflected by the exclusion of that number of unit months available for the project(s) when making the calculations, under 24 CFR 890, for determination of the total amount of Operating Subsidy payable under the Consolidated ACC. In any event, no Operating Subsidy payable under a Consolidated ACC or otherwise shall be used to pay, directly or indirectly, any costs attributable to a project which is ineligible or otherwise excluded from Operating Subsidy under § 869.104. Even if no Operating Subsidy is received with respect to a project, the PHA remains obligated to maintain and operate the project in accordance with the provisions of the ACC related to project operation so long as those ACC provisions remain in effect.

§ 869.106 ACC extension in absence of current operating subsidy.

Where Operating Subsidy under an ACC is not approved for payment during a time period which results in extension of the term of the ACC provisions related to project operation, with respect to a particular project, pursuant to § 869.105, the PHA shall, at least one year before the anticipated ACC Expiration Date for the project, notify HUD as to whether or not the PHA desires to maintain a basis for receiving Operating Subsidy with respect to the project after the anticipated ACC Expiration Date. This notification shall be submitted to the appropriate HUD Field Office in the form of a resolution of the PHA's Board of Commissioners. If the PHA does not desire to maintain a basis for Operating Subsidy payments with respect to the project after the anticipated ACC Expiration Date, the resolution shall certify that no Operating Subsidy shall be utilized with respect to the project after the effective date of this rule and that all financial records and accounts for such a project shall be kept separately. If the PHA does desire to maintain a basis for such Operating Subsidy payments, the resolution shall include the PHA's request for extension of the term of the ACC provisions related to project operation, for a period of not less than one nor more than 10 years. Upon HUD's receipt of the request, HUD and the PHA shall enter into an ACC amendment effecting the extension for the period requested by the PHA, unless HUD finds that continued operation of the project cannot be justified under the standards set forth in 24 CFR 870 (HUD's regulation on demolition or disposition of public housing).

§ 869.107 HUD approval of demolition or disposition before ACC expiration.

This Part is not intended to preclude or restrict the demolition or disposition of a project pursuant to HUD approval in accordance with 24 CFR 870. Subject to the requirements of 24 CFR 870, HUD may authorize a PHA to demolish or dispose of public housing at any time before the ACC Expiration Date.

Issued at Washington, D.C., June 25, 1980.

Lawrence B. Simons,

Assistant Secretary for Housing—Federal Housing Commissioner.

BILLING CODE 4210-01-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[T.D. 7712]

Income Tax; Investment in United States Property by Controlled Foreign Corporations

AGENCY: Internal Revenue Service. Treasury.

ACTION: Final regulations.

SUMMARY: This document provides final regulations relating to the exceptions to the definition of United States property under section 956 (b) (2) of the Internal Revenue Code of 1954. Changes in the applicable tax law were made by the Tax Reform Act of 1976. This document also contains final regulations under section 956 (c) which affect the computation of the investment of earnings in United States property by controlled foreign corporations. The regulations provide the public with the guidance needed to comply with the provisions of the Tax Reform Act of 1976 as well as guidance with respect to the clarification of existing regulations. The final regulations affect controlled foreign corporations making certain investments in United States property and their United States shareholders.

DATE: The amendments in general apply to taxable years beginning after December 31, 1975 except that the amendment to § 1.956–2 (c) (2) applies with respect to pledges made after September 8, 1980.

FOR FURTHER INFORMATION CONTACT: Jacob Feldman of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, N.W., Washington, D.C. 20224, Attention: CC:LR:T 202–566–3289, not a toll-free call.

SUPPLEMENTARY INFORMATION:

Background

On April 23, 1979, the **Federal Register** published proposed regulations under sections 956 and 958 of the Internal Revenue Code of 1954 (44 FR 23880). Amendments under section 956 (a), (b)(2), and 958 were proposed to conform the regulations to amendments made to the Code by section 1021 of the Tax Reform Act of 1976 (90 Stat. 1618). Amendments made under section 956 (c) were intended to clarify existing regulations. A public hearing was held on October 30, 1979. After consideration all comments regarding the proposed amendments, this Treasury decision is adopted.

Discussion

The proposed amendments made changes to the regulations under section 965 (b) and 958 to conform the regulations to amendments made to the Code by section 1021 of the Tax Reform Act of 1976 (90 Stat. 1618). In addition, amendments were made to the regulations under section 956 (c) to clarify existing regulations.

Proposed § 1.956–2 (c) (2) dealing with indirect pledges or guarantees has been modified. Under the final regulations the pledge of stock of a controlled foreign corporation will be considered as an indirect pledge of the assets of the controlled foreign corporation only if at least 66⅔ percent of the voting power of the stock of the controlled foreign

corporation is pledged and only if, in addition, the pledge of stock is accompanied by negative covenants or similar restrictions. This provision applies to pledges made after September 8, 1980.

Proposed § 1.956–2 (c) (3) dealing with the facilitation of loans to shareholders has been eliminated. Although the Committee Report accompanying the Tax Reform Act of 1976 supports the position taken in the proposed regulations, a number of comments were received that the proposed section was too vague and could be misconstrued to cover situations not prohibited by section 956. Any need for specificity will be covered in rulings on particular facts. Examples (4) and (5) under proposed § 1.956–2 (c) (3) have also been eliminated. Example (4) dealt with the operation of an effective date which has been modified and Example (5) dealt with the concept of facilitation.

A change was also made under proposed § 1.956–2 (b) (1) (ix) in order to expand the concept of "when used" to include situations in which equipment has been purchased for use and not as yet used. Another change of a clarifying nature was made under § 1.956–2 (b) (1) (ix) with respect to the definition of movable drilling rigs and other oil and gas exploration and exploitation equipment used on the continental shelf of the United States.

Drafting Information

The principal author of these regulations is Jacob Feldman of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations, both on matters of substance and style.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR Part 1 is amended as follows:

Paragraph 1. Paragraph (b) of § 1.956–1 is amended by redesignating subparagraphs (2) and (3) as subparagraphs (3) and (4), respectively, and by adding new subparagraph (2) to read as set out below:

§ 1.956–1 Shareholder's pro rata share of a controlled foreign corporation's increase in earnings invested in United States property.

* * * * *

(b) *Amount of a controlled foreign corporation's investment of earnings in United States property.* * * *

(2) *Aggregate amount of United States property.* For purposes of determining an increase in earnings invested in United States property for any taxable year beginning after December 31, 1975, the aggregate amount of United States property held by a controlled foreign corporation at the close of—

(i) Any taxable year beginning after December 31, 1975, and

(ii) The last taxable year beginning before January 1, 1976

does not include stock or obligations of a domestic corporation described in section 956(b)(2)(F) or movable property described in section 956(b)(2)(G).

Par. 2. Section 1.956–2 is amended as follows:

1. Paragraph(b)(1) is amended by revising subdivision (iii), by redesignating subdivision (viii), as subdivision (x), and by adding subdivisions (viii) and (ix) as set forth below.

2. Paragraph (c) is amended as follows:

a. Subparagraph (1) amended by deleting "subparagraph (2)" from the first sentence and by inserting in lieu thereof "subparagraph (4)", and by deleting the last sentence and the examples.

b. Subparagraph (2) is redesignated as subparagraph (4) and new subparagraphs (2) and (3) are added to read as set forth below.

3. Paragraph (d)(1)(i) is revised by deleting "of paragraph (a)" from the first sentence, and by revising paragraph (d)(1)(i)(*b*) to read as set forth below.

4. Paragraph (d)(2) is revised by deleting "of paragraphs (a)(1)(iii) and (b)(1)(v)" from the first sentence.

§ 1.956–2 Definition of United States property.

(b) *Exceptions*—(1) *Excluded property.* * * *

(iii) Deposits with persons carrying on the banking business, unless the deposits serve directly or indirectly as a pledge or guarantee within the meaning of paragraph (c) of this section. See paragraph (e)(2) of § 1.956–1.

* * * * *

(viii) For taxable years beginning after December 31, 1975, the voting or nonvoting stock or obligations of an unrelated domestic corporation. For purposes of this subdivision, an unrelated domestic corporation is a domestic corporation which is neither a United States shareholder (as defined in section 951(b)) of the controlled foreign corporation making the investment, nor a corporation 25 percent or more of whose total combined voting power of all classes of stock entitled to vote is owned or considered as owned (within the meaning of section 958 (b)) by United States shareholders of the controlled foreign corporation making the investment. The determination of whether a domestic corporation is an unrelated corporation is made immediately after each acquisition of stock or obligations by the controlled foreign corporations.

(ix) For taxable years beginning after December 31, 1975, movable drilling rigs or barges and othet movable exploration and exploitation equipment (other than a vessel or an aircraft) which are used exclusively on the Continental Shelf (as defined in section 638) of the United States in the exploration for, development, removal or transportation of natural resources from or under ocean waters. Property of the kind described in this subdivision which is being constructed or is in storage or in transit within the United States meets the requirements of § 1.956–2(b)(1) defining excluded property if it is actually used on the Continental Shelf by the last day of the taxable year following the year of purchase, commencement of storage or commencement of transit, and has nto been used by the taxpayer anyplace else. In general, the type of property which qualifies for the exception under this subdivision includes any movable property which would be entitled to the investment credit if used outside the United States in certain geographical areas of the Western Hemisphere pursuant to section 48(a)(2)(B) (x) (without reference to sections 49 and 50).

* * * * *

(c) *Treatment of pledges and guarantees*— (1)*General rule.* * * *

(2) *Indirect pledge or guarantee.* If the assets of a controlled foreign corporation serve at any time, even though indirectly, as security for the performance of an obligation of a United States person, then, for purposes of paragraph (c)(1) of this section, the controlled foreign corporation will be considered a pledgor or guarantor of that obligation. For this purpose the pledge of stock of a controlled foreign corporation will be considered as the indirect pledge of the assets of the corporation if at least 66 2/3 percent of the total combined voting power of all classes of stock entitled to vote is pledged and if the pledge of stock is accompanied by one or more negative covenants or similar restrictions on the shareholder effectively limiting the corporation's discretion with respect to the disposition of assets and the incurrence of liabilities other than in the ordinary course of business. This paragraph (c)(2) applies only to pledges and guarantees which are made after September 8, 1980. For purposes of this paragraph (c)(2) a refinancing shall be considered as a new pledge or guarantee.

(3) *Illustrations.* The following examples illustrate the application of this paragraph (c):

Example (1). A, a United States person, bortows $100,000 from a bank in foreign country X on December 31, 1964. On the same date controlled foreign corporation R pledges its assets as security for A's performance of A's obligation to repay such loan. The place at which or manner in which A uses the money is not material. For-purposes of paragraph (b) of § 1.956–1, R Corporation will be considered to hold A's obligation to repay the bank $100,000, and, under the provisions of paragraph (e)(2) of § 1.956–1, the amount taken into account in computing R Corporation's aggregate investment in United States property on December 31, 1964, is the unpaid principal amount of the obligation on that date ($100,000).

Example (2). The facts are the same as in example (1), except that R Corporation participates in the transaction, not by pledging its assets as security for A's performance of A's obligation to repay the loan, but by agreeing to buy for $1,00,000 at maturity the note representing A's obligation if A does not repay the loan. Separate arrangements are made with respect to the payment of the interest on the loan. The agreement of R Corporation to buy the note constitutes a guarantee of A's obligation. For purposes of paragraph (b) of § 1.956–1, R Corporation will be considered to hold A's obligation to repay the bank $100,000, and, under the provisions of paragraph (e)(2) of § 1.956–1, the amount taken into account in computing R Corporation's aggregate investment in United States property on December 31, 1964, is the unpaid principal amount of the obligation on that date ($100,000).

Example (3). A, a United States person, borrows $100,000 from a bank on December 10, 1981, pledging 70 percent of the stock of X, a controlled foreign corporation, as collateral for the loan. A and X use the calendar year as their taxable year. in the loan agreement, among other things, A agrees not to cause or permit X Corporation to do any of the following without the consent of the bank:

(a) Borrow money or pledge assets, except as to borrowings in the ordinary course of business of X Corporation;

(b) Guarantee, assume, or become liable on the obligation of another, or invest in or lend funds to another;

(c) Merge or consolidate with any other corporation or transfer shares of any controlled subsidiary;

(d) Sell or lease (other than in the ordinary course of business) or otherwise dispose of any substantial part of its assets;

(e) Pay or secure any debt owing by X Corporation to A; and

(f) Pay any dividends, except in such amounts as may be required to make interest or principal payments on A's loan from the bank.

A retains the right to vote the stock unless a default occurs by A. Under paragraph (c)(2) of this section, the assets of X Corporation serve indirectly as security for A's performance of A's obligation to repay the loan and X Corporation will be considered a pledgor or guarantor with respect to that obligation. For purposes of paragraph (b) of § 1.956–1, X Corporation will be considered to hold A's obligation to repay the bank $100,000 and under paragraph (e)(2) of § 1.956–1, the amount taken into account in computing X Corporation's aggregate investment in United States property on December 31, 1981, is the unpaid principal amount of the obligation on that date.

(d) *Definitions*—(1) *Meaning of "acquired"*—(i) *Applicable rules.* For purposes of this section—

* * * * *

[*b*) Property which is an obligation of a United States person with respect to which a controlled foreign corporation is a pledgor or guarantor (within the meaning of paragraph (c) of this section) shall be considered acquired when the corporation becomes liable as a pledgor or guarantor or is otherwise considered a pledgor or guarantor (within the meaning of paragraph (c)(2) of this section); and

* * * * *

Par. 3. Section 1.958–2 is amended as follows:

1. The first sentence of paragraph (a) is revised as set out below.

2. Paragraph (b)(3) is amended by adding a new sentence immediately after the first sentence as set forth below.

3. Paragraph (d)(2) is amended by adding a new sentence immediately after the first sentence as set forth below.

§ 1.958–2 Constructive ownership of stock.

(a) *In general.* Section 958(b) provides that, for purposes of sections 951(b), 954(d)(3), 956(b)(2), and 957, the rules of section 318(a) as modified by section 958(b) and this section shall apply to the extent that the effect is to treat a United States person as a United States shareholder within the meaning of section 951(b), to treat a person as a related person within the meaning of section 954(d)(3), to treat the stock of a domestic corporation as owned by a United States shareholder of a controlled foreign corporation under section 956(b)(2), or to treat a foreign corporation as a controlled foreign corporation under section 957. * * *

(b) *Members of family.* * * *

(3) *Stock owned by nonresident alien individual.* * * * However, this limitation does not apply for purposes of determining whether the stock of a domestic corporation is owned or considered as owned by a United States shareholder under section 956(b)(2) and § 1.956–2(b)(1)(viii). * * *

* * * * *

(d) *Attribution to partnerships, estates, trusts, and corporations.* * * *

(2) *Limitation.* * * * This limitation does not apply for purposes of determining whether the stock of a domestic corporation is owned or considered as owned by a United States shareholder under section 956(b)(2) and § 1.956–2(b)(1)(viii). * * *

(Secs. 956(c), 7805, Internal Revenue Code of 1954 (76 Stat. 1017, 68A Stat. 917; (26 U.S.C. 956(c) and U.S.C. 7805 respectively))]

Jerome Kurtz,
Commissioner of Internal Revenue.

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 762

Surface Coal Mining and Reclamation Operations; Permanent Regulatory Program; Correction

AGENCY: Office of Surface Mining Reclamation and Enforcement, Department of the Interior.

ACTION: Final rule; correction.

SUMMARY: This document corrects § 762.13 of the Permanent Regulatory Program published in the **Federal Register**, March 13, 1979, Part II, Book 3 of 3. The provision relates to land exempt from designation as unsuitable for surface coal mining operations.

EFFECTIVE DATE: August 7, 1980.

FOR FURTHER INFORMATION CONTACT: Boyd B. Lewis (202) 343–5361. Office of Surface Mining Reclamation and Enforcement, Department of the Interior, Washington, D.C. 20240.

SUPPLEMENTARY INFORMATION: This document corrects an error that appeared in the March 13, 1979, Permanent Regulatory Program and Title 30, Code of Federal Regulations, 1979. The page number corresponds to the March 13, 1979, **Federal Register** document. The following instructions will aid the user in locating the referenced:

Page—indicates the page number that appears in the upper margin of the March 13, 1979, **Federal Register**;

DEPARTMENT OF TRANSPORTATION

Saint Lawrence Seaway Development Corporation

33 CFR Part 401

Seaway Regulations; Miscellaneous Amendments

AGENCY: Saint Lawrence Seaway Development Corporation.

ACTION: Final rule.

SUMMARY: The Saint Lawrence Seaway Development Corporation and its counterpart agency, the St. Lawrence Seaway Authority of Canada, after reviewing their joint Seaway Regulations have determined that several sections are in need of revision. The Seaway Corporation will therefore amend Subpart A of 33 CFR Part 401 in order to 1) require certain new safety features and procedures, 2) revise provisions concerning the transportation of hazardous cargo in accordance with the International Maritime Dangerous Goods Code as promulgated by the Intergovernmental Maritime Consultative Organization (IMCO), 3) insure its consistency with actual operating procedures, and 4) clarify several existing regulations.

EFFECTIVE DATE: August 7, 1980.

FOR FURTHER INFORMATION CONTACT: Frederick A. Bush, General Counsel, (315) 764-0271, Ext. 245.

SUPPLEMENTARY INFORMATION:

Background

On June 19, 1979, the Seaway Corporation published in the **Federal Register** (44 FR 35256) proposed amendments to the Seaway Regulations which had been developed jointly with the Canadian Seaway Authority for the reasons set forth in the Summary.

Two comments were submitted in response to the notice of proposed rulemaking. The first comment was from the National Transportation Safety Board which suggested that two minor changes be made to the revised section on Dangerous Cargo, both of which have been made. As a result of the Board's suggestion, the word "flammable" (which had been used in the proposed rule interchangeably with "inflammable") will be used consistently. The Board also suggested that a phrase be added which explains the method by which a cargo's flashpoint is determined. This comment, too, has been adopted.

The second comment was from The Research and Special Projects Administration of the U.S. Department of Transportation. A request was made that The Hazardous Materials Transportation Act of the United States be included in the list of laws and regulations with which we require compliance in Part 401.66 of the Seaway Regulations. In accordance with this request, this suggestion has also been adopted.

Explanation of Changes

Since publication of the notice of proposed rulemaking, the Seaway Corporation and the Canadian Seaway Authority have held further discussions concerning the proposed amendments. As a result, several minor technical and editorial changes have been made, none of which have affected the substance of the amendments. Following is an explanation of the revised regulations.

The Table of Contents has been amended to reflect changes in several section headings.

In § 401.2, a definition for "flashpoint" was added in accordance with a request from the National Transportation Safety Board. A definition for "tanker" was also added. This was necessary as several of the sections included under the heading "Dangerous Cargo" are applicable to these vessels.

In § 401.3, paragraphs (b) and (d) have been amended to restrict vessel dimensions so as to protect all structures which could be interfered with at any of the locks. In the proposed rule, a specific reference was made to bascule bridges, but since bascule bridges are located at only a few of the locks, it is essential that the regulations provide for the protection of structures at all locks. Section 401.3(d)(1) was formerly noted only in Appendix I, but has now become § 401.3(d)(1) since it is a substantial rule. Appendix I has been retained to provide a block diagram which shows maximum allowable vessel dimensions as well as some explanatory notes.

In § 401.3(b), a correction in translation has been made, and § 401.3(d) has been redesignated as § 401.19(c).

The main text of § 401.5(b) has been relocated in substantially the same form to § 401.21 while its subparagraphs have been set forth in a new Schedule I. This change is designed to clearly indicate that the requirements contained therein apply only to the U.S. waters of the Seaway.

The heading to § 401.6 has been changed from "Draft markings" to "Markings" and a new paragraph (c) has been added to the section which requires that vessels with bulbous bows so indicate by placing special markings above their draft markings. This has appeared as a strong recommendation in the general Seaway Notice published by both Seaway entities for a number of years and is necessary so that the vessel may be safety spotted in the lock. Because the regulation will not be effective until the beginning of the 1981 navigation period, vessels will have an adequate time in which to comply with a relatively simple requirement.

In § 401.16, a reference to the vessel's weight has been substituted for a reference to the vessel's length. This will make the equipment required by the section dependent on the gross tonnage of the vessel rather than on its length and will keep the Seaway Regulations consistent in their requirements for equipment. Subsection 401.16(b) has been reworded for clarity with no change in substance.

As indicated above, a new paragraph (c) has been added to § 401.19 which prohibits the discharge of any substance onto lock or tie-up walls. In addition, the section's heading has been changed to read "Disposal and discharge systems".

The heading to § 401.20 has been changed to more accurately reflect the substance of the regulation. This had originally been changed in 1978 (43 FR 25817). However, the modification did not appear in the most recent edition of Title 33 of the Code of Federal Regulations.

As further stated above, § 401.21 has been modified to indicate that in addition to the requirements contained elsewhere in the Seaway Regulations, certain requirements as set forth in Schedule I are applicable only to the U.S. waters of the Seaway. The present § 401.21 provision that vessels be equipped with rudder angle indicators has been included in Schedule I.

Section § 401.23(a) is revised to reflect the fact that a condition of approval of an application for preclearance must show that the vessel is covered by liability insurance equal to or exceeding $100 per gross registered ton.

Section 401.26 along with § 401.29(c), § 401.31(c)(4), § 401.35, § 401.43, § 401.62 and § 401.63 have been amended so as to delete any reference to the Canadian Sault Ste. Marie Lock. This is necessary to reflect that the Canadian Seaway Authority no longer has any responsibility for the area.

New security required of vessels as a result of the recently revised Tolls Schedule (43 FR 11672) has been set forth in § 401.26.

Subsection 401.31(c)(2) has been amended to prohibit smaller pleasure craft from overtaking and passing commercial vessels near lock entrances, the practice of which endangers both vessels.

As indicated previously, bascule bridges overhang several lock walls within the Seaway system. Section 401.3 has been amended to provide for this. Section 401.33 has also been amended to require that vessels whose dimensions exceed the maximum allowable under § 401.3(d) must apply for special transit instructions from either the Seaway Corporation or the Seaway Authority.

Section 401.35 has been reworded to conform to changes in Sections 401.3(b) and 401.3(d).

Subsection 401.40(a) has been revised to indicate that stop symbols rather than "Stop" signs are now in use at the locks.

Section 401.51 has been amended to require that a vessel master signal the vessel's presence to a bridgemaster by VHF radio rather than by using the vessel's whistle. This will make the regulation consistent with the usual practice.

Subsection 401.59(b) has been revoked and a new provision substituted therefor which requires that vessels only discharge substances in accordance with the applicable U.S. Federal Regulations and Canadian Regulations. Additionally, in the Welland Canal, two zones have been designated as prohibited discharge areas due to their proximity to municipal intake areas.

In Section 401.63 the control sectors beginning with Control Sector Number 4 are renumbered as follows to reflect the actual Sector Numbers.

Station; Control Sector Number

Seaway Clayton; 4.
Seaway Sodus; 4.
Seaway Newcastle; 5.
Seaway Welland; 6.
Seaway Long Point; 7.

In Sections 401.68 and 401.69, references to metric and short tons have been deleted, and the term, "tonnes" substituted in view of the fact that the phrase tonnes is metric.

Sections 401.66 through 401.73 have been revised in accordance with IMCO standards and applicable U.S. and Canadian statutes concerning the transportation of dangerous cargo.

Section 401.77, "Pleasure craft tolls" has been deleted because of non-use. However, Section 401.77 will be reserved.

Section 401.78 has been expanded to include additional required documents.

Section 401.80 has been amended to require a hazardous cargo vessel to report certain particulars of its cargo to the nearest Seaway station prior to entering or getting underway in the Seaway system.

Sections 401.84 and 401.85 have been substantially revised so as to group in one place applicable vessel reporting requirements.

A new Section 401.95, "Compliance with Regulations" has been added. This addition is necessary so that there is no misunderstanding as to whom the Regulations apply.

Sections 401.95 and 401.96 under NAVIGATION CLOSING PROCEDURES have now been redesignated Section 401.96, "Defintions", and Section 401.97, "Closing Procedures".

Schedules I, II and III presently follow Section 401.94. However, they will be moved to follow Section 401.97.

A new Schedule I which indicates additional maneuvering data and equipment required to be on board vessels transiting the U.S. waters of the Seaway has been added. This Schedule includes the requirements previously set forth in § 401.5(b). The remaining Schedules have been renumbered accordingly. In addition, several minor changes have been made to the redesignated Schedules II and III in order to make them consistent with operating procedures now in effect.

Appendix I is titled "Vessel Dimensions".

The Seaway Corporation has determined that the expected impact of this regulation is so minimal that it does not warrant either a Regulatory Analysis or a formal Evaluation as required by the Secretary of Transportation's Order concerning Regulatory Policies and Procedures (44 FR 11034). It is expected to result in negligible cost to a few vessel owners. There should be no added cost to or impact on consumers and/or Federal, state and local governments.

Since these amendments should require minimal action on the part of vessel owners and operators, good cause exists for making them effective upon publication.

1. The Table of Contents to the Seaway Regulations is amended by revising the section headings of Sections 401.6, 401.19, 401.20, 401.21, 401.77, 401.80, 401.84, 401.95, 401.96, 401.97; revising the headings of Schedules I, II and III, and adding Appendix I.

Navigation Closing Procedures

401.96 Definitions.
401.97 Closing procedures.

Schedule I—Vessels Transiting U.S. Waters.
Schedule II—Table of Speeds.
Schedule III—Calling-in-Table.
Appendix I—Vessel Dimensions.

2. Section 401.2 is amended by adding in alphabetical order defintions for "flashpoint" and "tanker" and by redesignating the subparagraphs to reflect these additions.

§ 401.2 Interpretation.

* * * * *

"Flashpoint" means the temperature as determined by the closed-cup method.

* * * * *

"Tanker" means any vessel specifically constructed for carrying bulk cargoes of liquid petroleum products, liquid chemicals, liquid edible oils and liquified gases in tanks which form both an integral part and the total cargo carrying portion of that vessel.

* * * * *

3. Section 401.3 is amended by revising paragraphs (b) and (d) to read as follows:

§ 401.3 Maximum vessel dimensions.

* * * * *

(b) No vessel shall transit if any part of the vessel or anything on the vessel

extends more than 35.5 meters (116.5 feet) above water level.

* * * * *

(d) No vessel's hull or superstructure when alongside a lock wall shall extend beyond the limits of the lock wall, as illustrated in Appendix I.

(d)(1) A vessel having a beam width less than 23.16 meters (76 feet) and having dimensions exceeding the limits of the block diagram illustrated in Appendix I shall not transit a lock except in accordance with a permit to transit issued by the Authority.

§ 401.5 [Deleted]

4. Section 401.5(b) is deleted.

5. The heading to § 401.6 is changed and a new paragraph (c) is added as follows.

§ 401.6 Markings.

* * * * *

(c) Effective April 1, 1981, where a vessel's bulbous bow extends forward beyond her stem head, a symbol of a bulbous bow shall be marked above the 79.25 decimeters (26 feet) mark in addition to a "+" symbol followed by a number indicating the total length in meters by which the bulbous bow projects beyond the stem.

6. Section 401.16 is amended by revising the introductory paragraph and paragraph (b) to read as follows:

§ 401.16 Propeller direction alarms.

Every vessel of 1600 gross registered tons or more shall be equipped with

* * * * *

(b) Visible and audible wrong-way propeller direction alarms located in the wheelhouse and the engine room, unless the vessel is fitted with a device which renders it impossible to operate engines against orders from the bridge telegraph.

7. The heading to § 401.19 will be changed and a new paragraph (c) added as follows:

§ 401.19 Disposal and discharge systems.

* * * * *

(c) No substance shall be discharged or disposed of onto a lockwall or tie-up wall by any means, including overboard discharge pipes.

8. The heading to Section 401.20 is revised to read as follows.

§ 401.20 Oily water extractors.

* * * * *

9. Section 401.21 is revised to read as follows:

§ 401.21 Requirements for U.S. waters of the St. Lawrence Seaway.

In addition to the requirements set forth elsewhere in these Regulations, vessels transiting the U.S. waters of the St. Lawrence Seaway are subject to the requirements set out in Schedule I.

10. Section 401.23(a) is amended to read as follows:

§ 401.23 Liability insurance.

(a) It is a condition of approval of an application for preclearance that the vessel is covered by liability insurance equal to or exceeding $100 per gross registered ton.

* * * * *

11. The introductory paragraph to § 401.26(a) and § 401.26 (b) and (c) are revised to read as follows:

§ 401.26 Security for tolls.

(a) Before transit by a vessel to which the requirement of preclearance applies, security for the payment of tolls in accordance with the St. Lawrence Seaway Tariff of Tolls as well as security for any other charges, shall be provided by the representative by means of * * *

* * * * *

(b) The security for the tolls of a vessel shall be sufficient to cover the gross registered tonnage of the vessel:

(1) On the Seaway between Montreal and Lake Ontario, at $1.50 per ton for transit each way or at $3.00 per ton for a round trip;

(2) On the Welland Canal, at $1.25 per ton for transit each way or at $2.00 per ton for a round trip; and shall be maintained in an amount sufficient to cover each transit for which tolls have been incurred and are unpaid.

(c) Where a number of vessels:

(1) Are owned or controlled by the same individual or company, and

(2) Have the same representative, the security for the tolls may be provided in an amount estimated by the representative to be equal to $2.20 per ton for the aggregate maximum tonnage of the vessels within the Seaway at any one time and shall be maintained in an amount sufficient to cover each transit for which tolls have been incurred and are unpaid.

* * * * *

§ 401.29 [Amended]

12. Paragraph (c) of § 401.29 is revoked.

13. Section 401.31 (c)(2) is revised as follows and (c)(4) is revoked.

§ 401.31 Meeting and passing.

* * * * *

(c) * * *

(2) Within 609.60 meters (2,000 feet) of a canal or lock entrance

* * * * *

14. Section 401.33 is revised to read as follows:

§ 401.33 Special instructions.

Special instructions shall be applied for from the Corporation or the authority in connection with the intended transit of vessels of unusual design, hulks, sections of vessels, large dredges, all vessels in tow and vessels whose limits exceed the requirements of § 401.3(d), and such vessels shall not transit except in compliance with such instructions.

15. Section 401.35 is revised to read as follows:

§ 401.35 Employment of tugs.

No tug shall be fastened alongside a vessel in a canal so that the aggregate of the beams exceeds 23 meters (75 feet 6 inches).

16. In § 401.40, paragraph (a) is revised to read as follows:

§ 401.40 Entering a lock.

(a) No vessel shall proceed into a lock in such a manner that the stem passes the stop symbol on the lock wall nearest the closed gates.

* * * * *

17. Section 401.43 is revised to read as follows:

§ 401.43 Mooring table.

Unless otherwise directed by an officer, vessels passing through locks in the South Shore, Beauharnois, Wiley-Dondero, Iroquois and Welland Canals shall moor at the side of the tie-up wall or lock as shown in the table to this section.

§ 401.43 [Table Amended]

The table to § 401.43 is amended by deleting therefrom the portion entitled "Canadian Sault Ste. Marie".

18. Section 401.51 is revised as follows:

§ 401.51 Signalling approach to a bridge.

Unless a vessel's approach has been recognized by a flashing signal, the master shall signal the vessel's presence to the bridgemaster by VHF radio when it comes abreast of any of the bridge whistle signs, which signs shall be placed at distances varying between 670.56 meters and 1500 meters (2200 feet and 4921 feet) upstream and downstream from movable bridges at sites other than lock sites.

19. Paragraph (b) of § 401.59 is amended to read as follows:

§ 401.59 Pollution.

* * * * *

(b) No vessel shall discharge into Seaway waters any substance not in conformity with applicable United States Federal Regulations and Canadian Regulations with the exception of the waters of the Welland Canal where two specific zones are established in which no substances shall be discharged, namely,

(1) From Lock 7 (Thorold) to mile 17 (Welland); and

(2) From Lock 8 (Port Colborne) to the outer Port Colborne Piers (Lake Erie).

* * * * *

20. Section 401.62 is amended as follows:

§ 401.62 [Amended]

The following Seaway station is deleted:

VDX23 (Seaway Sault)—Sault Ste. Marie, Ontario—Traffic Control Sector No. 6.

21. In § 401.63, the control sectors are renumbered to reflect the actual Sector Numbers.

§ 401.63 Radio procedure.

* * * * *

Control Sector; No. and Station

* * * * *

4 Seaway Clayton.
4 Seaway Sodus.
5 Seaway Newcastle.
6 Seaway Welland.
7 Seaway Long Point.

The following is deleted.

9 Seaway Sault	C.I.P. No. 17 to C.I.P. No. 18	Channel 14	Channel 14	Channel 16

22. Sections 401.66 through 401.73 under the heading of "DANGEROUS CARGO" are revised as follows:

Dangerous Cargo

§ 401.66. Applicable laws.

Vessels carrying a cargo or part cargo of fuel oil, gasoline, crude oil or other flammable goods in bulk, including empty tankers which are not gas free, and vessels carrying dangerous substances whether break-bulk or containerized, to which regulations made under the *Canada Shipping Act*, or under the *Transportation of Dangerous Goods Act* or to which the *Dangerous Cargo Act* or the *Hazardous Materials Transportation Act* of the United States or regulations issued pursuant thereto apply, shall be deemed to carry dangerous substances and shall not transit unless all requirements of the said Statutes and regulations and of these Regulations have been fulfilled.

§ 401.67 Explosive vessles.

A vessel carrying explosives, either Government or commercial, as defined in the Dangerous Cargo Act of the United States and in the International Maritime Dangerous Goods Code, Class 1, Divisions 1.1 to 1.5 inclusive, shall be deemed for the purpose of these Regulations to be an explosive vessel.

§ 401.68 Explosives permit.

(a) A Seaway Explosives Permit is required for an explosive vessel in the following cases:

(1) For all vessels carrying any quantity of explosives with a mass explosive risk, up to a maximum of 2 tonnes (2.2 tons) (IMCO Class 1, Division 1.1);

(2) For all vessels carrying more than 10 tonnes (11.02 tons) and up to a maximum of 50 tonnes (55.12 tons) of explosives that do not explode en masse (IMCO Class 1, Division 1.2);

(3) For all vessels carrying more than 100 tonnes (110.23 tons) and up to a maximum of 500 tonnes (551.16 tons) of explosives having a fire hazard without explosive effect (IMCO Class 1, Division 1.3); and

(4) For all vessels carrying more than 100 tonnes (110.23 tons) and up to a maximum of 500 tonnes (551.16 tons) of safety explosives and shop goods (IMCO Class 1, Divisions 1.4 and 1.5).

(b) When an explosive vessel is carrying quantities of explosives above the maximum mentioned in paragraph (a), no Seaway Explosives Permit shall be granted and the vessel shall not transit.

(c) A written application for a Seaway Explosives Permit may be made to the Chief, Office of Lock Operations, Saint Lawrence Seaway Development Corporation, P.O. Box 520, Massena, New York 13662 or to the Manager of Operational Services, The St. Lawrence Seaway Authority, 202 Pitt Street, Cornwall, Ontario K6J 3P7. The application shall show that the cargo is packed, marked, labeled, described, certified, stowed and otherwise conforms with all relevant regulations of the country in which it was loaded and of Canada and the United States.

(d) A signed copy of a Seaway Explosives Permit and a true copy of any certificate as to the loading of dangerous cargo shall be kept on board every explosive vessel in transit and shall be made available to any officer requiring production of such copies.

§ 401.69 Hazardous cargo vessels.

For the purpose of these Regulations, a vessel shall be deemed to be a hazardous cargo vessel in the following cases:

(a) A tanker carrying fuel oil, gasoline, crude oil or other flammable liquids in bulk, having a flashpoint below 61°C, including a tanker that is not gas free where its previous cargo had a flashpoint below 61°C;

(b) A tanker carrying compressed liquefied gases, bulk acids or liquefied chamicals;

(c) A dry cargo vessel carrying the following dangerous substances, whether in bulk, break-bulk or containerized, that are

(1) In excess of 50 tonnes (55.12 tons) of gases, compressed, liquefied or dissolved under pressure (IMCO Class 2),

(2) In excess of 50 tonnes (55.12 tons) of flammable liquids having a flashpoint below 61°C (IMCO Class 3),

(3) In excess of 50 tonnes (55.12 tons) of flammable solids spontaneously combustible material or substances emitting combustible gases when wet (IMCO Class 4),

(4) In excess of 50 tonnes (55.12 tons) of oxidizing substances or organic peroxides (IMCO Class 5),

(5) Any quantity of poisonous (toxic) substances and infectious substances (IMCO Class 6),

(6) Any quantity of radioactive substances (IMCO Class 7),

(7) In excess of 50 tonnes (55.12 tons) of corrosive substances (IMCO Class 8),

(8) Any quantity of metal turnings, borings, cuttings, or shavings in bulk having a temperature on loading or in transit in excess of 65.5°C, and

(9) Any quantity of grain that is under fumigation, where the chemical being used is hazardous to human life.

§ 401.70 Fendering—Explosive and hazardous cargo vessels.

All explosive vessels requiring a permit in accordance with § 401.68 and

all tankers carrying cargo with a flashpoint of up to 61°C, except those carrying such cargo in center tanks with gas free wing tanks, shall be equipped with a sufficient number of non-metallic fenders on each side to prevent any metallic part of the vessel from touching the side of a dock or lock wall.

§ 401.71 Signals—Explosive and hazardous cargo vessels.

(a) An explosive vessel shall display at the masthead or at an equivalent conspicuous position a "B" flag.

(b) A hazardous cargo vessel shall display at the masthead or at an equivalent conspicuous position a "B" superior to numeral pennant number 1.

§ 401.72 Reporting—Explosive and hazardous cargo vessels.

(a) Every explosive vessel or hazardous cargo vessel shall, when reporting information related to cargo as required by § 401.64(a), report the nature and tonnage of its explosive or hazardous cargo and the flashpoint of that cargo where applicable. Every vessel carrying grain which is under fumigation shall declare the nature of the fumigant and its properties.

(b) Every explosive vessel requiring a Seaway Explosives Permit shall, when reporting in, give the number of its Seaway Explosives Permit.

(c) Every hazardous cargo vessel carrying metal turnings, shavings, cuttings or borings in bulk shall, when reporting information related to cargo as required by § 401.64(a), give the high temperature reading of each compartment at that time, together with the high temperature reading in each compartment taken on completion of loading.

(d) Every vessel carrying radioactive substances shall, when reporting in, give the number and date of issue of any required certificate issued by the Atomic Energy Control Board authorizing such shipment.

§ 401.73 Cleaning tanks—Hazardous cargo vessels.

Gas freeing and cleaning of cargo tanks shall not take place:

(a) In a canal or a lock;

(b) In an area that is not clear of other vessels or structures; and

(c) Before gas freeing and tank cleaning has been reported to the nearest Seaway station.

§ 401.77 [Reserved]

22. Section 401.77 entitled Pleasure craft tolls is revoked and reserved because of non-use.

23. Section 401.78 under INFORMATION and REPORTS is revised as follows:

§ 401.78 Required information.

(a) Documentary evidence, comprising inspection certificates, load line certificates, crew lists, dangerous cargo manifest and the cargo stowage plan, shall be carried on board and shall be made available to any officer requiring production of such evidence.

(b) Documentary evidence, comprising evidence of cargo declared, cargo manifest, dangerous cargo manifest and bills of lading, shall be kept by the agent, owner or operator for a period of five years, or until an audit has been performed by the Corporation or the Authority, whichever occurs first, and such documents shall be made available to an officer requiring production of such evidence.

24. Section 401.80 is revised to read as follows:

§ 401.80 Reporting dangerous cargo.

(a) The master of any explosive vessel or hazardous cargo vessel shall report or shall cause to be reported to the nearest Seaway station at least three hours prior to expected entry into the Seaway System, the nature and quantity of the dangerous cargo and where it is stowed on the vessel.

(b) The master of any vessel, that takes an explosive or hazardous cargo while in the Seaway System, shall report to the nearest Seaway station at least three hours prior to commencing transit the nature and quantity of the dangerous cargo and where it is stowed on the vessel.

25. Section 401.84 is revised to read as follows:

§ 401.84 Reporting of impairment or other hazard by vessels transiting within the Seaway.

While transiting the Seaway, the master of a vessel shall immediately report to the nearest Seaway station:

(a) Any condition of the vessel that might impair its ability to transit safely and expeditiously;

(b) Any hazardous condition of the vessel;

(c) Any malfunction on the vessel of equipment required by § 401.5 and § 401.21;

(d) Any difficulty on the part of the vessel in controlling its tow or tows;

(e) Any hazard, dangerous situation or malfunctioning aid to navigation which has not been published in a Notice to Mariners;

(f) Any loss of anchor with particulars of the precise location of the loss; and

(g) Any location where visibility is less than one nautical mile (1.15 statute miles).

26. Section 401.85 is revised to read as follows:

§ 401.85 Reporting of impairment or other hazard by vessels intending to transit the Seaway.

The master of any vessel which intends to transit the Seaway shall report to the nearest Seaway Station, prior to entering the Seaway, any of the conditions set out in paragraphs (a) to (d) of § 401.84.

27. Sections 401.95 and 401.96 are renumbered as §§ 401.96 and 401.97 respectively and the introductory text to § 401.96 is revised as follows:

§ 401.96 Definitions.

In § 401.97: * * *

* * * * *

28. A new § 401.95 is added as follows:

§ 401.95 Compliance with regulations.

The master or owner of a vessel shall ensure that all requirements of these Regulations applicable to that vessel are complied with.

29. A new general heading, **"Navigation Closing Procedures"** is added before § 401.96

30. Schedule I, "Table of Speeds", and Schedule II, "Calling-in Table", are renumbered as Schedules II and III, respectively, A new Schedule I is added as follows:

Schedule I—

Vessels Transiting U.S. Waters

No vessel of 1600 gross tons or more shall transit the U.S. waters of the St. Lawrence Seaway unless it is equipped with the following maneuvering data and equipment:

(a) Charts of the Seaway that are currently corrected and of large enough scale and sufficient detail to enable safe navigation. These may be published by a foreign government if the charts contain similar information to those published by the U.S. Government.

(b) U.S. Coast Guard Light List, currently corrected.

(c) Current Seaway Notices Affecting Navigation.

(d) The following maneuvering data prominently displayed on a fact sheet in the wheelhouse:

(1) For full and half speed, a turning circle diagram to port and starboard that shows the time and distance of advance and transfer required to alter the course 90 degrees with maximum rudder angle and constant power settings:

(2) The time and distance to stop the vessel from full and half speed while maintaining approximately the initial heading with minimum application of rudder;

(3) For each vessel with a fixed propeller, a table of shaft revolutions per minute, for a representative range of speeds;

(4) For each vessel that is fitted with an auxiliary propeller, a table of control settings for a representative range of speeds;

(5) For each vessel that is fitted with an auxiliary device to assist in maneuvering, such as a bow thruster, a table of vessel speeds at which the auxiliary device is effective in maneuvering the vessel;

(6) The maneuvering information for the normal load and normal ballast condition for:

(A) Calm weather—wind 10 knots or less, calm sea;

(B) No current;

(C) Deep water conditions—water depth twice the vessel's draft or greater; and

(D) Clean hull.

(7) At the bottom of the fact sheet, the following statement:

Warning

The response of the (name of the vessel) may be different from the above if any of the following conditions, on which the maneuvering is based, are varied:

(a) Calm weather—wind 10 knots or less, calm sea;

(b) No current;

(c) Deep water conditions—water depth twice the vessel's draft or greater;

(d) Clean hull;

(e) Intermediate drafts or unusual trim.

(e) Illuminated magnetic compass at main steering station with compass deviation table, graph or record.

(f) Gyro-compass with illuminated gyro-repeater at main steering station.

(g) Marine radar system for surface navigation.

(h) Efficient echo sounding device.

(i) Illuminated rudder angle indicator or repeaters that are:

(1) Located in the wheelhouse;

(2) Arranged so that they can easily be read from any position on the bridge.

(j) Illuminated indicator showing the operating mode of that device when vessel is equipped with auxiliary maneuvering devices.

Schedule II [Amended]

31. Schedule II, "Table of Speeds*", is amended by deleting entry 14, renumbering entries 15 and 16 as 14 and 15 respectively, and revising entries 1, 3, 4, 5, 9 and 10 as follows:

From	To	Maximum speed over the bottom (knots) Col. III	Col. IV
1. Upper Entrance South Shore Canal.	Lake St. Louis Buoy 13A.	10.4 (12 mph).	10.4 (12 mph)
• • • • •			
3. Upper Entrance Beauharnois Lock Buoy 5B.	Lake St. Francis Buoy 27F.	8.6 (10 mph upb).	8.6 (10 mph dnb)
4. Lake St. Francis Buoy 27F.	Lake St. Francis Buoy 67 F.	15.5 (18 mph).	15.5 (18 mph)
5. Lake St. Francis Buoy 67F.	Snell Lock	8.6 (10 mph upb).	7.7 (9 mph upb)
• • • • •			
9. Ogden Island Buoy 99.	Blind Bay ½ mile east of Buoy 162.	13 (15 mph)	10.4 (12 mph)
10. Blind Bay ½ mile east of Buoy 162.	Deer Island Lt. 186.	11.3 (13 mph).	10.4 (12 mph)
• • • • •			
14. Port Robinson.	Ramey's Bend through the Welland By-Pass.	7.7 (9 mph)	7.7 (9 mph)
15. All other canals.		6.1 (7 mph)	6.1 (7 mph)

*Maximum speeds at which a vessel may travel in identified area in both normal and high water conditions are set out in this schedule. The Corporation and the Authority will, from time to time, designate the set of speed limits that is in effect.

32. Schedule III, "Calling-in Table" is amended by revoking Items 25, 26, 27, 28 and 52. In addition, Item 53 will be revised to read as follows:

C.I.P. and Checkpoint	Station to Call	Message Content
Downbound vessels—		
• • • • •		
53. St. Nicholas Island.	Seaway Beauharnois Ch. 14.	1. Name of Vessel. 2. Location. 3. Confirm harbor or river pilot requirement—St. Lambert. 4. Montreal Harbor Berth Number (if applicable).

* * * * *

33. The former Schedule III which noted locations where pleasure craft tickets could be purchased is revoked.

34. Appendix I is added to read as follows.

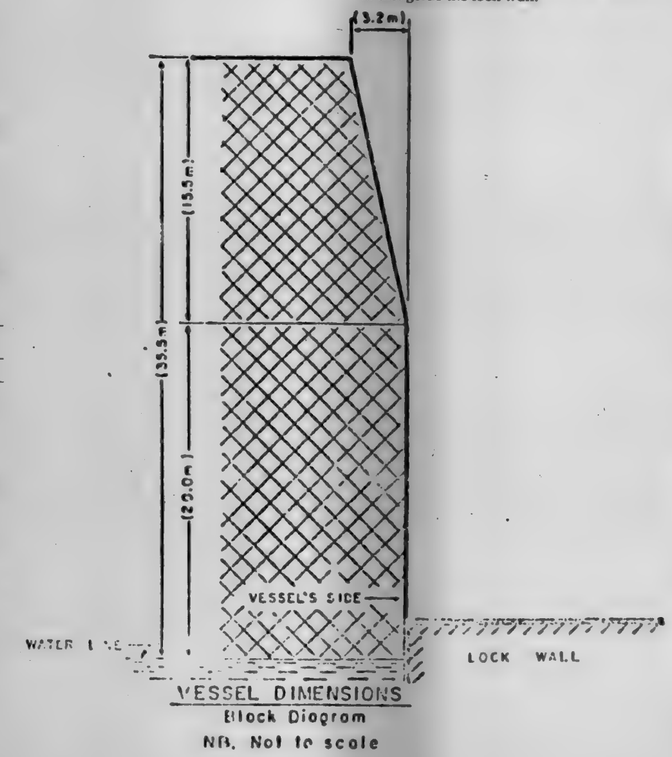
Appendix I—Vessel Dimensions

Structures are located at a number of Seaway locks which, when fully raised, overhang the lock wall at a given point, thereby limiting:

(a) The height of a vessel above the water line measured at the vessel's side; and

(b) The height of other structures that are located near the sides of the vessel, such as derricks, crosstrees, antennas, etc.

The following block diagram shows the limits beyond which a vessel's hull or superstructure cannot extend *when the vessel is alongside the lock wall.*



VESSEL DIMENSIONS
Block Diagram
NB. Not to scale

The limits in the block diagram are based on vessels with a maximum allowable beam of 23.16 m (76 feet). For vessels that have a beam width less than this and that have dimensions exceeding the limits of the block diagram (measured with the vessel alongside the lock wall), a special permission to transit must be obtained. (Accurate measurements may be required before such permission is granted).

Caution: Masters must take into account the ballast draft of the vessel when verifying the maximum permissible dimensions.

(68 Stat. 93–96, 33 U.S.C. 981–990, as amended and Sections 4, 5, 6, 7, 8, 12 and 13 of SEC. 2 of Pub. L. 95–474, 92 Stat. 1471).

Issued at Washington, D.C. on July 21, 1980.

1980.

Saint Lawrence Seaway Development Corporation.

D. W. Oberlin,

Administrator.

BILLING CODE 4910–61–M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Public Land Order 5745

[M–39381]

Montana; Withdrawal of National Forest Lands for Selway-Bitterroot Wilderness Trailhead Facility and Recreation Area

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This order withdraws approximately 80.72 acres of national forest land for a recreation area and trailhead facilities into the Selway-Bitterroot Wilderness Area.

EFFECTIVE DATE: August 7, 1980.

FOR FURTHER INFORMATION CONTACT: Dan Stark, Montana State Office, 406–657–6291.

By virtue of the authority contained in Section 204 of the Federal Land Policy and Management Act 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. Subject to valid existing rights, the following described national forest lands are hereby withdrawn from location and entry under the mining laws (30 U.S.C., Ch. 2), for a trailhead facility into the Selway-Bitterroot Wilderness Area:

Lolo National Forest

Principal Meridian

T. 11 N., R. 21 W.,
Sec. 6, West 660 feet of lot 3, East 1,000 feet of lot 4, and East 1,000 feet of lot 5.

The area described contains 80.72 acres in Missoula County.

2. The withdrawal made by this order does not alter the applicability of those public land laws governing the use of the national forest lands under lease, license, or permit, or governing the disposal of their mineral or vegetative resources other than under the mining laws.

3. This withdrawal shall remain in effect for a period of 20 years from the date of this order.

James W. Curlin,

Acting Assistant Secretary of the Interior.

July 31, 1980.

BILLING CODE 4310–84–M

43 CFR Public Land Order 5746

[R–1663]

California; Withdrawal for National Forest Recreation and Administrative Sites

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This order withdraws 789.97 acres of national forest lands from the mining laws for recreation and administrative sites in the Inyo National Forest.

EFFECTIVE DATE: August 7, 1980.

FOR FURTHER INFORMATION CONTACT: Marie Getsman, California State Office, 916–484–4431.

By virtue of the authority contained in Section 204 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2751, 43 U.S.C. 1714), it is hereby ordered as follows:

1. Subject to valid existing rights, the following described national forest lands are hereby withdrawn from appropriation under the United States mining laws, 30 U.S.C., Ch. 2, but not from leasing under the mineral leasing laws, in aid of programs of the Department of Agriculture:

Inyo National Forest

Mount Diablo Meridian

June Lake Loop Recreation Area

Rush Creek Campground

Lone Pine

T. 15 S., R. 35 E.,
Sec. 29, S½N½SE¼, N½S½SE¼.
The areas described aggregate approximately 789.87 acres in Inyo and Mono Counties.

2. The withdrawal made by this order does not alter the applicability of those public land laws governing the use of the national forest lands under lease, license, or permit or governing the disposal of their mineral or vegetative resources other than under the mining laws.

3. This withdrawal shall remain in effect for a period of 20 years from the date of this order.

James W. Curlin,

Acting Assistant Secretary of the Interior.

July 31, 1980.

[FR Doc. 80–23882 Filed 8–6–80; 8:45 am]

BILLING CODE 4310–84–M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 64

[Docket No. FEMA 5871]

List of Communities Eligible for the Sale of Insurance Under the National Flood Insurance Program

AGENCY: Federal Insurance Administration, FEMA.

ACTION: Final rule.

SUMMARY: This rule lists communities participating in the National Flood Insurance Program (NFIP). These communities have applied to the program and have agreed to enact certain flood plain management measures. The communities' participation in the program authorizes the sale of flood insurance to owners of property located in the communities listed.

EFFECTIVE DATES: The date listed in the fifth column of the table.

ADDRESSES: Flood insurance policies for property located in the communities listed can be obtained from any licensed property insurance agent or broker serving the eligible community, or from the National Flood Insurance Program (NFIP) at: P.O. Box 34294, Bethesda, Maryland 20034, Phone: (800) 638–6620.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Krimm, National Flood Insurance Program, (202) 755–5581 or Toll Free Line 800–424–8872, Room 5270, 451 Seventh Street SW., Washington, DC 20410.

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP), enables property owners to purchase flood insurance at rates made reasonable through a Federal subsidy. In return, communities agree to adopt and administer local flood plain management measures aimed at protecting lives and new construction from future flooding. Since the communities on the attached list have recently entered the NFIP, subsidized flood insurance is now available for property in the community.

In addition, the Federal Insurance Administrator has identified the special flood hazard areas in some of these communities by publishing a Flood Hazard Boundary Map. The date of the flood map, if one has been published, is indicated in the sixth column of the table. In the communities listed where a flood map has been published, Section 102 of the Flood Disaster Protection Act of 1973, as amended, requires the purchase of flood insurance as a condition of Federal or federally related financial assistance for acquisition or construction of buildings in the special flood hazard area shown on the map.

The Federal Insurance Administrator finds that delayed effective dates would be contrary to the public interest. The Administrator also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

The Catalog of Domestic Assistance Number for this program is 83.100 "Flood Insurance." This program is subject to procedures set out in OMB Circular A–95.

In each entry, a complete chronology of effective dates appears for each listed community. The entry reads as follows:

Section 64.6 is amended by adding in alphabetical sequence new entries to the table.

§ 64.6 List of Eligible Communities.

State	County	Location	Community No.	Effective dates of authorization/ cancellation of sale of flood insurance in community	Special flood hazard area identified
Arizona	Maricopa	Chandler, city of	040040B	July 16, 1980, suspension withdrawn	May 24, 1977, and Jan. 17, 1978.
Arkansas	Benton	Bentonville, city of	050012B	do	May 10, 1974, and Feb. 27, 1976.

BILLING CODE 6718-03-M

44 CFR Part 65

[Docket No. FEMA 5872]

List of Withdrawal of Flood Insurance Maps Under the National Flood Insurance Program

AGENCY: Federal Insurance Administration.

ACTION: Final rule.

SUMMARY: This rule lists communities where Flood Insurance Rate Maps or Flood Hazard Boundary Maps published by the Federal Insurance Administration, have been temporarily withdrawn for administrative or technical reason. During that period that the map is withdrawn, the insurance purchase requirement of the National Flood Insurance Program is suspended.

EFFECTIVE DATES: The date listed in the fifth column of the table.

FOR FURTHER INFORMATION CONTACT: Mr. Robert G. Chappell, National Flood Insurance Program, (202) 426–1460 or Toll Free Line 800–424–8872, Room 5150, 451 Seventh Street, SW., Washington, DC 20410.

SUPPLEMENTARY INFORMATION: The list includes the date that each map was withdrawn, and the effective date of its republication, if it has been republished. If a flood-prone location is now being identified on another map, the community name for the effective map is shown.

The Flood Disaster Protection Act of 1973 (Pub. L. 93–234), as amended, requires, at Section 102, the purchase of flood insurance as a condition of Federal financial assistance if such assistance is:

(1) for acquisition and construction of buildings, and

(2) for buildings located in a special flood hazard area identified by the Director of Federal Emergency Management Agency.

One year after the identification of the community as flood-prone, the requirement applies to all identified special flood hazard areas within the United States, so that, after that date, no such financial assistance can legally be provided for acquisition and construction of buildings in these areas unless the community has entered the program. The denial of such financial assistance has no application outside of the identified special flood hazard areas of such flood-prone communities.

Prior to July 1, 1975, the statutory requirement for the purchase of flood insurance did not apply until and unless the community entered the program and the special flood hazard areas were identified by the issuance of a flood insurance map. However, after July 1, 1975, or one year after identification, whichever is later, the requirement applies to all communities in the United States that are identified as having special flood hazard areas within their community boundaries, so that, no such financial assistance can legally be provided for buildings in these areas unless the community has entered the program.

The insurance purchase requirement with respect to a particular community may be altered by the issuance or withdrawal of the Federal Insurance Administration's (FEMA) official Flood Insurance Rate Map (FIRM) or the Flood Hazard Boundary Map (FHBM). A FHBM is usually designated by the letter "E" following the community number and a FIRM by the letter "R" following the community number. If the FIA withdraws a FHBM for any reason the insurance purchase requirement is suspended during the period of withdrawal. However, if the community is in the Regular Program and only the FIRM is withdrawn but a FHBM remains in effect, then flood insurance is still required for properties located in the identified special flood hazard areas shown on the FHBM, but the maximum amount of insurance available for new applications or renewal is first layer coverage under the Emergency Program, since the community's Regular Program status is suspended while the map is withdrawn. (For definitions see 44 CFR Part 59 et seq.)

As the purpose of this revision is the convenience of the public, notice and public procedure are unnecessary, and cause exists to make this amendment effective upon publication. Accordingly, Subchapter B of Chapter I of Title 44 of the Code of Federal Regulations is amended as follows:

1. Present § 65.6 is revised to read as follows:

§ 65.6 Administrative withdrawal of maps.

(a) *Flood Hazard Boundary Maps (FHBM's).*

The following is a cumulative list of withdrawals pursuant to this Part:

40 FR 5149
40 FR 17015
40 FR 20798
40 FR 46102
40 FR 53579
40 FR 56672
41 FR 1478
41 FR 50990
41 FR 13352
41 FR 17726

44 FR 6383
44 FR 18485
44 FR 25636
44 FR 34120
44 FR 52835
44 FR 57094
44 FR 12421
44 FR 26051
44 FR 31318
44 FR 34120
45 FR 49570
45 FR 52385

(b) *Flood Insurance Rate Maps (FIRM's)*

The following is a cumulative list of withdrawals pursuant to this Part:

40 FR 17015
41 FR 1478
42 FR 49811
42 FR 64076
43 FR 24019
44 FR 25636
44 FR 12421
45 FR 49570

2. The following additional entries (which will not appear in the Code of Federal Regulations) are made Pursuant to § 65.6:

State	Community name and number	County	Hazard ID date	Rescission date	Reason
Arizona	City of Eloy, 040083A, E	Pinal	Oct. 10, 1978	Aug. 5, 1980	2
Arkansas	Town of Norvell, 050268	Crittenden	Aug. 15, 1975	Aug. 5, 1980	4
Louisiana	Town of Brusly, 220241R	West Baton Rouge Parish	Aug. 15, 1977	Aug. 5, 1980	2
Missouri	Village of Bellerive, 290331E	St. Louis	Sept. 10, 1976	Aug. 5, 1980	1
Pennsylvania	Boro of Hunker, 420880A, E	Westmoreland	Feb. 7, 1975	Aug. 5, 1980	2
Utah	Town of Mona, 490081A, E	Juab	June 21, 1977	Aug. 5, 1980	1

KEY TO SYMBOLS

E—The community is participating in the Emergency Program. It will remain in the Emergency Program without a FHBM.
R—The community is participating in the Regular Program.
1. The Community appealed its flood-prone designation and FIA determined the Community would not be inundated by a flood having a one-percent chance of occurrence in any given year.
2. FIA determined the Community would not be inundated by a flood having a one-percent chance of occurrence in any given year.
3. The Flood Hazard Boundary Map (FHBM) contained printing errors or was improperly distributed. A new FHBM will be prepared and distributed.
4. The community lacked land-use authority over the special flood hazard area.
5. The FHBM does not accurately reflect the Community's special flood hazard areas (i.e., sheet flow flooding, extremely inaccurate map, etc.). A new FHBM will be prepared and distributed.
6. The Flood Insurance Rate Map was rescinded because of inaccurate flood elevations contained on the map.
7. The Flood Insurance Rate Map was rescinded in order to re-evaluate the mudslide hazard in this Community.
8. The T&E or H&E Map was rescinded.
9. A revision of the FHBM within a reasonable period of time was not possible. A new FHBM will be prepared and distributed.
10. Miscellaneous.

BILLING CODE 6718-03-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

46 CFR Parts 30 and 151

[CGD 80-02]

Revisions to Lists of Flammable and Combustible Bulk Cargoes

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: The Coast Guard is revising two tables found in its regulations which list flammable and combustible cargoes that may only be transported in bulk in certificated tank vessels. The revisions add to the lists cargoes that the Coast Guard has evaluated and determined to be flammable or combustible in the period since the tables were last revised. In addition, certain editorial corrections are being made to the tables.

EFFECTIVE DATE: This amendment is effective on September 10, 1980.

FOR FURTHER INFORMATION CONTACT: Mr. Curtis Payne, Office of Merchant Marine Safety (G–MHM/14), Room 1400–B, U.S. Coast Guard Headquarters, Washington, D.C. 20593, (202) 426–6260.

SUPPLEMENTARY INFORMATION: A notice of proposed rulemaking concerning this amendment was published in the **Federal Register** on April 7, 1980 (45 FR 23475). Interested persons were invited to submit comments on the proposal by May 22, 1980.

Two pertinent comments were received. The first of these recommended the inclusion of Tallow Fatty Acid on the Subcharter D list. This has not been done owing to the fact that this commodity has yet to be evaluated and classified. The second commenter stated that several commodities proposed for inclusion in the revised Subchapter D list are in reality solids at ambient temperatures. These commodities are Ethylene-Propylene Copolymer, 2-Mercaptobenzothiazole, and Propylene Polymer. They were included in the Subchapter D list because they are sometimes shipped as components of mixtures containing other Subchapter D commodities which are liquids at ambient temperatures. These commodities have in the past been authorized for shipment in bulk and will continue to be so authorized. However, their entries on the Subchapter D list are being modified to indicate that these commodities are only regulated when contained in liquid mixtures.

Drafting Information

The principal persons involved in drafting this proposal are: Mr. Curtis Payne, Project Manager, Office of Merchant Marine Safety, and Mr. Coleman Sachs, Project Counsel, Office of the Chief Counsel.

This amendment has been reviewed and determined to be nonsignificant under the Department of Transportation's "Regulatory Policies and Procedures" published on February 26, 1979 (44 FR 11034). A final evaluation has been prepared and included in the public docket. This may be obtained from the Marine Safety Counsel (G–CMC/24), Room 2418, U.S. Coast Guard Headquarters, 2100 2nd Street SW., Washington, D.C. 20593.

§ 30.25–1 [Amended]

§ 151.01–10 [Amended]

In consideration of the foregoing, the Coast Guard is amending Title 46, Code of Federal Regulations by revising the contents of Table 30.25–1 in § 30.25–1 in Part 30 and Table 151.01–10(d) in § 151.01–10(d) in Part 151 to read as follows:

Acetone.
Acetophenone.
Acetyl Tributyl Citrate.
Alcohols (Mixed).
Alkenylsuccinic Acid.
Alkenylsuccinic Anhydride.
Alkyle Benzene Sulfonic Acid (4% or less).
Alkyl Phthalates (n-).
Alkyl Succinate Formaldehyde Hydroxy Amino Condensate (3.2% or less).
Amyl Acetate (iso-, n-).
Amyl Alcohol (n-).
Amylene.
Amyl Methyl Ketone.
Amyl Tallate.
Asphalt.
Asphalt Blending Stocks: Roofers Flux.
Straight Run Residue.
Behenyl Alcohol.
Benzyl Alcohol.
Bicyclic Terpenel Polyamine Amide Salt.
Butane.
Butyl Acetate (iso-, n-, sec-).
Butyl Alcohol (iso-, n-, sec-, tert-).
Butyl Benzyl Phthalate.
Butylene.
1,3-Butylene Glycol.
Butylene Polyglycol.
Butyl Heptyl Ketone.
Butyl Methyl Ketone.
Butyl Stearate.
Butyl Toluene.
Butyrolactone (Gamma).
Calcium Alkylphenate.
Calcium Alkyl Salicylate.
Calcium Amino Nonyl Phenolate.
Calcium Carboxylate.
Caprolactam Solutions.
Carbon Black Base.
Cetyl Alcohol (Hexadecanol).
Cetyl Stearyl Alcohol.
Cleaning Spirit (unleaded).
Cumene.
Cyclopentadiene Polymers.
Cycloaliphatic Resins.
Cyclohexane.
Cyclohexanol.
Cymene (para-).
Decaldehyde (iso-, n-).
Decane.
Decene.
Decyl Alcohol (iso-, n-).
Decyl Benzene (n-).
Detergent Alkylate.
Diacetone Alcohol.
Dibutyl Carbinol.
Dibutyl Phthalate (ortho-).
Dicyclopentadiene.
Diethylbenezene.
Diethylene Glycol.
Diethylene Glycol Diethyl Ether.
Diethylene Glycol Monobutyl Ether (Methyl Carbitol).
Diethylene Glycol Monobutyl Ether Acetate.
Diethylene Glycol Monoethyl Ether.
Diethylene Glycol Monoethyl Ether Acetate.
Diethylene Glycol Monomethyl Ether.
Diethylene Glycol Monomethyl Ether Acetate.
Diethylene Glycol Monophenyl Ether.
Di (Ethylhexyl) Phthalate.
Diethyl Phthalate.
Digylcidyl Ether of Bisphenol A.
Diheptyl Phthalate.
Dihexyl Phthalate.
Diisobutyl Carbinol.
Diisobutylene.
Diisobutyl Ketone.
Diisobutyl Phthalate.
Diisodecyl Phthalate.
Diisononyl Phthalate
Diisooctyl Phthalate.
Diisopropyl Benzene.
Dimethyl Benzene.
Dimethyl Phthalate.
2,2-Dimethylpropane-1, 3-Diol.
Dinonyl Phthalate.
Di(Octyl Phenyl) Amine.
Dioctyl Phthalate.
Dipentene.
Diphenyl.
Diphenyl-Diphenyl Oxide.
Diphenyl Ether.
Dipropylene Glycol.
Dipropylene Glycol Monomethyl Ether.
Distillates: Flashed Feed Stocks.
Straight Run.
Diundecyl Phthalate.
Dodecane
Dodecanol.
Dodecene.
Dodecylbenzene (commercial).
Dodecyl Phenol.
Epoxylated Linear Alcohols, C11–C15.
Ethane.
Ethoxyethanol.
Ethoxyethyl Acetate.
Ethoxylated Alcohols, C11–C15.
Ethoxy Triglycol (crude).
Ethyl Acetate.
Ethyl Alcohol.
Ethyl Amyl Ketone.
Ethyl Benzene.
Ethyl Butanol.
Ethyl Cyclohexane.
Ethylene.
Ethylene Carbonate.
Ethylene Glycol.
Ethylene Glycol Diacetate.
Ethylene Glycol Methyl Butyl Ether.
Ethylene Glycol Monobutyl Ether.
Ethylene Glycol Monobutyl Ether Acetate.
Ethylene Glycol Monoethyl Ether.
Ethylene Glycol Monoethyl Ether Acetate.
Ethylene Glycol Monoispropyl Ether.
Ethylene Glycol Monomethyl Ether.
Ethylene Glycol Monomethyl Ether Acetate.
Ethylene Glycol Phenyl Ether.
Ethylene-Propylene Copolymer (in liquid mixtures).
Ethylhexaldehyde.
Ethylhexanoic Acid.
2-Ethyl Hexanol.
Ethylhexoic Acid.
Ethyl Hexyl Phthalate.
Ethyl Hexyl Tallate.
Ethyl Toluene.
Fatty Acid Amides.
Formamide.
Furfuryl Alcohol.
Gas Oil. Cracked.
Gasoline Blending Stocks; Alkylates.
Reformates.
Gasolines: Automotive (containing not over 4.23 grams lead per gallon).
Aviation (containing not over 4.86 grams lead per gallon).
Casinghead (natural).
Polymer.
Straight Run.
Glycerine.
Glycerol.
Glyceryl Triacetate.
Glycidyl Ester of Tertiary Carboxylic Acid.
Glycidyl Ester of Versatic Acid.
Glycol Diacetate.

Glycols, Resins, & Solvents Mixture.
Glycol Triacetate.
Glyoxal (40%).
Grease.
Heptadecane.
Heptane.
Heptanoic Acid.
Heptanol.
Heptene.
Herbicide ($C_{14}H_{20}NO_2Cl$).
Hexaethylene Glycol.
Hexamethylene Glycol.
Hexane (iso-, n-).
Hexanol.
Hexene.
Hexyl Acetate.
Hexylene Glycol.
Hog Grease.
Isophorone.
Jet Fuels: JP–1 (Kerosene).
JP–3.
JP–4.
JP–5 (Kerosene, Heavy).
Kerosene.
Lactic Acid.
Lard.
Latex, Liquid Synthetic.
Magnesium Nonyl Phenol Sulfide.
Magnesium Sulfonate.
Maleic Anhydride Copolymer.
2-Mercaptobenzothiazole (in liquid mixtures).
Methane.
Methoxy Triglycol.
Methyl Acetate.
Methyl Acetoacetate.
Methyl Alcohol.
Methyl Amyl Acetate.
Methyl Amyl Alcohol.
Methyl Amyl Ketone.
Methyl Butanol.
Methyl Ethyl Ketone.
Methyl Formal (Dimethyl Formal).
Methyl Heptyl Ketone.
Methyl Isobutyl Carbinol.
Methyl Isobutyl Ketone.
Methyl Naphthalene.
Methyl Pentene.
Methyl Pyrrolidone (n-).
Methyl tert-Butyl Ether.
Mineral Spirits.
Naphtha: Aromatic (10% or less benzene).
Cracking Fraction.
Heavy.
Paraffinic.
Petroleum.
Solvent.
Stoddard Solvent.
Varnish Makers' and Painters' (75%).
Naphthenic Acid.
Nonane.
Nonanoic Acid.
Nonanoic-Tridecanoic Acid Mixture.
Nonene.
Nonyl Alcohol.
Nonyl Phenol.
Nonyl Phenol (ethoxylated).
Nonyl Phenol Sulfide (30% or less).
Octadecene.
Octadecenoamide (Oleamide).

BILLING CODE 4910-14-M

46 CFR Part 61

[CGD 78–153]

Tailshaft Examination

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: This rule amends the vessel inspection requirements for tailshafts with oil lubricated bearings to allow the shaft to be shifted for inspection in lieu of being drawn as currently required. Shifting the shaft allows for examination of all components that are prone to develop defects or experience failure, and accordingly, a drawing is unnecessary to ensure the satisfactory operational condition of the shaft.

The rule also adds specific inspection requirements for flanged tailshafts; specifies bearing weardown criteria for tailshafts with oil lubricated bearings and water lubricated rubber bearings; and authorizes the Officer in Charge, Marine Inspection to grant all extensions pertaining to tailshaft examination intervals.

EFFECTIVE DATE: This rule is effective on September 15, 1980.

FOR FURTHER INFORMATION CONTACT: Lieutenant Michael P. Rolman, Office of Merchant Marine Safety (G–MVI–1/24), Room 2415, U.S. Coast Guard Headquarters, 2100 Second Street, S.W., Washington, D.C. 20593, (202–426–1464).

SUPPLEMENTARY INFORMATION: On November 1, 1979, the Coast Guard published a Notice of Proposed Rulemaking (44 FR 62915) concerning these amendments. A correction was published in the November 19, 1979 issue of the **Federal Register** (44 FR 66219). Four written comments were received on the proposal.

Drafting Information

The principal persons involved in drafting this rule are: Lieutenant Michael P. Rolman, Project Manager, Office of Merchant Marine Safety, and John W. Salter, Project Counsel, Office of the Chief Counsel.

Discussion of Comments

The four comments received generally supported the proposal.

§ 61.20–17. One commenter suggested a five year drawing interval for tailshafts on multiple screw vessels referencing a 1976 American Bureau of Shipping (ABS) circular sanctioning the practice. The 1980 ABS rules provide for a four year examination interval for these shafts. Moreover, given the revised examination procedures for tailshafts with oil lubricated bearings and the additional two year extension period, the Coast Guard has retained the

four year period pending experience under the new examinations.

§ 61.20–21. One commenter indicated that on occasion vessels have been required to drydock for an examination pursuant to the granting of a two year extension. It is not mandatory to drydock a vessel to conduct the examination. Any examination procedure that provides for inspection of the shafts' bearing clearance, seals, and lubricating system would meet the requirements. To clarify this fact, the provision in paragraph (3)(i) concerning examination of the propeller in place has been deleted from the final rule. This provision was included to differentiate the examination for extensions from the normal examination during which the propeller is removed.

§ 61.20–23. Two commenters felt that listing the manufacturer's recommendations concerning bearing weardown as a criteria for the Officer in Charge, Marine Inspection (OCMI) to consider would cause that officer to use them as the sole consideration. The commenters recommended listing sound engineering practices and the recommendations of the marine inspector as additional criteria for the OCMI to consider. The OCMI will, as a matter of course, consider these criteria during any examination. However, since they address general criteria and the paragraph is solely concerned with bearing weardown, the Coast Guard does not believe their inclusion would serve any useful purpose. Therefore, the rule has been retained as proposed.

This regulation has been reviewed under the Department of Transportation's Regulatory Policies and Procedures (44 FR 11034) and is considered "non-significant." A final evaluation has been prepared and placed in the public docket for inspection.

Accordingly, Part 61 of Title 46, Code of Federal Regulations, is amended by revising § 61.20–15 and adding new §§ 61.20–17 through 61.20–23 to read as follows:

§ 61.20–15 Tailshaft examination.

The rules in §§ 61.20–15 through 61.20–23 apply only to vessels in ocean and coastwise service. Each examination, inspection and test prescribed by these sections must be conducted in the presence of a marine inspector.

§ 61.20–17 Examination intervals.

(a) Except as provided in paragraphs (b) and (c) of this section, each tailshaft on a vessel must be examined at least once within two years.

(b) Tailshafts fabricated of materials resistant to corrosion by sea water, or fitted with a continuous liner or a sealing gland which prevents sea water from contacting the shaft must be examined at the following intervals:

(1) A tailshaft on a vessel with a single tailshaft must be examined at least once within three years, except that a tailshaft with a taper, keyway, and propeller designed in accordance with American Bureau of Shipping standards to reduce stress concentrations must be examined at least once within four years.

(2) Each tailshaft on a vessel with multiple tailshafts must be examined at least once within four years.

(c) A tailshaft on a mobile offshore drilling unit is not subject to the examination intervals prescribed in paragraphs (a) and (b) of this section if it is:

(1) Examined during each regularly scheduled drydocking; or

(2) Regularly examined in a manner acceptable to the Commandant.

§ 61.20–18 Examination details.

(a) Except as provided in paragraphs (b) and (c) of this section, each tailshaft on a vessel must be drawn and visually inspected at each examination.

(b) Tailshafts with a taper, keyway, and propeller designed in accordance with American Bureau of Shipping standards to reduce stress concentration must be examined as follows:

(1) Each tailshaft with water lubricated bearings must be drawn for examination. At each examination, in addition to a visual inspection of the entire shaft, the forward ⅙ of the shaft's taper section must be nondestructively tested.

(2) Each tailshaft with oil lubricated bearings must be examined as prescribed in paragraph (b)(1) of this section or as follows:

(i) The shaft must be shifted aft, as directed by the attending marine inspector, to expose the after end of its bearing contact area;

(ii) The exposed bearing contact area and the forward ⅙ of the shafts' taper section must be nondestructively tested and

(iii) The shaft's bearing clearance, seals, and lubricating system must be inspected.

(c) Tailshafts with a propeller fitted is the shaft by means of a coupling flange must be examined as follows:

(1) Each flanged tailshaft with water lubricated bearings must be drawn for examination. At each examination, in addition to a visual inspection of the entire shaft, the flange, fillet at the propeller end and each coupling bolt must be nondestructively tested.

(2) Each flanged tailshaft with oil lubricated bearings must be examined as prescribed in paragraph (c)(1) of this section or as follows:

(i) The shaft must be shifted aft, as directed by the attending marine inspector, to expose the after end of its bearing contact area;

(ii) The exposed bearing contact area, flange fillet at the propeller end, and each coupling bolt must be nondestructively tested; and

(iii) The shaft's bearing clearance, seals, and lubricating system must be inspected.

(d) If any defects are detected after a tailshaft is shifted for examination, the attending marine inspector may direct that the tailshaft be drawn for further examination of the shaft, seals, and bearings.

§ 61.20–21 Extension of examination interval

(a) The Officer in Charge, Marine Inspection, may extend the interval between tailshaft examinations as follows;

(1) An extension to the next drydocking period may be granted, except that the period of extension shall not exceed six months.

(2) If a vessel has had a long period of layup after its last tailshaft examination, an extension equal to the time the vessel has been laid up may be granted, except that the period of extension shall not exceed one year for vessels that have tailshafts with oil-lubricated bearings and six months for all other vessels.

(3) An extension of up to two years may be granted to vessels that have tailshafts with oil lubricated bearings if:

(i) Each tailshaft is examined in place with consideration given to the condition of the shafts' bearing clearance, seals, and lubricating system;

(ii) No major repairs by grinding or welding have ever been made to the shaft; and

(iii) Review of the vessel's file, drydock reports, and operations since its last tailshaft examination shows no deficiencies exist that would preclude the extension.

§ 61.20–23 Tailshaft clearance; bearing weardown.

(a) Water lubricated bearings, other than rubber, must be rebushed as follows:

(1) Where the propelling machinery is located amidship, the after stern tube bearing must be rebushed when it is worn down to 6.4 mm (0.25 in) clearance for shafts of 229 mm (9 in) or less in diameter, 7.95 mm (0.3125 in) clearance for shafts exceeding 229 mm (9 in) but not exceeding 305 mm (12 in) in diameter, and 9.53 mm (0.375 in) clearance for shafts exceeding 305 mm (12 in) in diameter.

(2) Where the propelling machinery is located aft, the after stern tube bearing must be rebushed when weardown is 1.6 mm (.0625 in) less than the applicable clearance for propelling machinery located amidship.

(b) Water lubricated rubber bearings must be rebushed when any water groove is half the original depth.

(c) Oil lubricated bearings must be rebushed when deemed necessary by the Officer in Charge, Marine Inspection. The manufacturer's recommendation shall be considered in making this determination.

(46 U.S.C. 375, 390b, 391a, 416; 49 U.S.C. 1655(b)(1); 49 CFR 1.46(b))

BILLING CODE 4910-14-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Ch. I

[Docket No. 20828]

Second Computer Inquiry; Motion for Waiver Granted

AGENCY: Federal Communications Commission.

ACTION: Waiver of page limitation requirement (Second Computer Inquiry).

SUMMARY: In response to a motion filed by the Computer and Business Equipment Manufacturers Association (CBEMA), the Chief Common Carrier Bureau, acting on delegated authority, has waived 47 CFR 429(f), which provides that oppositions to a petition for reconsideration shall not exceed 25 pages, and 47 CFR 429(g), which provides that replies to oppositions shall not exceed 10 pages, for all parties filing such pleadings in the Second Computer Inquiry (45 FR 31319, May 13, 1980).

DATES: July 24, 1980.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: H. Russell Frisby, Jr., Common Carrier Bureau, Tele: (202) 632–9342.

Order

Adopted: July 24, 1980.

Released: July 28, 1980.

In the Matter of Amendment of Section 64.702 of the Commission's Rules and Regulations (Second Computer Inquiry).

By the Chief, Common Carrier Bureau:

1. The Computer and Business Equipment Manufacturers Association (CBEMA) has moved that the Commission waive in this proceeding the 25 page limitation imposed on oppositions to petitions for reconsideration, contained in Section 1.429(f) of the Commission's Rules, and the 10 page limitation imposed on replies to oppositions, contained in Section 1.429(g) of the Rules. In support of its motion, CBEMA states that the Chief of the Common Carrier Bureau has previously waived the 25 page limitation for the petitions for reconsideration filed herein and that if similar action is not taken parties opposing these petitions will be denied a comparable opportunity to analyze fully and comment upon the issues.

2. In light of the fact that the similar 25 page limitation for petitions for reconsideration was waived, it appears reasonable and in the public interest that the 25 page limitation on oppositions and the 10 page limitation on replies to oppositions be likewise waived. Accordingly, it is ordered, pursuant to Section 0.291 of the Commission's Rules on delegation of authority, that CBEMA's motion for waiver is granted. The 25 page limitation provision of Section 1.429(f) of the Commission's Rules and the 10 page limitation of Section 1.429(g) of the Commission's Rules are hereby waived for all parties filing oppositions to petitions for reconsideration and replies to oppositions in this proceeding.

Philip L. Verveer,

Chief, Common Carrier Bureau.

BILLING CODE 6712-01-M

UNITED STATES RAILWAY ASSOCIATION

49 CFR Part 941

Regulations for Determination of the Attainment by Consolidated Rail Corporation of Certain Standards Relating to the Corporation's Employee Stock Ownership Plan

AGENCY: United States Railway Association.

ACTION: Final regulations.

SUMMARY: The regulations hereby promulgated by the United States Railway Association (the Association) with the concurrence of the Finance Committee are the regulations required by Section 216(f) of the Rail Act for determining whether the Consolidated Rail Corporation (Conrail) has attained the positive net income test and the freight labor cost to freight revenue ratio test set forth in that Section so that the rights of the participants to the securities in the employee stock ownership plan established by Conrail (ESOP) will not be subject to defeasance.

DATE: These regulations are effective as of January 1, 1980.

FOR FURTHER INFORMATION CONTACT: Edwin Rector, Assistant General Counsel (USRA) (202) 755–6763.

Supplementary Information

United States Railway Association Amendments Act of 1978, Pub. L. 95–565, 92 Stat. 2397, enacted November 1, 1978, provides, among other things, for an increase from $2,100,000,000 to $3,300,000,000 in the authorization for appropriations to the Association to be used for the purchase of securities of Conrail.

Section 3 of Pub. L. 95–565 added a new Subsection (f) to Section 216 of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 700–794) (hereafter referred to as "the Rail Act"). Subsection (f) provides, in part, that:

(1) The Association shall not invest the final $345,000,000 of the additional investment in the Corporation authorized by the Regional Rail Reorganization Act Amendments of 1978 unless and until (A) the Corporation has in effect an employee stock ownership plan which satisfies the requirements of paragraphs (2) and (3), and (B) the requirements of the other paragraphs of this subsection have been satisfied.

"(2) The employee stock ownership plan shall:

"(A) provide:

"(i) for a transfer to the plan and allocation to the accounts of plan participants in periodic installments of Series A preferred stock of the Corporation with a stated redemption value of at least $345,000,000 or any other securities in an amount determined by the Association, with the concurrence of the Finance Committee, as constituting a meaningful interest in the Corporation, or any combination thereof so determined by the Association, with the concurrence of the Finance Committee. The use of Series A preferred stock to fund the Employee Stock Ownership Plan shall not be interpreted to relieve Conrail of the responsibility for repaying in full to the United States Railway Association its indebtedness as represented by all shares originally issued under Public Law 94–210 and this Act;

"(ii) for immediate vesting of the rights of participants to such securities upon allocation, subject to defeasance as a result of the plan's termination which termination shall occur in the event that, by the end of the 120th month beginning after the month in which securities or interests therein are first

allocated to participants' accounts, the Corporation has not attained for two consecutive quarters positive net income and a freight labor cost to freight revenue ratio equal to the average such ratio for all Class I railroads in 1977, as determined pursuant to procedures adopted by the Corporation pursuant to regulations promulgated by the Association with the concurrence of the Finance Committee. * * *

Proposed regulations were published in the **Federal Register** on February 20, 1980 (45 FR 11141–11142). These final regulations reflect revisions made after consideration of comments received with respect to the proposed regulations.

Analysis of Comments:

The proposed regulations provided for public comment to be submitted on or before March 14, 1980. The Association received comments submitted on behalf of Conrail and other comments submitted on behalf of the Railway Labor Executives' Association (RLEA) and the Conrail employees whose interest in the Conrail (ESOP).

RLEA represents under Section 216(f) of the Rail Act. These comments were carefully considered by the Association and revisions to the proposed regulations have been made as described below.

Both sets of comments maintained that Conrail's own costs and revenues should be included in the computation of the average freight labor costs to freight revenue ratio for all Class I railroads in 1977. This suggestion has been adopted and the final regulations have been amended accordingly. The average freight labor costs to freight revenue ratio for all Class I railroads (including Conrail) in 1977 has been calculated by the Association to be 0.4164. The details of this calculation have been included in the final regulations.

Both sets of comments contend that the accounting methodology incorporated in the final regulations should be that of generally accepted accounting principles (GAAP) rather than the railroad accounting principles prescribed by the Interstate Commerce Commission (ICC). The Association believes that ICC accounting is the appropriate methodology to be used for the purposes of determining whether the statutory tests have been attained by Conrail. The ICC is the Government agency with the statutory authority to issue accounting rules for railroads; and the ICC accounting methodology applies to the railroads with which Conrail is being compared. In the absence of a clear directive in the statute to use another accounting methodology these regulations will be based on the ICC system of accounts in effect for the period for which the determinations are made.

Both sets of comments point out that the statutory term "positive net income" is not a standard accounting term and they therefore suggest that the Association should construe that term in one special manner or another. The Association has concluded that the term "positive net income" means simply a net income greater than zero. The proposed and final regulations reflect this interpretation.

Both sets of comments maintain that the two tests, each of which must be met during two consecutive quarters need not be met during the *same* two consecutive quarters. While Public Law 95–565 may be subject to different interpretations on this point, the Association concludes that the better interpretation of the statutory language is that both tests must be met during the same two-quarter period.

The comments submitted on behalf of Conrail question whether the proposed regulations are in accordance with the statutory language regarding the determination of whether the tests have been attained. The final regulations have been drafted to make it clear that this determination will be made pursuant to procedures adopted by Conrail pursuant to these regulations.

The comments submitted on behalf of Conrail point out that the proposed regulations do not prescribe the manner in which the test computations will be adjusted in the event there is a substantial restructuring of Conrail's capital structure or assets at some future time. There are at this time no specific proposals to restructure Conrail's capital structure or assets, therefore, it would be difficult to provide for such possibilities in these regulations. Should such plans be developed, appropriate amendments to these regulations may be necessary.

Pursuant to the authority set forth in Pub. L. 95–565, 49 CFR is amended by adding a new Part 941 to read as follows:

PART 941—REGULATIONS FOR DETERMINATION OF THE ATTAINMENT BY CONSOLIDATED RAIL CORPORATION OF CERTAIN STANDARDS RELATING TO THE CORPORATION'S EMPLOYEE STOCK OWNERSHIP PLAN

Secs.

941.1 Purpose of regulations.
941.2 Positive net income test.
941.3 Freight labor cost to freight revenue ratio test.
941.4 Average freight labor cost to freight revenue ratio for all Class I Railroads in 1977.
941.5 Period of application of the tests.
941.6 Procedures for determination of attainment of the positive net income test and the freight labor cost to freight revenue ratio test.

Authority: The Regional Rail Reorganization Act of 1973 (45 U.S.C. 700–794) as amended by Pub. L. 95–565 (92 Stat. 2397).

§ 941.1 Purpose of regulations.

The purpose of the regulations is to set forth the definitions and criteria for determining whether by the end of the 120th month beginning after the month in which securities or interests therein are first allocated to the accounts of the participants in the employee stock ownership plan established by Consolidated Rail Corporation (Conrail), Conrail has attained for two consecutive quarters (a) positive net income, and (b) a freight labor cost to freight revenue ratio equal to the average such ratio for all Class I railroads in 1977.

§ 941.2 Positive net income test.

Positive net income is defined to mean net income greater than zero. Net Income of Conrail shall be determined on a company-only basis (excluding extraordinary items) as prescribed by the Interstate Commerce Commission (ICC) Uniform System of Accounts for Railroads in effect for the period for which the determination is made. Net Income for each quarter shall be the amount shown as such on Conrail's "Quarterly Report of Revenues, Expenses and Income—Railroads" as filed with the ICC. Determination of Conrail's net income shall be subject to adjustment whenever Conrail is required to restate its quarterly net income on an amended ICC Quarterly Report of Revenues, Expenses and Income—Railroads.

§ 941.3 Freight labor cost to freight revenue ratio test.

(a) The freight labor cost to freight revenue ratio shall be determined by dividing freight labor cost by total revenues assignable to freight service. Freight labor cost is the amount expended by Conrail for freight salaries and wages. Total revenues assignable to freight service is the freight-related portion of total railway operating revenues. Each quarter Conrail shall determine these costs and revenues on the basis of accounting systems and practices consistent with those used in the preparation of the corresponding annual data for inclusion on the annual report submitted by Conrail to the ICC on Report R–1.

(b) On Report R–1 freight labor cost is the freight salaries and wages included in *"Total Carrier Operating Expenses"* (Column (b) of Line 620) on schedule 410 (*"Railway Operating Expense"*): and total revenues assignable to freight service is the freight-related portion of *"Total Railway Operating Revenues"* (Column (d) of Line 13) on schedule 210 (*"Results of Operations"*).

§ 941.4 Average freight labor cost to freight revenue ratio for all Class I railroads in 1977.

(a) The average freight labor cost to freight revenue ratio for all Class I railroads (including Conrail) in 1977 is 0.4164. This ratio was calculated by dividing total freight labor cost by railway operating revenues assignable to freight service. The statistics used to derive the numbers used to calculate this ratio are reported in *Transport Statistics in the United States for the year ended December 31, 1977* (published by ICC Bureau of Accounts) (hereafter referred to as *ICC Transport Statistics, 1977*).

(b) The amount of railway operating revenues—assignable to freight service is $19,505,457,000 (as reported in *ICC Transport Statistics, 1977*, table 4, column 1, line 242). Total freight labor cost is $8,122,128,000, and was calculated by multiplying $8,511,085,000, the amount of employee compensation chargeable to operating expenses (as reported in *ICC Transport Statistics, 1977*, table 5, column 1, line 456A) by .9543, the ratio of freight labor expenses to total labor expenses for all Class I railroads. This ratio was derived by dividing the employees health and welfare benefits expenses for freight service, which is $486,801,000 (as reported in *ICC Transport Statistics, 1977*, table 10, column 3, sum of items in lines 277, 335, 359, 409, 449, and 456) by the difference between the employees health and welfare benefits expenses, all districts, and such expenses of the National Railroad Passenger Corporation. That difference is $510,128,000 (as reported in *ICC Transport Statistics, 1977*, table 5, column 1, the sum of lines 308, 340, 359, 421 and 434, minus, in column 2, the sum of all items listed).

§ 941.5 Period of application of the tests.

For purposes of determining whether Conrail has attained for two consecutive quarters the positive net income test and the freight labor cost to freight revenue ratio test in order that the plan will not be terminated under the provisions of Section 216(f) of the Rail Act, both tests must be met during the same two consecutive quarters.

§ 941.6 Procedures for determination of attainment of the positive net income test and the freight labor cost to freight revenue ratio test.

Determinations of whether Conrail has attained the positive net income test and the freight labor cost to freight revenue ratio test will be made pursuant to procedures adopted by Conrail pursuant to these regulations.

Signed at Washington, D.C. this 21st day of July 1980.

Donald C. Cole,

President, United States Railway Association.

Concurrence by the Finance Committee

By resolution enacted on July 24, 1980, the Finance Committee of the Board of Directors of the United States Railway Association has concurred with the promulgation of the above Regulations for Determination of the Attainment by Consolidated Rail Corporation of Certain Standards Relating to the Corporation's Employee Stock Ownership Plan.

William E. Loftus,

Acting for the Secretary of the Finance Committee of the USRA Board.

BILLING CODE 8240–01–M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 26

Amendment to Back Bay National Wildlife Refuge, Va.; Public Entry and Use

AGENCY: United States Fish and Wildlife Service, Department of the Interior.

ACTION: Special regulations—amendments.

SUMMARY: This document amends certain portions of the special regulations governing public access, use, and recreation on Back Bay National Wildlife Refuge, Virginia, published on page 35823, **Federal Register**, Volume 45, No. 104, Wednesday, May 28, 1980.

DATES: July 25, 1980 through December 31, 1982.

ADDRESSES: Contact the Refuge Manager, Back Bay National Wildlife Refuge, Pembroke Office Park, Pembroke No. Two Building, Suite 218, Virginia Beach, Virginia 23462, at 804–490–0505.

FOR FURTHER INFORMATION CONTACT: Howard N. Larsen, Regional Director, U.S. Fish and Wildlife Service, One Gateway Center, Suite 700, Newton Corner, Massachusetts 02158 (617–965–5100 Ext. 200).

SUPPLEMENTARY INFORMATION: Edward S. Moses, U.S. Fish and Wildlife Service, Newton Corner, Massachusetts 02158 (617–965–5100 Ext. 222), is the primary author of this amendment.

Background

On July 25, 1980, President Jimmy Carter signed into law Senate Bill #2382 which reads in part:

Section 3(a) During any period in which the Secretary of the Interior, by regulation, limits vehicular access to Back Bay National Wildlife Refuge, the Secretary of the Interior shall issue to any eligible applicant, a renewable annual permit to enable the applicant to commute across the Back Bay National Wildlife Refuge. For purposes of this section, the term "eligible applicant" shall include all full-time residents who can furnish to the Refuge Manager, Back Bay National Wildlife Refuge, adequate proof of residence commencing prior to December 31, 1979, on the Outer Banks from the refuge boundary south to and including the village of Corolla, North Carolina, as long as they remain full-time residents. The south boundary of the area for access consideration is defined as a straight east-west line extending from Currituck Sound to the Atlantic Ocean and passing through a point one thousand and six hundred feet due south of the Currituck Lighthouse.

(b) As used in this section, the term—

(1) "residence" means a place of general abode;

(2) "place of general abode" means a principal, actual dwelling place in fact, without regard to intent; and

(3) "dwelling" means a residential structure occupied on year-round basis by the permit applicant and shall not include seasonal or part-time dwelling units such as beach houses, vacation cabins, or structures which are intermittently occupied.

(c) Any permit issued pursuant to this section shall assure that eligible applicants shall be allowed at least two round trips per day. Travel pursuant to such permits may be restricted to between the hours of 5 a.m. and 12 p.m. (midnight). In addition the Refuge Manager may make exceptions to access restrictions for qualified permittees who have demonstrated to the satisfaction of the Refuge Manager a need for additional access relating to health or livelihood.

(d) Permits pursuant to this section shall be renewed upon the submission of a signed, notarized statement by an eligible applicant that conditions of the previous permit have not changed.

(e) The Secretary of the Interior, may, subject to the foregoing provisions of this section, issue such regulations as are necessary to protect the resources of the refuge.

Accordingly the amended portions of § 26.34 are set forth below.

V 45 / 154
AG 7 80
UMI

§ 26.34 Special regulations concerning public access, use and recreation for individual national wildlife refuges.

Virginia

Back Bay National Wildlife Refuge

Access

(a) Who can qualify for access?

(1) Permanent, full-time residents who can furnish to the Refuge Manager, Back Bay National Wildlife Refuge, adequate proof of continuous and continuing residence, commencing prior to December 31, 1979, on the Outer Banks from the refuge boundary south to and including the village of Corolla, North Carolina, as long as they remain permanent, full-time residents, are authorized beach access. The south boundary of the area for access consideration is defined as a straight east-west line extending from Currituck Sound to the Atlantic Ocean and passing through a point 1,600 feet due south of the Currituck Lighthouse Residence is defined as the place of general abode; the place of general abode of a person means his principal, actual dwelling place in fact, without regard to intent. For the purposes of this section, a dwelling shall mean a residential structure occupied on a year-round basis by the permit applicant and shall not include seasonal or part-time dwelling units such as beach houses, vacation cabins, or structures which are intermittently occupied. The burden of proof showing that the prospective permittee meets these criteria shall be on the applicant by presentation of appropriate documentation. Only one permit will be issued per family.

* * * * *

(c) How many trips are allowed?

Permitted vehicles of permanent full-time residents shall be limited to a total of two round trips per day. Travel is restricted to the designated route of travel between the hours of 5 a.m. and 12 p.m. (midnight).

* * * * *

General Rules

* * * * *

(q) *Dogs.* Dogs on a hand-held leash are permitted on refuge public use areas.

* * * * *

Note.—The Department of the Interior has determined that these amendments are not a significant rule and do not require a regulatory analysis under Executive Order 12044 and 43 CFR Part 14.

Robert L. Miller,

Acting Regional Director, U.S. Fish and Wildlife Service.

July 30, 1980.

[FR Doc. 80-23909 Filed 8-6-80; 8:45 am]

BILLING CODE 4310-55-M

50 CFR Part 32

National Wildlife Refuges in Idaho

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulations.

SUMMARY: The Director has determined that the opening to hunting of certain National Wildlife Refuges in Idaho is compatible with the objectives for which these areas were established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public. This document establishes special regulations effective for the upcoming hunting seasons for migratory game birds, upland game, and big game.

DATES: September 1, 1980 to February 28, 1981.

ADDRESSES: Contact the Refuge Manager at the address and/or telephone number listed below in the body of Special Regulations.

FOR FURTHER INFORMATION CONTACT: L. A. Mehrhoff, Area Manager, U.S. Fish and Wildlife Service, 4620 Overland Road, Room 238, Boise, Idaho 83705.

SUPPLEMENTARY INFORMATION: The Refuge Recreation Act of 1962 (16 U.S.C. 460k) authorizes the Secretary of the Interior to administer such areas for public recreation as an appropriate incidental or secondary use only to the extent that it is practicable and not inconsistent with the primary objectives for which the area was established. In addition, the Refuge Recreation Act requires (1) that any recreational use permitted will not interfere with the primary purpose for which the area was established; and (2) that funds are available for the development, operation, and maintenance of the permitted forms of recreation.

The recreational use authorized by these regulations will not interfere with the primary purposes for which these National Wildlife Refuges were established. This determination is based upon consideration of, among other things, the Service's Final Environmental Statement on the Operation of the National Wildlife Refuge System published in November 1976. Funds are available for the administration of the recreational activities permitted by these regulations.

Hunting is permitted on the National Wildlife Refuges indicated below in accordance with 50 CFR 32, and the following special regulations. Portions of refuges which are open to hunting are designated by signs and/or delineated on maps. No vehicle travel is permitted except on designated roads and trails. Special conditions applying to individual refuges are listed on the reverse side of maps available at refuge headquarters and from the office of the Regional Director, Fish and Wildlife Service, Lloyd 500 Bldg., Suite 1692, 500 NE Multnomah Street, Portland, OR 97232.

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

1. Migratory game birds except mourning doves, common snipe, and crows, may be hunted on the following refuge areas:

Bear Lake National Wildlife Refuge, P.O. Box 9, Montpelier, Idaho 83254, phone 208–847–1757.

Special Regulations: (1) Air-thrust boats are prohibited. Camas National Wildlife Refuge, Hamer, Idaho 83425, phone 208–662–5423.

Deer Flat National Wildlife Refuge, Snake River Island Sector, and Lake Lowell Sector, Route 1, Box 1457, Nampa, Idaho 83651, phone 208–467–9278.

Special Conditions: (1) Waterfowl and coot hunters are required to use native materials for hunting blind construction. (2) Hunting is on a first-come-first-served basis. (3) Goose hunting is prohibited on the Lake Lowell Sector.

Grays Lake National Wildlife Refuge, P.O. Box 837, Soda Springs, Idaho 83276, phone 208–547–4996.

Special Conditions: (1) Air-thrust boats are prohibited. (2) Entry to the hunting area is limited to foot travel only.

Kootenai National Wildlife Refuge, Star Route No. 1, Box 160, Bonners Ferry, Idaho 83805, phone 208–267–3888.

Special Conditions: (1) Hunting is permitted on Saturdays, Sundays, Tuesdays and Thursdays. (2) Hunters are required to use native materials for blind construction.

Minidoka National Wildlife Refuge, Route 4, Rupert, Idaho 83350, phone 208–436–3580.

§ 32.22 Special regulations; upland game (excluding mourning dove and crows); for individual wildlife refuge areas.

Bear Lake National Wildlife Refuge, P.O. Box 9, Montpelier, Idaho 83254, phone 208–847–1757.

Special Conditions: Cottontail (including pygmy) rabbit hunting will be permitted concurrent with the State season.

Camas National Wildlife Refuge, Hamer, Idaho 83425, phone 208–662–5423.

Deer Flat National Wildlife Refuge, Lake Lowell and Snake River Sectors, Route 1, Box 1457, Nampa, Idaho 83651, phone 208–467–9278.

Special Conditions: (1) Lake Lowell sector is open only during waterfowl season.

Kootenai National Wildlife Refuge, Star Route 1, Box 160, Bonners Ferry, Idaho 83805, phone 208–267–3888.

Special Conditions: (1) Only that portion of the refuge west of the West Side road is open to upland game hunting. (2) Pheasant hunting is prohibited.

Minidoka National Wildlife Refuge, Route 4, Rupert, Idaho 83350, phone 208–436–3589.

Special Conditions: Upland game may be hunted on the public hunting area during the waterfowl season only.

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

Deer Flat National Wildlife Refuge, Snake River Island Sector, Route 1, Box 1457, Nampa, Idaho 83651, phone 208–467–9278.

Grays Lake National Wildlife Refuge, P.O. Box 837, Soda Springs, Idaho 83276, phone 208–547–4996.

Special Conditions: (1) Entry to the hunting area is by foot travel only. (2) Horses may only be used to retrieve bagged animals.

Kootenai National Wildlife Refuge, Star Route #1, Box 160, Bonners Ferry, Idaho 83805, phone 208–267–3888.

Special Conditions: Only that portion of the refuge west of the West Side road is open to big game hunting.

The provisions of these special regulations supplement the regulations which govern hunting on wildlife refuge areas generally and which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

Note.—The Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11494 and OMB Circular A–107.

Dated: July 30, 1980.

W. D. Carter,

Acting Boise Area Manager.

National Wildlife Refuges in Oreg.

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulations.

SUMMARY: The Director has determined that the opening to hunting of certain National Wildlife Refuges in Oregon is compatible with the objectives for which these areas were established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public. This document establishes special regulations effective for the upcoming hunting seasons for migratory game birds, upland game, and big game.

DATES: August 15, 1980 to February 28, 1981.

ADDRESS: Contact the Refuge Manager at the address and/or telephone number listed below in the body of Special Regulations.

FOR FURTHER INFORMATION CONTACT: L. A. Mehrhoff, Area Manager, U.S. Fish and Wildlife Service, 4620 Overland Road, Room 238, Boise, Idaho 83705, 208–334–1960.

SUPPLEMENTARY INFORMATION: The Refuge Recreation Act of 1962 (16 U.S.C. 460k) authorizes the Secretary of the Interior to administer such areas for public recreation as an appropriate incidental or secondary use only to the extent that it is practicable and not inconsistent with the primary objectives for which the area was established. In addition, the Refuge Recreation Act requires (1) that any recreational use permitted will not interfere with the primary purpose for which the area was established; and (2) that funds are available for the development, operation, and maintenance of the permitted forms of recreation.

The recreational use authorized by these regulations will not interfere with the primary purposes for which these National Wildlife Refuges were established. This determination is based upon consideration of, among other things, the Service's Final Environmental Statement on the Operation of the National Wildlife Refuge System published in November 1976. Funds are available for the administration of the recreational activities permitted by these regulations.

Hunting is permitted on the National Wildlife Refuges indicated below in accordance with 50 CFR 32, and the following special regulations. Portions of refuges which are open to hunting are designated by signs and/or delineated on maps. No vehicle travel is permitted except on designated roads and trails. Special conditions applying to individual refuges are listed on the reverse side of maps available at refuge headquarters and from the office of the Regional Director, Fish and Wildlife Service, Lloyd 500 Bldg., Suite 1692, 500 NE Multnomah Street, Portland, OR 97232.

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

1. Migratory game birds may be hunted on the following refuge areas: Ankeny National Wildlife Refuge, Route 1, Box 198, Jefferson, Oregon 97352, phone 503–327–2444.

Special Conditions: (1) Mourning dove and band-tailed pigeon hunters must check in and out of the refuge by use of self-service permits. (2) Waterfowl, coot, and snipe hunting is permitted on Wednesdays, Saturdays and Sundays from opening shooting time until 12 noon during the authorized season. (3) A Federal permit is required for waterfowl, coot, and snipe hunting and will be issued on an advanced reservation basis. Applications for reservations will be accepted between September 15 and October 15. (4) Steel shot only may be possessed or used on the refuge while hunting waterfowl, coot, and snipe. (5) Waterfowl, coot, and snipe hunters are limited to the possession and use of twenty (20) shells per day.

Baskett Slough National Wildlife Refuge, 10995 Highway 22, Dallas, Oregon, 97338, phone 503–623–2749.

Special Conditions: (1) Mourning dove and band-tailed pigeon hunting is prohibited. (2) Waterfowl, coot, and snipe hunting is permitted on Wednesdays, Saturdays and Sundays from opening shooting time until 12 noon during the authorized season. (3) A Federal permit is required for waterfowl, coot, and snipe hunting and will be issued on an advanced reservation basis. Application for reservations will be accepted between September 15 and October 15. (4) Steel shot only may be possessed or used on the refuge while hunting waterfowl, coot, and snipe. (5) Waterfowl, coot, and snipe hunters are limited to the possession and use of twenty (20) shells per day.

Deer Flat National Wildlife Refuge, Snake River Island Sector, Route, 1, Box 1457, Nampa, Idaho 83651, phone 208–467–9278.

Special Conditions: (1) Waterfowl and coot hunters are required to use native materials for hunting blind construction. (2) Hunting is on a first-come-first-serve basis.

Malheur National Wildlife Refuge, P.O. Box 113, Burns, Oregon 97720, phone 502–493–2323.

Special Conditions: (1) That portion of the Blitzen Valley west of Highway 205, the Malheur Lake area, and the Kern Reservoir will be open to hunting as posted. (3) The Malheur Lake hunt area is open for scouting with boats two weeks prior to season opening. (4) Use of motors on boats, all-terrain vehicles and construction or use of permanent blinds are prohibited.

William L. Finley National Wildlife Refuge, Route 2, Box 208, Corvallis, Oregon 97330, phone 503–757–7236.

Special Conditions: (1) Mourning dove and band-tailed pigeon hunters are required to check in and out of the refuge daily by use of self-service permits. (2) Waterfowl, coot and snipe hunting is permitted on Wednesdays, Saturdays and Sundays from opening shooting time until 12 noon during the authorized season. (3) A Federal permit is required for waterfowl, coot and snipe hunting and will be issued on an advanced reservation basis. Applications for reservations will be accepted between September 15 and October 15. (4) Steel shot only may be possessed or used on the refuge while hunting waterfowl, coots and snipe. (5) Waterfowl, coot and snipe hunters are limited to the possession and use of twenty (20) shells per day.

2. Migratory game birds, except mourning doves, band-tailed pigeons and common snipe, may be hunted on the following refuge areas: Cold Springs National Wildlife Refuge, Hermiston, Oregon, P.O. Box 239, Umatilla, Oregon 97882, phone 503–922–3232.

Klamath Forest National Wildlife Refuge (Headquarters: Klamath Basin National Wildlife Refuges, Route 1, Box 74, Tule Lake, California 96134, phone 916–667–2231).

Special Conditions: (1) Boats with or without motors are permitted except air-thrust and inboard water-thrust are prohibited. (2) All decoys, boats and other personal property must be removed from the refuge at the close of each day. (3) No person may possess any weapon or ammunition that may not be legally used for taking waterfowl.

Lower Klamath National Wildlife Refuge (Headquarters: Klamath Basin National Wildlife Refuges, Route 1, Box 74, Tule Lake, California 96134, phone 916–667–2231).

Special Conditions: (1) Posted retrieving zones are established on certain hunting units. Possession of firearms in these retrieving zones is prohibited, except, unloaded firearms may be taken through these zones when necessary to reach or leave hunting areas. Decoys may not be set in retrieving zones. (2) Boats with or without motors are permitted. Air-thrust and inboard water-thrust boats are prohibited. (3) All decoys, boats, and other personal property must be removed at the close of each day.

McKay Creek National Wildlife Refuge, Pendleton, Oregon, (Headquarters: Umatilla National Wildlife Refuge, P.O. Box 239, Umatilla, Oregon 97882, phone 503–922–3232).

Special Conditions: Hunting is permitted on Wednesdays, Saturdays, Sundays and State holidays, except Christmas.

Umatilla National Wildlife Refuge, P.O. Box 239, Umatilla, Oregon 97882, phone 503–922–3232.

Special Conditions: (1) Waterfowl and coot hunting is permitted on Wednesdays, Saturdays, Sundays and State holidays, except Christmas. (2) A Federal permit is required and will be issued on an advance reservation basis. Successful applicants may bring one guest and must arrive at check station at least one hour before shooting time or reservation is cancelled. (3) Applications will be accepted during two sign-up periods. Permits are non-transferable. (4) Steel shot only may be possessed or used during waterfowl and coot hunting. (5) Waterfowl and coot hunting will be from blinds only. Upper Klamath National Wildlife Refuge, (Headquarters: Klamath Basin National Wildlife Refuges, Route 1, Box 74, Tule Lake, California 96134, phone 916–667–2231).

Special Conditions: (1) Boats with or without motors are permitted. Air-thrust and inboard water-thrust boats are prohibited. (2) All decoys, boats and other personal property must be removed from the refuge at the close of each day. (3) No person may possess any weapon or ammunition that may not be legally used for taking waterfowl.

3. Ducks, geese, coots, and snipe may be hunted on the following refuge areas:

Lewis and Clark National Wildlife Refuge, Route 1, Box 376 C, Cathlamet, Washington 98612, phone 206–795–3915.

§ 32.22 Special regulations; upland game, for individual wildlife refuge areas.

Upland game may be hunted on the following refuge areas: Ankeny National Wildlife Refuge, Route 1, Box 198, Jefferson, Oregon 97352, phone 503–327–2444.

Special Conditions: (1) Only pheasant and quail may be hunted. (2) No upland game hunting is permitted after November 2, 1980. (3) All hunters must check in and out of the refuge daily by use of self-service permits. (4) Hunters on the area served by each registration station may be limited to 50 at any one time.

Baskett Slough National Wildlife Refuge, 10995 Highway 22, Dallas, Oregon 97338, phone 503–623–2749.

Special Conditions: (1) Only pheasant and quail may be hunted. (2) No upland game hunting is permitted after November 2, 1980. (3) All hunters must check in and out of the refuge daily by use of self-service permits. (4) Hunters on the area served by each registration station may be limited to 50 at any one time.

Cold Springs National Wildlife Refuge, Hermiston, Oregon (Headquarters: Umatilla National Wildlife Refuge, P.O. Box 239, Umatilla, Oregon 97882, phone 503–922–3232).

Deer Flat National Wildlife Refuge, Snake River Island Sector, Route 1, Box 1457, Nampa, Idaho 83651, phone 208–467–9278.

Hart Mountain National Wildlife Refuge, P.O. Box 11, Lakeview, Oregon 97630, phone 503–947–3315.

Lower Klamath National Wildlife Refuge (Headquarters: Klamath Basin National Wildlife Refuges, Route 1, Box 74, Tule Lake, California 96134, phone 916–667–2231.

Malheur National Wildlife Refuge, P.O. Box 113, Burns, Oregon 97720, phone 503–493–2323.

Special Conditions: (1) Pheasant, quail and partridge hunting will be permitted on the Blitzen Valley upland game hunting area during the last nine days of the State season. (2) Pheasant, quail and partridge hunting will be permitted on the Malheur Lake waterfowl hunting area during the waterfowl season. (3) Hunting will be permitted in the Blitzen Valley west of Highway 205 and the Kern Reservoir area as posted.

McKay Creek National Wildlife Refuge, Pendleton, Oregon (Headquarters: Umatilla National Wildlife Refuge, P.O. Box 239, Umatilla, Oregon 97882, phone 503–922–3232).

Special Conditions: (1) Hunting is permitted on Wednesdays, Saturdays, Sundays and State holidays, except Christmas. Umatilla National Wildlife Refuge, P.O. Box 239, Umatilla, Oregon 97882, phone 503–922–3232.

Special Conditions: (1) A Federal advanced reservation permit is required to hunt pheasants on the opening weekend of pheasant season. (2) Hunting is permitted from 12 noon until closing time on Wednesday, Saturdays, Sundays and State holidays, except Christmas. (3) Pheasant hunters are required to check in and out of the refuge at check stations.

William L. Finley National Wildlife Refuge, Route 2, Box 208, Corvallis, Oregon 97330, phone 503–757–7326.

Special Conditions: (1) Only pheasant and quail may be hunted. (2) Hunters are required to check in and out of the refuge by use of self-service permits. (3) Upland game hunting is prohibited after November 2, 1980. (4) Each registration station may be limited to 100 hunters at any one time.

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

Deer Flat National Wildlife Refuge, Snake River Island Sector, Route 1, Box 1457, Nampa, Idaho 83651, phone 208–467–9278.

Hart Mountain National Wildlife Refuge, P.O. Box 11, Lakeview, Oregon 97630, phone 503–947–3315.

Special Conditions: (1) Hunters are required to check in and out of the refuge. (2) Antelope and sheep hunters are required to attend a prehunt indoctrination session.

Malheur National Wildlife Refuge, P.O. Box 113, Burns, Oregon 97720, phone 503–947–3315.

Special Conditions: (1) That portion of the refuge in the Blitzen Valley west of Highway 205 will be open as posted to deer hunting concurrent with the regular State season. (2) That portion of the refuge in the Blitzen Valley west of Highway 205 and the Kern Reservoir will be open to hunting of coyotes, rabbits and hare from September 1, 1980 to January 31, 1981.

William L. Finley National Wildlife Refuge, Route 2, Box 208 Corvallis, Oregon 97330, phone 503–757–7326.

Special Conditions: (1) Hunters are required to check in and out of the refuge by use of self-service permits. (2) The use of rifles is prohibited.

The provisions of these special regulations supplement the regulations which govern hunting on wildlife refuges areas generally and which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

Note.—The Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A–107.

Dated: July 30, 1980.

W. D. Carter,

Acting Area Manager.

BILLING CODE 4310–55–M

V 45 / 154 AG 7 80 UMI

Proposed Rules

Federal Register
Vol. 45, No. 154
Thursday, August 7, 1980

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 80-SO-29]

Revocation of Federal Airways

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposed to revoke Federal Airways, V-51E, between Louisville, Ky., and Livingston, Ky., and V-140N, between Nashville, Tenn., and London, Ky. Use of these airways has steadily declined for the last several years. In 1979, less than one percent of the aircraft in the area utilized these airway segments. This action will simplify charting and lessen storage requirements for the ATC automation data base.

DATES: Comments must be received on or before September 8, 1980.

ADDRESSES: Send comments on the proposal in triplicate to: Director, FAA Southern Region, Attention: Chief, Air Traffic Division, Docket No. 80-SO-29, Federal Aviation Administration, P.O. Box 20636, Atlanta, Ga. 30320.

The official docket may be examined at the following location: FAA Office of the Chief Counsel, Rules Docket (AGC-24), Room 916, 800 Independence Avenue, SW., Washington, D.C. 20591.

An informal docket may be examined at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Mr. Chuck Horne, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426-8525.

SUPPPLEMENTARY INFORMATION:

Comments Invited

Interested persons may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Southern Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Ga. 30320. All communications received on or before September 8, 1980 will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

Availability of NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426-8058. Communications must identify the docket number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

The Proposal

The FAA is considering an amendment to § 71.123 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) that would revoke Federal Airways, V-51E between Louisville, Ky., and V-140N between Nashville, Tenn., and London, Ky. Use of these airways has steadily declined for the last several years. In 1979, less than one percent of the aircraft in the area utilized these airway segments. This action will simplify charting and lessen storage requirements for the air traffic control automation data base. Section 71.123 of Part 71 was republished in the **Federal Register** on January 2, 1980, (45 FR 307).

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.123 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (45 FR 307) as follows:

1. Under V51 after "Livingston, Tenn.: Louisville, Ky., including an" delete "E alternate and also a"

2. Under V140 after "London, Ky." delete ", including a north alternate from Nashville to London via INT Nashville 049 degree and London 258 degree radials"

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and (14 CFR 11.65)

Note: The FAA has determined that this document involves a proposed regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation and a comment period of less than 45 days is appropriate.

Issued in Washington, D.C., on July 30, 1980.

B. Keith Potts,

Acting Chief, Airspace and Air Traffic Rules Division.

[FR Doc. 80-23442 Filed 8-6-80; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 75

[Airspace Docket No. 80-ASW-30]

Alternation of Jet Route and Establishment of Jet Route

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to alter Jet Route J-13 between Truth or Consequences, N. Mex., and Delicias, Mex., and establish new Jet Route J-141 from El Paso, Tex., to Delicias. These actions would reduce controller workload by permitting air traffic control flexibility for operations between the United States and Mexico.

DATES: Comments must be received on or before September 8, 1980.

ADDRESSES: Send comments on the proposal in triplicate to:

Director, FAA Southwest Region, Attention: Chief, Air Traffic Division, Docket No. 80-ASW-30, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex. 76010.

The official docket may be examined at the following location:

FAA Office of the Chief Counsel, Rules Docket (AGC-204), Room 916, 800 Independence Avenue, SW., Washington, D.C. 20591.

An informal docket may be examined at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace Regulations Branch (ATT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426-8525.

Comments Invited

Interested persons may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Alaskan Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex. 76101. All communications received on or before September 8, 1980 will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Dockets for examination by interested persons.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue, SW., Washington, D.C., 20591, or be calling (202) 426-8058. Communications must identify the docket number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

The Proposal

The FAA is considering an amendment to Subpart B of Part 75 of the Federal Aviation Regulations (14 CFR Part 75) that would realign Jet Route J-13 between Truth or Consequences, N. Mex., and Delicias, Mex., and establish new Jet Route J-141 from El Paso, Tex., to Delicias. These changes have been requested by the Government of Mexico in order to improve traffic flow in the Cuidad Juarez, Mex., airport terminal area and would provide for an improved departure route from El Paso International Airport. The action requested would reduce controller workload, improve traffic flow, and aid flight planning. Section 75.100 of Part 75 was republished in the **Federal Register** on January 2, 1980, (45 FR 732).

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 74.100 of Part 75 of the Federal Aviation Regulations (14 CFR Part 75) as republished (45 FR 732) as follows:

1. By revising Jet Route No. 13 to read as follows: "From Delicias, Mex., to Chihuahua, Mex.; thence via Truth or Consequences, N. Mex., 165°T(152°M) radial to Truth or Consequences; Albuquerque, N. Mex.; Alamosa, Colo.; Denver, Colo.; Cheyenne, Wyo.; Casper, Wyo.; Billings, Mont.; Great Falls, Mont.; to Lethbridge, Alberta, Canada. The airspace within Mexico and the airspace within Canada are excluded."

2. By adding a new Jet Route No. 141 to read as follows: "Jet Route No. 141 From El Paso, Tex., via INT El Paso 137°T(125°M) and Fort Stockton, Tex., 273°T(262°M) radials; to Delicias, Mex. The airspace within Mexico is excluded."

Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65)

The FAA has determined that this document involves a proposed regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation and a comment period of less than 45 days is appropriate.

Issued in Washington, D.C., on July 30, 1980.

B. Keith Potts,

Acting Chief, Airspace and Air Traffic Rules Division.

BILLING CODE 4910-13-M

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

21 CFR Ch. II

Semiannual Agenda of Regulations

AGENCY: Drug Enforcement Administration, Department of Justice.

ACTION: Publication of semiannual agenda.

SUMMARY: In compliance with Executive Order No. 12044 and Attorney General Order No. 831-79, the Drug Enforcement Administration (DEA) is providing public notice of its plan to simplify its regulations and to streamline its administrative procedures.

FOR FURTHER INFORMATION CONTACT: Richard Ira Lebovitz, Office of the Chief Counsel, Drug Enforcement Administration, Washington, D.C. 20537. Telephone: (202) 633-1141.

I. REVIEW OF SIGNIFICANT REGULATIONS

All regulations concerning the importation, exportation, manufacture, distribution and dispensing of controlled substances, the scheduling of such substances, the registration of all legitimate handlers of controlled substances, and the administrative procedures to be followed by DEA, registrants under the Controlled Substances Act, 21 U.S.C. 801 *et seq.*, and interested members of the public with respect to such matters, are presently contained in a single volume of the Code of Federal Regulations, 21 CFR Part 1300 to End.

While some of the regulations contained in this volume are clearly of a less significant or housekeeping nature, we consider the majority significant because they have an impact upon, and create some burden or responsibility which devolves upon, one or more of the classes of DEA registrants. For the most part, these regulatory controls are Congressionally mandated and necessary if the integrity of the closed system of controlled substance distribution is to be maintained.

DEA seeks to clarify and simplify its regulations to reduce to the greatest degree possible consistent with the requirements of the Controlled Substances Act and the public health and safety, the burdens imposed by its regulations upon those who legitimately handle controlled substances.

The following parts of Title 21, Code of Federal Regulations, were identified in our initial review as being subject to review during the subsequent six month period:

V 45 / 154
AUG 7 80
UMI

Part 1301—Registration of Manufacturers, Distributors and Dispensers of Controlled Substances
Part 1303—Quotas
Part 1304—Records and Reports of Registrants
Part 1308—Schedules of Controlled Substances
Part 1311—Registration of Importers and Exporters of Controlled Substances
Part 1316—Administrative Functions, Practices and Procedures

In addition to those sections listed above, our last semiannual agenda, published on September 19, 1979, identified a significant regulation that was under review concerning the limitation on importation of narcotic raw materials. During the 60-day comment period which followed the publication, approximately 15 individuals and organizations commented on the parts under review. We received many other comments on parts not under review during the six month period covered by the agenda. We will keep those comments, many of which concerned Part 1306, Prescriptions, for future consideration. We are reviewing comments received on the affected parts to ascertain what regulatory changes, if any, should be considered.

The significant regulation concerning the limitation on importation of narcotic raw materials, identified in the semiannual agenda, was published as a proposed rule on February 12, 1980 (see 45 FR 9289).

Additionally, the review by DEA has generated proposed regulations concerning the partial filling of prescriptions for controlled substances (45 FR 24199, April 9, 1980), the transfer of prescriptions for controlled substances between pharmacies as a recordkeeping task (45 FR 21652, April 2, 1980), the elimination of the need for obtaining a permit to maintain records in a central location (45 FR 24198, April 9, 1980) and the issuance of a statement of policy concerning the maintenance of emergency kits containing controlled substances in long term care facilities (45 FR 24128, April 9, 1980).

These notices of proposed rulemaking and the statement of policy provided the opportunity for comment. DEA reviewed comments received on the statement of policy concerning emergency kits and the proposed rule concerning central recordkeeping permits. By formal publication dated June 18, 1980 (45 FR 40576), DEA placed the statement of policy into effect and also published a final rule concerning central recordkeeping permits on July 1, 1980 (45 FR 44266).

After consideration of all timely comments submitted in response to the other proposed regulations referred to above, DEA will decide whether to publish final orders.

DEA also proposes to engage in a review of the following parts of its regulations in 21 CFR Part 1300 to End:

Part 1302—Labeling and Packaging Requirements for Controlled Substances
Part 1307—Miscellaneous
Part 1310—Piperidine Reporting and Purchaser Identification

Part 1302—Labeling and Packaging Requirements for Controlled Substances

Regulations in Part 1302 require that controlled substances distributed in commercial containers bear labeling which displays the appropriate symbol to identify in which schedule the controlled substances are placed. This part requires that commercial containers for certain controlled substances be sealed to deter and detect tampering.

Legal Basis—21 U.S.C. 825.

Knowledgeable Official—Ronald W. Buzzeo, Chief, Compliance Division, Office of Compliance and Regulatory Affairs, Drug Enforcement Administration, Washington, D.C. 20537. Telephone (202) 633–1321.

Regulatory Analysis—Not required.

Discussion—Review of this part will focus on the clarification and simplification of terms defined and used in this regulation.

Part 1307—Miscellaneous

The regulations in Part 1307 provide the authority in furtherance of the Controlled Substances Act for the Administrator to except persons from DEA regulations concerning registration, packaging and labeling, order forms, quotas, records and reports, prescription requirements, controlled substances schedule requirements, importation and exportation requirements, and administrative functions, practices and procedures. This part merely provides the authority to grant exceptions; it is stressed that the exercise of this authority is entirely in the Administrator's discretion. This part further provides special exceptions from regulations for certain manufacturing and distribution activities and provides procedures for the proper disposal and disposition of controlled substances.

Legal Basis—21 U.S.C. 821 and 871(b).

Knowledgeable Official—Ronald W. Buzzeo, Chief, Compliance Division, Office of Compliance and Regulatory Affairs, Drug Enforcement Administration, Washington, D.C. 20537. Telephone (202) 633–1091.

Regulatory Analysis—Not required.

Discussion—Review of this part will include identifying the need or desire, and the practicalities, of providing additional exceptions for registrants' activities beyond those special exceptions for manufacture and distribution of controlled substances currently set forth in Part 1307.

Part 1310—Piperidine Reporting and Purchaser Identification

Regulations in Part 1310 were first published on March 9, 1979 (44 FR 12993) pursuant to the mandate of Title II, PCP Criminal Penalties and Piperidine Reporting, of the Psychotropic Substances Act of 1978, Pub. L. 95–633. The 1978 Act amended the Controlled Substances Act by creating a new section 310 (21 U.S.C. 830) that requires sellers of the chemical piperidine to report their sales to DEA and to require proof of positive identification from the piperidine purchaser. Section 310 authorizes the Attorney General to establish regulations detailing the reporting requirements and identification procedures to be met by sellers of piperidine, and, in consequence, the Administrator has issued Part 1310. Part 1310 requires reports from persons who distribute, transfer, sell, import, or suffer theft or loss of, piperidine. Part 1310 also particularizes the information such reports must contain, sets out the format for the reports, and notes when they must submitted. It also sets out the acceptable type of identification which purchasers should present to sellers during a sale of piperidine. Lastly, Part 1310 allows sellers an exemption from reporting sales to known customers.

Legal Basis—21 U.S.C. 830.

Knowledgeable Official—Dale Schuitema, Staff Coordinator, Office of Enforcement, Drug Enforcement Administration, Washington, D.C. 20537. Telephone (202) 633–1463.

Regulatory Analysis—Not required.

Discussion—Review of Part 1310 will encompass the productivity of these reporting and purchaser identification requirements. The authority for Part 1310 is section 310 of the Controlled Substances Act, and by the terms of Pub. L. 95–633, section 310 is repealed, effective January 1, 1981. If DEA's review reveals that the reporting and purchaser identification requirements have proven to be worthy tools in curtailing illegal sales and purchases of piperidine, DEA will recommend that the "sunset" provision of Pub. L. 95–633 be repealed.

There will be a 60-day comment period following the present publication of DEA's semiannual agenda. DEA will consider any and all comments submitted by interested persons on the parts currently scheduled for reviews. If this review shows that amendments or deletions are necessary, whether initiated by interested persons through their comments filed within the 60-day period or by DEA through its own initiative, DEA will then publish notices of proposed rulemaking.

A second 60-day comment period will follow publication of any such proposed revised regulations. During the entire review period, DEA will solicit and encourage active participation by the affected industries and professions and by DEA staff within the limitations imposed by budgetary constraints and normal day-to-day workloads.

Dated: July 23, 1980.

Marion W. Hambrick,

Acting Administrator, Drug Enforcement Administration.

[EE-164-78]

Coordination of Vesting and Discrimination Requirements for Qualified Plans; Announcement

AGENCY: Internal Revenue Service, Treasury.

ACTION: Announcement.

SUMMARY: This document announces that the Internal Revenue Service has published on August 4, 1980, a news release, IR–80–85, dated August 4, 1980, that provides examples of the coordination of vesting and discrimination rules for employee retirement plans that may be included in the final regulations for determining if a plan's vesting schedule discriminates in favor of certain types of employees.

FOR FURTHER INFORMATION CONTACT: George H. Bradley of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, N.W., Washington, D.C. 20224, Attention: CC:LR:T, 202–566–3486, not a toll-free call.

Announcement

Proposed regulations for Internal Revenue Code section 411(d)(1) were published in the **Federal Register** on April 9, 1980 (45 FR 24201). In response to comments received, modifications to the proposed regulations were published in the **Federal Register** on June 12, 1980, (45 FR 39869) with three examples showing how the facts and circumstances test for discriminatory vesting in the proposed regulations was to be applied.

At the July 10, 1980, public hearing on the modified proposed regulations several commenters asked the IRS to include the three examples in the final regulations and to provide additional examples as guidance. The Treasury Department has indicated that other examples will be publicized before the final regulations are adopted so that the public and members of Congress can make comments.

The three original examples, with modifications, and two new examples are attached to IR–80–85. All five examples may be included in the final regulations under 411(d)(1).

Written comments on the examples should be sent to: Commissioner of Internal Revenue, Attention: CC:LR:T (EE–164–78), 1111 Constitution Avenue, N.W., Washington, D.C. 20224.

George H. Jelly,

Director, Employee Plans and Exempt Organizations Division.

BILLING CODE 4830-01-M

26 CFR Part 1

[LR-261-76]

Income Tax; Deductions for Business Use or Rental of Dwelling Unit

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed regulations relating to the deductibility of expenses in connection with the business use, or the rental to others, of a dwelling unit that the taxpayer is deemed to have used for personal purposes during the taxable year. The Tax Reform Act of 1976 established new conditions for the deductibilty of such expenses. The regulations would provide the public with needed guidance in complying with the Act and would affect individuals, partnerships, trusts, estates, and electing small business corporations that incur business expenses for dwelling units which are deemed to have been used for personal purposes during the taxable year.

DATES: Written comments and requests for a public hearing must be delivered or mailed by October 6, 1980. The amendments are proposed to be effective for taxable years beginning after 1975.

ADDRESS: Send comments and requests for a public hearing to: Commissioner of Internal Revenue, Attention: CC:LR:T (LR–261–76), Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT: Paul A. Francis (202–566–6640).

SUPPLEMENTARY INFORMATION:

Background

This document contains proposed amendments to the Income Tax Regulations (26 CFR Part 1) under sections 183, 212, 262, and 280A of the Internal Revenue Code of 1954. These amendments are proposed to provide regulations under section 280A which was added to the Code by section 601 of the Tax Reform Act of 1976 (90 Stat. 1569) and amended by section 306 of the Tax Reduction and Simplification Act of 1977 (91 Stat. 152) and section 701(h) of the Revenue Act of 1978 (92 Stat. 2904). The amendments to the regulations under sections 183, 212, and 262 provide for coordination of those sections with section 280A. These amendments are to be issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805).

General Rule

Section 280A generally disallows business deductions for expenses with respect to the use of a dwelling unit used by the taxpayer as a residence during the taxable year, but there are several exceptions to this general rule. Section 280A prescribes certain criteria for determining whether a taxpayer who uses a dwelling unit for business purposes or rents a dwelling unit to others has used the dwelling unit as a residence during the taxable year. A dwelling unit may be a house, apartment, condominium, mobile home, boat, or similar property with basic living accommodations. Section 280A also applies to other property, such as a garage, which is closely related to the dwelling unit itself. If the taxpayer has used the dwelling unit as a residence, the taxpayer may deduct the expenses attributable to the business use or rental of the unit only to the extent provided in section 280A.

Use as a Residence

A taxpayer uses a dwelling unit as a residence during a taxable year if the number of calendar days on which the taxpayer uses the unit for personal purposes exceeds the greater of 14 days or 10 percent of the number of calendar days on which the unit is rented at a fair rental (excluding days on which the taxpayer uses the unit for personal purposes). A special rule applies in certain situations in which the taxpayer

is renting out a unit used by the taxpayer as a principal residence.

A taxpayer is treated as using a unit for personal purposes on any day on which the unit is used—

(1) For personal purposes by the taxpayer or any other person with an interest in the unit, or by certain relatives of either;

(2) By any person under an arrangement which enables the taxpayer to use another unit; or

(3) By any person (except certain employees) if fair rental has not been paid for the use of the unit for that day.

The proposed regulations explain how these rules apply to units in which entities, such as partnerships or trusts, have an interest. The proposed regulations also provide that an individual who works on repair or maintenance of the unit on a substantially full-time basis will not be treated as using the unit for personal purposes.

Business Use of Home

A taxpayer who uses a dwelling unit as a residence may deduct expenses for business use of the unit only if the use is within one of the exceptions enumerated in section 280A. No deductions are allowed unless the taxpayer uses the unit for a specified business purpose on a regular basis. Deductions are subject to the limitation explained below.

A taxpayer may deduct expenses allocable to the use of a portion of a dwelling unit as the taxpayer's principal place of business if the taxpayer makes no use of that portion of the unit other than for business purposes. The proposed regulations provide that this exception applies only if the unit is the principal place of the taxpayer's overall business activity. Use of a unit as the principal place of business for a secondary business does not qualify. The proposed regulations do not follow the decision of the tax Court in *Curphey v. Commissioner*, 73 T.C. No. 61 (Feb. 4, 1980).

Expenses allocable to the use of a portion of a unit as a place of business used by patients, clients, or customers in meeting or dealing with the taxpayer are deductible if the taxpayer makes no use of that portion of the unit other than for business purposes.

A taxpayer who, in connection with a trade or business, uses a separate structure which is related to the dwelling unit but not attached to it may deduct expenses allocable to the use of the separate structure if the taxpayer makes no use of the structure other than for business purposes.

An employee may deduct expenses under the three exceptions just described only if the employee's use of the unit is for the convenience of the employer.

There is also an exception for expenses allocable to space within the unit in which the taxpayer stores inventory. The inventory must be held for use in the taxpayer's trade or business of selling products at wholesale or retail, and the unit must be the sole fixed location for that trade or business.

A taxpayer may deduct expenses allocable to the use of a unit in the taxpayer's trade or business of providing day care for children, for individuals who have attained age 65, or for individuals who are physically or mentally incapable of caring for themselves. The regulations distinguish day care services, which are primarily custodial, from educational activities.

There are two special rules that apply to the exception for day care services. The taxpayer may deduct expenses accuring after August 1977, only if the taxpayer is taking, or has taken, whatever steps may be necessary to comply with applicable state laws such as licensing or registration requirements. The proposed regulations indicate when a taxpayer will be deemed to have satisfied this rule. If the taxpayer uses any portion of the unit for day care services and for some other purpose besides the purposes described in section 280A, the taxpayer must make a time allocation of the expenses attributable to that portion of the unit according to the formula specified in the proposed regulations.

Limitation on Deductions for Business Use

Deductions allowable under the five exceptions just described are subject to a special limitation. As the proposed regulations indicate, the first step necessary to apply the limitation is to determine the gross income derived from the use of the unit. If the taxpayer carries on the trade or business in more than one location, the taxpayer must allocate the income to the activity in the different locations. The gross income derived from the use of the unit equals the excess of the gross income allocable to the business activity in the unit over the expenses incurred in the activity but not allocable to the use of the unit itself, such as expenditures for supplies and compensation paid to assistants. The gross income derived from the use of the unit is the ceiling for all other deductions. The proposed regulations prescribe the sequence in which the deductions must be claimed.

Rental of Dwelling Unit

Section 280A prescribes several special rules with respect to the deductibility of expenditures in connection with the rental of dwelling units.

Section 280A(d)(3) provides that the days on which the taxpayer used the rental unit as a principal residence are disregarded in determining whether a taxpayer may deduct rental expenses in excess of income from a "qualified rental period." A "qualified rental period" is a consecutive period of 12 or more months, or a shorter period ending with the sale or exchange of the unit, during which the unit is rented to someone other than a family member, or is held for rental, at fair rental value.

Section 280A(f)(1)(B) excludes from the definition of "dwelling unit", and therefore from the general disallowance provision of section 280A(a), any portion of a unit "used exclusively as a hotel, motel, inn, or similar establishment". The proposed regulations state that this exception applies only if the portion of the unit is regularly available for occupancy by paying customers and only if no person with an interest in the property is deemed to have used it as a residence during the taxable year.

If a taxpayer uses a unit as a residence and actually rents it to others for less than 15 days during the year, the taxpayer disregards the rental use altogether for tax purposes. Thus, the taxpayer excludes the rental income from gross income for the year and may not deduct the rental expenses.

If a taxpayer who rents a dwelling unit to others makes any personal use of the unit during the taxable year, the taxpayer may not deduct more than a proportionate share of the expenses for the unit as rental expenses. The proposed regulations explain this limitation, which applies even if the personal use of the unit by the taxpayer is insufficient to constitute use as a residence.

A taxpayer who uses a unit as a residence and rents it to others for more than 14 days during the year may deduct rental expenses only to the extent of the gross rental income from the unit. The taxpayer must deduct expenses allocable to the rental use of the unit in the sequence prescribed in the proposed regulations. Items which are deductible without regard to any connection to a business activity, such as mortgage interest and taxes, are deducted first, then operating expenses, and finally items which affect basis, such as depreciation.

Special Property Arrangements

The proposed regulations provide for the application of section 280A to two types of special property arrangements: rental pools and time-sharing arrangements.

Rental pools are arrangements whereby a number of dwelling units are made available for rental and the owners of the units agree to share at least a portion of the rental receipts without regard to the actual rental of the individual units. The proposed regulations require each pool participant to include in gross income the amounts received from the pool. The limitation on the allocation of expenses to the rental use of a unit is applied by reference to the actual use of each unit.

A time sharing arrangement is an arrangement whereby two or more persons with interests in a dwelling unit agree to exercise control over the unit for different periods during a year. In general, the proposed regulations treat such arrangements as tenancies in common.

Comments and Requests for a Public Hearing

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted (preferably six copies) to the Commissioner of Internal Revenue. All comments will be available for public inspection and copying. A public hearing will be held upon written request to the Commissioner by any person who has submitted written comments. If a public hearing is held, notice of the time and place will be published in the **Federal Register**.

Drafting Information

The principal author of these proposed regulations was Paul A. Francis of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department particpated in developing the regulations, both on matters of substance and style.

Evaluation of the effectiveness of the proposed regulations after issuance will be based upon comments received from offices within Treasury and the Internal Revenue Service, other governmental agencies, and the public.

Proposed amendments to the regulations

The proposed amendments to 26 CFR Part 1 are as follows:

Paragraph 1. Section 1.183–1 is amended by adding at the end thereof the following new paragraph:

§ 1.183–1 Activities not engaged in for profit.

* * * * *

(g) *Coordination with section 280A.* If section 280A(a) (relating to disallowance of deductions for certain expenses with respect to the use of a dwelling unit used as a residence) applies with respect to any dwelling unit (or portion thereof) for the taxable year—

(1) Section 183 and this section shall not apply to that unit (or portion thereof) for that year, but

(2) That year shall be taken into account as a taxable year for purposes of applying section 183(d).

See section 280A and the regulations thereunder for definitions and rules relating to use of dwelling units. Note that the limitation of section 280A(e) and § 1.280A–3(c) applies in any case where an individual or an electing small business corporation uses a dwelling unit for personal purposes on any day during the taxable year.

Par. 2. Paragraph (h) of § 1.212–1 is amended by adding at the end thereof a new sentence to read as follows:

§ 1.212–1 Nontrade or nonbusiness expenses.

* * * * *

(h) * * * But see section 280A and the regulations thereunder.

* * * * *

Par. 3. Paragraph (b)(3) of § 1.262–1 is amended to read as follows:

§ 1.262–1 Personal, living and family expenses.

* * * * *

(b) *Examples of personal, living, and family expenses.* * * *

(3) Expenses of maintaining a household, including amounts paid for rent, water, utilities, domestic service, and the like are not deductible. For rules relating to expenses incurred in connection with dwelling units used for both business purposes and personal purposes, see section 280A and the regulations thereunder.

* * * * *

Par. 4. The following new sections are inserted immediately after § 1.279–7:

§ 1.280A–1 Limitations on deductions with respect to a dwelling unit which is used by the taxpayer during the taxable year as a residence.

(a) *General rule.* In the case of an individual, a partnership, a trust an estate, or an electing small business corporation (as defined in section 1371 (b)), no deductions which would otherwise be allowable under chapter 1 of the Code shall be allowed with respect to the use of a dwelling unit used by such person during the taxable year as a residence except as provided in section 280A and in §§ 1.280A–1 through 1.280A–3. The requirements imposed by section 280A are in addition to the requirements imposed by other provisions of the Code. If a deduction is claimed for an item attributable to a dwelling unit used by the taxpayer during the taxable year as a residence, the taxpayer must first establish that it is otherwise allowable as a deduction under chapter 1 of the Code before the provisions of section 280A become applicable. Section 1.280A–2 sets forth the rules relating to the deductibility of expenses attributable to the business use of a dwelling unit used as a residence. Section 1.280A–3 sets forth the rules relating to the deductibility of expenses attributable to the rental of a dwelling unit used as a residence. Note that the allocation rule of section 280A (e) and § 1.280A–3 (c) applies to expenses attributable to any dwelling unit used by the taxpayer for personal purposes on any day during the taxable year, whether or not the taxpayer is treated as using the unit as a residence.

(b) *Deductions allowable without regard to any connection with a trade or business or an income-producing activity.* Deductions which are allowable without regard to any connection with a trade or business or an income-producing activity are allowed with respect to the use of dwelling units. Such deductions include the deduction for interest under section 163, the deduction for taxes under section 164, and the deduction for casualty losses under section 165.

(c) *Dwelling unit*—(1) *In general.* For purposes of this section and §§ 1.280A–2 and 1.280A–3, the term "dwelling unit" includes a house, apartment, condominium, mobile home, boat, or similar property, which provides basic living accommodations such as sleeping space, toilet, and cooking facilities. All structures and other property appurtenant to a dwelling unit which do not themselves constitute dwelling units are considered part of the unit. For example, an individual who rents to another person space in a garage which is appurtenant to a house which the individual owns and occupies may claim deductions with respect to that rental activity only to the extent allowed under section 280A, paragraph (b) of this section, and § 1.280A–3.

(2) *Exception.* Notwithstanding the provisions of paragraph (c)(1) of this section the term "dwelling unit" does not include any portion of a unit which is used exclusively as a hotel, motel, inn, or similar establishment. Property is so

V 45 / 154 AG 7 80 UMI

used only if it is regularly available for occupancy by paying customers and only if no person having an interest in the property is deemed under the rules of this section to have used the unit as a residence during the taxable year. For example, this exception will apply to a unit entered in a rental pool (see § 1.280A–3 (e)) only if the owner of the unit does not use it as a residence during the taxable year.

(d) *Use as residence*—(1) *In general.* For purposes of this section and §§ 1.280A–2 and 1.280A–3, a taxpayer uses a dwelling unit during the taxable year as a residence if the taxpayer uses the unit for personal purposes for a number of days which exceeds the greater of—

(i) 14 days, or

(ii) 10 percent of the number of days during the year for which the unit is rented at a fair rental.

For purposes of this determination, a unit shall not be treated as rented at fair rental for any calendar day on which it is used for personal purposes.

(2) *Examples.* The provisions of this paragraph (e) may be illustrated by the following examples:

Example (1). B owns a boat suitable for overnight use. B is deemed, under paragraph (d) of this section, to have used the boat for personal purposes for 16 days during B's taxable year. B rents the boat at fair rental for 163 days during B's taxable year. B is not deemed to have used the boat for personal purposes on any of the 163 days for which it is rented at fair rental. Since the number of days on which B used the boat for personal purposes does not exceed 16.3 (10 percent of 163, the number of days on which the boat is treated as rented at a fair rental for purposes of this determination), B has not used the boat as a residence for the taxable year.

Example (2). Assume the same facts as in example (1) of this subparagraph, except that 5 of the 16 days on which B is deemed to have used the boat for personal purposes were included in the 163 days on which the boat was rented at fair rental. On those 5 days the boat is not treated as rented at a fair rental for purposes of this paragraph. Since the number of days on which B used the boat for personal purposes exceeds 15.8 (10 percent of 158, the number of days on which the boat is treated as rented at a fair rental for purposes of this determination), B has used the boat as a residence for the taxable year.

(e) *Personal use of dwelling unit*—(1) *General rule.* For purposes of this section and §§ 1.280A–2 and 1.280A–3, a taxpayer shall be deemed to have used a dwelling unit for personal purposes for a calendar day if, for any part of such day, any portion of the unit is used—

(i) For personal purposes by the taxpayer or any other person who has an interest in the unit;

(ii) By a brother or sister (whether by the whole or half blood), spouse, ancestor, or lineal descendant of the taxpayer or of any other person who has an interest in the unit;

(iii) By any individual who uses the unit under an arrangement which enables the taxpayer to use some other dwelling unit for any period of time, whether or not a rental is charged for the use of the other unit and regardless of the length of time that the taxpayer uses the other unit; or

(iv) By any individual, other than an employee with respect to whose use section 119 (relating to meals or lodging furnished for the convenience of the employer) applies, unless for such day the dwelling unit is rented for a rental which, under the facts and circumstances, is fair rental.

For purposes of this paragraph, a person is considered to have an interest in a dwelling unit if that person holds any interest in the unit (other than a security interest or an interest under a lease for a fair rental) even if there are no immediate rights to possession and enjoyment under the interest.

(2) *Special rule for "qualified rental period".* For purposes of determining whether section 280A(c)(5) and § 1.280A–3(d) limit deductions for expenses allocable to a "qualified rental period", a taxpayer shall not be considered to have used the rented unit for personal purposes on any day during the taxable year before or after a "qualified rental period" described in paragraph (e)(2)(ii) of this section, or before a "qualified rental period" described in paragraph (e)(2)(ii) of this section, if the rented unit was the principal residence of the taxpayer with respect to that day. The use of the unit for personal purposes shall, however, be taken into account for all other purposes of section 280A. A "qualified rental period" is a consecutive period of—

(i) 12 or more months which begins or ends during the taxable year, or

(ii) less than 12 months which begins in the taxable year and at the end of which the rented unit is sold or exchanged, and

for which the unit is rented to a person other than a member of the family of the taxpayer, or is held for rental, at a fair rental. For purposes of the preceding sentence, the family of the taxpayer includes the brothers and sisters (whether by the whole or half blood), spouse, ancestors, and lineal decendants of the taxpayers. For the meaning of the term "principal residence", see section 1034 and § 1.1034–1 (c)(3).

(3) *Dwelling units in which a partnership, a trust, an estate, or an electing small business coporation has an interest.* For purposes of applying the provisions of paragraph (e) (1) of this section to a dwelling unit in which a partnership, a trust, an estate, or an electing small business corporation (as defined in section 1371 (b)) has an interest, the entity shall be considered to have made personal use of the unit on any calender day on which any member of the partnership, beneficiary of the trust or estate, or shareholder in the corporation would be considered to have made personal use of the unit if that member, beneficiary, or shareholder had an interest in the dwelling unit.

(4) *Use of the unit for repairs and maintenance.* For purposes of applying the provisions of paragraph (e)(1) of this section, the use of a dwelling unit by any individual on any calendar day shall be disregarded if on that calendar day that individual is engaged in repair or maintenance work on the unit on a substantially full-time basis. An individual will be deemed to have satisfied this condition on any calendar day on which the individual works on the unit for the lesser of 8 hours or ⅔ of the time that the individual is present on the premises. If all individuals on the premises on a calendar day who are capable of working do work on the unit on a substantially full-time basis, incidental use of the unit on the same day by other individuals incapable of working, *e.g.*, small children, shall be disregarded for purposes of paragraph (e) (1) of this section.

(5) *Examples.* The provisions of this paragraph (e) may be illustrated by the following examples:

Example (1). B owns a vacation home which B rents to S, B's sister, at a fair rental for 19 days. B also rents the home to C at fair rental for 11 days as a part of an arrangement whereby B is enabled to use D's home for 6 days. As a favor, B rents the home to F at a discount rate for 15 days. On the basis of the rental activity described, B is deemed to have used the home for personal purposes on 36 days.

Example (2). X Inc., an electing small business corporation in which A and B are shareholders, is the owner of a fully equipped recreational vehicle. During the month of July, the vehicle is used by three individuals. A uses the vehicle on a 7-day camping trip. D, who is B's daughter, rents the vehicle from A and B at fair rental for 10 days. E rents the vehicle at fair rental for 12 days under an arrangement whereby B is enabled to use an apartment owned by F, a friend of E, for 9 days. X Inc. is deemed to have used the dwelling unit for personal purposes on any day on which any of its shareholders would be deemed to have so used the unit if each shareholder had an interest in the unit.

Example (3). A owns a lakeside cottage which A rents during the summer. A arrives at the cottage alone at 8 p.m. on a Thursday to prepare it for the summer season. A works on the cottage for 3 hours that evening and for 10 hours on Friday. B, A's spouse, joins A at the cottage at noon on Saturday. A works on the cottage for 9 hours that day, and B works on the cottage for 4 hours. On Sunday A and B work on the cottage for one hour and then return home. A and B ate their meals in the cottage and slept there during the time that they were present. A will be deemed to have used the cottage for personal purposes on Saturday because B, who made personal use of the cottage on that day, did not work on the cottage on a substantially full-time basis. A also made personal use of the cottage on Sunday on which A worked only briefly. A will not be deemed to have used the cottage for personal purposes on Thursday or Friday because the use by A, the only person making use of the cottage on those days, is disregarded since A was engaged in repair and maintenance work on the unit for more than ⅔ of the time that A was on the premises on Thursday and for more than 8 full hours on Friday.

Example (4). A owns a mountain cabin which A rents for most of the year. A works on maintenance of the cabin on a substantially full-time basis for several days. A's four-year old son, S, accompanies A to the cabin and plays while A works. The personal use of the cabin by S is disregarded since S, who is incapable of working is accompaning A, who is working on a substantially full-time basis. If S were 16 years old and otherwise capable of working, however, A would be deemed to have used the cottage for personal purposes unless S worked on the cabin on a substantially full-time basis.

Example (5). B, an individual whose taxable year is the calendar year, uses a dwelling unit as a principal residence from January 1, 1978, to June 30, 1978. On July 1, 1978, B rents the unit at a fair rental to D, an unrelated individual, for a two-year period beginning immediately. In determining whether section 280A(c)(5) and § 1.280A–3(d) limit deductions for expenses allocable to this "qualified rental period", B is not considered to have used the unit for personal purposes from January 1, 1978, to June 30, 1978. Note, however, that section 280A(e) and § 1.280A–3(c) limit the portion of the total 1978-expenses with respect to the unit which may be attributed to the "qualified rental period." B's personal use of the unit is similarly taken into account in applying section 280A(c)(5) to any other use of the unit during the taxable year, *e.g.*, the use of a portion of the unit as a place of business.

(f) *Coordination with section 183.* If a dwelling unit is used by the taxpayer during the taxable year as a residence, section 183 (relating to activities not engaged in for profit) shall not apply with respect to the unit for the taxable year. The taxable year shall, however, be taken into account as a taxable year for purposes of determining whether the presumption described in section 183(d) applies.

Example. B owns a cottage which B rents for part of the summer in 1976, 1977, and 1978. B also uses the cottage as a residence in 1976 and 1977, but not in 1978. B's rental income for 1976 exceeds the expenses allocable to the rental activity, but in 1977 the expenses exceed the rental income. In determining whether B may claim for 1978 the benefit of the presumption described in section 183(d), the rental activity in 1976 and 1977 is taken into account even though section 183 did not apply with respect to the cottage for those years.

(g) *Effective date.* This section and §§ 1.280A–2 and 1.280A–3 apply to taxable years beginning after December 31, 1975.

§ 1.280A–2 Deductibility of expenses attributable to business use of a dwelling unit used as a residence.

(a) *Scope.* This section describes the business uses of a dwelling unit used as a residence for which items may be deductible under an exception to the general rule of section 280A and explains the general conditions for the deductibility of items attributable to those uses. Deductions are allowable only to the extent provided in section 280A(c)(5) and in paragraph (i) of this section. See § 1.280A–1 for the general rules under section 280A.

(b) *Use as the taxpayer's principal place of business*—(1) *In general.* Section 280A(c)(1)(A) provides an exception to the general rule of section 280A(a) for any item to the extent the item is allocable to a portion of the dwelling unit which is used exclusively and on a regular basis as the taxpayer's principal place of business.

(2) *Determination of principal place of business.* For purposes of section 280A(c)(1)(A) and this section, a taxpayer may have only one principal place of business regardless of the number of business activities in which the taxpayer may be engaged. When a taxpayer engages in business activities at more than one location, it is necessary to determine the principal place of the taxpayer's overall business activity in light of all the facts and circumstances. Among the facts and circumstances to be taken into account in determining an individual's principal place of business are the following:

(i) The portion of the total income from business activities which is attributable to activities at each location;

(ii) The amount of time spent in business activities in each location; and

(iii) The facilities available to the taxpayer at each location.

For example, a home office in which a taxpayer engages in business as a self-employed person would rarely qualify as the taxpayer's principal place of business if the taxpayer's primary source of income is wages for services performed in another business on the employer's premises. On the otherhand, if an outside salesperson has no office space except at home and spends a substantial amount of time on paperwork at home, the office in the home may qualify as the salesperson's principal place of business.

(c) *Use by patients, clients, or customers in meeting or dealing with the taxpayer in the normal course of business.* Section 280A (c)(1)(B) provides an exception to the general rule of section 280A(a) for any item to the extent the item is allocable to a portion of the dwelling unit which is used exclusively and on a regular basis as a place of business in which patients, clients, or customers meet or deal with the taxpayer in the normal course of the taxpayer's business. This exception applies only if the use of the dwelling unit by patients, clients, or customers is substantial and integral to the conduct of the taxpayer's business. Occasional meetings are insufficient to make this exception applicable.

(d) *Use of a separate structure not attached to the dwelling unit in connection with the taxpayer's trade or business.* Section 280A(c)(1)(C) provides an exception to the general rule of section 280A(a) for any item to the extent that the item is allocable to a separate structure which is appurtenant to, but not attached to, the dwelling unit and is used exclusively and on a regular basis in connection with the taxpayer's trade or business. An artist's studio, a florist's greenhouse, and a carpenter's workshop are examples of structures that may be within the description of this paragraph.

(e) *Use as a storage unit for taxpayer's inventory.* Section 280A(c)(2) provides an exception to the general rule of section 280A(a) for any item to the extent such item is allocable to space within the dwelling unit which is used on a regular basis as a storage unit for the inventory of the taxpayer held for use in the taxpayer's trade or business of selling products at retail or wholesale. The storage unit includes only the space actually used for storage; thus, if a taxpayer stores inventory in one portion of a basement, the storage unit includes only that portion even if the taxpayer makes no use of the rest of the basement. The exception provided under section 280A(c)(2) applies only if—

(1) The dwelling unit is the sole fixed location of that trade or business, and

(2) The space used is a separately identifiable space suitable for storage.

V 45 / 154 4 AG 7 80 UMI

(f) *Use in providing day care services*—(1) *In general.* Section 280A(c)(4) provides an exception to the general rule of section 280A(a) for any item to the extent that the item is allocable to the use of any portion of the dwelling unit on a regular basis in the taxpayer's trade or business of providing day care services for children, for individuals who have attained age 65, or for individuals who are physically or mentally incapable of caring for themselves.

(2) *Day care services.* Day care services are services which are primarily custodial in nature and which, unlike foster care, are provided for only certain hours during the day. Day care services may include educational, developmental, or enrichment activities which are incidental to the primary custodial services. If the services performed in the home are primarily educational or instructional in nature, however, they do not qualify as day care services. The determination whether particular activities are incidental to the primary custodial services generally depends upon all the facts and circumstances of the case. Educational instruction to children of nursery school age shall be considered incidental to the custodial services. Further, educational instruction to children of kindergarten age would ordinarily be considered incidental to the custodial services if the instruction is not in lieu of public instruction under a State compulsory education requirement. In addition, enrichment instruction in arts and crafts to children, handicapped individuals, or the elderly would ordinarily be considered incidental to the custodial services rendered.

(3) *State law requirements.* This paragraph applies to items accruing after August 31, 1977, only if the owner or operator of the day care business is, at the time the item accrues, acting in accordance with the applicable State law relating to the licensing, certification, registration, or approval of day care centers or family or group day care homes. A person satisfies the condition stated in the preceding sentence for any period for which—

(i) There is no applicable State law of the type described;

(ii) The person is exempt from the requirements of the applicable State law;

(iii) The person has whatever license, etc., is required under the applicable State law; or

(iv) The person has applied for whatever license, etc., is required under the applicable State law, provided, that the application has not been rejected, and provided that the person has corrected or removed any deficiencies that resulted in the revocation of any previous license, etc., or in the rejection of any previous application.

(g) *Exclusive use requirement*—(1) *In general.* Paragraph (b), (c), or (d) of this section may apply to the use of a portion of a dwelling unit for a taxable year only if there is no use of that portion of the unit at any time during the taxable year other than for business purposes. Paragraph (b), (c), or (d) may apply to a portion of a unit which is used for more than one business purpose. Necessary repair or maintenance does not constitute use for purposes of this paragraph.

(2) *Convenience of the employer.* In the case of an employee, paragraph (b), (c), or (d) shall apply to a use of a portion of a dwelling unit only if that use is for the convenience of the employer.

(h) *Use on a regular basis.* The determination whether a taxpayer has used a portion of a dwelling unit for a particular purpose on a regular basis must be made in light of all the facts and circumstances.

(i) *Limitation on deductions*—(1) *In general.* The deductions allowable under chapter 1 of the Code for a taxable year with respect to the use of a dwelling unit for one of the purposes described in paragraphs (b) through (f) of this section shall not exceed the gross income derived from such use of the unit during the taxable year, as determined under subparagraph (2) of this paragraph. Subparagraphs (3) and (4) of this paragraph provide rules for determining the expenses allocable to the business use of a unit. Subparagraph (5) of this paragraph prescribes the order in which deductions are allowable.

(2) *Gross income derived from use of unit*—(i) *More than one location.* If the taxpayer engages in a business in the dwelling unit and in one or more other locations, the taxpayer shall determine the portion of the gross income from the business that is attributable to business activity in the unit. In making this determination, the taxpayer shall take into account the amount of time that the taxpayer engages in business activity at each location, and any other facts and circumstances that may be relevant.

(ii) *Exclusion of certain amounts.* For purposes of section 280A and this section, gross income derived from use of a unit means gross income from the business activity in the unit reduced by expenditures required for the activity but not allocable to the use of the unit itself, such as expenditures for supplies and compensation paid to other persons. For example, a physician who uses a portion of a dwelling for treating patients shall compute gross income derived from use of the unit by subtracting from the gross income attributable to the business activity in the unit any expenditures for nursing and secretarial services, supplies, etc.

(3) *Expenses allocable to portion of unit.* The taxpayer may determine the expenses allocable to the portion of the unit used for business purposes by any method that is reasonable under the circumstances. If the rooms in the dwelling unit are of approximately equal size, the taxpayer may ordinarily allocate the general expenses for the unit according to the number of rooms used for the business purpose. The taxpayer may also allocate general expenses according to the percentage of the total floor space in the unit that is used for the business purpose. Expenses which are attributable only to certain portions of the unit, *e.g.*, repairs to kitchen fixtures, shall be allocated in full to those portions of the unit. Expenses which are not related to the use of the unit for business purposes, *e.g.*, expenditures for lawn care, are not taken into account for purposes of section 280A.

(4) *Time allocation for use in providing day care services.* If the taxpayer uses a portion of a dwelling unit in providing day care services, as described in paragraph (f) of this section, and the taxpayer makes any use of that portion of the unit for non-business purposes during the taxable year, the taxpayer shall make a further allocation of the amounts determined under subparagraph (3) of this paragraph to be allocable to the portion of the unit used in providing day care services. The amounts allocated to the business use of the unit under this subparagraph shall bear the same proportion to the amounts determined under subparagraph (3) of this paragraph as the length of time that the portion of the unit is used for day care services bears to the length of time that the portion of the unit is available for all purposes. For example, if a portion of the unit is used for day care services for an average of 36 hours each week during the taxable year, the fraction to be used for making the allocation required under this subparagraph is 36/168, the ratio of the number of hours of day care use in a week to the total number of hours in a week.

(5) *Order of deductions.* Business deductions with respect to the business use of a dwelling unit are allowable in the following order and only to the following extent:

(i) The allocable portions of amounts allowable as deductions for the taxable year under chapter 1 of the Code with respect to the dwelling unit without regard to any use of the unit in trade or business, *e.g.*, mortgage interest and real estate taxes, are allowable as business deductions to the extent of the gross income derived from use of the unit.

(ii) Amounts otherwise allowable as deductions for the taxable year under chapter 1 of the Code by reason of the business use of the dwelling unit (other than those which would result in an adjustment to the basis of property) are allowable to the extent the gross income derived from use of the unit exceeds the deductions allowed or allowable under subdivision (i) of this subparagraph.

(iii) Amounts otherwise allowable as deductions for the taxable year under chapter 1 of the Code by reason of the business use of the dwelling unit which would result in an adjustment to the basis of property are allowable to the extent the gross income derived from use of the unit exceeds the deductions allowed or allowable under subdivisions (i) and (ii) of this subparagraph.

(6) *Cross reference.* For rules with respect to the deductions to be taken into account in computing adjusted gross income in the case of employees, see section 62 and the regulations prescribed thereunder.

(7) *Example.* The provisions of this subparagraph may be illustrated by the following example:

Example. A, a self-employed individual, uses an office in the home on a regular basis as a place of business for meeting with clients of A's consulting service. A makes no other use of the office during the taxable year and uses no other premises for the consulting activity. A has a special telephone line for the office and occasionally employs secretarial assistance. A also has a gardener care for the lawn around the home during the year. A determines that 10% of the general expenses for the dwelling unit are allocable to the office. On the basis of the following figures, A determines that the sum of the allowable business deductions for the use of the office is $1,050.

Gross income from consulting services	$1,900
Expense for secretary	500
Business telephone	150
Supplies	200
Total expenditures not allocable to use of unit	850
Gross income derived from use of unit	1,050
Deductions allowable under subparagraph (5) (i) of this paragraph:	
Mortgage interest (total $5,000)	[1] 500
Real estate taxes (total $2,000)	[1] 200
Amount allowable	700
Limit on further deductions	350
Deductions allowable under subparagraph (5) (ii) of this paragraph:	
Insurance (total $600)	[1] $60
Utilities, other than residential telephone (total $900)	[1] 90
Lawn care (total $500)	[1] 0
Amount allowable	150
Limit on further deductions	200
Deductions allowable under subparagraph (5)(iii) of this paragraph:	
Depreciation (total $3,200)	[1] 320
Amount allowable	200

[1] Allocable to office.

No portion of the lawn care expense is allocable to the business use of the dwelling unit. A may claim the remaining $6,300 paid for mortgage interest and real estate taxes as itemized deductions.

§ 1.280A–3 Deductability of expenses attributable to the rental of a dwelling unit used as a residence.

(a) *Scope.* This section provides rules for determining the deductibility of expenses attributable to the rental of a dwelling unit used as a residence. Note that paragraph (c) of this section applies to any dwelling unit used by the taxpayer for personal purposes on any day during the taxable year, whether or not the taxpayer is treated as using the unit as a residence. See § 1.280A–1 for the general rules under section 280A.

(b) *Short rental period.* If a dwelling unit used by the taxpayer as a residence during the taxable year is actually rented for less than 15 days during the taxable year,

(1) No deduction otherwise allowable because of the rental use shall be allowed, and

(2) The rental income shall not be included in gross income.

(c) *Allocation*—(1) *In general.* If a taxpayer uses a dwelling unit for personal purposes on any day during the taxable year, the amount deductible by reason of the rental use of the unit during the taxable year shall not exceed an amount which bears the same relationship to the total expenses paid or incurred with respect to the unit during the taxable year as the number of calendar days on which the unit is rented at fair rental during the year bears to the total number of calendar days that the unit is used for any purpose during the taxable year. For purposes of section 280A(e) and this section, the fact that a unit is deemed to be used for personal purposes on a particular day does not prevent that day from being counted as a day on which the unit is rented at fair rental. Use of a unit for repair and maintenance which is disregarded under § 1.280A–1(e)(4) shall be disregarded for purposes of this paragraph.

(2) *Portion of unit rented.* If the taxpayer rents only a portion of the dwelling unit, the rule prescribed in subparagraph (1) of this paragraph shall be applied to the expenses attributable to that portion of the unit, and the days to be taken into account shall be the days on which that portion of the unit is rented at fair rental during the taxable year and the days on which that portion of the unit is used for any purpose during the taxable year. The expenses attributable to any portion of a unit shall be determined in accordance with the rules prescribed in § 1.280A–2(i)(3).

(3) *Deductions allowable without regard to rental use.* This paragraph shall not disallow any part of those deductions with respect to a dwelling unit which are allowable without regard to the rental use of the unit.

(4) *Example.* The provisions of this paragraph may be illustrated by the following example:

Example. A, an individual, owns a cottage which A rents to vacationers at fair rental for 120 days during the taxable year. A is deemed to have made personal use of the cottage on 15 of those 120 days. The unit is used for one or more purposes (other than repair or maintenance) on 160 days during the taxable year. The amount that A may claim as rental expenses may not exceed 120/160 of the total expenses paid or incurred with respect to the unit during the taxable year. If A itemizes deductions, A may claim the remaining 40/160 of items, such as mortgage interest and taxes, which are deductible without regard to the rental use of the unit.

(d) *Limitation on deductions if taxpayer has used dwelling unit as a residence*—(1) *In general.* The deductions allowable under chapter 1 of the Code for a taxable year with respect to the rental use of a dwelling unit which the taxpayer is treated as having used as a residence during such year shall not exceed the gross rental income from the unit for such year. See section 280A(d)(3) and § 1.280A–1(e)(2) for special rules affecting the determination whether the taxpayer has used a unit as a residence if any day during the taxable year is part of a "qualified rental period."

(2) *Gross rental income.* For purposes of section 280A and this section gross rental income from a unit equals the gross receipts from rental of the unit reduced by expenditures to obtain tenants for the unit, such as realtors' fees and advertising expense. The gross rental income from a unit for a taxable year includes rental income for periods during which the unit is rented at less than a fair rental as well as rental income for periods during which the unit is rented at fair rental.

(3) *Order of deductions.* Deductions with respect to the rental use of a dwelling unit are allowable in the following order and only to the following extent:

V 45 / 154 AG 7 80 UMI

(i) The allocable portions of amounts otherwise allowable as deductions for the taxable year under chapter 1 of the Code with respect to the dwelling unit without regard to the rental use of the unit, *e.g.*, mortgage interest and real estate taxes, are deductible as rental expenses to the extent of the gross rental income from the unit.

(ii) The allocable portions of amounts otherwise allowable as deductions for the taxable year under chapter 1 of the Code by reason of the rental use of the dwelling unit (other than those which would result in an adjustment to the basis of property) are allowable to the extent the gross rental income exceeds the deductions allowed or allowable under subdivision (i) of this subparagraph.

(iii) The allocable portions of amounts otherwise allowable as deductions for the taxable year under chapter 1 of the Code by reason of the rental use of the dwelling unit which would result in an adjustment to the basis of property are allowable to the extent the gross rental income exceeds the deductions allowed or allowable under subdivisions (i) and (ii) of this subparagraph.

For purposes of this subparagraph, the portion of any item which is allocable to the rental use of a unit during a taxable year shall be that amount which bears the same relationship to the total amount of the item as the number of days on which the unit is rented at a fair rental during the taxable year bears to the number of days on which the unit is used for any purpose (other than repair or maintenance) during the taxable year.

(4) *Example.* The provisions of this paragraph may be illustrated by the following example:

Example. B owns a lakeside home which B rents at a fair rental for 90 days during the taxable year. B uses the home for personal purposes on 20 other days during the taxable year and also rents it to a friend at a discount for 10 days. Thus, the home is used for some purpose (other than repair or maintenance) on 120 days during the taxable year, and the rental allocation fraction may not exceed 90/120. On the basis of the following figures, B determines that the sum of the rental expenses for the home for the taxable year that are deductible under subparagraph (3) of this paragraph is $2,200. The advertising expense and the realtor's fee are also deductible.

Gross receipts from rental:	
90 days at $25 per day	$2,250
10 days at $15 per day	150
Total	2,400
Computation of gross rental income:	
Gross receipts from rental	2,400
Less: Advertising and realtor's fee	200
Gross rental income	2,200

	Total	Allocable to rental
Deductions allowable under subparagraph (3)(i) of this paragraph:		
Mortgage interest	$1,000	$750
Real estate taxes	800	600
Amount allowable		1,350
Limit on further deductions		950
Deductions allowable under subparagraph (3)(ii) of this paragraph:		
Insurance	400	300
Utilities	600	450
Amount allowable		750
Limit on further deductions		100
Deductions allowable under subparagraph (3)(iii) of this paragraph:		
Depreciation	1,500	1,125
Amount allowable		100

NOTE.—If B itemizes deductions, B may claim the other $250 in mortgage interest and the other $200 in real estate taxes as itemized deductions.

(e) *Application of the provisions of § 1.280A–1 and this section to rental pools*—(1) *In general.* In the case of a dwelling unit which is entered in a rental pool, as defined in subparagraph (2) of this paragraph, during the taxable year, the provisions of § 1.280A–1 and this section shall be applied in accordance with this paragraph.

(2) *Rental pool.* For purposes of this section, the term "rental pool" means any arrangement whereby two or more dwelling units are made available for rental and those persons with interests in the units agree to share at least a substantial part of the rental income from the units without regard to the actual use of the various units. The fact that those persons with interests in a particular unit are entitled to an occupancy fee or other payment for the actual use of the unit does not prevent the arrangement from constituting a rental pool if the percentage of the rental income in which the participants in the arrangement share is substantial.

(3) *Gross rental income of participants.* Participants in a rental pool shall include in gross rental income all amounts received or accrued by reason of participation in the rental pool (including payments such as occupancy fees) except amounts which are clearly not rental income, *e.g.*, interest earned on deposits held in escrow on behalf of the rental pool participants. Thus, a taxpayer who participates in a rental pool may have gross rental income although the unit in which the taxpayer has an interest is not actually rented during the taxable year.

(4) *Determination of use.* For purposes of § 1.280A–1(d)(1) and paragraph (c) of this section, the number of days on which the unit is rented at fair rental and the number of days on which the unit is used for any purpose shall be determined by reference to the actual use of the unit. Availability for rental through the rental pool does not constitute rental at a fair rental or use of the unit for any other purpose. If the taxpayer's unit is actually rented at a fair rental on any day during the taxpayer's participation in the rental pool, the taxpayer may count that day as a day on which the unit is rented at a fair rental although the taxpayer receives only a portion of the rental paid.

(5) *Reciprocal arrangements.* If the rental pool agreement provides that a participant whose unit is rented on a given day may make use of another unit in the pool on that day, a taxpayer who has an interest in a unit so used by another participant shall be deemed to have used the unit for personal purposes on any day on which another participant uses the unit under that provision of the agreement.

(f) *Application of the rules of § 1.280A–1 and this section to time sharing arrangement*—(1) *In general.* In the case of a dwelling unit which is used during the taxable year under a time sharing arrangement, as defined in subparagraph (2) of this paragraph, the provisions of § 1.280A–1 and this section shall be applied in accordance with this paragraph.

(2) *Time sharing arrangement.* For purposes of this section, the term "time sharing arrangement" means any arrangement whereby two or more persons with interests in a dwelling unit agree to exercise control over the unit for different periods during the taxable year. For example, an arrangement under which each of twelve persons with interests in a unit is entitled to exercise control over the unit for one month during the taxable year is a time sharing arrangement. Whether all twelve persons have undivided interests in the unit for the entire year or each has the sole interest in the unit for a single month during the year is immaterial.

(3) *Use for personal purposes.* For purposes of § 1.280A–1 (d) and (e), each of the persons with an interest in the unit subject to the time sharing arrangements shall be considered to have a continuing interest in the unit regardless of the terms of the interest under local law.

(4) *Short rental period.* The provisions of paragraph (b) of this section shall be applied on the basis of the number of days that the unit is actually rented during the entire taxable year.

(5) *Allocation rule.* The provisions of paragraph (c) of this section shall apply if any person with an interest in the unit is deemed to use the unit for personal purposes on any day during the taxable year. The provisions of paragraph (c) of this section shall be applied on the basis of the taxpayer's expenses for the unit, the number of days during the taxable year that the unit is rented at a fair rental, and the number of days during the taxable year that the unit is used for any purpose.

(6) *Limitation on deductions.* The provisions of paragraph (d) of this section shall be applied on the basis of the taxpayer's rental income and expenses with respect to the unit.

Jerome Kurtz,
Commissioner of Internal Revenue.

BILLING CODE 4830-01-M

Bureau of Alcohol, Tobacco and Firearms

27 CFR Parts 19, 70, 240, 245, 250, 270, and 275

[Notice No. 346; RE: Notice Nos. 341 and 342]

Electronic Fund Transfer and Return and Deferral Periods for Certain Alcohol and Tobacco Products Excise Tax Payments and Other Provisions; Extension of Comment Periods

AGENCY: Bureau of Alcohol, Tobacco and Firearms (ATF), Department of the Treasury.

ACTION: Proposed rules; extension of comment periods.

SUMMARY: This notice extends the comment priod for Notice No. 341 (45 FR 38258, June 6, 1980) and for Notice No. 342 (45 FR 38271, June 6, 1980). ATF published for comment proposed regulations that (1) would require large alcohol and tobacco products excise taxpayers to pay their excise taxes by electronic fund transfer (Notice No. 341) and that (2) would change for large manufacturers of tobacco products the return period from a semimonthly to a weekly tax return period and the deferral period from the last day of the next succeeding return period to no later than three business days succeeding the last day of the proposed weekly return period (Notice No. 342).

According to Notice Nos. 341 and 342, the comment period is to end August 5, 1980. The comment period on both notices are being extended an additional 30 days since several large taxpayers of tobacco products requested an extension of time to comment on both notices.

DATE: Comments must be received on or before September 8, 1980.

ADDRESS: Send comments on Notice Nos. 341 and 342 separately to: Chief, Regulations and Procedures Division, Bureau of Alcohol, Tobacco and Firearms, Post Office Box 385, Washington, D.C. 20044.

Notice.—AFT will not recognize any material in comments designated as confidential or as not to be disclosed; any material that the commenter considers to be confidential or inappropriate for disclosure to the public should not be included in the comments; the name of any commenter is not exempt from disclosure.

FOR FURTHER INFORMATION CONTACT:
A. N. Stickney or James A. Hunt at 202–566–7626.

Authority: This notice is issued under the authority contained in 26 U.S.C. 7805 (68A Stat. 917).

Signed: August 5, 1980.
G. R. Dickerson,
Director.

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Ch. VII

Disclosure of Comments Received From Federal Agencies on Tennessee Proposed Permanent Program Submitted Under the Surface Mining Control and Reclamation Act of 1977

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Department of the Interior.

ACTION: Announcement of public disclosure of comments on the Tennessee Program from the Environmental Protection Agency (EPA), the Department of Agriculture (USDA), and other Federal agencies.

SUMMARY: Before the Secretary of the Interior may approve a permanent State regulatory program submitted under Section 503(a) of the Surface Mining and Reclamation Act of 1977 (SMCRA), the views of certain Federal agencies must be solicited and disclosed. The Secretary has solicited comments of these agencies on the Tennessee State Program, and is today announcing their public disclosure.

ADDRESSES: Copies of the comments received are available for public review during business hours at:

Administrative Record Room, Office of Surface Mining Reclamation and Enforcement, Region II, 530 Gay Street, S.W., Suite 500, Knoxville, Tennessee 37902.

Tennessee Department of Conservation, Division of Surface Mining and Reclamation, 1720 West End Avenue, Nashville, Tennessee 37203.

Tennessee Department of Conservation, Division of Surface Mining and Reclamation, 618 Church Avenue, S.W., Knoxville, Tennessee 37902.

FOR FURTHER INFORMATION CONTACT:

John T. Davis, Assistant Regional Director, Office of Surface Mining Reclamation and Enforcement, 530 Gay Street, S.W., Suite 500, Knoxville, Tennessee 37902, Telephone: (615) 637–8060; or

Carl C. Close, Assistant Director, State & Federal Programs, Office of Surface Mining Reclamation and Enforcement, U.S. Department of the Interior, 1951 Constitution Avenue, N.W., Washington, D.C. 20240, Telephone: (202) 343–4225.

SUPPLEMENTARY INFORMATION: The Secretary of the Interior is evaluating the Tennessee permanent regulatory program submitted by Tennessee for his review on February 28, 1980. See 45 FR 15578–15580 (March 11, 1980), 45 FR 28369 (April 29, 1980), and 45 FR 41979–41981 (June 23, 1980). In accordance with Section 503(b)(1) of SMCRA and 30 CFR 732.13(b)(1), the Tennessee program may not be approved until the Secretary has solicited and publicly disclosed the views of the Administrator of the Environmental Protection Agency, the Secretary of the Department of Agriculture, and the heads of other Federal agencies concerned with or having special expertise relevant to the program as proposed. In this regard, the following Federal agencies were invited to comment on the Tennessee Program:

Tennessee Valley Authority
Advisory Council on Historic Preservation
Department of Labor:
  Mine Safety and Health Administration
Ohio River Basin Commission
Appalachian Regional Commission
U.S. Army Corps of Engineers
Department of Agriculture:
  U.S. Forest Service
  Soil Conservation Service
Water Resources Council
Department of Energy
U.S. Environmental Protection Agency
Department of the Interior:
  Bureau of Indian Affairs
  Bureau of Land Management
  Heritage Conservation & Recreation Service
  U.S. Geological Survey
  Bureau of Mines
  U.S. Fish & Wildlife Service
  National Park Service

Of those agencies invited to comment, OSM received comments from the following offices:

U.S. Forest Service

V 45 / 154 AG 7 80 UMI

Heritage Conservation and Recreation Service
Bureau of Mines
Mine Safety and Health Administration
U.S. Army Corps of Engineers
Tennessee Valley Authority
U.S. Fish and Wildlife Service
Department of Energy
Bureau of Land Management
Appalachian Regional Commission
Soil Conservation Service

Dated: July 31, 1980.

30 CFR Ch. VII

Public Disclosure of Comments Received From Federal Agencies on the Kansas State Permanent Program Submitted Under Pub. L. 95-87

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), U.S. Department of the Interior.

ACTION: Announcement of public disclosure of comments on the Kansas program.

SUMMARY: Before the Secretary of the Interior may approve permanent state regulatory programs submitted under Section 503(a) of the Surface Mining Control and Reclamation Act of 1977 (SMCRA), the views of certain federal agencies must be solicited and disclosed. The Secretary has solicited comments of these agencies, and is today announcing receipt and availability for public review of agency comments on the Kansas State Program.

ADDRESSES: Copies of the comments received are available for public review during business hours at:

Office of Surface Mining, Reclamation and Enforcement, Region IV, 5th Floor, Scarritt Building, 818 Grand Ave., Kansas City, Missouri 64106, Telephone (816) 374-5056.
Mined Land Office, 107 West 11th Street, Pittsburg, Kansas.
Kansas Corporation Commission, Legal Office, 4th Floor, State Office Building, 915 Harrison, Topeka, Kansas.

FOR FURTHER INFORMATION CONTACT: Richard Rieke, Assistant Regional Director, State and Federal Programs, Office of Surface Mining, Scarritt Building, 818 Grand Avenue, Kansas City, Missouri 64106, Telephone (816) 374-3920.

SUPPLEMENTARY INFORMATION: The Secretary of the Interior is evaluating the permanent regulatory program submitted by Kansas for his review on February 26, 1980. See the March 4, 1980, **Federal Register** (45 FR 14152-14153); April 18, 1980, **Federal Register** (45 FR 26368); and the June 16, 1980, **Federal Register** (45 FR 40619-40621). In accordance with Section 503(b)(1) of SMCRA and 30 CFR 732.13(b)(1) the Kansas program may not be approved until the Secretary has solicited and publicly disclosed the views of the administrator of the Environmental Protection agency, the Secretary of Agriculture, and the heads of other federal agencies concerned with or having special expertise relevant to the program as proposed. In this regard, the following federal agencies were invited to comment on the Kansas program:

Department of Agriculture
State Land Use Committee
SEA-Extension
Farmers Home Administration
Agricultural Stabilization and Conservation Service
SEA-Agricultural Research
Soil Conservation Service
Forest Service
SEA-Cooperative Research
Advisory Council on Historic Preservation
Department of Labor
Mine Safety & Health Administration
U.S. Enviornmental Protection Agency
Water Resources Council
Department of Energy
Department of the Interior
Bureau of Indian Affairs
Bureau of Land Management
Bureau of Mines
Heritage Conservation & Recreation Service
Water & Power Services
Fish & Wildlife Service
National Park Service
Geological Survey
U.S. Dept. of the Army Corps of Engineers
Missouri River Basin Commission
Council on Environmental Quality

Of these agencies invited to comment, OSM recieved comments from the following offices:

Advisory Council on Historic Preservation
U.S. Dept. of the Army Corps of Engineers
Soil Conservation Service
Fish and Wildlife Service
Heritage Conservation and Recreation Service
Bureau of Mines
National Park Service
Mine Safety and Health Administration
Geological Survey
Department of Energy

These comments are available for review and copying during business hours, at the locations listed above under "Addresses."

Dated: July 31, 1980.

Carl C. Close,

Assistant Director, State and Federal Programs.

BILLING CODE 4310-05-M

Geological Survey

30 CFR Part 250

Oil and Gas and Sulphur Operations in the Outer Continental Shelf

AGENCY: U.S. Geological Survey, Department of the Interior.

ACTION: Proposed rule.

SUMMARY: A final rule incorporating the modification of 30 CFR § 250.34 required to conform to the Outer Continental Shelf (OCS) Lands Act Amendments of 1978, 92 Stat. 629 (herein referred to as the "Act"), was published September 14, 1978 (44 FR 53685). This proposed revision would amend 30 CFR § 250.34, exploration, development, and production plans, to provide for the submission of a plan of operations for leases in the western Gulf of Mexico in lieu of the current requirement for the submission of a development and production plan. Interested persons are invited to submit written comments and recommendations on the proposed regulation.

DATE: Written comments and recommendations must be submitted on or before September 8, 1980.

ADDRESS: Comments and recommendations should identify the subject matter and be directed to the Deputy Division Chief, Offshore Minerals Regulation, U.S. Geological Survey, National Center, Mail Stop 640, Reston, Virginia 22092.

FOR FURTHER INFORMATION CONTACT: Gerald D. Rhodes, Conservation Division. U.S. Geological Survey, National Center, Mail stop 640 Reston, Virginia 22092, (703) 860-7531.

AUTHOR: Richard B. Krahl, Conservation Division, U.S. Geological Survey, National Center, Mail Stop 640, Reston, Virginia 22092, (703) 860-7531.

SUPPLEMENTARY INFORMATION: Subsequent to the issuance of final rule on September 14, 1978 (44 FR 53685), a number of parties petitioned the Secretary of the Interior requesting a review and revision of the requirements of 30 CFR § 250.34. Under the current requirements of § 250.34-2, development and production plans are required of all lessees in all OCS areas including the Gulf of Mexico. There are special provisions permitting the submission of less detailed information with respect to development and production plans covering activities in the western Gulf of Mexico. Under the proposed rule, a plan of operations would be submitted for development and production activities on leases in the western Gulf of Mexico. The plan of operations would contain all

the information needed for the determinations required to assure that the proposed activities described in the plan are adequate from the standpoint of safety, protection of the environment, and prompt and efficient development and production. Moreover, a plan of operations would constitute an "OCS Plan" within the meaning of 15 CFR § 930.73(a) and together with the related Environmental Report (Development and Production) would provide the data and information necessary to determine the consistency of proposed Federal license and permit activities described in detail in "OCS plans." 15 CFR § 930.77(a). 44 FR 37142. While the receipt of a plan of operations need not be published in the **Federal Register**, a plan of operations for a lease or leases in the western Gulf of Mexico would be accompanied by an Environmental Report (Development and Production) when the activities in the plan affect the land or water use of an affected State, such as Alabama, which has a coastal zone management program approved under the Coastal Zone Management Act. The proposed modification should reduce the chances for inadvertent delays in the Conservation Division's review and and decisionmaking process while assuring that those Gulf of Mexico coastal States with coastal zone management programs approved under the Coastal Zone Management Act are provided adequate information on which to make the required coastal zone consistency concurrence determination.

Environmental Impact and Regulatory Analysis

The Department of the Interior has determined that this proposed revision of the provisions of 30 CFR § 250.34 is not a major Federal action significantly affecting the quality of the human environment, and, therefore, preparation of an Environmental Impact Statement is not required. The Department has also determined that this proposed rule is not a significant regulatory action and does not require the preparation of a regulatory analysis under Executive Order 12044.

Dated: August 1, 1980.

Charles P. Eddy,

Acting Assistant Secretary—Energy and Minerals.

It is proposed to amend the provisions of 30 CFR § 250.34 as follows:

§ 250.34-2 [Amended]

1. Revise the first sentence of § 250.34-2(a)(1) to read:

(a)(1) No development or production activities may be commenced or conducted on any leased area, except in accordance with a development and production plan or a plan of operations approved by the Director. * * *

2. Revise the portion of the fourth sentence of § 250.34-2(a)(1) which precedes the colon to read:

(a)(1) * * *

* * * A development and production plan, or in the western Gulf of Mexico a plan of operations, shall include: * * *

3. Revise § 250.34-2(a)(2) to read:

(a)(1) * * *

(2) For leases in the western Gulf of Mexico, a plan of operations may be submitted in lieu of a development and production plan. The Director may limit the information that will be required to be included in a plan of operations to those parts of paragraph (a)(l)(i) through (viii) that are necessary to assure conformance with the Act; other laws, including § 307 of the Coastal Zone Management Act; applicable regulations; and lease provisions. In determining the information to be included in a plan, the Director shall consider current and expected operating conditions together with experience gained during past operations of a similar nature in the area of proposed activities.

4. Revise § 250.34-2(a)(4) to read:

(a) * * *

* * * * *

(4) The Director may require the lessees of tracts on which oil or gas, or both, have been discovered in paying quantities and which are adjacent to or nearby the area covered in a development and production plan or a plan of operations to submit a preliminary description of their plans for development and production from those leases which are on adjacent or nearby areas.

5. Revise the first sentence of § 250.34-2(a)(5) to read:

(a) * * *

* * * * *

(5) The lessee shall indicate which portions of a development and production plan, or a plan of operations for a lease in the western Gulf of Mexico, the lessee believes are exempt from disclosure under the Freedom of Information Act (5 U.S.C. 552) and the implementing regulations (43 CFR Part 2). * * *

6. Revise the portion of § 250.34-2(a)(6) preceding the colon to read:

(a) * * *

* * * * *

(6) A development and production plan or a plan of operations shall not be deemed submitted until: * * *

7. Revise § 250.34-2(b)(2) to read:

(b) * * *

* * * * *

(2) The Governor of an affected State adjacent to the western Gulf of Mexico that does not have a coastal zone management program approved pursuant to § 306 of the Coastal Zone Management Act may receive copies of plans of operation and development and production plans by submitting to the Director a written request for the documents. The Director shall notify the appropriate lessees immediately upon receipt of such a request. The Governor of Florida will receive copies of plans under the provisions of paragraph (b)(1) of this section.

8. Revise § 250.34-2(c)(3)(i) to read:

(c) * * *

* * * * *

(3)(i) When it is determined that the activities proposed in a development and production plan or in a plan of operations will affect any land use or water use in the coastal zone of a State with a coastal zone management program approved pursuant to § 306 of the Coastal Zone Management Act, the plan will be processed in accordance with the regulations in this section and the regulations governing Federal Coastal Zone Management Consistency Procedures (15 CFR Part 930).

9. Revise § 250.34-2(d) to read:

* * * * *

(d) The Director shall review the environmental impacts of the activities described in a development and production plan or in a plan of operations pursuant to the provisions of § 250.34-4.

10. Revise the first part of § 250.34-2(e)(1) to read:

* * * * *

(e)(1) If the Director determines, subject to the provisions of § 120(2)(C) of the National Environmental Policy Act, that approval of a development and production plan or a plan of operations is a major Federal action * * *

11. Revise § 250.34-2(e)(2) to read:

(e)(1) * * *

(2) Prior to or immediately after a determination by the Director that approval of a development and production plan or a plan of operations requires that the procedures under the National Environmental Policy Act shall commence, the Director may require lessees of tracts in the vicinity, for which development and production plans or plans of operations have not been approved, to submit preliminary or final plans for their leases.

12. Revise the first part of § 250.34-2(e)(3) to read:

(e) * * *

(3) A determination by the Director that approval of a development and

production plan or a plan of operations requires commencement * * *

13. Revise the first part of § 250.34–2(f) to read:

* * * * * *

(f) After reviewing the record of any public hearing held with respect to the approval of a development and production plan or a plan of operations for which an * * *

14. Revise the first part of § 250.34–2(g)(1) to read:

* * * * * *

(g)(1) In the evaluation of a development and production plan or a plan of operations, the Director shall consider * * *

15. Revise § 250.34–2(g)(3) to read:

(g) * * *

(3) The Director shall notify the lessee in writing of the reason(s) for disapproving a plan of operations or a development and production plan or for requiring modification of a plan and the conditions which must be met for plan approval.

16. Revise § 250.34–2(h) to read:

* * * * * *

(h) The lessee may submit either a development and production plan or a plan of operations, as modified, to the Director. Within 60 days following the 60-day comment period provided for in § 250.34–2(c)(1), the Director shall approve or disapprove a modified development and production plan based upon the criteria in subparagraphs (g)(1)(i) through (vi) of this section.

17. Revise the first part of § 250.34–2(i)(1) to read:

* * * * * *

(i)(1) If a development and production plan or a plan of operations is disapproved for the sole reason * * *

18. Revise the first part of § 250.34–2(i)(2) to read:

(i)(1) * * *

(2) If a development and production plan or a plan of operations is disapproved because a State * * *

19. Revise § 250.34–2(j) to read:

* * * * * *

(j) A modified development and production plan or a plan of operations which has been disapproved pursuant to subsection (h) of this section may be revised in the same manner as, and with the same information required for, a new plan.

20. Revise the first sentence of § 250.34–2(l)(1) to read:

* * * * * *

(l)(1) The Director shall periodically review the activities being conducted under an approved development and production plan or under an approved plan of operations.

21. Revise the first sentence of § 250.34–2(l)(2) to read:

(l)(1) * * *

(2) Proposals to revise an approved development and production plan or to revise an approved plan of operations, whether initiated by the lessee or ordered by the Director, shall be submitted to the Director for approval in the same manner as, and with the same information required for, a new plan.

22. Revise the first part of § 250.34–2(l)(3) to read:

(l) * * *

* * * * * *

(3) When any revision to an approved development and production plan or to an approved plan of operations is proposed by the lessee, * * *

23. Revise the first sentence of § 250.34–2(n) to read:

* * * * * *

(n) In order to ensure that activities to be carried out under a proposed development production plan or an proposed plan of operations or activities which are being carried out under an approved plan, are carried out in a safe and environmentally acceptable manner. The Director may authorize or direct the lessee to conduct geological, geophysical, or other surveys that the Director determines are necessary for the evaluation of such activities.

24. Revise the last sentence of § 250.34–2(o) to read:

* * * * * *

(o) * * * Permit activities must conform to the activities described in detail in the related approved development and production plan or the related approved plan of operations, and shall not be subject to a separate State coastal zone consistency review.

25. Revise the last sentence of § 250.34–2(p) to read:

* * * * * *

(p) * * * In such situations, the Director may approve or require departures from an approved development and production plan or from an approved plan of operations.

§ 250.34–3 [Amended]

1. Revise the first sentence of § 250.34–3(b) to read:

* * * * * *

(b) At the same time a lessee submits a development and production plan or a plan of operations to the Director, an Environmental Report (Development/Production) shall be submitted, except as provided for in § 250.34–2(a)(3)(ii).

* * *

2. Revise the portion of § 250.34–3(b)(1) which precedes the colon to read:

* * * * * *

(b)(1) To the extent that information is not contained in the related development and production plan or plan of operations, the environmental report shall contain: * * *

§ 250.34–4 [Amended]

1. Revise the first part of the first sentence of § 250.34–4(a) to read:

(a) Prior to approval of an exploration plan, a development and production plan, or a plan of operations, or approval of significant revisions to an approved exploration plan, development and production plan, or plan of operations, the Director shall * * *

BILLING CODE 4310-31-M

Office of Surface Mining Reclamation and Enforcement

30 CFR Parts 700, 701

Definition of Surface Coal Mining Operations

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Notice of extension of comment period on proposed rulemaking.

SUMMARY: On June 24, 1980, the Office of Surface Mining Reclamation and Enforcement (OSM) proposed rules to amend the definitions of "surface coal mining operations" and "coal processing plants." 45 FR 42333. Comments on these proposed rules were solicited until July 24, 1980 and a public hearing was held on July 16, 1980. Several persons requested an extension of the comment period on these rules. Because these rules will be applicable during the interim regulatory program, which program is expected to expire early next year, OSM is concerned about any extension of the comment period that might delay the final adoption of these rules. On the other hand, OSM wishes to provide all interested persons with an adequate opportunity to submit comments.

DATE: Accordingly, OSM has decided to extend the comment period until August 18, 1980. Comments received after 5:00 p.m. EST on that date will not be considered.

ADDRESSES: Written comments should be addressed to: Office of Surface Mining Reclamation and Enforcement, U.S. Department of the Interior, P.O. Box 7267, Benjamin Franklin Station, Washington, D.C. 20044 or may be hand-delivered to Office of Surface Mining Reclamation and Enforcement, Room 153, U.S. Department of the Interior, South Building, Washington, D.C. 20240, where all comments will be available for public inspection. In addition, representatives of OSM will be available to meet with interested persons upon request before the close of the comment period.

FOR FURTHER INFORMATION CONTACT: Richard Robinson, Office of Surface Mining Reclamation and Enforcement, U.S. Department of the Interior, (202) 343–8061 or Mark Squillace, Office of the solicitor, U.S. Department of the Interior, (202) 343–4671.

Dated: August 1, 1980.

Charles P. Eddy,

Acting Assistant Secretary, Energy and Minerals.

Canned and Preserved Seafood Processing Point Source Category

AGENCY: Environmental Protection Agency.

ACTION: Notice of availability and request for public comment on petitions to modify regulations.

SUMMARY: This notice announces the availability of, and invites public comment on a Petition for Modification and a Supplemental Petition for Modification of the BPT effluent limitations guidelines for certain subcategories of the Canned and Preserved Seafood Processing Point Source Category. The Petitions, submitted by a portion of the Alaskan seafood industry, request that the regulations cited below be modified to delete Anchorage, Cordova, Juneau, Ketchikan, and Petersburg from the "non-remote" Alaska subcategories. The practical effect of this modification would be to change the wastewater control technology from screening and solids handling to grinding for plants located in these areas.

DATE: Comments must be received on or before September 8, 1980.

ADDRESS: Send comments to: Mr. Gary S. Kasaoka, Effluent Guidelines Division, U.S. Environmental Protection Agency, 401 M Street, S.W., Room 925, WSME (WH–552), Washington, D.C. 20460, Attention: Seafood Effluent Guidelines Modification.

The Petition for Modification, the Supplemental Petition for Modification, and all supporting information including appendices to these Petitions will be available for inspection and copying at the EPA Public Information Reference Unit, Room 2404 (Rear) PM–213 (EPA Library), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460; U.S. Environmental Protection Agency, Region X, Regional Library, 1200 Sixth Avenue, Seattle, Washington, 90101; and Alaska Operations Office, U.S. Environmental Protection Agency, Room E535, 701 C Street, Box 19, Anchorage, Alaska 99501.

FOR FURTHER INFORMATION CONTACT: Gary S. Kasaoka, Effluent Guidelines Division, 401 M Street, SW., Room 925, WSME (WH–552), Washington, D.C. 20460 (202) 426–2707.

SUPPLEMENTARY INFORMATION: On May 7, 1980, a portion of the Alaskan seafood industry submitted a Petition for Suspension and a Preliminary Petition for Modification of EPA's effluent limitations guidelines based on the Best Practicable Control Technology Currently Available (BPT) for certain subcategories of the Canned and Preserved Seafood Processing Point Source Category, 40 CFR Part 408. These had been promulgated under the Clean Water Act (33 U.S.C. 1251, *et seq.*) ("the Act). The Petition for Suspension requested that the applicability of BPT effluent limitations guidelines regulations be suspended for the 1980 salmon processing season (May 15 through October 15) for facilities located in the following cities originally classified as "non-remote" by EPA: Anchorage, Cordova, Juneau, Ketchikan, and Petersburg. The current regulations for the Alaska seafood processing subcategories divide the State of Alaska into two classifications—"remote" and "non-remote." BPT regulations for "remote" areas are based upon grinding technology. BPT regulations for "non-remote" areas are based upon screening and solids handling technology. Thus, the practical effect of this temporary suspension is to designate grinding as BPT for facilities at these "non-remote" locations, rather than screening and solids handling technology. EPA granted the Petition to Suspend the applicability of the BPT "non-remote" regulations to facilities located in Anchorage, Cordova, Juneau, Ketchikan, and Petersburg for the 1980 salmon processing season. A notice of Suspension of the Regulations was published in the May 19, 1980 Federal Register (45 FR 32676).

The petitioners filed a Supplemental Petition for Modification dated June 16, 1980 in accordance with the schedule set forth in the May 19, 1980 Notice. The schedule requires that EPA review the Petition for Modification and the Supplemental Petition for Modification and make any request for clarification or additional data by July 16, 1980. Any additional submissions in response to such requests must be made by the petitioners by August 15, 1980. EPA will either grant or deny the petition by October 15, 1980, the date on which the temporary suspension of the regulations expires.

The petitioners maintain that "the costs of screening are wholly out of proportion to the effluent reduction benefits achieved and that other factors indicate that screening is not a practicable technology." Sections of the Petitions examine the costs of screening and barging and the lack of Alaskan waste disposal alternatives to barging, such as landfills, municipal sewage treatment facilities, and reduction (fish meal) facilities. The petitioners claim that screening in Alaska, other than in Kodiak, achieves no effluent reduction benefits. The petitioners also claim that the following factors were not properly considered by the Administrator in setting BPT and are appropriate for consideration: (1) The significant energy requirements of screening and barging; (2) the potential for violating the Sanitation Standards of the U.S. Food and Drug Administration (20 CFR Part 110) if wastes are stored near the processing plant; and (3) the fact that the increased costs of screening will frustrate the purposes of the Fisheries Conservation and Management Act of 1976 (16 U.S.C. 1801 *et seq.*). Published as an Appendix to this Federal Register Notice are the Petition for Modification

and Supplemental Petition for Modification. Appendices to these Petitions and other supporting data are available for inspection at the addresses listed above.

The Agency hereby solicits comments on the Petitions. EPA will review the Petitions for Modification and any comments received. Notice of EPA's final action will be published in the **Federal Register.** Anyone who wishes to comment on the Petitions and proposed modification of the regulations must do so on or before September 8, 1980.

Dated: July 31, 1980.

Eckardt C. Beck,

Assistant Administrator for Water and Waste Management.

Petition For Modification

I. Introduction

In Re Effluent Guidelines Regulations for Alaskan Subcategories of the Canned and Preserved Seafood Processing Point Source Category (40 CFR Part 408).

Petitioners Pacific Seafood Processors Association, Morpac, Inc., Nefco-Fidalgo Packing Company, North Pacific Processors, E. C. Phillips and Son, Inc., Washington Fish & Oyster Company and Whitney-Fidalgo Seafoods, hereby request reconsideration and modification by The Environmental Protection Agency ("EPA") of the 1977, effluent guidelines for certain subcategories of the Canned and Preserved Seafood Processing Point Source Category, which were promulgated under the Clean Water Act (33 U.S.C. 466, *et seq.*) ("the Act").[1]

Specifically, petitioners seek to modify the following subcategory regulations:

40 CFR 408.40 (Subpart D); 40 CFR 408.60 (Subpart F); 40 CFR 408.90 (Subpart I); 40 CFR 408.162 and 408.165 (Subpart P); 40 CFR 408.172 and 408.175 (Subpart Q); 40 CFR 408.202 and 40 CFR 408.205 (Subpart T); 40 CFR 408.292 and 40 CFR 408.295 (Subpart AC); and 40 CFR 408.312 and 408.315 (Subpart AE).[2]

In summary, petitioners' request is that the regulations be modified to delete Anchorage, Cordova, Juneau, Ketchikan and Petersburg from the non-remote Alaska subcategories. The effect of this modification, under the current regulations, would be to designate grinding as the best practicable control technology currently available ("BPT") for facilities at those locations, rather than the current screening technology.

II. Background

The Administrator, pursuant to the Act, published the effluent limitations for the seafood processing category in two parts. The first, referred to as Phase I, was published on June 26, 1974. These regulations covered, in part, the Alaska crab subcategories and the Alaska shrimp subcategories. On December 1, 1975 the Phase II regulations were published covering, in part, the Alaska salmon, Alaska bottom fish, Alaska scallop and Alaska herring subcategories.

The regulations prescribe as BPT grinding of solids at most locations in Alaska (designated as remote locations) and screening at certain other locations in Alaska (designated as non-remote locations).

The discharge which is the subject of the regulations is effluent from seafood processing plants, which includes only the residuals of the seafood that are not utilized in the processing operation. Nothing is added during the processing of the seafood. The effluent enters the food chain at a high level as a food source for birds (such as gulls and terns), fish (such as flounders, sea trout and the like) and crab.

III. The Legal Basis for the Request

This petition for modification is a petition for rulemaking under the Administrative Procedure Act (5 U.S.C. 553(e)). Although EPA has not promulgated regulations specifically governing such petitions, the courts have recognized this mechanism for modifying EPA regulations. Two early cases under the Clean Air Act held that the appropriate procedure to seek a modification of EPA regulations is to petition the agency. *Union Electric Company* v. *EPA,* 515 F.2d 206 (8th Cir. 1975), *aff'd,* 427 U.S. 246 (1976), *reh. denied* 429 U.S. 873 (1977) and *Oljato Chapter of Navajo Tribe* v. *Train,* 515 F. 2d 654 (D.C. Cir. 1975). The relevant judicial review section of the Clean Water Act, Section 509(b)(1), is analogous to the review provision of the Clean Air Act, Section 307(b)(1). Similarly, the Ninth Circuit Court of Appeals, in a recent opinion on certain regulations at issue in this proceeding, stated:

"The Act provides for annual revision of guidelines for effluent limitations—such as the challenged regulations—promulgated under Section 304, 33 U.S.C. Section 1314. Section 304(b), 33 U.S.C. Section 1314(b) * * * In an appropriate case, moreover, a petition for reconsideration may be filed with the EPA to consider whether evidence such as that offered by petitioners requires the agency to review its original actions (citation). Thus, there are mechanisms for the agency to consider evidence developed after promulgation of the 1977 regulations."

Association of Pacific Fisheries v. *Environmental Protection Agency,* No. 75–2007, slip op. at 23 (9th Cir. February 4, 1980).

IV. The Environmental Protection Agency Should Modify the Regulations at Issue Because Screening is not BPT for Areas in Alaska, except Kodiak.

The current regulations for the Alaska seafood processing subcategories divide the State of Alaska into two classifications—remote and non-remote. BPT for remote areas is grinding. BPT for the non-remote areas is screening. This petition seeks the reclassification of a number of areas from non-remote to remote, limiting the area where screening is BPT. The petition is based on the fact that screening in Alaska locations, with exception of Kodiak, does not meet the statutory criteria for BPT.

A. *The Costs of Screening in Alaska Are Wholly Out of Proportion to the Effluent Reduction Benefits Achieved.* Section 304 of the Act sets forth the factors the Administrator must consider in establishing BPT. Among those factors is:

"* * * the total cost of application of technology in relation to the effluent reduction benefits to be achieved by such application."

Section 304(b)(1)(B). The Congress, in explaining the cost-benefit factor, stated:

"The balancing test between total cost and effluent reduction benefit is intended to limit the application of technology only where the additional degree of effluent reduction is wholly out of proportion to the cost of achieving such marginal level of reduction for any class or category of sources."

Congressional Research Service, A Legislative History of the Water Pollution Control Act Amendments of 1972, at 170 (1973).

1. *EPA's cost determinations for screening are significantly understated.* In 1975, as part of the determination of BPT, EPA determined the cost of installation of screening with the attendant of barging required for disposal.[3] Recently, EPA, as part of its re-evaluation of best available technology economically achievable, commissioned its contractor to update these cost estimates.[4] As the chart below illustrates, EPA's costs are significantly understated.

CAPITAL COSTS [5]

	EPA 1975 [6]	EPA 1979 [7]	Industry 1980 [8]
Screening and storage	$84,000	$196,000	$166,500
In plant	0	220,000	220,000
Barging	62,000	25,000	475,000
Dock construction	0	0	156,000
Total	146,000	443,000	1,037,500

[5] These represent the capital costs for the Alaska Mechanized Salmon subcategory (Subpart Q).
[6] From the Development Document.
[7] From the 1979 Reassessment.
[8] This data is preliminary Cordova data. The plant costs figure is adopted from the EPA figure. The barging cost is based on a self-powered, twin engine, 65' x 24' barge. The dock construction is a small platform, 1200 sq. feet with steel pilings.

The two significant items of discrepancy are the cost of a barge and the dock construction. EPA as based its recent barge estimate on the cost of a scow provided with a plastic liner being towed by an "available power boar." [9] A plastic lined barge would not be sufficiently durable for use in Alaska. Further, plants do not have extra power boats of the size needed to tow a barge. In addition, EPA ignored the cost of dock loading facilities which is a significant capital expense in any area, but especially with the exceedingly high materials and labor costs in Alaska. The cost of the dock is based on $130 per square foot.

Petitioner submit that a result of these understated costs, EPA's assessment of the relationship between the cost of treatment and the effluent reduction benefits achieved produced an inaccurate conclusion.

2. *Screening in Alaska, other than in Kodiak, achieves no effluent reduction benefit.* It has been settled, that the "effluent reduction benefits" referenced in Section 304(b)(1)(B) are not primarily water quality benefits. *Weyerhaeuser Company v. Costle,* 590 F.2d 1011 (D.C. Cir. 1978). Effluent reduction benefit is the reduction in the pounds of waste which are discharged into the water.

It is petitioners' position that screening in Alaska, other than in Kodiak,[10] achieves no effluent reduction benefit. This position is based on the fact that the only practicable disposal method in Alaska is barging with ocean discharge. Such a screening and barging operation does not result in the removal of waste from the receiving water. In other words, the same number of pounds of seafood waste is discharged into the water whether by grinding or by screening.[11]

The development documents discuss other methods of disposing of screened seafood waste. These include landfill, reduction facilities for by-product recovery, and discharge into municipal sewer systems. These alternate methods, in fact, are utilized for the non-Alaska seafood processing subcategories in Washington, Oregon and California. However, these alternatives are not available in Alaska.

First, there are no available landfill sites in any of the presently designated non-remote Alaska locations. Because seafood waste is very watery after screening, any discharge in a landfill near the water could result in the leaching of the seafood material into the water.

Second, while there has been much discussion about reduction facilities as a method of disposing of screened seafood waste, this is not a practicable disposal method. Currently the City in Kodiak is the only year-round processing location in Alaska. Even with its 17 facilities, the reduction facility loses money each year and requires an annual subsidy from the processors. To construct a reduction facility in any other location would not only require a significant capital investment, but would result in unreasonably large deficits given the seasonal operations and the lack of processor concentration in any of these other locations.[12]

Finally, none of the municipalities in Alaska are equipped to receive seafood processing waste in their sewage treatment facilities. Discussions have been undertaken with each of the affected municipalities and each has refused to accept seafood processing waste.

In summary, the only practicable method of handling the waste collected on the screens is the barging method—and this method achieves no effluent reduction benefit because screening with barging does not reduce the pounds of waste discharged.

3. *Summary.* Based on the above information, petitioners submit that the high cost of implementing screening and barging (in excess of $1,000,000 per processing facility) satisfies the test of being "wholly out of proportion" to the effluent reduction benefits—one million dollars per plant does not remove one pound of waste.

B. *The Administrator did not consider other significant factors in establishing BPT.* In addition to the cost-benefit factor, required under the Act, Section 304(b)(1)(B) provides that in determining BPT consideration should be given to "such other factors as the Administrator deems appropriate." Petitioners suggest that the following factors were not considered by the Administrator, and are appropriate for consideration.

1. *The energy requirements of screening and barging are significant.* The State of Alaska is constantly operating under the threat of serious curtailments in petroleum products, especially diesel fuel. This fuel is required for the fishing vessels which operate throughout Alaskan waters and as the source of fuel for the generation of electricity and steam. It is important to point out that many of the plants generate their own electricity and steam.

The operation of a barge will require significant quantities of diesel fuel each day during the fishing season—at the time of peak demand. This is a significant drain on the diesel fuel resources in a particular area and also results in a significant additional daily operating cost.

2. *The Sanitation Standards of U.S. Food and Drug Administration and the State of Alaska may conflict with screening.* Both the U.S. Food and Drug Administration sets stringent standards for sanitation in a food processing facility. Because of the location of the processing facilities in Alaska—that is, either between the mountains and the water or at the end of a pier—the storage area for seafood waste must be directly adjacent to the processing facility. Seafood wastes attract a number of insects, vermin, birds and rodents. Because of their proximity to the processing plant the waste storage facilities may cause significant problems by attracting such animals into the processing facility itself. It is already a major job to keep such animals out of the plants and waste storage will serve to aggravate the problem.

3. *The increased costs from screening will frustrate the purposes of the Fisheries Conservation & Management Act of 1976.* One of the major purposes

[1] This petition presents preliminary material. Petitioners have advised EPA that they will complete this submission, with all the relevant supporting data, by June 16, 1980.
[2] The proposed modifications to each section are attached as Appendix A.

[3] See: "Development Document for Effluent Guidelines and New Source Performance Standards for the Fish Meal, Salmon, Bottom Fish, Clam, Oyster, Sardine, Scallop, Herring, and Abalone Segment of the Canned & Preserved Fish & Seafood Processing Industry Point Source Catagory." (September, 1975). ("Development Document").

[4] "Reassessment of Effluent Limitations Guidelines and New Source Performance Standards For the Canned & Preserved Seafood Point Source Category." Prepared for EPA by E. C. Jordan & Co. (December, 1979) ("1979 Reassessment").
[9] 1979 Reassessment at p. 232
[10] In the City of Kodiak, there are enough year-round processors to support a reduction facility where the screened waste can be utilized.

[11] The NPDES permits issued direct the location of the dump site. These vary from less than one mile to 2½ miles.
[12] One of the companies in Petersburg, Icicle Seafoods, owns an existing reduction facility. There is some question as to whether that facility can handle all the waste generated by all three Petersburg plants. In addition, the logistics and costs of moving waste from the Whitney-Fidalgo plant to the reduction facility makes disposal at the facility not practicable. (This subject will be discussed in greater detail in petitioners' supplemental filing.)

V 45 / 154 AG 7 80 UMI

of the Fisheries Conservation & Management Act of 1976 (16 U.S.C. 1801 *et seq.*) was to establish a preference for American processors.

Congressman John Murphy, Chairman of the House Merchant Marine and Fisheries Committee, stated in explaining the final language of the 1978 amendments to the Fisheries Conservation & Management Act that the language:

"* * * would give preference to U.S. fish processors of U.S. harvested fish* * *."

Congressional Record, H–8266, August 10, 1978. The House Report accompaning the 1978 amendments states:

"* * * Some of the species which would appear to be fully utilized by U.S. processors are salmon, king crab, halibut, surf clams, menhaden, lobster and shrimp. When processing capacity and intent is sufficient, the committee feels that foreign processing vessels should not be allowed to participate in such fisheries."

H. Rep. No. 95–1024, 95th Cong. 2d Sess. 6 (1978).

The imposition of the significant screening costs will adversely affect the ability of American processors to compete with foreign-owned floating processors which operate outside U.S. waters, and, therefore, are not required to install pollution control technology of any type. The result of this discrepancy will be to frustrate the Congressional intent of encouraging more American processing with its attendant employment base, material support and the resulting increase in export of processed fish which will help significantly to lessen this country's balance of payment deficit.

IV. Summary

Petitioners submit that screening is not BPT for Alaska, other than in the City of Kodiak, for the reasons stated in this petition. Petitioners submit that the information above shows that the costs of screening are wholly out of proportion to the effluent reduction benefits achieved and that other factors further indicate that screening is not a practicable technology. Petitioners urge the administrator to propose a modification of the regulations, as submitted by petitioners, which will reclassify a number of areas in the State of Alaska and establish a true BPT.

Dated: May 7, 1980.

Respectfully submitted,

Bogle & Gates.

Charles R. Blumenfeld,

Attorneys for Petitioners.

Supplemental Petition for Modification

In Re Effluent Guidelines Regulations for Alaskan Subcategories of the Canned and Preserved Seafood Processing Point Source Category (40 CFR Part 408).

I. Introduction

Petitioners Pacific Seafood Processors Association, Morpac, Inc., Nefco-Fidalgo Packing Company, North Pacific Processors, E. C. Phillips & Son, Inc., Washington Fish & Oyster Company and Whitney-Fidalgo Seafoods, submit this Supplemental Petition for Modification of the 1977 effluent guidelines for certain subcategories of the Canned and Preserved Seafood Processing Point Source Category, which were promulgated under the Clean Water Act (33 U.S.C. 466, *et seq.*).

This Supplemental Petition is filed in accordance with the schedule set forth in the May 19, 1980 **Federal Register** (45 FR 32676). The purpose of this Supplemental Petition and the accompanying appendices is to provide additional material and supporting documentation for petitioners' Petition for Modification ("Original Petition") filed on May 7, 1980.

As stated in the Original Petition, petitioners request that the regulations at issue [1] be modified to delete Anchorage, Cordova, Juneau, Ketchikan and Petersburg from the non-remote Alaska subcategories. The effect of this modification, under the current regulations, would be to designate grinding as the best practicable control technology currently available ("BPT") for facilities of those locations, rather than the current screening technology.

II. The Cost of Screening

Petitioners, in their Original Petition (Part IV.A.1.), set forth comparative costs for screening and barging. The information which follows supplements the material in the Original Petition. In particular, the following chart is intended to supersede the chart on page 6 of the Original Petition.

Capital Costs [2]

	EPA[3] 1975	EPA[4] 1979	Cordova[5]	Ketchikan[6]	Anchorage[7]	Juneau[8]	Petersburg (barging)[9]	Petersburg (reduction)[10]
Screening and storage	$64,000	$196,000	$257,000	$312,000	*$151,000	$277,000	*$75,000	$314,000
Barging	82,000	25,000	479,000	*485,000	[10]225,000	485,000	[10]225,000	0
Dock	0	0	164,000	172,000	135,000	90,000	0	800,000
Total	146,000	*223,000	900,000	969,000	*511,000	852,000	*300,000	1,114,000

*Corrected as of June 20, 1980.

[2] These represent the capital costs for the Mechanized salmon subcategory (Subpart Q).

[3] Source: "Development Document for Effluent Guidelines and New Source Performance Standards for the Fish Meal, Salmon, Bottom Fish, Clam, Oyster, Sardine, Scallop, Herring, and Abalone Segment of the Canned and Preserved Fish & Seafood Processing Industry Point Source Category." (September, 1975); Table 194 at p. 429.

[4] Source: "Reassessment of Effluent Limitations Guidelines and New Source Performance Standards For the Canned and Preserved Seafood Point Source Category." Prepared for EPA by E. C. Jordan & Co. (December, 1979); Table 100 at p. 252.

[5] These costs are the average costs from the three Cordova petitioners: Morpac, Inc., North Pacific Processors, and St. Elias (Washington Fish & Oyster Co.). The individual plants costs are detailed in Appendix B.

[6] These costs are the costs for petitioner Nefco-Fidalgo's facility. The other Ketchikan Petitioner, E. C. Phillips, has only a cold storage facility. Because of the minimal waste generated by cold storage facilities, its waste disposal costs are not typical. The individual costs are detailed in Appendix C.

[7] Petitioner Whitney-Fidalgo operates the only facility in Anchorage. These costs are detailed in Appendix D.

[8] Petitioner Juneau Cold Storage (Washington Fish & Oyster Co.) operates the only facility in Juneau. These costs are detailed in Appendix E.

[9] The only petitioner operating a facility is Whitney-Fidalgo. Costs are presented for both barging and transportation to the reduction facility operated by Icicle Seafoods. (See discussion in Part III.C., below). The costs are detailed in Appendix F.

[10] This barging cost is based on a non-self-propelled barge and tender. Petitioner Whitney-Fidalgo selected this method because of the lesser amount of waste generated at these two facilities.

One item deserves note—the "In-Plant" category has been deleted. In petitioners' haste to file the Original Petition, EPA's in-plant costs were included; however, these costs are not appropriate for BPT considerations. Thus, this category has been deleted.

III. Waste Disposal Alternatives, Other Than Barging, Are Not Available in Alaska

As discussed in the Original Petition (Part IV.A.2.), landfill, reduction facilities for by-product recovery, and discharge into municipal sewer systems are not available alternatives in Alaska.

A. *Landfill.* Appendix G includes correspondence from the cities of Cordova and Ketchikan discussion the unavailability of municipal landfills for

[1] The proposed modifications to each section are attached as Appendix A.

the discharge of seafood waste.[11] Petitioners initiated inquiries and the correspondence is the municipality's response.

B. *Municipal Sewage Treatment Facilities.* Appendix G includes correspondence from the cities of Cordova and Ketchikan discussion the unavailability of municipal treatment facilities for seafood processing wastes.[11] Petitioners initiated inquiries and the correspondence is the municipality's response.

C. *Reduction Facilities.* As petitioners mentioned in their Original Petition (at page 8), reduction facilities are not a feasible method of disposing of screened seafood waste. Currently, the only independent reduction facility in Alaska is operated in the City of Kodiak. All the processors located in Kodiak subsidize the reduction facility. Even though processors located in the City of Kodiak operate nearly year round, and seventeen facilities are located there, the reduction facility continues to lose money each year. The subsidy for 1980 has increased to $20.00 per ton of wet waste handled. To construct a reduction facility at any other location would not only require a significant capital investment, but would result in an unreasonably large annual operating deficit—given the seasonal nature of processing and the limited number of processors.

Petitioner Washington Fish & Oyster Company has developed capital costs for its Cordova and Juneau processing locations.[12]

An EPA contractor evaluated the profitability of reduction facilities at certain Alaska locations.[13] Among those locations which are relevant to this petition, were Cordova and Ketchikan. The contractor concluded that a reduction facility in Cordova would have a net profit of $22 per ton and, in Ketchikan, a net profit of $15 per ton. To achieve this profit figure the contractor assumed that the reduction facility would recover 25% of the raw waste material delivered.[14] However, the operators of existing reduction facilities in Alaska have experienced no more than a 20% recovery. This 20% recovery, instead of 25%, significantly decreases the profitability of a reduction facility, since the expense of operating the facility remains constant (because the volume of waste delivered is not reduced). For example, at 20% recovery the net profit in Cordova is reduced to only $5 per ton and a net *loss* of $5 per ton is created in Ketchikan.

Cordova

	25 percent recovery [15]		20 percent recovery	
	Tons	Annual gross revenue	Tons	Annual gross revenue
Fish meal	940	$360,000	752	$288,000
Fish oil	300	117,000	300	117,000
Shell fish meal	135	13,000	135	13,000
		490,000		418,000
Less: annual cost		(399,000)		(399,000)
Net profit		$91,000		$19,000
Divided by: raw tons delivered		4,136		4,136
Net profit per ton of raw material		$22.00		$4.59

Ketchikan

	25 percent recovery [16]		20 percent recovery	
	Tons	Annual gross revenue	Tons	Annual gross revenue
Fish meal	950	$360,000	760	$288,000
Fish oil	300	120,000		
			300	120,000
		480,000		408,000
Less: annual cost		(427,000)		(427,000)
Net profit/(loss)		$53,000		$(19,000)
Divided by: raw tons delivered		3,533		3,533
Net profit per ton of raw material		$15.00		$(5.38)

[15] *Id.* at p. 173. See Appendix I.

[16] *Id.* at p. 182. See Appendix I.

In addition, it is important to point out that the contractor has undersized the Cordova facility, and as a result, it would be unable to handle all the waste material generated. In an earlier study, by another EPA contractor, it was concluded that a 50-ton per day facility in Cordova would only handle 66% of the waste generated. [17] It is this 50-ton per day plant which is used by contractor E. C. Jordan Co., Inc. in its 1979 Reassessment to fix capital costs and operating expense. [18] To process 100% of the waste generated in Cordova, the facility in Cordova would have to be approximately the same size as the Ketchikan facility, used in the 1979 Reassessment, and its operating expenses would be similar to that facility, also. Therefore, the actual profitability of an adequately-sized Cordova reduction facility would result in approximately the same $5 per ton *loss* as at the Ketchikan facility.

There is an existing reduction facility in Petersburg, Alaska. This facility is owned and operated by Icicle Seafoods, a processor. Petitioners question whether that facility has enough capacity to handle waste generated in Petersburg during the peak of the season. (The peak capacity is the key, because any waste disposal system, to be viable, must be able to handle waste generated at the peak of the season.)

Petitioners also are concerned about a facility having to rely on a competitor's reduction plant for waste disposal. Such dependence could be vulnerable to anti-competitive practices. For example, if the operator of the reduction facility either refused to accept waste material from another processor, or significantly increased its price for the waste at the peak of the processing season, the dependent processor could be faced

[11] Petitioners expect to receive further correspondence on this matter. Such correspondence will be forwarded to the Agency when received. The letters in Appendix G, however, are representative of the position of each municipality involved.

[12] These costs are detailed in Appendix H.

[18] 1979 Reassessment at p. 169.

V. 45 / 154 4 AG 7 80 UMI

with a choice of shutting down or violating its NPDES permit—neither is an attractive alternative.

Finally, petitioner Whitney-Fidalgo has submitted material which indicates that its cost of transporting waste material to the existing Petersburg reduction facility is significantly more costly than barging. (See: Chart on p. 3, above). The reason for this is that Whitney-Fidalgo must increase the width of its 800 foot dock so that vehicles can move the material to the shore. [19]

D. *Summary.* As stated in the Original Petition, the above information indicates that the only viable method of disposing of seafood wastes collected on screens is by barging; yet, this method achieves no reduction in the volume of effluent discharged. The same number of pounds of waste are discharged with screening and barging as with direct discharge through grinding.

IV. Consideration of Other Significant Factors in Establishing BPT

As discussed in the original Petition (Part IV.B.), there are a number of other significant factors which were not considered in establishing BPT. Among those are U.S. Food & Drug Administration regulations which set forth the current good manufacturing practice in manufacturing, processing, packing or holding human food (20 CFR Part 110). [20] Petitioners are particularly concerned about the storage of seafood waste directly adjacent to the processing plant which may constitute an attractant, breeding place, or harborage for rodents, insects and other pests.

V. Summary

Petitioners submit that screening is not BPT for Alaska, other than in the City of Kodiak, for the reasons stated in petitioners' Petition for Modification and Supplemental Petition.

Petitioners further submit that the information included in the petition demonstrates that the costs of screening are wholly out of proportion to the effluent reduction benefits achieved and that other factors further indicate that screening is not BPT.

Petitioners respectfully urge the Administrator to propose a modification of the regulations, as submitted by petitioners, which will reclassify a number of areas in the State of Alaska; thus, establishing a true BPT.

Respectfully submitted,

Bogle & Gates.

Dated: June 16, 1980.

Charles R. Blumenfeld,

Attorneys for Petitioners.

BILLING CODE 6560-01-M

[19] The Whitney-Fidalgo plant is located at the end of a one-lane 800-foot dock. In order to get waste material to the reduction facility a transportation system would have to be established. This would include loading 2,000-pound bins, which can be handled at the end of the dock, with waste and carrying these bins on a forklift to the shore where larger waste bins would be constructed. The larger waste bins would be emptied into a truck for transport across Petersburg from the Whitney facility to the reduction plant. Given the volume of waste from Whitney's Petersburg facility, the logistics would be complicated inasmuch as a forklift would be traveling down the dock every five to ten minutes with a 2,000-pound bin and a truck would make 50 trips a day through the center of Petersburg. The major cost of the transportation system is the necessity to add an additional lane on the dock. A forklift traveling along the dock every five to ten minutes will tie up one lane on the dock and the existing one-lane-wide dock would not be sufficient to handle that volume of forklift traffic along with all the other traffic which presently uses the dock.

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

[Docket No. FEMA-5843]

National Flood Insurance Program; Proposed Flood Elevation Determinations; Correction

AGENCY: Federal Insurance Administration, FEMA.

ACTION: Proposed rule; correction.

SUMMARY: This document corrects a Notice of Proposed Determinations of base (100-year) flood elevations for selected locations in the Township of Commerce, Oakland County, Michigan, previously published at 45 FR 42699 on June 25, 1980.

EFFECTIVE DATE: August 7, 1980.

FOR FURTHER INFORMATION CONTACT: Mr. Robert G. Chappell, National Flood Insurance Program, (202) 426-1460 or Toll Free Line (800) 424-8872 (In Alaska and Hawaii call Toll Free Line (800) 424-9080), Federal Emergency Management Agency, Washington, D.C. 20472.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the correction to the Notice of Proposed Determinations of base (100-year) flood elevations for selected locations in the Township of Commerce, Oakland County, Michigan previously published at 45 FR 42699 on June 25, 1980, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 44 CFR 67.4(a)). The location described as, "Just downstream of Farr Road," under the Source of Flooding of Huron River should read, "Just downstream of Farr Street."

The location described as, "Just upstream of Fox Lake Dam," under the Source of Flooding of Huron River should read, "Just upstream of Fox Lake Outlet Dam."

The Source of Flooding listed as Channel from Lake Pleasant should read Carus Lake and Lake Pleasant Channel. Also under this Source of Flooding, the location described as, "About 3,000 feet downstream of Haggerty Road," should read, "About 3,000 feet downstream of Haggerty Highway," and the location described as, "Just downstream of Haggerty Road," should read, "Just downstream of Haggerty Highway."

The Source of Flooding listed as Commerce Lake should read North Commerce Lake.

The Source of Flooding, South Commerce Lake, location—Shoreline, with a corresponding elevation of 910 feet should be added.

The Source of Flooding, Fox Lake, location—Shoreline, with a corresponding elevation of 931 feet should be added. The listing appears correctly as follows:

State	City/town/county	Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD)
Michigan	(Twp) Commerce, Oakland County.	Huron river	Just downstream of Farr Street	*929
			Just upstream of Fox Lake Outlet Dam	*931
		Carus Lake and Lake Pleasant Channel.	About 3,000 feet downstream of Haggerty Highway	*931
			Just downstream of Haggerty Highway	*934
		North Commerce Lake	Shoreline	*910
		South Commerce Lake	Shoreline	*910
		Fox Lake	Shoreline	*931

[National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; Executive Order 12127, 44 FR 19367)

Issued: July 25, 1980.

Gloria M. Jimenez,

Federal Insurance Administrator.

[FR Doc. 80-23849 filed 8-6-80; 8:45 am]

BILLING CODE 6718-03-M

44 CFR Part 67

[Docket No. FEMA-5818]

National Flood Insurance Program

Proposed Flood Elevation Determinations; Correction

AGENCY: Federal Insurance Administration, FEMA.

ACTION: Proposed rule; correction.

SUMMARY: This document corrects a Notice of Proposed Determinations of base (100-year) flood elevations for selected locations in the Unincorporated Areas of Rice County, Minnesota, previously published at 45 FR 31443 on May 13, 1980.

EFFECTIVE DATE: August 7, 1980.

FOR FURTHER INFORMATION CONTACT: Mr. Robert G. Chappell, National Flood Insurance Program, (202) 426-1460 or Toll Free Line (800) 424-8872 (In Alaska and Hawaii call Toll Free Line (800) 424-9080), Federal Emergency Management Agency, Washington, D.C. 20472.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the correction to the Notice of Proposed Determinations of base (100-year) flood elevations for selected locations in the Unincorporated Areas of Rice County, Minnesota previously published at 45 FR 31443 on May 13, 1980, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 44 CFR 67.4(a)).

The Source of Flooding of Cannon Lake must be added. The location described as, "Shoreline, south of County Road 13," which originally appeared under the Source of Flooding of Cannon River should now appear under Cannon Lake. The accompanying Flood Insurance Study (profile) and Flood Insurance Rate Map were correct as printed.

The listing appears correctly as follows:

State	City/town/county	Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD).
Minnesota	(Uninc.), Rice County	Cannon Lake	Shoreline, south of County Road 13	*982

[National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; Executive Order 12127, 44 FR 19367)

Issued: July 29, 1980.

Gloria M. Jimenez,

Federal Insurance Administrator.

[FR Doc. 80-23848 Filed 8-6-80; 8:45 am]

BILLING CODE 6718-03-M

44 CFR Part 67

[Docket No. FEMA 5873]

National Flood Insurance Program; Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, FEMA.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the nation. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in each community.

ADDRESSES: See table below.

FOR FURTHER INFORMATION CONTACT: Mr. Robert G. Chappell, National Flood Insurance Program (202) 426-1460 or Toll Free Line (800) 424-8872 (In Alaska and Hawaii call Toll Free Line (800) 424-9080), Federal Emergency Management Agency, Washington, D.C. 20472.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for selected locations in the nation, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 44 CFR Part 67.4(a).

These elevations, together with the flood plain management measures required by § 60.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State or Regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

V. 45 / 154 AUG 7 1980 UMI

The proposed base (100-year) flood elevations for selected locations are:

Proposed Base (100-Year) Flood Elevations

State	City/town/county	Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD)
Pennsylvania	Caernarvon, Township, Lancaster County.	Conestoga Creek	Approximately 1,200 feet downstream of Private Lane	*418

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 40001–4128); Executive Order 12127, 44 FR 19367)

Issued: July 25, 1980.

Gloria M. Jimenez,

Federal Insurance Administration.

[FR Doc. 80-23844 Filed 8-6-80; 8:45 am]

BILLING CODE 6718-03-M

44 CFR Part 67

[Docket No. FEMA 5874]

National Flood Insurance Program; Proposed Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency, FEMA.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below and proposed changes to base flood elevations for selected locations in the nation. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in each community.

ADDRESSES: See table below.

FOR FURTHER INFORMATION CONTACT: Mr. Robert G. Chappell, National Flood Insurance Program (202) 426–1460 or Toll Free Line (800) 424–8872 (In Alaska and Hawaii call Toll Free Line (800 424–9080), Federal Emergency Management Agency, Washington, D.C. 20472.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for selected locations in the nation, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 44 CFR 67.4(a).

These elevations, together with the flood plain management measures required by Section 60.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or Regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Proposed Base (100-Year) Flood Elevations

State	City/town/county	Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD)
Alabama	City of Fultondale, Jefferson County.	Five Mile Creek	Just upstream of corporate limits	*498
			Just upstream of U.S. Highway 31	*509
		Black Creek	Just upstream of Sloats Road	*497
			Just downstream of New Castle road	*515
	Maps available at City Hall, 1005 Walkers Chapel road, Fultondale, Alabama 35068.			
	Send comments to Mayor James Arwood or City Clerk, Milton Stuckey, City Hall, P.O. 378, Fultondale, Alabama 35068.			
Arkansas	City of Greenwood, Sebastian County.	Vache Grasse Creek	Approximately 150 feet upstream of Route 10	*488
			Approximately 400 feet upstream of Route 71B	*493
		Heartsill Creek	Just downstream of Arkansas Route 10	*491
			Just downstream of Denver Street	*505
		Hester Creek	Just upstream of Interstate 71	*508
	Maps available at City Hall, 101 North Aster Street, Greenwood, Arkansas 72936.			
	Send Comments to Mayor T. P. BROWN OR Ms. Bobbie Jones, Recorder of Deeds, City Hall, P.O. Box 206, Greenwood, Arkansas 72936.			
California	Dixon (City), Solano County	Dickson Creek	At intersection of North First Street and Stratford Avenue	*61
			At intersection of North Almond Street and West H Street	*63
			Intersection of North Washington Street and Park Drive	*#1
	Maps available at City Hall, Dept. of Public Works, 600 East A Street, Dixon, California.			
	Send comments to the Honorable Marime Burton-Halloran, 600 East A Street, Dixon, California 95620.			
California	Rio Vista (City), Solano County	Sacramento River	Intersection of river and center of State Highway 12	*8
		Marina Creek	100 feet upstream from center of Second Street	*9
		Marina Creek Tributary	100 feet upstream from corporate limits	#1
		Industrial Creek	100 feet downstream from center of St. Francis Way	*13
			Intersection of creek and center of St. Francis Way	#2
	Maps available at City Eng. Office, City Hall, 1 Main Street, Rio Vista, California.			
	Send comments to the Honorable Milton Wallace, 1 Main Street, Rio Vista, California 94571.			
Illinois	(V) Bloomingdale, DuPage County	Spring Brook Creek	Just downstream of Medinah—On-The-Lake Road	*705
			Just upstream of Circle Avenue	*714
			About 430 feet upstream of Foster Avenue	*726
			Just upstream of private drive (about 520 feet upstream of Foster Avenue).	*729
		West Branch Tributary to Spring Brook Creek.	About 200 feet upstream of confluence with Spring Brook Creek	*720
			About 120 feet downstream of Maple Avenue	*740
			About 250 feet downstream of Lake Street	*750
	Maps available at the Engineer's Office, Village Hall, 201 South Bloomingdale Road, Bloomingdale, Illinois.			
	Send comments to Honorable Sam Tenuto, Village President, Village of Bloomingdale, Village Hall, 201 South Bloomingdale Road, Bloomingdale, Illinois 60108.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; Executive Order 12127, 44 FR 19367; and delegation of authority to Federal Insurance Administrator)

Issued: July 25, 1980.

Gloria M. Jimenez,

Federal Insurance Administrator.

[FR Doc. 80-23845 Filed 8-6-80; 8:45 am]

BILLING CODE 6718-03-M

---

44 CFR Part 67

[Docket No. FEMA- 5875]

National Flood Insurance Program; Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, FEMA.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the nation. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in each community.

ADDRESSES: See table below.

FOR FURTHER INFORMATION CONTACT: Mr. Robert G. Chappell, National Flood Insurance Program (202) 426–1460 or Toll Free Line (800) 424–8872 (In Alaska and Hawaii call Toll Free Line (800 424–9080), Federal Emergency Management Agency, Washington, D.C. 20472.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for selected locations in the nation, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448), 42 U.S.C. 4001–4128, and 44 CFR 67.4(a).

These elevations, together with the flood plain management measures required by Section 60.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or Regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

V 45 / 154 AUG 7 80 UMI

The proposed base (100-year) flood elevations for selected locations are:

Proposed Base (100-Year) Flood Elevations

State	City/town/county	Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD)
New Jersey	Atlantic Highlands, Borough, Monmouth County.	Sandy Hook Bay	Entire shoreline	*12
			Tidal flooding on Wagner Creek downstream from upstream corporate limits.	*12
			Tidal flooding of Many Mind Creek downstream of State Route 36	*12
	Maps available at the Office of the Borough Clerk, Atlantic Highlands, New Jersey.			
	Send comments to Honorable J. Leonard Clark, Clerk Administrator of Atlantic Highlands, 100 First Avenue, Atlantic Highlands, New Jersey 07716.			
New Jersey	Deerfield, Township, Cumberland County.	Maurice River	Downstream Corporate Limits	*39
			Upstream Corporate Limits	*36
	Maps available at the Municipal Building, Deerfield, New Jersey.			
	Send comments to Honorable Anthony Standione, Mayor of Deerfield, P.O. Box 327, Municipal Building, Rosenhayn, New Jersey 08352.			
New Jersey	Township of Harmony, Warren County.	Delaware River	Downstream corporate limits	*202
			4,000 feet upstream of corporate limits	*203
			At Conrail Bridge 2,280 feet upstream of corporate limits	*213
			Confluence of Buckhorn Creek	*220
			At 2nd Conrail Bridge 42,350 feet upstream of corporate limits	*228
			1,650 feet upstream of 2nd Conrail Bridge	*230
		Lopatcong Creek	Downstream corporate limits	*334
			At dam 70 feet upstream of corporate limits	*345
			1,400 feet upstream from corporate limits	*358
			400 feet downstream from County Route 519	*363
			At County Route 519	*370
			At private road 1,000 feet upstream of County Route 519	*380
			At private road 2,000 feet upstream of County Route 519	*391
			1,000 feet downstream of Decker Road	*402
			400 feet downstream of Decker Road	*409
			Upstream side of Decker Road	*417
			800 feet upstream of Decker Road	*425
			Hartman Drive	*437
			800 feet upstream of Hartman Drive	*448
			1,400 feet upstream of Hartman Drive	*457
			1,800 feet upstream of Hartman Drive	*465
			1,400 feet downstream of Harmony Brass Castle Road	*474
			800 feet downstream of Harmony Brass Castle Road	*487
			Approximately 300 feet downstream of Harmony Brass Castle Road	*497
			Allen's Mill Road	*508
			270 feet upstream from Allen's Mill Road	*513
		Buckhorn Creek	At confluence with Delaware River	*220
			1,000 feet upstream of Hutchison State Road	*228
			2,000 feet upstream of Hutchison State Road	*238
			1,500 feet downstream of Reeder Road	*247
			300 feet downstream of Reeder Road	*255
			At Reeder Road	*265
			1,100 feet upstream of Reeder Road	*276
			2,500 feet upstream of Reeder Road	*286
			2,000 feet downstream of Roxburg Station Road	*298
			At confluence of Tributary No. 1 to Buckhorn Creek	*301
			At upstream corporate limits	*303
		Tributary No. 1 to Buckhorn Creek.	At confluence with Buckhorn Creek	*301
			200 feet upstream of confluence with Buckhorn Creek	*303
			200 feet downstream of County Route 519	*315
			At County Route 519 and Hill Road	*322
			300 feet upstream of County Route 519	*332
			600 feet upstream of County Route 519	*341
			700 feet upstream of County Route 519	*351
			800 feet upstream of County Route 519	*362
			900 feet upstream of County Route 519	*372
			1,000 feet upstream of County Route 519	*381
			1,100 feet upstream of County Route 519	*391
			1,200 feet upstream of County Route 519	*404
			1,300 feet upstream of County Route 519	*416
			1,400 feet upstream of County Route 519	*433
			1,500 feet upstream of County Route 519	*444
			1,650 feet upstream of County Route 519	*454
			1,745 feet upstream of County Route 519	*463
			1,880 feet upstream of County Route 519	*472
	Maps available at the Harmony Township School, Harmony, New Jersey.			
	Send comments to Honorable J. Richard Collins, Mayor of Harmony, Mounted Route 12, Phillipsburg, New Jersey 08865.			
New Jersey	Ocean Gate, Borough, Ocean County.	Tributary to Toms River	Upstream Chelsea Avenue	*6
			Upstream Point Pleasant Avenue	*6
			Approximately 800' upstream of Point Pleasant Avenue	*6
			Confluence with Toms River	*6
	Maps available for review at the Office of the Borough Clerk, 153 East Longport Avenue, Ocean Gate, New Jersey.			
	Send comments to Clarence G. Cashman, Mayor of Ocean Gate, 153 East Longport Avenue, Ocean Gate, New Jersey 08740			

Proposed Base (100-Year) Flood Elevations—Continued

State	City/town/county	Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD)
New Jersey	Red Bank, Borough, Monmouth County.	Navesink River	Along entire shoreline including Swimming River	*9
	Maps available at the Municipal Building, Red Bank, New Jersey.			
	Send comments to Honorable Michael Aronone, Mayor of Red Bank, 32 Monmouth Street, Red Bank, New Jersey 07701.			
New York	Addison (Village), Steuben County.	Canisteo River	100 feet upstream from center of Main Street	*992
		Tuscarora Creek	100 feet upstream from center of South Street	*992
	Maps available at Village Hall, 35 Tuscarora Street, Addison, New York.			
	Send comments to Honorable Edward Fort, 35 Tuscarora Street, Addison, New York 14801.			
New York	Caledonia, Village, Livingston County.	Spring Creek	Downstream Corporate Limits	*635
			Downstream Conrail	*643
	Maps available at the Village Hall, Caledonia, New York.

Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forest Service

Fishlake National Forest, Juab, Millard, Sanpete, Sevier, Beaver, Piute, Iron, Garfield, and Wayne Counties, Utah; Intent To Prepare an Environmental Impact Statement for Proposed Forest Land and Resource Management Plan

Pursuant to the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, will prepare an Environmental Impact Statement for the proposed Forest Land and Resource Management Plan for the Fishlake National Forest. The Management Plan for the Fishlake will encompass 1,525,412 acres.

Preparation of the Plan will follow direction outlined in the Forest and Rangeland Renewable Resources Planning Act of 1974, as amended by the National Forest Management Act of 1976. The Forest Plan will be prepared according to regulations promulgated by the Secretary of Agriculture. The regulations implement section 6 of the National Forest Management Act of 1976.

The resulting Plan will provide for multiple use and sustained yield of products and services from the Fishlake National Forest. The Plan will guide all natural resource management activities and establish management standards and guidelines. It will determine resource management practices, harvesting levels, and procedures under the principles of multiple use and sustained yield, and the availability and suitability of lands for resource management.

The Forest Plan will be selected from among representative alternatives which will include at least: (1) a no-change in existing resource outputs alternative, (2) a range of alternatives that displays possible outputs of resources available at each of several expenditure levels, and (3) alternatives designed to resolve the identified major public issues and management concerns.

Public participation will be an integral part of the planning process. Small "scoping" meetings to identify issues to be addressed will be held early in the process. Times and places for these meetings will be announced by notices in area newspapers, news releases to news media, and announcements mailed to other agencies, organizations, and individuals known to have interest in management of the Fishlake National Forest. Four general meetings will be held in 1980 at the following places: Fillmore Ranger District, 390 S. Main, Fillmore; Beaver Ranger District, 190 N. 100 E., Beaver; and Richfield Ranger District, 55 S. 100 E., Richfield, Utah, 1:00 to 5:00 p.m. and 7:00 to 9:00 p.m., September 3. Loa Ranger District will hold their meeting in conjunction with the Teasdale Ranger District of the Dixie National Forest at Wayne High School (lunch room), 55 N. Center, Bicknell, 7:00 to 10:00 p.m., August 12 and 13.

Jeff M. Sirmon, Regional Forester, is the responsible official for this Plan.

Further information about the planning and Environmental Impact Statement process or comments on the Notice of Intent should be directed to Andrew E. Godfrey, Forest Planning Staff Officer, Fishlake National Forest, 70 North Main Street, Richfield, UT 84701, (801) 896–4491.

The estimated date for filing the Draft Environmental Impact Statement is December 1981; and the anticipated date for filing the Final Environmental Statement is August 1982.

Dated: July 31, 1980.

Richard K. Griswold,

Director, Planning and Budget, Intermountain Region.

BILLING CODE 3410-11-M

Land and Resource Management Plan National Forests and National Grasslands in Texas; Angelina, Fannin, Houston, Jasper, Montague, Montgomery, Nacogdoches, Newton, Sabine San Augustine, San Jacinto, Shelby, Trinity, Walker and Wise Counties, Tex.; Intent To Prepare an Environmental Impact Statement

Pursuant to Section 102(2)(c) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, will prepare an environmental impact statement on the Land and Resource Management Plan for the National Forests and National Grasslands in Texas which include the Angelina, Davy Crockett, Sabine, and Sam Houston National Forests and the Caddo and LBJ National Grasslands.

The Land and Resource Management Plan is being prepared in accordance with requirements of the Secretary's regulations promulgated pursuant to the National Forest Management Act of 1976. The resulting plan will provide for the multiple use and sustained yield of goods and services from the National Forests and National Grasslands in Texas.

The planning process will integrate all resource planning—timber, range, fish and wildlife, water, wilderness, and recreation—together with resource protection and resource use activities. The process will be issue-oriented, i.e., public issues, management concerns, and development opportunities will be analyzed continually throughout the process.

A reasonable range of alternatives will be formulated by an interdisciplinary team to provide different ways to address and respond to the major public issues, management concerns, and resource opportunities identified during this planning process.

Alternatives will reflect a range of resource outputs and expenditure levels. In formulating these alternatives, the following criteria will be met:

(1) Each alternative will be capable of being achieved.

(2) A no-action alternative will be formulated, that is the most likely condition expected to exist in the future if current management direction continues unchanged.

(3) Each alternative will provide for orderly elimination of backlogs of needed treatment for the restoration of renewable resources as necessary to achieve the multiple-use objectives of that alternative.

(4) Each identified major public issue and management concern will be addressed in one or more alternatives; and

(5) Each alternative will represent to the extent practicable the most cost efficient combination of management practices examined that can meet the objectives established in the alternative.

Each alternative will state at least:

(1) The condition and uses that will result from long-term application;

(2) The goods and services to be produced, and the timing and flow of these outputs;

(3) Resource management standards and guidelines; and

(4) The purposes of the management direction proposed.

As an early step in the planning process, Federal, State, and local agencies, organizations, and individuals who may be interested in, or be affected by the decision will be invited to participate in a scoping process which includes:

(a) identification of those issues to be addressed;

(b) identification of those issues to be analyzed in depth; and

(c) elimination from detailed study those issues which are not significant, or which have been covered by prior environmental review. To accomplish this scoping effort, the National Forests and National Grasslands in Texas will send out information packets in late Fall 1980. The packets will be sent to and comments solicited from Federal, State, and local agencies, organizations, and individuals who may be interested or have expressed an interest in National Forest and National Grassland Planning. Public input on this packet will be received for 60 days.

Written comments should be sent to: Mr. Gordon Steele, National Forest in Texas, P.O. Box 969, Lufkin, Texas 75901. The Supervisor's Office is located at the corner of Third Street and Lufkin Avenue in Lufkin. The commercial telephone number is 713–632–4446.

The draft environmental impact statement and plan will be available by March 1983 for a 90 day comment period. The final environmental impact statement and plan is scheduled for completion by December 1983.

Lawrence M. Whitfield, Regional Forester, Southern Region on the Forest Service, is the responsible official for approval of the environmental impact statement and plan.

For further information about the planning process or the environmental impact statement, contact: Gordon Steele, I. D. Team Leader, National Forests in Texas (713–632–4426).

Dated: July 30, 1980.

James S. Sabin, Jr.,

Acting Regional Forester.

[FR Doc. 80-23774 Filed 8-6-80; 8:45 am]

BILLING CODE 3410-11-M

Lumber Price Index Trends; Sugar Pine

AGENCY: Forest Service, USDA.

ACTION: Final policy.

SUMMARY: This policy sets forth Forest Service procedures for the replacement of the current sugar pine index based upon a 1971 recovery study used for adjustment of contract rates in timber sale contracts with a sugar pine index based upon a 1977–1978 recovery study. The Western Wood Products Association (WWPA) discontinued the 1971 basis sugar pine index after publication of the March 1980 data.

FOR FURTHER INFORMATION CONTACT: James Thorne or George M. Leonard, Timber Management Staff, Forest Service, USDA, P.O. Box 2417, Washington, D.C. 20013 (202) 447–4051.

SUPPLEMENTARY INFORMATION: On February 26, 1980, the Chief, Forest Service, published a Notice of Intent (45 FR 12463) which set forth procedures for replacing the Western Wood Products Association (WWPA) Sugar Pine Index based upon a 1971 recovery study with a new index based upon a 1977–1978 recovery study. This index is used by Government agencies in the appraisal of public timber and to adjust prices paid for timber under certain timber sale contracts. There were no responses to the notice.

IMPLEMENTATION OF THE REPLACEMENT INDEX: It has been determined that the 24-month period, January 1977 through December 1978 is appropriate to establish the differential for replacing the 1971 basis sugar pine base indices in existing timber sale contracts. This 24-month period will properly alleviate any seasonal bias. The differential is calculated as follows:

24-mo Average Index (Weighted) January 1977–December 1978

	Board feet	Value (dollars)	Dollars per thousand board feet
Sugar pine (1971 basis)	363,956,967	151,807,861.57	417.10
Sugar pine (1977–78 basis)	2,209,334,994	860,133,967.68	389.32
Per thousand board feet difference			−27.78

The formula to adjust present contract base indices for sugar pine is:

New base Index = (present contract base index) + (−27.78).

Transition of present contracts with a 1971 basis sugar pine base index to the new 1977–1978 sugar pine base index will be made for the second quarter of calendar year 1980.

The 1971 basis sugar pine index was used for sugar pine sold during April 1980, until base period values for the new 1977–1978 basis sugar pine index could be prepared. New sale offerings advertised after April 30, 1980, have used or will use the new index. Publication of the Sugar Pine Index (1971 basis) was discontinued by WWPA after March 30, 1980.

Holders of existing contracts that are subject to base index changes are being notified in writing of the change by the appropriate Forest Service Official.

Dated: July 28, 1980.

R. Max Peterson,

Chief, Forest Service.

East Finley Township Park Public Water-Based Recreation and Critical Area Treatment R.C. & D. Measure, Pennsylvania

AGENCY: Soil Conservation Service, U.S. Department of Agriculture.

ACTION: Notice of finding of no significant impact.

FOR FURTHER INFORMATION CONTACT:
Mr. Graham T. Munkittrick, State Conservationist, Soil Conservation Service, Room 820, Federal Building, 228 Walnut Street, Harrisburg, Pennsylvania, 17108, telephone 717–782–2202.

NOTICE: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the East Finley Township Park Public Water-Based Recreation and Critical Area Treatment R.C. & D. Measure, Washington County, Pennsylvania.

The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Graham Munkittrick, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for recreation facilities and critical area treatment. The planned works of improvement include picnic tables, grills and benches, a picnic shelter, a water well, comfort station, and a parking area. Conservation practices include subsurface drains, diversions, a stone waterway, streambank stabilization, and seeding.

The Notice of a Finding of No Significant Impact (FNSI) has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Graham T. Munkittrick, State Conservationist, Soil Conservation Service, Room 820, Federal Building, 228 Walnut Street, Harrisburg, Pennsylvania 17108, telephone 717–782–2202. The FNSI has been sent to various Federal, State, and local agencies and interested parties. A limited number of the FNSI are available to fill single copy requests at the above address.

Implementation of the proposal will not be initiated until September 8, 1980.

(Catalog of Federal Domestic Assistance Program No. 10.901, Resource Conservation and Development Program—Pub. L. 87–703, 16 U.S.C. 590a–f, q)

BILLING CODE 3410-16-M

Grant-Shanghai Watershed, Chautauqua County, Kans.

AGENCY: Soil Conservation Service, U.S. Department of Agriculture.

ACTION: Notice of a finding of no significant impact.

FOR FURTHER INFORMATION CONTACT:
Mr. John W. Tippie, State Conservationist, Soil Conservation Service, 760 South Broadway, P.O. Box 600, Salina, Kansas 67401, telephone number (913) 825–9535.

NOTICE: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Grant-Shanghai Watershed project, Chautauqua County, Kansas.

The environmental evaluation of this federally-assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. John W. Tippie, State Conservationist, has determined that the preparation and review of an environmental impact statement is not needed for this project.

The remaining project works include one single-purpose flood prevention dam to be implemented under the authority of the Watershed Protection and Flood Prevention Act (Pub. L. 566, 83d Congress, 68 Stat. 666) as amended.

The Finding of No Significant Impact has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental evaluation is on file and may be reviewed by interested parties at the Soil Conservation Service, 760 South Broadway, Salina, Kansas 67401, telephone number (913) 825–9535. The Finding of No Significant Impact and environmental assessment report have been reviewed by various Federal, State, and local agencies and interested parties. A limited number of copies are available to fill single copy requests.

Implementation of the proposal will not be initiated until September 8, 1980.

Hudson River Supplemental Watershed Plan

AGENCY: Soil Conservation Service, U.S. Department of Agriculture.

ACTION: Notice of a finding of no significant impact.

FOR FURTHER INFORMATION CONTACT:
Mr. Dwight M. Treadway, State Conservationist, Soil Conservation Service, Robert G. Stephens Federal Building, 355 East Hancock Avenue, Athens, Georgia 30603, Telephone 404–546–2273.

NOTICE: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Supplemental Watershed Plan for the Hudson River Watershed project located in Madison, Banks, and Franklin Counties, Georgia.

The environmental assessment of this Federal action indicates that the project will not create significant local, regional, or national impacts on the environment and that no significant controversy is associated with the planned measure. As a result of these findings, Mr. Dwight M. Treadway, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The supplemental watershed plan concerns a plan for the land stabilization measures on 144 acres of critically eroding gully areas. These measures are planned to reduce erosion that is causing damage to property and the environment.

A Finding of No Significant Impact (FNSI) has been prepared and sent to various Federal, State and local agencies, and interested parties. The Notice of a Finding of No Significant Impact has been forwarded to the

Environmental Protection Agency. The environmental assessment and basic data developed during the environmental evaluation are on file and may be reviewed by contacting Mr. Dwight M. Treadway, State Conservationist, 206 Federal Building, 355 East Hancock Avenue, Athens, Georgia 30603, Telephone: 404–546–2273. A limited number of copies of the assessment and FNSI are available from the same address to fill single copy requests.

Implementation of the proposal will not be initiated until September 8, 1980.

CIVIL AERONAUTICS BOARD

[Order 80-7-203]

South Bend-Chicago Subpart Q Proceeding

AGENCY: Civil Aeronautics Board.

ACTION: Notice of order to show cause.

SUMMARY: The Board is instituting the *South Bend-Chicago Subpart Q Proceeding* and is proposing to grant unrestricted authority to Air Wisconsin in the South Bend-Chicago market under expedited procedures of Subpart Q of its Procedural Regulations. The tentative findings and conclusions will become final if no objections are filed.

The complete text of this order is available as noted below.

DATE: Objections: All interested persons having objections to the Board issuing the proposed authority shall file, and serve upon all persons listed below, no later than September 4, 1980, a statement of objections, together with a summary of the testimony, statistical data, and other material expected to be relied upon to support the stated objections.

ADDRESSES: Objections to the issuance of a final order should be filed in Docket 38343, which we have entitled the *South Bend-Chicago Subpart Q Proceeding*. They should be addressed to the Docket Section, Civil Aeronautics Board, Washington, D.C. 20428.

In addition, copies of such filings should be served upon Air Wisconsin; South Bend-Mishawaka Area Chamber of Commerce; the Indiana Aeronautics Commission; the Governor of Illinois; the Mayors of Chicago and South Bend; the Airport authority, Chicago-O'Hare International Airport and the airport authority, Michiana Regional Airport, South Bend, Indiana.

FOR FURTHER INFORMATION CONTACT:
Lucille J. Mellema, Bureau of Domestic Aviation, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428 (202) 673–5105.

SUPPLEMENTARY INFORMATION: The complete text of order 80–7–203 is available from our Distribution Section, Room 516, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428. Persons outside the metropolitan area may send a postcard request for Order 80–7–203 to that address.

By the Bureau of Domestic Aviation: July 31, 1980.

International Trade Administration

Electronic Instrumentation Technical Advisory Committee; Partially Closed Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act, as amended, 5 U.S.C. App. (1976), notice is hereby given that a meeting of the Electronic Instrumentation Technical Advisory Committee will be held on Tuesday, August 26, 1980, at 9:30 a.m. in Room 3708, Main Commerce Building, 14th Street and Constitution Avenue, NW., Washington, D.C.

The Electronic Instrumentation Technical Advisory Committee was initially established on October 23, 1973. On October 7, 1975, October 21, 1977, and August 28, 1978, the Assistant Secretary for Administration approved the recharter and extension of the Committee pursuant to Section 5(c)(1) of the Export Administration Act of 1969, as amended, 50 U.S.C. App. Section 2404(c)(1) and the Federal Advisory Committee Act.

The Committee advises the Office of Export Administration with respect to questions involving (A) technical matters, (B) worldwide availability and actual utilization of production technology, (C) licensing procedures which affect the level of export controls applicable to electronic instrumentation, including technical data or other information related thereto, and (D) exports of the aforementioned commodities and technical data subject to multilateral controls in which the United States participates, including proposed revisions of any such multilateral controls.

The Committee meeting agenda has four parts:

General Session

(1) Opening remarks by the Chairman.
(2) Presentation of papers or comments by the public.
(3) Discussion of automatic test equipment (ATE) in the infrastructure of manufacturing.
(4) Discussion of keystone technology in the ATE system.

Executive Session

(5) Discussion of matters properly classified under Executive Order 11652 or 12065, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

With respect to agenda item (5), the Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on September 6, 1978, pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended by Section 5(c) of the Government In The Sunshine Act, P.L. 94–409, that the matters to be discussed in the Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552b(c)(1). Such matters are specifically authorized under criteria established by an Executive Order to be kept secret in the interests of the national defense or foreign policy. All materials to be reviewed and discussed by the Committee during the Executive Session of the meeting have been properly classified under Executive Order 11652 or 12065. All Committee members have appropriate security clearances.

The complete Notice of Determination to close meetings or portions thereof of the series of meetings of the Electronic Instrumentation Technical Advisory

V 45 / 154 AG 7 80 UMI

Committee and of any subcommittees thereof was published in the **Federal Register** on December 27, 1978 (43 FR 60328).

Copies of the minutes of the open portions of the meeting will be available by calling Mrs. Margaret Cornejo, Office of the Director of Licensing, Office of Export Administration, International Trade Administration, Room 1617M, U.S. Department of Commerce, Washington, D.C. 20230, telephone: 202–377–2583.

For further information, contact Mrs. Cornejo, either in writing or by phone at the address or number shown above.

Dated: August 4, 1980.

Kent N. Knowles,

Director, Office of Export Administration, International Trade Administration, U.S. Department of Commerce.

BILLING CODE 3510-25-M

National Oceanic and Atmospheric Administration

Intent To Conduct Reviews of Government Versus Contract Operation of Commercial or Industrial Activities and Service Contracts

AGENCY: National Oceanic and Atmospheric Administration.

ACTION: Notice.

SUMMARY: Pursuant to Office of Management and Budget (OMB) Circular A–76 and the Department of Commerce Administrative Order 201–41 implementing OMB Circular A–76, notice is hereby given that the National Oceanic and Atmospheric Administration (NOAA) intends to conduct reviews of the feasibility and/or cost of contract operation versus Government operation of commercial and industrial activities listed below under Supplemental Information. Specific invitation for bids or request for proposals will be announced in the Commerce Business Daily. A contract or contracts may or may not result from each feasibility or cost comparison study. Results of each study will be made available to responding bidders or offerors and other interested parties.

DATES: See specific dates in table under Supplemental Information.

FOR FURTHER INFORMATION CONTACT: Samuel A. Lawrence, Assistant Administrator for Management and Budget, 6010 Executive Boulevard, Rockville, Maryland 20852, 443–8134.

SUPPLEMENTARY INFORMATION: Studies to be made are identified in the following tabulation:

Name of activity	Location of activity	Review start date	Review end date
Operation of ship chapman [1]	Seattle, Washington	07/31/80	07/31/81
Imagery processing laboratory [2]	Washington, D.C.	07/31/80	07/31/81
Central distribution	Rockville, Maryland	10/01/80	10/01/81
Duplicating plant	Rockville, Maryland	10/01/80	10/01/81
Central logistics supply center	Kansas City, Missouri	01/01/81	01/01/82
Airport obstruction surveys	Rockville, Maryland	10/31/80	10/31/81
Data entry	Asheville, North Carolina	10/01/80	10/01/81
Microfilming	Boulder, Colorado	10/01/80	10/01/81
Repair of weather equipment	Kansas City, Missouri	10/01/80	10/01/81
Aeronautics drafting	Silver Spring, Maryland	12/01/80	12/01/81
Photography laboratory	Suitland, Maryland	03/01/81	03/01/82
Radiosonde reconditioning	Kansas City, Missouri	03/01/81	03/01/82

BILLING CODE 3510-12-M

Pacific Fishery Management Council, Scientific and Statistical Committee and Salmon Subpanel; Public Meeting With Partially Closed Session; Rescheduling

AGENCY: National Marine Fisheries Service.

SUMMARY: The Pacific Fishery Management Council, established by Section 302 of the Fishery Conservation and Management Act of 1976 (Pub. L. 94–265) and its Salmon Subpanel have changed meeting dates and times (FR Vol. 45, No. 144, July 24, 1980, page 49312):

From

Salmon Subpanel (open meeting) August 19–20, 1980 (2 p.m. to 5 p.m. on August 19; 8 a.m. to 5 p.m. on August 20)

To

August 20 (2 p.m. to 5 p.m.) and August 21 (8 a.m. to 12 noon)

From

Council (open meeting) August 20, (9 a.m. to 5 p.m.) and August 21 (8 a.m. to 5 p.m.)

To

August 20 (9 a.m. to 5 p.m.) and August 21 (11 a.m. to 5 p.m.)

From

Council (closed meeting) August 20, (8 a.m. to 9 a.m.)

To

August 21 (9 a.m. to 11 a.m.)

All other information remains unchanged.

FOR FURTHER INFORMATION CONTACT: Pacific Fishery Management Council, 526 S.W. Mill Street, Second Floor, Portland, Oregon 97201, Telephone: (503) 221–6352.

Dated: August 4, 1980.

Robert K. Crowell,

Deputy Executive Director, National Marine Fisheries Service.

[FR Doc. 80-23854 Filed 8-6-80; 8:45 am]

BILLING CODE 3510-22-M

New England Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service, NOAA.

SUMMARY: The New England Fishery Management Council, established by Section 302 of the Fishery Conservation and Management Act of 1976 (Pub. L. 94–265), will meet to discuss status of groundfish fishery; oversight committee reports for lobster, scallops, and herring, as well as other business.

DATE: The meetings, which are open to the public, will convene on Wednesday, August 27, 1980, at approximately 10 a.m., and will adjourn on Thursday, August 28, 1980, at approximately 5 p.m. The meetings may be lengthened or shortened, or agenda items rearranged, depending upon progress on the agenda.

ADDRESS: The meetings will take place at the Samoset Resort, Rockport, Maine.

FOR FURTHER INFORMATION CONTACT: New England Fishery Management Council, Suntaug Office Park, Five Broadway, Route One, Saugus, Massachusetts 01906, Telephone: (617) 231–0422.

Dated: August 4, 1980.

Robert K. Crowell,

Deputy Executive Director, National Marine Fisheries Service.

BILLING CODE 3510-22-M

Sea Lion Promotions Ltd.; Issuance of Permit

On May 30 1980, Notice was published in the **Federal Register** (45 FR 36466), that an application had been filed with the National Marine Fisheries Service by Sea Lion Promotions Limited, 9 Auckland Terrace, Parliament Street, Ramsey, Isle of Man, for a permit to take two (2) California sea lions (*Zalophus californianus*) for the purpose of public display.

Notice is hereby given that on July 31, 1980, and as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), the National Marine Fisheries Service issued a Public Display Permit for the above taking to Sea Lion Promotions Limited subject to certain conditions set forth therein.

The Permit is available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, N.W., Washington, D.C.; and

Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, California 90731.

Dated: July 31, 1980.

Robert K. Crowell,

Deputy Executive Director, National Marine Fisheries Service.

COMMODITY FUTURES TRADING COMMISSION

Proposed Joint Audit Plan, Correction

In FR Doc. 80–21785, appearing at page 48682 in the **Federal Register** of Monday, July 21, 1980, the following changes should be made:

1. On page 48683, in the third column, immediately below the boldface heading, "Chicago Board of Trade-FCM's," the FCM "Aardvark Financial Inc." should be added. Also, on the fourteenth line under that boldface heading, the FCM denoted as "Brown & Co., Inc., K.J.," should be deleted.

2. On page 48684, the first column, on line 28, the name "Shearson Loeb Rhoades, Inc." should be inserted in lieu of "Shearson Hayden Stone, Inc." and on line 36, the name "Gill & Duffus Services, Inc." should be inserted in lieu of "Truebner & Company, Inc." Also, immediately below line 36, the following two FCMs should be added: "Virginia Trading Corporation" and "Western Farm Commodities Company."

Issued in Washington, D.C., on August 4, 1980.

Jane K. Stuckey,

Secretary of the Commission.

BILLING CODE 3910-01-M

DEPARTMENT OF EDUCATION

Education Appeal Board; Applications for Review

AGENCY: Department of Education.

ACTION: Notice of applications for review accepted for hearing by Education Appeal Board.

SUMMARY: This notice lists the applications for review that were received and accepted for hearing by the Education Appeal Board between May 3, 1980, and June 30, 1980.

FOR FURTHER INFORMATION CONTACT: Dr. David S. Pollen, Chairman, Education Appeal Board, 400 Maryland Avenue, SW (Room 2141, FOB–6), Washington, D.C. 20202. Telephone (202) 245–7835.

SUPPLEMENTARY INFORMATION: Under sections 451 through 456 of the General Education Provisions Act (20 USC 1234), the Education Appeal Board has authority to conduct (1) audit appeal hearings, (2) withholding, termination and cease and desist hearings initiated by the Secretary of Education, and (3) other proceedings designated by the Secretary as being within the jurisdiction of the Board. For

V 45/154 AG 7 80 UMI

information concerning the Board and its procedures, see the Board's final regulations published in the **Federal Register** on April 3, 1980 (45 FR 22634).

This notice lists the applications for review that were received and accepted for hearing by the Education Appeal Board between May 3, 1980, and June 30, 1980.

Two applications for review involved programs conducted under Title I of the Elementary and Secondary Education Act of 1965, as amended:

(1) *Appeal of the State of Nevada,* Docket No. 6–(61)–80. The State appealed a final audit determination that the Washoe County School District had no supporting documentation for its fiscal year 1975 and 1976 comparability reports and could not demonstrate that services provided from State and local funds to schools serving Title I project areas were comparable to the services provided schools not serving Title I project areas. The Department of Education requested a refund from the State in the amount of $640,699.00.

(2) *Appeal of the State of Illinois,* Docket No. 7–(62)–80. The State appealed final audit determinations that the Chicago Board of Education (1) used Title I funds in fiscal years 1975 and 1977 to support a project for the education of pregnant girls that was not eligible for Title I funds, and supplanted State and local funds that should have been used to support the project; (2) approved projects in fiscal year 1977 at two schools that did not meet the Title I comparability requirements, and (3) overclaimed indirect costs in fiscal years 1975 through 1977. The Department of Education requested a refund from the State in the amount of $3,335,680.00.

Two applications for review involved programs conducted under the Emergency School Aid Act:

(1) *Appeal of the City of Detroit, Michigan,* Docket No. 5–(60)–80. The city appealed final determinations that some of the funds made available to the city under the Emergency School Aid Act were improperly used for out-of-State trips and space rental costs under one grant, and for additional costs and activities that were unauthorized under a second grant. The Department of Education requested a refund from the city in the amount of $116,729.00.

(2) *Appeal of Community School District 22, Brooklyn, New York,* Docket No. 8–(63)–80. The school district appealed a final determination that some of the funds made available to the school district under an Emergency School Aid Act grant were used to hire additional personnel without the prior approval of the Grants Officer. The Department of Education requested a refund from the school district of $105,362.00.

Section 100d.43 of the Board's final regulations provides that an interested person, group, or agency may, upon application to the Board Chairperson, intervene in appeals before the Education Appeal Board, including the four listed above.

The application must indicate to the satisfaction of the Board Chairperson or, as appropriate, the Panel Chairperson, that the intervenor has an interest in and information relevant to the specific issues raised in the appeals. If an application to intervene is approved, the intervenor becomes a party to the proceedings.

All such applications or questions should be addressed to Dr. David S. Pollen, Chairman, Education Appeal Board, 400 Maryland Avenue, SW (Room 2141, FOB–6), Washington, D.C. 20202, telephone (202) 245–7835.

(Catalog of Federal Domestic Assistance Number not applicable. Part I of one circular A–95 does not apply.)

(20 U.S.C. 1234)

Dated: August 4, 1980.

Shirley M. Hufstedler,

Secretary of Education.

[FR Doc. 80-23866 Filed 8-6-80; 8:45 am]

BILLING CODE 4000-01-M

Education Appeal Board; Final Decisions Adopted

AGENCY: Department of Education.

ACTION: Summaries of Final Decisions of the Education Appeal Board.

SUMMARY: This notice contains summaries of the two decisions of the Education Appeal Board which were adopted at the final decisions of the Department of Education between January 5, 1980, and June 30, 1980.

FOR FURTHER INFORMATION CONTACT: Dr. David S. Pollen, Chairman, Education Appeal Board, 400 Maryland Avenue, S.W. (Room 2141, FOB–6), Washington, D.C. 20202. Telephone (202) 245–7835.

SUPPLEMENTARY INFORMATION: Under sections 451 through 456 of the General Education Provisions Act (20 U.S.C. 1234), the Education Appeal Board has authority to conduct (1) audit appeal hearings, (2) withholding, termination, and cease and desist hearings initiated by the Secretary of Education, and (3) other proceedings designated by the Secretary as being within the jurisdiction of the Board. For information concerning the Board and its procedures, see the Board's final regulations published in the **Federal Register** on April 3, 1980 (45 FR 22634).

This notice summarizes the two decisions of the Education Appeal Board that were adopted as the final decisions of the Department of Education between January 5, 1980, and June 30, 1980. Summaries of the Board's decisions are published on a semiannual basis in order to keep the public informed as to the Board's activities.

The summaries are prepared as a convenience to the public and are intended only to highlight the holdings of the Education Appeal Board. The summaries are not official parts of the decisions and should not be relied upon as guidance from the Department of Education or legal precedent. Copies of the full decisions of the Education Appeal Board are available at the address given above on request and with payment of the full costs of reproduction.

Summary of Final Decision: *Appeal of the State of Michigan,* Docket No. 9–(24)–76, February 26, 1980.

Michigan appealed a final audit determination, made by the Deputy Commissioner for School Systems, that during the summer of 1970, the Traverse Bay Area Intermediate School District improperly charged the shared costs of a State-funded day care program and a Federally-funded migrant youth education program solely to the Federal program. The Federal program was funded under Title I of the Elementary and Secondary Education Act of 1965, as amended. The Deputy Commissioner requested a refund from the State in the amount of $55,557.00.

On February 12, 1979, the Hearing Panel issued an interim decision holding that Michigan was required to refund the amount of Title I migrant funds improperly expended on the day care program, but leaving open the issue of how to properly compute that amount. In the Panel's concluding decision issued on December 19, 1979, the Panel approved the auditors' use of average daily attendance figures as the basis for prorating the shared costs of the two programs, and noted that the State had not met its burden of proving that the average daily attendance figures were inaccurate.

The Panel held that Michigan was required to refund $55,557.00 to the Department of Education. On February 26, 1980, the Panel's decision was adopted as the final decision of the Department.

Summary of Final Decision: *Appeal of the State of New Jersey,* Docket No. 14–(29)–76, May 3, 1980.

New Jersey appealed final audit determinations, made by the Deputy Commissioner for Elementary and Secondary Education, that the Newark local educational agency misspent funds under Title I of Elementary and Secondary Education Act of 1965, as amended, in fiscal years 1971 and 1972. After applying the statute of limitations, the amount of Title I funds remaining in dispute was $1,031,304.00.

In a decision issued February 19, 1980, the Hearing Panel ruled that the Commissioner of Education was not limited to withholding future Title I funds but could recover funds improperly spent within the applicable limitation period. The Panel found that the Newark local educational agency spent Title I funds at schools which the Newark local educational agency, by using an eligiblity formula that inflated the percentages of children from low-income families attending the schools, improperly classified as eligible for Title I services. The Panel also ruled that recalculations of the percentages submitted during the appeal proceedings failed to show that the schools were eligible. The Panel further rejected New Jersey's argument that all the Newark schools were disadvantaged and therefore eligible to receive Title I services.

The Panel ruled that New Jersey was required to refund $1,031,304.00 to the Department of Education. On May 3, 1980, the Panel's decision was adopted as the final decision of the Department.

(Catalog of Federal Domestic Assistance Number not applicable. Part I of OMB Circular A–95 does not apply.)

Dated: August 4, 1980.

Shirley M. Hufstedler,

Secretary of Education.

[FR Doc. 80-23867 Filed 8-6-80; 8:45 am]

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Compliance With the National Environmental Policy Act; Intent To Prepare Environmental Impact Statement

AGENCY: Department of Energy.

ACTION: Notice of Intent to prepare an Environmental Impact Statement (EIS) on the potential use of a group of salt domes in the Gulf of Mexico off the coast of Texas and Louisiana for crude oil storage by the Strategic Petroleum Reserve.

SUMMARY: The Department of Energy (DOE) announces its intent to prepare an EIS to assess the environmental implications of a proposed DOE action to use one of three salt domes located in the Gulf of Mexico approximately 40–65 miles off the coast of Texas and Louisiana for storage of up to 200 million barrels (MMB) of crude oil as a part of the Strategic Petroleum Reserve (SPR).

Interested agencies, organizations, and members of the general public desiring to submit commnts or suggestions for consideration in connection with this EIS are invited to do so. Upon completion of the EIS, its availability will be announced in the **Federal Register,** at which time comments will again be solicited.

Written comments may be submitted to: Harry A. Jones, Deputy Assistant Secretary, Strategic Petroleum Reserve Office, U.S. Department of Energy, 1726 M St. NW., Washington, DC 20461 (202) 634–5521.

For general information on the DOE Environmental Impact Statement (EIS) process contact: Ms. Mary E. Shaughnessy, NEPA Affairs Division, Office of the Assistant Secretary for Environment, U.S. Department of Energy, Room 4G–064, Forrestal Building, 1000 Independence Ave. SW., Washington, DC 20585 (202) 252–4610.

BACKGROUND INFORMATION: Congress mandated the SPR in Title I, Part B, of the Energy Policy and Conservation Act of 1975 (Pub. L. 94–163) to provide the United States with sufficient petroleum reserves to minimize the effects of any future oil supply interruption. SPR Plan Amendment No. 2, submitted to the Congress in May 1978, increased the goal of the Reserve from 500 million to 1 billion barrels by 1985 and provided for implementation of a 750 million barrel Government Reserve.

A final programmatic EIS addressing the effects of SPR implementation was made available in December 1976. A final supplement updating the programmatic EIS and addressing the expansion of the SPR to a billion barrel program was made available in January 1979. The programmatic EIS and its supplement addressed the establishment of several different types of reserves (e.g. Industrial Petroleum Reserve, Regional Product Reserve, and the Early Storage Reserve) as well as several different types of storage media (e.g., surplus tanker ships, conventional steel surface tanks, underground storage in salt domes and rock caverns). In addition, the programmatic EIS addresses cumulative effects expected from use of varying combinations of media types.

Five sites are presently being developed in Gulf coastal areas of Texas and Louisiana as a part of the SPR. These include: solution-mined salt dome sites at Bryan Mound, Texas, and West Hackberry, Bayou Choctaw and Sulphur Mines, Louisiana, and one mechanically mined site at Weeks Island, Louisiana. Site specific EIS's are available for each of these sites. With an increased goal of the SPR of one billion barrels, additional storage sites must be identified and evaluated. The development of storage below the floor of the Gulf of Mexico in an offshore group of salt domes is proposed as one alternative to provide up to 200 MMB of the total SPR capacity.

The purpose of this Notice is to present, pertinent background information regarding the proposed scope and content of the EIS and to solicit comments and suggestions for consideration in its preparation. Environmental effects of this proposal will be assessed in the EIS. This offshore group of salt domes is proposed for storage of up to 200 MMB although full utilization of all three sites could provide up to 600 MMB of storage. The offshore sites under consideration have been named for the lease blocks in which they are located. The three sites are identified as Galveston Island Block 86 (GA86), Galveston Island Block 64, (GA64) and East Cameron Block 192 (EC192). Site GA86 lies approximately 45 miles south of Freeport, Texas; site GA64 lies approximately 50 miles southwest of Freeport; and site EC192 lies approximately 65 miles southwest of Cameron, Louisiana.

Development of 200 MMB of storage capacity at any one of the sites would require leaching 24 storage caverns from the salt dome. Each cavern would be planned for a 10 MMB net capacity; however, since unforeseen construction or geological conditions might result in less than desired capacity in some caverns, planning would assume development of 16 caverns at 10 MMB and 8 caverns at 5 MMB. Erection of 24 drilling platforms would be required for cavern entry wells to be used for leaching, oil fill and oil withdrawal. Water for leaching would be withdrawn from the Gulf of Mexico, and the brine produced during cavern development would be discharged into the Gulf through two discharge ports positioned 15 feet apart and 25 feet below the water surface at each platform. Return of the brine to a central pumping platform for discharge is not proposed because of (1) the extensive piping required, (2) the potentially greater effect on the water column of a larger concentration of brine discharge at one location, and (3) the potential for brine recirculating through the leach water intake and adversely affecting the rate of cavern leaching.

V 45 / 154 AG 7 80 UMI

Additional principal facilities at an offshore salt dome site would include a large pumping platform for seawater intake (leach water), oil pumping, offshore control center, and living quarters; connecting pipelines; and six single point moorings (SPM). Establishment of anchorages and shipping safety fairways to provide tanker access to the SPM's would also be required.

Onshore support facilities would be provided at either Freeport or Port Arthur, Texas. Principal onshore support base components would include a small boat harbor and docking facility, a warehouse and storage area, heliport, an administration center, and oil spill control equipment.

A primary advantage of using offshore sites is that very large crude carriers could be moored at a site for offloading directly into storage caverns. Oil withdrawn from storage could be transported by small and/or large tankers to refineries in the northeastern United States and/or in the Caribbean. Tankers could also transport oil to Gulf Coast refineries.

Identification of Environmental Issues

Issues which will analyzed during preparation of the DEIS include but are not limited to the following list which is not intended to be a predetermination of effects:

(1) Effects resulting from site preparation and operation of oil storage facilities including a permanent loss of salt resources, adverse effects on local water quality due to sediment suspension, effects of brine disposal, and effects of accidents resulting in oil spills and/or on-site fires;

(2) Effects on biota resulting from construction and operation including disruption of bottom sediments and resultant loss of benthos, creation of a favorable reef habitat at the platforms, and entrainment and impingement of organisms by intake structures;

(3) The release of hydrocarbon emissions due to tanker venting during withdrawal may result in exceeding air quality standards for up to 20 miles from SPM's;

(4) Cumulative effects of cavern area preemption from commercial fishing and oil/gas development; and

(5) Effects resulting from development of a 10-acre onshore support base which would include loss of terrestrial and aquatic habitats with indirect effects on fish and wildlife.

ALTERNATIVES: The DEIS for the proposed development of offshore domes for use in the SPR will examine the environmental effects of that development and compare them to effects of reasonable alternatives. The DEIS will consider this proposal from the standpoint of various development options. The DEIS will also consider these alternatives: storage underground in caverns developed in Gulf Coast and inland salt domes, storage underground in hard rock mines, and a "no action" alternative whereby no additional storage would be developed for the SPR beyond that already provided in SPR Gulf Coast facilities.

All suggestions, comments and questions submitted to DOE on or before August 27, 1980, will be carefully considered in the preparation of the DEIS. Comments received after that date will also be considered to the maximum extent practicable.

Dated at Washington, DC, this 1st day of August 1980.

For the United States Department of Energy.

Lynda L. Brothers,

Acting Assistant Secretary for Environment.

[FR Doc. 80-23800 Filed 8-6-80; 8:45 am]

BILLING CODE 6450-01-M

Proposed Subsequent Arrangements

Pursuant to section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160), notice is hereby given of a proposed "subsequent arrangement" under the Agreement for Cooperation Between the Government of the United States of America and the Government of Canada.

The subsequent arrangement to be carried out under the above mentioned agreement involves approval of the following contract:

WC–CA–20, United States to Canada, fuel rods containing 245 kilograms uranium, with 7.3 kilograms of U–235 (2.98%), to be used for a loss of coolant accident study at the NRU reactor, Atomic Energy of Canada, Limited, Chalk River, Canada. This study is sponsored by the U.S. Nuclear Regulatory Commission. It is intended that this material will be returned to the United States within two years after completion of the study.

In accordance with section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that the furnishing of the nuclear material will not be inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than August 22, 1980.

For the Department of Energy.

Dated: August 1, 1980.

Harold D. Bengelsdorf,

Director for Nuclear Affairs, International Programs.

BILLING CODE 6450-01-M

Proposed Subsequent Arrangement

Pursuant to Section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160), notice is hereby given of a proposed "subsequent arrangement" under the Agreement for Cooperation Between the Government of the United States of America and the Government of Japan and the Additional Agreement Between the Government of the United States of America and the European Atomic Energy Community (EURATOM) Concerning the Peaceful Uses of Atomic Energy.

The subsequent arrangement to be carried out under the above mentioned agreements involves approval of the following retransfer:

RTD/JA(EU)–21, from West Germany to Japan, two prototype material test reactor fuel elements, one of which contains 520 grams uranium enriched to 92.65% in U–235, and one of which contains 980 grams of uranium enriched to 19.99% in U–235, to be utilized in the material test reactor at the Japan Atomic Energy Research Institute.

In accordance with Section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that this subsequent arrangement will not be inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than August 22, 1980.

For the Department of Energy.

Dated: August 1, 1980.

Harold D. Bengelsdorf,

Director for Nuclear Affairs, International Nuclear and Technical Programs.

BILLING CODE 6450-01-M

Economic Regulatory Administration

Entitlements Program Crude Oil Cost Data, November 1978 Through May 1980

The Economic Regulatory Administration (ERA) hereby issues its bi-monthly notice of crude oil cost data. The purpose of this notice is to make available to the public information on the effect of the entitlements program on the crude oil costs of the various segments of the refining industry. Table I (attached) sets forth the pre-entitlements costs of crude oil to (1) the major refiners (Amoco, Arco, Chevron, Citgo, Conoco, Exxon, Getty, Gulf, Marathon, Mobil, Phillips, Shell, Sunoco, Texaco, and Union-Oil), (2) large independent refiners (Ameriada Hess, Sohio, Ashland, Coastal, Tosco, Kerr-McGee, and Champlin), and (3) small refiners. Table II (attached) shows the post-entitlements crude oil cost distribution for the 22 major and large independent companies. Table III (attached) shows the pre-entitlements imported crude oil cost distribution for the same 22 companies.

The data are based on the reports filed each month on the Form ERA–49 by all refiners in the entitlements program.

Issued in Washington, D.C. on July 31, 1980.

Hazel R. Rollins,

Administrator, Economic Regulatory Administration.

ENVIRONMENTAL PROTECTION AGENCY

[OPTS-51106; FRL 1564-1]

Isocyanate Terminated Urethane Prepolymer; Premanufacture Notice

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Section 5(d)(2) requires EPA to publish in the **Federal Register** certain information about each PMN within 5 working days after receipt. This Notice announces receipt of a PMN and provides a summary.

DATE: Written comments by September 19, 1980.

ADDRESS: Written comments to: Document Control Officer (TS-793), Office of Pesticides and Toxic Substances, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460, 202-755-8050.

FOR FURTHER INFORMATION CONTACT: George Bagley, Premanufacturing Review Division (TS-794), Office of Pesticides and Toxic Substances, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460, 202/426-3936.

SUPPLEMENTARY INFORMATION: Section 5(a)(1) of TSCA [90 Stat. 2012 (15 U.S.C. 2604)], requires any person who intends to manufacture or import a new chemical substance to submit a PMN to EPA at least 90 days before manufacture or import commences. A "new" chemical substance is any substance that is not on the Inventory of existing substances compiled by EPA under Section 8(b) of TSCA. EPA first published the Initial Inventory on June 1, 1979. Notice of availability of the Initial Inventory was published in the **Federal Register** of May 15, 1979 (44 FR 28558). The requirement to submit a PMN for new chemical substances manufactured or imported for commercial purposes became effective on July 1, 1979.

EPA has proposed premanufacture notification rules and forms in the **Federal Register** issues of January 10, 1979 (44 FR 2242) and October 16, 1979 (44 FR 59764). These regulations, however, are not yet in effect. Interested persons should consult the Agency's Interim Policy published in the **Federal Register** of May 15, 1979 (44 FR 28564) for guidance concerning premanufacture

notification requirements prior to the effective date of these rules and forms. In particular, see page 28567 of the Interim Policy.

A PMN must include the information listed in Section 5(d)(1) of TSCA. Under section 5(d)(2) EPA must publish in the **Federal Register** nonconfidential information on the identity and use(s) of the substance, as well as a description of any test data submitted under section 5(b). In addition, EPA has decided to publish a description of any test data submitted with the PMN and EPA will publish the identity of the submitter unless this information is claimed confidential.

Publication of the section 5(d)(2) notice is subject to section 14 concerning disclosure of confidential information. A company can claim confidentiality for any information submitted as part of a PMN. If the company claims confidentiality for the specific chemical identity or use(s) of the chemical, EPA encourages the submitter to provide a generic use description, a nonconfidential description of the potential exposures from use, and a generic name for the chemical. EPA will publish the generic name, the generic use(s), and the potential exposure descriptions in the **Federal Register.**

If no generic use description or generic name is provided, EPA will develop one and after providing due notice to the submitter, will publish an amended **Federal Register** notice. EPA immediately will review confidentiality claims for chemical identity, chemical use(s), the identity of the submitter, and for health and safety studies. If EPA determines that portions of this information are not entitled to confidential treatment, the Agency will publish an amended notice and will place the information in the public file, after notifying the submitter and complying with other applicable procedures.

After receipt, EPA has 90 days to review a PMN under section 5(a)(1). The section 5(d)(2) **Federal Register** notice indicates the date when the review period ends for each PMN. Under section 5(c), EPA may, for good cause, extend the review period for up to an additional 90 days. If EPA determines that an extension is necessary, it will publish a notice in the **Federal Register.**

Once the review period ends, the submitter may manufacture the substance unless EPA has imposed restrictions. When the submitter begins to manufacture the substance, he must report to EPA, and the Agency will add the substance to the Inventory. After the substance is added to the Inventory, any company may manufacture it without providing EPA notice under section 5(a)(1)(A).

Therefore, under the Toxic Substances Control Act, a summary of the data taken from the PMN is published herein.

Interested persons may, on or before September 19, 1980, submit to the Document Control Officer (TS-793), Rm. E-447, Office of Pesticides and Toxic Substances, 401 M St., SW, Washington, DC 20460, written comments regarding this notice. Three copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the document control number "[OPTS-51106]" and the PMN number. Comments received may be seen in the above office between 8:00 a.m. and 4:00 p.m., Monday through Friday, excluding holidays.

(Sec. 5, 90 Stat. 2012 (15 U.S.C. 2604))

Dated: August 1, 1980.

Warren R. Muir,

Acting Deputy Assistant Administrator for Chemical Control.

PMN 80-178

Close of Review Period. October 19, 1980.

Manufacturer's Identity. Claimed confidential.

Specific Chemical Identity. Claimed confidential. Generic name provided. Isocyanate terminated urethane prepolymer.

Use. Claimed confidential.

Production Estimates. Claimed confidential.

Regional Implementation of EPA Policy for Increased Use of Minority Consultants and Construction Contractors

The U.S. Environmental Protection Agency (EPA) announces these regional goals for utilization of minority consultants and construction contractors in the four States of Region 10: Alaska, Idaho, Oregon and Washington. This action implements EPA's Policy for "Increased Use of Minority Consultants and Construction Contractors" published in the **Federal Register,** Vol. 43, No. 248, page 60220 (Tuesday, December 26, 1978). These goals shall become effective thirty (30) days after publication in the **Federal Register.**

I. Introduction

Public hearings were held in each of the four Region 10 States to assist EPA in identifying and establishing goals for minority business enterprises (MBE) in the Region. Notice of these hearings was published in five major newspapers, including one newspaper in each of the four Region 10 States. In addition, notice of these hearings was mailed to more than 700 MBE's, contractors, material suppliers, engineering firms and others interested in the MBE program in Region 10. The hearings were held in Boise, Idaho on January 8, 1980, Anchorage, Alaska on January 15, 1980, Seattle, Washington on January 17, 1980, and in Portland, Oregon on January 24, 1980.

Based on the comments and testimony received, the Regional Administrator, Region 10, establishes a variable goal which takes into account the type, size and location of EPA-assisted projects. This notice also establishes regional policy and procedures regarding non-minority controlled firms to curb the potential abuse of non-MBE firms taking a share of business which otherwise would go to MBE under the policy.

The goals announced are established for three separate components of the engineering, planning and construction industry: (1) Architectural and engineering (A/E) services; (2) construction contracting; and (3) the supply of equipment and materials. Region 10 has established a separate goal and a separate method of computing MBE participation for material and equipment suppliers based on testimony from MBE and the industry generally that construction contractors have used non-minority manufactured equipment and mateials, supplied by minority firms, to totally meet the MBE goal without taking further positive efforts to retain MBE in other construction related areas.

The EPA policy was issued prior to the final promulgation by the Office of Management and Budget (OMB) of Revised Attachment O to OMB Circular A-102, **Federal Register,** Vol. 44, No. 159, page 47874 (August 15, 1979). However, the EPA policy is based upon and consistent with the positive efforts requirements contained in Revised Attachment O.

II. Summary of Comments and Agency Response

The four hearings held in Idaho, Alaska, Washington and Oregon were conducted by the EPA Region 10, Office of Regional Counsel, Water Division and Office of External Affairs (civil rights office). Participants at the hearings included both minority and non-minority architects and engineers, material and equipment suppliers and construction contractors from the private sector as well as public officials associated with State and local governments implementing MBE programs.

Persons testifying at each of the hearings stated that the EPA Policy has increased opportunities for MBE participation in all segments of the construction industry and has been effective to a greater or lesser extent in overcoming past discrimination and lack of minority involvement in the industry. Nevertheless, numerous commenters stated that discrimination against minorities is continuing in the construction and architectural and engineering industry, and that additional efforts are needed to overcome this problem.

Oregon Hearing

The hearing in Oregon was held in Portland on January 24, 1980.

Testimony was received on each of the questions asked in the notice of public hearing, and on other issues involving the MBE program. Witnesses expressed concern over implementation of a uniform regional goal, given the diversity of population in areas and number of minority owned firms in those areas. There was discussion regarding "importing" minority firms and workers to do jobs that "locals" could do. Many expressed the view that there should be no relationship between minority population in an area and goal-setting for that area.

Those present expressed a belief that some majority contractors were not contracting with MBE's because MBE's would not travel. MBE's stated that they were willing to travel for work, wherever it was, but expected to be compensated for travel like any other contractor.

Commentors stated they wanted the opportunity to bid jobs fairly, rather than submitting bids that are never responded to, which are extremely time consuming and costly to prepare. It was suggested that the EPA engineers be more involved in working with grantees, prime contractors, and MBE's.

Some minority group members testified that non-minority contractors tried to avoid using minority contractors by delaying jobs to be performed and calling them at the last minute to submit bids. It was also stated that prime A/E firms were making minority firms bid against one another for A/E work rather than selcting minority firms on their qualifications.

Commentors suggested that the goal should either remain at the same percentage of total project costs or be increased. Persons testifying also requested that changes in the goal not be based solely on availability of minority contractors in a give locality.

Many of those present stated that women-owned businesses should have either a separate goal or no goal at all and not be allowed to compete with the MBE program. It was also stated that the MBE program should be extended to all EPA grant programs.

Washington Hearing

The hearing was intially scheduled for January 8, 1980, but was deferred until January 17, because of inclement weather.

Some commenters stated that the minority work force was adequate in size, skills and interest to increase our present goals to about 30 percent. They argued that the minorities are able and willing to travel and therefore, goals should be uniform throughout the Region. Some present expressed opposite beliefs; i.e., that the minority work force is limited, MBE's cannot competitively travel from urban areas to all remote areas and that goals should vary with location and trade. Some said minority population or number of minority business enterprises should be considered by area in setting goals. Others said there was no relationship between population or number of MBE's and realistic goals.

Some comments were received indicating minority A/E firms wanted to be selected on the basis of qualifications as are non-minority firms but were requested to submit bids to prime A/E firms to obtain work. They did not believe the prime A/E firm should be hired based on qualifications and a different process be used for A/E subcontractors. Other commenters indicated that some A/E subcontractors gave responses to potential work offers which were not conclusive and could not be readily used in completing a proposal. Based upon these comments, it appears that minority and non-minority A/E firms are not cooperating with one another at times.

Problems were identified in measuring activities of MBE material and equipment brokerage firms to meet MBE goals. Specifically criticized was the practice of purchasing supplies from a minority supplier as a means of totally meeting the MBE requirements. Also, concerns were expressed about sham MBE's not being identified and administrative actions to identify such shams not being initiated by EPA as rapidly as possible.

Testimony was received regarding setting MBE goals separately from goals for women's business enterprises.

One commenter suggested a direct incentive bonus grant program of 85 percent federal financial participation in sewage treatment project costs be implemented for grantees who excelled in achieving "maximum" MBE participation.

Alaska Hearing

Most of those present at the January 15, 1980 hearing in Anchorage, Alaska, testified that the present Region 10 goal of 10 to 15 percent minority business enterprise participation has been instrumental in creating opportunities for minority businesses. Participants stated that this percentage goal should be maintained or increased for all segments of the architectural engineering and construction industry.

It should be noted that EPA has no statutory authority to increase the share of Federal financial participation in sewage treatment projects beyond seventy-five per cent (75%) on the basis of excellent MBE performance.

The most frequently mentioned problems with the program were: (1) Financial difficulties for small minority firms due to delays between submission of a bid and approval of the contract by the grantees, State and EPA, or due to delays in submitting and processing requests for payment: (2) "sham" or non-minority controlled firms obtaining work by claiming to be minority businesses; and (3) lack of timely knowledge by minority businesses of potential EPA projects or projects going to bid.

Several persons testified that the MBE program should be extended to all grant programs administered by EPA, and that a separate goal should be established for utilization of women's business enterprises (WBE).

Idaho Hearing

At the Idaho hearing held in Boise on January 8, 1980, virtually all substantive testimony focused on (a) the past tendency of Region 10's Office of Civil Rights to apply goals as if they were quotas, and (b) the difficulty encountered in trying to meet such goal/quotas in areas which are relatively remote from population centers where minority firms tend to be concentrated. Suggestions for improvement focused on having the EPA provide a clear, advance indication of what levels of minority business participation are viewed as acceptable if positive efforts to increase MBE participation prove inadequate to achieve the goal in any given project.

V. 45 / 154 AG 7 80 UMI

Witnesses also emphasized reluctance by grantees in the State of Idaho to use contractors or any sort who do not maintain offices in the State of Idaho, or to help to increase the number of minority business enterprises that might meet the grantee's qualifications.

III. Specific Comments and Agency Response

In the notice of the public hearings, EPA Region 10 requested testimony and comment on six areas of particular concern in developing MBE goals. There were:

a. What has been the experience of municipal, state or other agencies in the establishment of MBE goals?

b. Should different goals be established for A/E's, equipment and material suppliers, construction firms, and planning consultants?

c. Most MBE's are located in urban areas. Should this have an impact on the establishment of goals?

d. To what extent are MBE's willing to travel throughout the Region to compete for EPA funded contracts? Are MBE's interested in relocating to serve relatively rural projects?

e. What major factors should EPA consider to setting goals and how should these factors be used? For example, to what extent should population ratios impact MBE goals?

f. What goals should be set for MBE utilization in grantee procurements under EPA-assisted programs other than Title II Clean Water Act grants?

The public's comments on these areas of concern and EPA's responses are as follows:

(a) We received limited response regarding public entities implementing MBE goals. One effective local agency appears to be The Municipality of Metropolitan Seattle (Seattle Metro) which implements a dual-envelope bidding program. At bid opening the contractor's MBE participation commitment is evaluated first: only those with qualifying MBE commitments have the bid envelope stating their dollar-bid opened.

Henceforth, EPA will "delegate" its MBE contract approval responsibilities to grantees who demonstrate an "equivalent or better" MBE program than EPA's. Thus the Region has accepted Metro's MBE program as a grantee sponsored equivalent program.

(b) A wide range of suggestions regarding setting different goals for A/E, construction, and supply firms has been received, including suggestions for combined and individual goals for these categories. A particular target of concern is suppliers, where repeated reference has been made to "pass through" brokers or sales offices and allegedly "sham" MBE corporations. Some commenters desired goals based on the number of firms available, while others suggested a flat goal of three percent (3%) of total project costs. Region 10 believes that a flat goal of three percent (3%) or less would be a retreat from current performance of minority contractors in the Region and would not be appropriate.

Testimony was received regarding abuse of MBE goals in the area of materials and equipment supply or brokerage. Region 10 is clarifying what it will consider to be an acceptable supplier and what percentage of costs will be credited toward meeting the MBE goals. The credit will vary depending on whether the procurement is through a manufacturer, distributor with supply and service or a pass-through agency. EPA Region 10 solicited information from seven pipe manufacturers and other EPA regions to assist in establishing appropriate credits toward achievement of the goal through the use of material and equipment suppliers.

(c) Based on both written and oral comments, EPA Region 10 has reviewed the concept of separate goals for rural and urban areas. The complexities of (1) population ratios; (2) location of a project versus location of the majority of minority businesses; and (3) availability of minority business enterprises, affects regional areas differently. With these variables in mind, EPA regards the task of developing goals which reflect area needs as vital to a working program. EPA Region 10 is hereby establishing a varying goal with a basic core covering all projects and meeting the needs of the programs as well as the grantees as discussed in Section III.

(d) Although travel is viewed by some firms as a constraint to achieving MBE participation, EPA has received many responses that MBE are willing to travel. Travel expenses naturally impact the total price required for goods and services. Since cost is one of the items that is considered in procurement negotiations, the expense of travel like any other expense has a bearing on the selection of contractors and subcontractors. EPA agrees with commenters who suggested travel needs be identified and discussed with all interested parties at pre-bid or early negotiation phases of procurement. It is also recognized that portions of A/E work are usually performed in home offices of A/E firms, while construction work is primarily performed at the construction site. Therefore travel may have a larger impact on availability of MBE involved in construction. MBE have expressed a willingness to relocate which is dependent upon the size of the project and the amount of their participation.

(e) Many commenters said the Region 10 Office had applied goals in the past as if they were quotas. The MBE program which the EPA administers is a goal-oriented system. The main difference between a goal-oriented system and a quota system lies in the manner in which the sanction contract disapproval is applied. In EPA's goal-oriented system a contractor may be approved for award even though a stated percentage goal is not met as long as the contractor can demonstrate to the grantee and the EPA that it has undertaken the required efforts to enlist MBE participation in good faith. In a quota system, contract approval would not be obtained unless the stated percentage MBE participation has in fact been achieved. EPA Region 10 operates its MBE program as a goal-oriented system and will continue to approve proposed contract awards where the goal has not been reached as long as the contractor demonstrates adequate efforts to meet the goal.

Several commenters suggested that EPA Region 10 set different goals for different geographic areas based, among other variables, on the ratio of minorities to the local area population, the ration of minority enterprises to all other enterprises, the ratio of minority construction enterprises to other construction enterprises, the ratio of minorities to others in the construction business, or other similar ratios. Exclusive use of these ratios would result in goals that perpetuate historical performance rather than improve opportunities for MBE participation.

We recognize that it may be more difficult to obtain minority construction contractors in some areas than in others, for some jobs than others, and for some trades than others. Region 10 believes, however, that such increases must occur. Testimony received indicated that substantial and continuing discrimination against minorities has occurred and is occurring in the construction industry within Region 10. EPA's 1980–81 goal is based on need to insure that serious efforts are made to use suitable minority business enterprises wherever they can be found, and to the degree that they are able and willing to participate. We believe, however, that grantees and prime contractors should have a more precise indication of the level of participation that EPA thinks may be possible in different situations, and our goal seeks to provide this flexibility.

(f) Both written and oral comments were received stating that goals should be established for EPA grantee procurements in areas other than in Title II Clean Water Act Construction Grant Program. Those testifying stated that, because this is a goal-oriented system rather than a set aside, the goal for such procurements should be the same as that established for construction grants. Based on comments received it is the intent of the Region to extend the goal-oriented system to program other than the Title II Construction Grants Program. However, this will be a new program and consequently implementation of the goal system must be delayed until internal procedures can be developed.

A number of commenters have offered views on the possibility of having a goal for women's business enterprises participation in federal projects, a program currently being reviewed by the Federal Government. *See* Federal Register, Vol. 45, No. 78, page 26934, Monday, April 21, 1980. Most of the minority testimony received favored a separate goal, or favored requiring female minority business enterprises to be given the opportunity to choose whether they wish to be considered as MBE or WBE. EPA will shortly announce a Women's Business Enterprise. Comments should be directed to Ms. Joan Arnold, Office of the Deputy Administrator (A–101), EPA, 401 M Street SW., Washington, D.C. 20460.

III. Statement of the Goal

Based on the above public discussion and after considering all comments received, EPA Region 10 establishes the following varying goal to measure positive efforts for including minority business enterprises on federally funded programs.

It is each grantee's responsibility to assure that positive efforts are taken to provide opportunity to minority business enterprises in all aspects of grant funded projects.

A core goal of 13 to 15 percent is sought generally on all projects by EPA, two subgoals are established within an 8 to 20 percent range for projects of various sizes and in various locations to provide flexibility in determining compliance with the EPA policy. In the case of participation of certain MBE equipment or material suppliers, a reduced credit toward meeting the goal may apply. *See* Section IV, 4 below.

A goal is established of between eight percent (8%) to fifteen percent (15%) for projects which are:

1. Small-sized projects ($300,000 and under in total construction costs); and
2. Located in rural areas well removed from urban areas.

For example, in remote rural areas where construction would constitute a project of less than $300,000 consideration would be given to achieving the low end of the goal. Smaller projects, regardless of location, that do not readily lend themselves to being segmented into smaller parts are included in this category.

A goal of between thirteen and twenty percent (13–20%) is established for projects which are:

1. Large projects (over $2,000,000 in total construction costs) or
2. Located in large urban areas; and
3. Projects which can be broken down into multiple contracts suitable for MBE participation.

For example, a large construction job in urban areas where the greatest MBE resources exist should achieve the maximum goals. EPA will encourage grantees and their contractors to obtain maximum MBE participation on *all* jobs, but with understanding of the difficulty of attracting MBE's to small specialty jobs.

IV. Regional Implementation of Policy Regarding Minority Control and Management of MBE Firms.

The EPA Policy for Increased Utilization of Minority Consultants and Construction Contractors (43 FR 60,220, December 26, 1978) defines a minority business enterprise (MBE) as:

> "a business, at least 51 percent of which is owned and controlled by minority group menbers. The minority ownership must exercise actual day-to-day management." *Id.* at 60,221.

The actual implementation of this definition has lead to several instances where EPA Region 10 and its grantees have been called upon to interpret this definition. Based upon this experience, we believe it advisable to set forth the following criteria which EPA Region 10 will typically consider in determining whether a purported MBE meets EPA's definition of MBE.

Day-to-Day Management and *actual control* will be determined by the following standards:

a. The ownership by the minority owner or owners must be real, substantial and continuing and must go beyond the nominal ownership of the business as reflected in its ownership documents, (e.g. partnership stock control.) The minority owner or owners must enjoy the customary incidents of ownership, including risks and profits commensurate with their ownership interests. These interests must not be subject to the over-riding control of the non-minority owner or owners.

b. The minority owner or owners must actively participate in the management policy decisions and the direction of operations of the business. The participation must be commensurate with the ownership interests, taking into consideration the size and work performed by the business. The minority owner or owners' control shall not be subject to any formal or informal restrictions which limit the customary discretion of a controlling partner or other owner.

c. The business must be an independent and continuing enterprise. Recognition of a business as a separate entity for tax or corporate purposes may not be sufficient for recognition as an MBE. In determining whether a firm is independent and continuing, all relevant factors will be considered, including:

(1) Date business was established;

(2) Adequacy of resources for work contracted;

(3) The degree to which financial, equipment leasing and other relationships between the business and other non-minority firms vary from normal industry practice.

d. The contribution of capital, equipment or expertise made by minority owners to acquire their interests in a business must be real and substantial. Examples of insufficient contributions include a promise to contribute capital, a note payable to the firm or its owners who are not minority owners, or the mere participation as an employee.

e. All securities which evidence ownership and/or control of a business for purposes of establishing it as a minority business enterprise under this program shall be held directly by minority owners. No securities held in trust, or by a guardian for a minor, shall be considered as held by a minority group member in determining the ownership or control, unless the trustee or guardian is qualified as a minority owner.

f. The determination as to whether the minority owners possess sufficient ownership and control will be made by reviewing the substance rather than the form of arrangements and balancing all relevant factors. The following facts, although not in themselves cause to disqualify a business, will make the business subject to especially close scrutiny.

(1) Newly formed firms and firms whose ownership and/or control has changed since the date of the advertisement of the contract.

V 45 / 154 AG 7 80 UMI

(2) The presence of past or continuing employer-employee relationships among the owners of the business.

4. Suppliers of Materials or Equipment

In response to concerns and comments by the overall construction industry, Region 10 will employ the following criteria to determine whether a supply firm is a MBE as defined by the Policy:

A firm will be considered a supplier when it:

a. Assumes the actual and contractual responsibility for furnishing the supplies and materials and is the manufacturer of those supplies and materials; or

b. Is recognized as a distributor by the industry involved in the contracted supplies and materials; and

c. Owns or leases warehouse, yard buildings or whatever other facilities are viewed as customary or necessary by the industry; and

d. Distributes, delivers and services products with its own staff.

Where a MBE supplier is not the manufacturer, but has assumed the actual and contractual responsibility for furnishing the required supplies or materials and is performing a commercially useful function, a credit of twenty percent (20%) of the value of the contract will be awarded toward the MBE goal.

Where a MBE is performing a commercially useful function as a manufacturer's sales representative, ten percent (10%) of the value of the contract will be awarded toward the MBE goal.

A commercially useful function or service is one, such as a sales function, which is customarily performed as a distinct and necessary part of the supply process.

If the service is commercially unnecessary, such as the case when a firm acts only as a passive conduit in the supply process or duplicates a service provided by others in the same chain of supply from manufacturer to purchaser, no credit will be granted toward the MBE goal. Where the MBE is a manufacturer, one hundred percent (100%) of the furnished supplies and materials will be credited toward the MBE goal.

V. Use of EPA Roster of MBE

Over the past five years EPA Region 10 has maintained a roster of minority business in the Region. This roster is maintained as a service to grantees. A/E firms, construction contractors and MBE's.

EPA does not require that a business be included on the roster to be considered an MBE. However, the roster provides contractors and grantees ready access to MBE. MBE are encouraged to submit information to EPA in order that they may be included on this roster, and also in order that the process of confirming the status of the firm as an MBE does not delay contract award or approval.

VI. Procedures for Appeal of Civi Rights Office Determinations Regarding MBE Status

EPA Region 10 has established procedures for appeal of Civil rights office determinations made outside of the grantee procurement review process regarding the eligibility of a firm for meeting goals for MBE utilization. These procedures are in addition to the procedure for appeals of responsibility determinations of bidders or offerors under 40 CFR 35.939, as set forth in the Policy. These procedures are:

1. The regional civil rights office will notify the firm, in writing, that it is not considered an MBE, including a brief statement of reasons for that determination. If the firm has previously been considered an MBE by EPA Region 10, it shall continue to be treated as an MBE until a final administrative decision has been rendered by Region 10 in accordance with these procedures.

2. If a firm intends to appeal a civil rights office determination, it must file a written notice of appeal with the Director, Office of External Affairs, within thirty (30) days of receipt of the notification regarding MBE status by the regional civil rights office. The notice of appeal must include brief written contentions of the firm as to its qualifications as an MBE under the policy.

3. Upon receipt of a timely notice of appeal, the Director, Office of External Affairs, shall confer with the civil rights office regarding the determination. If the Director disagrees with the civil rights office determination, the Director shall reverse the determination and communicate such action to the affected business in writing. If the Director agrees with the civil rights office determination, he shall forward it to the Regional Administrator. The Director shall either reverse the determination or forward the appeal to the Regional Administrator within seven (7) days of receipt of the notice of appeal.

4. Upon receipt of the notice of appeal from the Director of External Affairs, the Regional Administrator shall appoint an EPA Region 10 attorney not associated with the case as hearing officer. The hearing officer shall conduct an informal administrative hearing on the matter. Review of the matter shall be *de novo*, with the firm having the burden of producing evidence that it is a qualified minority business under the Policy, and also having the burden of persuasion on this issue.

5. One or more prehearing conferences may be held, at the discretion of the hearing officer. The rules of evidence applicable to judicial proceedings shall be relaxed so as to develop a full record to facilitate administrative review. However, in the event oral presentation of evidence or oral argument is offered, any witnesses shall be under oath and a verbatim transcript of the hearing shall be made. Written testimony shall not be received in lieu of oral testimony.

6. The parties shall have one week or such extended period of time as the hearing officer deems appropriate to present proposed findings, conclusions and order to the hearing officer. The hearing officer shall submit a complete report of proceedings and official file together with a recommended decision to the Regional Administrator within thirty (30) days of receipt of proposed findings, conclusion and order from the parties. Within ten (10) days thereafter, the Regional Administrator shall either adopt the recommended decision, or reverse or modify it. The decision of the Regional Administrator shall constitute the final decision of the Agency.

7. Summary Dismissal of Appeal

The Regional Administrator may summarily dismiss an appeal or one or more claims made in an appealing party's letter of appeal. Such summary dismissal may be made by the Regional Administrator without the proceedings set forth above, if it is determined that such appeal or issue is untimely, frivolous, or without merit. Any such determination shall refer briefly to the facts supporting the determination.

EPA's MBE policy contemplates an annual review of the regional goals. While the goals set forth above will be diligently applied by Region 10, we will continue to learn from the experiences of the community as to improvements or refinements which might create a substantially better program. We invite your observations on a contemporary basis during the year; and we will appreciate your participation at the annual review hearings. Comments concerning further improvements to the program should be addressed to: Director, Office of External Affairs, Environmental Protection Agency, 1200 Sixth Avenue, Seattle, Washington 98101.

Dated: July 29, 1980.

Donald P. Dubois,

Regional Administrotor.

[FR Doc. 80-23881 Filed 8-6-80; 8:45 am]
BILLING CODE 6560-01-M

FEDERAL MARITIME COMMISSION

[Docket No. 80-52]

Agreements Filed for Approval; Order of Investigation and Hearing

In the matter of Agreements Nos. 10186, as amended, 10332, as amended, and 10371, as amended; order of investigation and hearing and pendente lite approval; Agreement No. 10377, order of investigation and hearing and denial of petition for pendente lite approval; and Agreements Nos. 10364 and 10329, order of investigation and hearing.

The following agreements have been filed with the Federal Maritime Commission for approval pursuant to section 15 of the Shipping Act, 1916:

Agreement No. 10186–4 seeks to amend Agreement No. 10186, a space chartering agreement between Orient Overseas Container Line, Inc. (OOCL) and Korea Shipping Corporation (KSC) in the trade between the United States and the Far East. The purpose of Agreement No. 10186–4 is to extend the term of the basic agreement through June 30, 1985 and to also extend its geographic scope to include Malaysia.

Notice of the filing of Agreement No. 10186–4 appeared in the **Federal Register** on February 6, 1980. Lykes Bros. Steamship Co., Inc. (Lykes) subsequently protested the agreement and requested a hearing. American President Lines, Ltd. (APL) and United States Lines, Ltd. (USL) filed comments adopting Lykes' protest and request for hearing.

Agreement No. 10332–1 proposes to amend the basic agreement, Agreement No. 10332, a space charter arrangement between Korea Marine Transport Company (KMTC) and Nippon Yusen Kaisha (NYK) which permits each party to operate a 1,050 TEU container vessel in a direct service between Korea and the U.S. Pacific Coast, including Hawaii and Alaska. Each party is permitted to charter space aboard its vessel to the other on terms as they may agree, and may also charter and/or subcharter up to 420 TEUs per calendar month to Showa Line, Ltd. (Showa).[1]

The purpose of Agreement No. 10332–1 is to extend the term of the basic agreement for three years, through July 1, 1983 and modify the basic agreement by removing the limitation on NYK from transporting cargoes to/from Far Eastern counties other than Korea,[2] excluding NYK's non-Korean/U.S. carryings from revenue sharing, and including NYK's non-Korean/U.S. carryings in the current reporting requirements.

Notice of the filing of Agreement No. 10332–1 appeared in the **Federal Register** on March 19, 1980. Protests and comments were received from Sea-Land Service, Inc. (Sea-Land), USL, Lykes and APL.

Agreement No. 10371–1 seeks to extend the basic agreement, Agreement No. 10371, for three years through July 1, 1983. Agreement No. 10371 provides for KMTC and NYK to collectively subcharter up to 420 TEUs per month to Showa, per the enabling authority of Agreement No. 10332.

Notice of the filing of Agreement No. 10371–1 appeared in the **Federal Register** on March 19, 1980. Protests and comments were received from USL, Lykes and APL.

Agreement No. 10377 proposes a space chartering arrangement which provides for the charter by Toko Kaiun-Kaisha, Ltd. (Toko) of unused space on its conventional type vessel to Suh Jin Shipping Co., Ltd. (Suh Jin) for loading of iron and steel products, plywood and other general cargoes in Korean ports for discharge in U.S. West Coast ports. Toko and Suh Jin are restricted from transporting any cargoes in containers from Korean or Japanese port to the U.S. West Coast ports. The agreement seeks approval until October 30, 1983, unless cancelled by mutual assent of all the parties.

Notice of the filing of Agreement No. 10377 appeared in the **Federal Register** on September 5, 1979.[3] On September 25, 1979, Seatrain Pacific Services S.A. (Seatrain) filed a protest and request for a hearing. Proponents filed a reply to Seatrain's protest on October 10, 1979. On October 23, 1979, Seatrain submitted further comments and subsequently withdrew its protest on December 4, 1979.

Position of Proponents

Agreement No. 10186–4

In justification of Agreement No. 10186–4, Proponents state that during the 3½ years that KSC has been functioning as a common carrier by water of containerized cargo, it has acquired considerable operational skill and proficiency. KSC believes that it is fully competent to operate its own vessels and to enjoy the economic rewards emanating therefrom. However, KSC contends that its present fleet will not support a viable containerized service. KSC argues that in order to conduct such a service, with the frequency of calls required to induce shipper patronage, additional sailings are required. KSC argues that with space chartered aboard the 10 ships owned by OOCL and available to KSC pursuant to Agreement No. 10186, KSC can readily offer its shippers one sailing every seven to eight days, thus operating an economically viable service.

Agreement Nos. 10332–1 and 10371–1

In statements submitted in support of the agreements, Proponents state that additional shipping opportunities and more efficient service result from the direct, evenly-spaced sailings under Agreement No. 10332, that Agreement No. 10332 avoids overtonnaging and lessens fuel consumption, that the use of common terminal facilities reduces costs and avoids terminal congestion, that the ability to serve directly reduces in-transit handling problems, and that access to bi-weekly sailings reduces inventory requirements and storage expenses while allowing a prompt and dependable cash flow to shippers from consignees. Proponents contend that Agreement No. 10332 has not given the parties an unreasonably strong competitive position, citing their low (less than 50 percent) utilizations and the competition posed by conference and nonconference carriers.

Proponents claim that the change proposed by Agreement No. 10332–1, concerning NYK carriage of Far East cargo, will be limited to Taiwan and Hong Kong, will afford NYK the same privilege as KMTC, will enable NYK to improve the frequency of its Taiwan and Hong Kong feeder services, will improve KMTC's and NYK's low utilizations, and will increase the efficiency of their two-vessel operation.

As to Agreement No. 10371, Proponents state that the agreement provides an additional direct service with shorter transit times and reduced delays in delivery and has also aided KMTC's and NYK's generally low utilizations. Proponents believe that the

---

[1] In its Order of Conditional Approval of Agreement No. 10332, dated November 9, 1978, the Commission set forth certain modifications to be made to Agreement No. 10332, *inter alia*, the inclusion of a sentence that no "continuing charter arrangement with Showa" would be implemented without prior FMC approval. This condition resulted in the filing of an interim arrangement, Agreement No. 10366 and subsequently Agreement No. 10371.

[2] While the involved provision prohibits NYK from transporting cargo booked, forwarded, transhipped or feeder-fed from or to Japan or any other Far Eastern nation, the modification would make the restriction continue to apply to Japan.

[3] Pursuant to the notice, USL commented that it has no objections to the agreement based on cargo restrictions which preclude, among other restrictions, the carriage of cargoes in containers.

service has resulted in less loss and damage, has avoided the need for more tonnage, has saved energy, and has resulted in cost savings.

Agreement No. 10377

In support of Agreement No. 10377, Proponents contend that the agreement will provide Suh Jin, which presently lacks market identity, access to a greater sailing frequency than it could maintain by itself while helping it to establish a service record with shippers.

Proponents assert that Toko will be acquiring a means of utilizing otherwise empty vessel space and that the economies of the neo-bulk trade require that operators have full, or nearly full, ship loads of cargo in order to be profitable.

Proponents also state that shippers have indicated an interest in this frequent service at nonconference rates. This, they argue, means that sales' margins of relatively low value commodities will not be reduced to the point where it no longer pays to deal in these products. Proponents also state that steel mills in Japan and Korea have limited storage capacity for their output and need frequent vessel calls to avoid inventory storage problems.

Position of Commentators/Protestants

Agreement No. 10186–4

Lykes

Lykes filed a protest and request for an investigation and hearing on Agreement No. 10186–4. In its protest Lykes states that the Commission has approved several space charter agreements, one by one, without addressing, in its orders, any consideration of their cumulative impact on the trade. Specific objections to the agreement include: (1) the fact that there is no limitation on the number of ships that may be employed by the parties and no limit on the capacity that may be cross-chartered, other than the number of vessels that KSC may at any given time decide to operate; (2) that a five-year term is too long; (3) that the agreement is far too broad as to the range of countries and ports served and that there is no justification for expanding the scope to include Malaysia; and (4) that the arrangement contemplates joint scheduling of services and, perhaps, joint advertising of vessels not provided for in the agreement.

APL and USL

APL and USL filed comments essentially adopting Lykes' protest and request for hearing.

Agreements Nos. 10332–1 and 10371–1

Sea-Land

Sea-Land protests only Agreement No. 10332–1, stating that it does not oppose a three-year extension but does object to removal of the limitation on NYK from transporting other Far East cargoes under the agreement. Sea-Land contends that the parties have not shown that the proposed change is necessitated by a serious transportation need or is necessary to secure an important public benefit, that the justification contains no data to warrant approval, that the Proponents' statements as to the limitation of additional service to Taiwan and Hong Kong and a 10 percent container capacity dedicated to these countries does not appear in the agreement, and that additional capacity will result from the proposed change.

USL

USL does not object to the agreements or their continuation. It does, however, believe that only a one-year extension is supported because revenue sharing in agreements of this nature leads to a common approach in rate-making and also to conference bloc voting.

Lykes

Lykes believes that, as stated in its protest of Agreement No. 10186–4, the Commission should review the total impact of space charter arrangements in the Korean trade. Lykes contends that the subject agreements have contributed to overtonnaging and that the parties' operating reports should be made part of the record.

Lykes suggests that a staff investigation should be initiated and distributed for comment which would focus on the following: total impact on the service and competition from expansion of Agreement No. 10332 to allow NYK to transport other Far East cargo in the service; possibility of limiting the parties' authority in certain regards; the parties' voting rights in conferences; the possibility that subchartering to Showa, per Agreement No. 10371, perpetuates overtonnaging; an explanation by the parties as to Korean maritime policy and the relation between the agreements and the Korean Maritime Transportation Promotion Law (Korean Law); and a precise statement by KMTC or the Korean Maritime and Port Administration as to how the waiver system under the Korean Law operates.

APL

APL opposes any long-term approval of Agreements Nos. 10332–1 and 10371–1 without a general investigation and hearing of space charter agreements in the Pacific trade.

Response to Protests

Agreement No. 10186–4

With respect to the issue of space chartering agreements contributing to overtonnaging, Proponents retort that Lykes presents no facts to support this assertion and that the issue is the approvability of the instant agreement, not the impact of all space charters on the trade.

Proponents point out that Agreement No. 10186 was of a five-year fixed duration when it was originally approved and that Agreement No. 10186–2 added the termination date of June 30, 1980. Proponents argue that since the agreement was permitted to run for four years during which no problems surfaced, Proponents believe that a five-year renewal term is reasonable.

As to the broadenings of the geographic scope, Proponents state that they serve the Gulf via mini-land bridge operation by rail between the Gulf and Pacific Coasts. Although the major portion of the carryings are to Korea, Japan, Hong Kong and Taiwan, reports filed with the Commission will reflect carryings to other destinations included within the trade. Proponents argue that reports will also show that Proponents have made carryings from Thailand and Singapore, countries which are contiguous to Malaysia. Proponents see no reason why this extension to Malaysia should not be approved.

Insofar as joint advertising of vessels is concerned, Proponents claim that they have not engaged in this practice and do not plan to. As to the joint scheduling of services, Proponents reply that the specifics of these arrangements will be filed with the Commission as they are developed pursuant to Article 1, paragraph D of the agreement.

Agreements Nos. 10332–1 and 10371–1

Response to Sea-Land

Proponents claim that extending NYK's service will result in more efficient use of space in a direct service, would only have a minor impact on the trade, would afford shippers an additional shipping opportunity, and would put NYK on equal footing with KMTC. Proponents are willing to accept a condition whereby NYK would limit transshipment authority to Taiwan and Hong Kong, with such carryings not to exceed 10 percent of NYK's allocated capacity.

Response to USL

Proponents do not believe there is any reason to limit the term of approval to one year. They also argue that any instability in the Pacific trade would constitute greater reason and need for approval. They further argue that the Commission can reexamine the agreements at any time, and short-term approval leads to uncertainty while a three-year approval would establish stability. Finally, Proponents argue that the agreements have not led to bloc voting and in the event they did, it would not obstruct voting in conferences.

Response to Lykes

Lykes has not shown how it will be harmed by the agreements nor has it tendered a justifiable reason for the institution of a general trade investigation. The parties have no intention of withdrawing from the Korean trade if their agreements are not approved. There continues to be a need for the quality of the parties' services and their recent low utilization is attributable to the recent intensity of rate competition. The Commission has rejected the contention that revenue sharing renders parties to a space charter and pooling arrangement "one," and each party maintain its own, separate common carrier business. Proponents claim that NYK could carry no more than 79 additional TEUs per month under the modification to include Taiwan and Hong Kong, which would assist the parties' direct service operation but could not reasonably have an adverse impact on the Taiwan, Hong Kong or Japan trades. Proponents assert that the information Lykes demands relative to the Korean Law is not relevant to Commission approval of the subject agreements.

Response to APL

Proponents believe that APL has failed to advance reasons to limit approval of the agreement to less than three years, refers to comments which are not directed to the parties or the subject agreements, and has offered no commentary regarding the subject agreements.

Further Comments/Reply

Agreement Nos. 10332–1 and 10371–1

Lykes' Comments

Lykes filed further comments in which it states that Proponents have offered no convincing reason why the Commission should not undertake a comprehensive investigation, and further states that Lykes would not oppose a 90-day extension. Lykes contends that Proponents have an understanding, not filed pursuant to section 15, in which they agree to limit any additional tonnage as long as they obtain the approvals they deem necessary. Lykes also asserts that statements filed in support of the instant agreements are inconsistent with statements filed with the basic agreement and that approval will only further overtonnage the trade.

Proponents' Reply

Proponents responded by stating that the requested investigation is hardly suitable for exercise of the section 15 approval process and that Lykes has failed to delineate any harm or adverse impact the agreements are having upon it. Proponents believe that space chartering is a sensible means of addressing overtonnaging, and that any contention that they contribute to overtonnaging would reverse prior Commission holdings. As to unfiled agreement activity, Proponents assert that their supporting statements were merely advising the Commission of the probable result should continued approval not be granted. Proponents state that there is no inconsistency in the current and past statements and that each speaks for itself at the particular time that it was made.

Discussion

In exercising its statutory authority to approve and disapprove agreements subject to section 15, the Commission is required to consider competitive conditions in the affected trades and the antitrust implications of proffered agreements. *U.S. Lines* v. *Federal Maritime Commission*, 584 F.2d 519, 528 (D.C. Cir. 1978). In this instance, protestants have contended that previous Commission considerations of space charter arrangements in the Korean trade have been unduly narrow and have failed to take into account the cumulative impact of these agreements on the trade. Protestants have also questioned whether adequate justification has been presented for certain of the agreements.

Also relevant to the consideration of these agreements is the Korean Law. Passed on February 28, 1967, and revised and implemented through presidential decree, the Promotion Law was designed to increase greatly the participation of Korean-flag vessels in the Korean trade. To achieve this goal, the law calls for 100 percent carriage of the Korea trade in Korean-flag vessels. The only way of avoiding this requirement is to obtain either an exemption or a waiver.

While it is clear that the Promotion Law plays a significant role in the ocean borne trade between Korea and its trading partners, the precise nature of its impact upon the agreements before the Commission is not. Because the Commission has been unable to define satisfactorily the relationship between the Promotion Law and the space charter agreements, it has decided to order an investigation, which will, among other things, more fully explore this issue.

As part of the effort to define more precisely the relationship between the Promotion Law and these agreements, the Commission would like the parties to address the issue of whether approval of any or all of the agreements will significantly affect the availability of waivers to shippers seeking to transport cargo on non-Korean flag vessels. Economic issues which require consideration are the effects of the proposed agreements on rate stability and cargo capacity in the trade between the U.S. and Korea. It is also important to determine whether approval of any or all of these agreements will lead to unjust discrimination or unfairness against non-signatory carriers and what impact approval would have on voting patterns within the conferences which now serve the U.S./Korea trade. A question also exists as to whether approval of the agreements would be consistent with existing treaties of friendship, commerce, and navigation between the U.S. and other nations with interests in the U.S./Korea trade.

During the Commission's examination and analysis of the Promotion Law and the agreements, the status of the agreements themselves came into question. Although they were presented to the Commission as standard commercial agreements, the impact which the Korean Promotion Law had upon them could not be ignored. In fact, is is possible that the agreements have been so influenced by the Promotion Law that they are not commercial agreements at all, but rather products of unilateral action by the Korean Government. Accordingly, the Commission may not have the authority to approve or disapprove such agreements. Indeed, the executive branch, which has the responsibility for negotiating intergovernmental agreements, may be the proper forum for these agreements, instead of the Commission. Therefore, the investigation instituted by this Order will also address the issue of whether these agreements are so tied to the unilateral action by the Korean Government as to be outside the Commission's jurisdiction.

V 4 5 / 1 5 4 AG 7 80 UMI

Pending the resolution of the issues presented and the ultimate disposition of the agreements submitted for approval, the Commission has determined to permit the continuation of the existing arrangements on the same terms reflected in the presently approved agreements on file with the Commission. The protesting parties have not alleged nor does the Commission have reason to believe that these parties are being injured by the agreements currently in effect, while the abrupt cessation of these activities is likely to injure the carriers involved and be highly disruptive to the U.S./Korea trade in general. Under such circumstances the public need for stable trading conditions warrants the preservation of the *status quo* for the relatively brief period necessary to complete the instant investigation. The measures being taken by the Commission to insure the prompt disposition of this matter include the imposition of strict time limitations on the conduct of the proceeding. Agreement No. 10377 is not be be approved *pendente lite*, however. This agreement has not been previously approved and no shippers have grown dependent on its service. Because no other valid reason for granting interim approval has been presented, the "Petition for Interim Approval" of Toko-Kaiun Kaisha, Ltd. and Suh Jin Shipping Company, Ltd. will be denied.

Although Agreements Nos. 10329 and 10364 stand approved through June 30, 1982 and January 8, 1983 respectively, the Commission has also decided to include them in this proceeding. This is because these agreements are integrally related to the matters placed at issue and to the general scope of the investigation. *Marine Space Enclosures, Inc.* v. *FMC*, 420 F.2d 577, 585 (D.C. Cir. 1969).

The Commission's decision to permit the continuation of the existing arrangements beyond their present termination dates will require proponents of these agreements to submit appropriate amendments which conform the proposed agreements to the presently approved agreements. Failure to so act within the time limitations specified below will void the *pendente lite* approval granted.

Therefore, It Is Ordered, That pursuant to sections 15 and 22 of the Shipping Act, 1916, a proceeding is hereby instituted to determine whether: (1) Agreements Nos. 10186, 10186–4, 10332, 10332–1, 10371, 10371–1, and 10377 are unjustly discriminatory or unfair as between carriers, shippers, exporters, importers, or ports, or between exporters from the United States and their foreign competitors, detrimental to the commerce of the United States, contrary to the public interest, or are in violation of the Shipping Act, 1916, and, therefore, whether they should be approved, disapproved, or modified; and (2) whether Agreements Nos. 10364 and 10329 are unjustly discriminatory or unfair as between carriers, shippers, exporters, importers, or ports, or between exporters from the United States and their foreign competitors, detrimental to the commerce of the United States, contrary to the public interest or are in violation of the Shipping Act, 1916, and, therefore, whether they should be disapproved or modified; and

It Is Further Ordered, That Agreements Nos. 10186, 10186–4, 10332, 10332–1, 10371, and 10371–1 are approved *pendente lite* effective from July 31, 1980 on the condition that they are amended to conform precisely to the terms of the respective agreements approved by and on file with the Commission, and that such amendments be submitted to the Commission within 30 days from the date of this Order; and

It Is Further Ordered, That the *pendente lite* approval accorded by this Order will become null and void 31 days from the date of this Order if the conforming amendments required by the preceding paragraph are not timely filed; and

It Is Further Ordered, That the Petition for Approval *Pendente Lite* of Agreement No. 10377 is denied; and

It Is Further Ordered, That the parties, in addressing the approvability of these Agreements under the standards of section 15 specifically address the following issues:

1. Whether and to what extent approval of any or all of the subject agreements will significantly affect the availability of waivers to shippers seeking to transport cargo on non-Korean flag vessels.

2. Whether and to what extent approval of any or all of the subject agreements will significantly affect cargo capacity in the United States trades with Korea.

3. Whether approval of any or all of the subject agreements will adversely affect rate stability in the United States trades with Korea.

4. Whether approval of any or all of the subject agreements will result in unjust discrimination or unfairness against non-signatory carriers serving the United States trade with Korea.

5. The manner in which approval of any or all of the subject agreements will affect voting patterns within steamship conferences operating in the United States trades with Korea.

6. Whether approval of any or all of the subject agreements is consistent with existing treaties of friendship; commerce, and navigation between the United States and other nations whose interests are represented in the United States trades with Korea.

7. Whether the imposition of the waiver system by the Korea Government under its Maritime Transportation Promotion Law and other Governmental cargo control activities have forced third flag carriers to enter into these space charter agreements in order to have reasonable access to cargo in the U.S.-Korean trades.

8. If the waiver system and other cargo control activities of the Korean Government have forced third flag carriers to enter these space charter agreements, whether the agreements are so impregnated with unilateral government action as to be, in reality, non-commercial agreements over which the Commission should take no jurisdiction under Section 15 of the Shipping Act, 1916; and

It Is Further Ordered, That the carriers listed in the Appendix attached hereto are hereby made proponents and protestants as so designated in the Appendix; and

It Is Further Ordered, That Hearing Counsel shall be a party to this proceeding; and

It Is Further Ordered, That a public hearing shall be held in this proceeding and that the matter be assigned for hearing and decision by an Administrative Law Judge of the Commission's Office of Administrative Law Judges at a date and place to be hereafter determined by the Presiding Administrative Law Judge.

The hearing shall include oral testimony and cross-examination in the discretion of the Presiding Officer only upon a proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents or that the nature of the matters in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record; and

It Is Further Ordered, That the Presiding Administrative Law Judge issue his Initial Decision in this proceeding on or befere December 31, 1980; and

It Is Further Ordered, That notice of this Order be published in the **Federal Register**, and a copy thereof be served upon Proponents and Protestants as listed in the Appendix hereto and the Commission's Bureau of Hearing Counsel; and

It Is Further Ordered, That persons having an interest and desiring to participate in this proceeding file a petition for leave to intervene in accordance with section 502.72 of the Commission's Rules of Practice and Procedure (46 CFR 502.72); and

It Is Further Ordered, That all future notices, orders, and/or decisions issued by or on behalf of the Commission in this proceeding, including notice of the time and place of hearing or prehearing conference, shall be mailed directly to all parties of record; and

It Is Further Ordered, That all documents submitted by any party of record in this proceeding shall be filed in accordance with section 502.118 of the Commission's Rules (46 CFR 502.118) as well as being mailed directly to all parties of record.

By the Commission.[1]

Francis C. Hurney,

Secretary.

FEDERAL RESERVE SYSYTEM

Bosque Corp.; Formation of Bank Holding Co.

Bosque Corporation, Meridian, Texas, has applied for the Board's approval under Section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company by acquiring 80 percent or more of the voting shares of Bosque County Bank of Meridian. The factors that are considered in acting on the application are set forth in § 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Dallas. Any person wishing to comment on the application should submit views in writing to the Reserve Bank, to be received not later than September 2, 1980. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Citizens Investment Co., Inc.; Proposed Continuation of General Insurance Agency Activities

Citizens Investment Co., Inc., Glenville, Minnesota, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to continue to engage in general insurance activities in a town with less than 5,000 population. These activities would be performed from Applicant's offices in Glenville, Minnesota, and the geographic area to be served is Glenville, Minnesota. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Minneapolis.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than September 2, 1980.

Any person wishing to comment on the application should submit views in writing to the Reserve Bank, to be received not later than September 2, 1980. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Board of Governors of the Federal Reserve System, August 1, 1980.

Cathy L. Petryshyn,

Assistant Secretary of the Board.

BILLING CODE 6210-01-M

GENERAL ACCOUNTING OFFICE

Regulatory Reports Review; Receipt of Report Proposals

The following requests for clearance of reports intended for use in collecting information from the public were accepted by the Regulatory Reports Review Staff, GAO, on August 1, 1980 (NRC), and August 4, 1980 (FMC). See 44 U.S.C. 3512(c) and (d). The purpose of publishing this notice in the **Federal Register** is to inform the public of such acceptances.

The notice includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed FMC and NRC requests are invited from all interested persons, organizations, public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed requests, comments (in triplicate) must be received on or before August 25, 1980, and should be addressed to Mr. John M. Lovelady, Senior Group Director, Regulatory Reports Review, United States General Accounting Office, Room 5106, 441 G Street, NW, Washington, DC 20548.

Further information may be obtained from Patsy J. Stuart of the Regulatory Reports Review Staff, 202-275-3532.

Federal Maritime Commission

The FMC requests clearance of a new, single-time, voluntary questionnaire to be sent to survey conferences and water borne common carriers in the U.S. foreign commerce with the dual rate contract system. The purpose of the questionnaire is to secure information for internal FMC decisionmaking on current practices and experiences under this contract system. The Commission estimates that the one-time only questionnaire will be sent to approximately 46 respondents and that response time will average 8 hours per questionnaire.

Nuclear Regulatory Commission

The NRC is requesting clearance of a new, single-time letter requesting additional information from its licensees regarding degree of compliance with NUREG/CR 0660, "Enhancement of onsite emergency diesel generator reliability." Therefore a letter requesting a detailed response to each of the recommendations contained in Section 5 of NUREG/CR 0660 will be issued to all operating power reactor licensees. The NRC estimates approximately 63 plants fall within the scope of this generic letter and that response burden is expected to average 240 hours per plant.

Norman F. Heyl,

Regulatory Reports Review Officer.
